Is Your Name In The Above List? If Not, Why Not?

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
 Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
 Yours very truly,
 GEO. A. SKENE.

Florham Farms, Madison, N. J., December 8, 1906.
 Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
 Yours truly,
 A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

ANDREW WILSON, Dept. 8.

SUMMIT, N. J.

THE PHILOSOPHY OF WHOLESALE.

Continued from page 359.

markets and business by his up-to-date methods; he has careful men to handle and pack the stock, storage boxes in which to keep the stock in good condition, proper boxes to pack in, telephones, a place of business close to railroads and express companies, and, in fact, has worked and developed his business until today he is indispensable.

He, however, cannot do business unless he has the stock to do it with, which means he must give his growers satisfaction. I believe if the growers would see their wholesaler more often, see how their stock arrives from the express company, how it is handled, etc., and keep in closer touch with the wholesaler, it would be to their advantage, as many times flowers which are in seemingly good condition when shipped, arrive in bad condition, due to improper packing and other causes which could be remedied, and it does seem too bad that in a few short hours all the work and trouble which has been taken to produce good stock, should go for naught, simply for the want of proper packing, cutting or keeping. Therefore, I say again, Mr. Grower, keep in close touch with your wholesaler.

I also believe that, in these times of specialization, it will pay the good grower to grow what he can produce best in quantity rather than to grow a number of things indifferently. Get the opinion of your wholesaler on this. He can do better for you if you have a large quantity of first-class stock rather than if you supply a number of small lots of poorer stock. I think this is generally recognized by growers, although some of them still send all kinds to the wholesalers and expect the same results as the man who sends good stock.

It is often said by retailers that the price of flowers is so much higher than it used to be, but do they take into consideration that the quality is just as much better? A wholesaler cannot sell the fine long-stemmed stock of today at the price of ten years ago for short-stemmed stock, and please his growers. In this connection I want to say that the wholesaler is accused unjustly many times of raising prices unnecessarily, but do his accusers ever stop to think that the law of supply and demand does more to control prices than any wholesaler or combination of wholesalers?

One trouble with a great many of the wholesale man's customers is that they want to be both buyer and seller. I might also say a word in this connection about the retailer who takes advantage of a falling market by not dropping his prices, but that would not be pertinent to the subject, perhaps.

I said, in speaking of the growers, that a wholesaler could not do business unless he had the stock to do it with, nor could he do business if he had no customers to whom to sell. I do not believe the retailers are using the wholesaler to the same advantage in our city as is done in some other big cities. What I mean is this: The wholesaler has a large stock of flowers on hand usually early in the morning. Now, it seems to me, if the retailers were to come or send their buyer to market, they would do much better for themselves than by ordering some of this or some of that, several times during the day. Think of the variety he would have to select from. And then, too, he would oftentimes be able to pick up lots of certain stock at better figures than if he bought only a small quantity. The wholesaler in selling a big quantity at once would also be able to make better returns to his growers than if the stock were sold in small quantities and picked over, thereby losing value.

It seems to me that the retailers generally expect a great deal more from the wholesaler than they should. I am not speaking altogether of service, but I do think that after the wholesaler has used his best efforts to serve a customer for a month, oftentimes procuring and delivering stock at a loss, it is up to the retailer to meet his bills promptly. I know this to be a sore subject generally among wholesalers, but I think our business has grown to such proportions that the same or better business methods should be as effective in the florist business as they are in others. The wholesaler pays his growers once a month, some twice a month and some weekly, and in order to do this, he has to collect his accounts on time.

I think it pays the wholesaler to cultivate as close business relations with his customers as possible; try to give the best service and the best stock procurable, and in return the retailer should do his part and show his appreciation of what has been done for him by the wholesaler.

In conclusion, I want to say that

my experience in the wholesale business has been recently acquired, and perhaps I will know more and talk less ten years hence. I can speak with some authority from the grower's standpoint, as I have had considerable experience in this line, and also a little in the retail line, so that I have had some opportunity to gather ideas from all sides.

WASHINGTON FRUIT TOPICS.

James C. Crowell, an orchardist at Kennewick, Wash., southwest of Spokane, with whom the United States department of agriculture entrusted the care of several varieties of hardy orange trees for experimental purposes, has submitted his report to the secretary, saying that the citranges have done remarkably well and are in flourishing condition. The trees received a year ago, were heeled in last spring, and that they are adapted to the climate is demonstrated by the fact that they withstood zero weather. Mr. Crowell does not recommend that citranges be planted on a commercial scale to compete with Florida and California growers, but advocates the planting of small orchards for home use, as the fruit is sweet and juicy. This probably will result in the trees being planted in eastern Washington.

Estimates prepared by the state fruit inspectors show that the growers in Washington will receive between \$19,000,000 and \$20,000,000 for the products of their trees, bushes and vines this season, and of this more than \$10,000,000 will go to the orchardists in the Spokane country. The apple crop will be the heaviest in the history of the commonwealth, 3,772,105 trees in bearing being reported in 37 counties, hanging from 300 in Adams county to 1,248,900 in Yakima county and 311,000 in Spokane county. Almost 1,600,000 prune and plum trees and 746,956 peach trees are in bearing in the state, and in addition to these there are several hundred thousand cherry trees and as many more of pears. More than 3,000,000 crates of small fruits and berries were harvested this summer, and of this Spokane county supplied 31,840 crates of strawberries, for which the growers received from \$2 to \$3 a crate. The price of apples ranges from \$1.25 to \$2.25 a box of 50 pounds, the latter being for shipment to eastern and middlewestern markets. Prune picking in eastern and central Washington will begin in a few days.

HAIL IN DES MOINES, IA.

Hail as large as walnuts fell in quantity in Des Moines on the afternoon of September 7, doing great damage generally and to greenhouses especially. Losses are reported as follows: Julius Ledig, 2,000 ft.; Vaughan's greenhouses, 15,000 ft.; Lambert's greenhouses, 3,000 ft.; Iowa Seed Co., 20,000 ft.; Hutchison, gardener, 2,000 ft. Practically everything was swept on the north side of the houses. Nearly all the above-named losses were covered by insurance.

San Jose scale and elm leaf beetle are rampant in many districts around Boston this year and tree wardens and others are kept busy fighting them.

I MANUFACTURE AND ERECT

H AND CO

Then there is another thing

This grate on the Old Standby corrugated boiler is connected from the outside — everything in plain sight — no chance for bolts to burn off — no danger of a slip some zero night. The shaking arm has the right amount of leverage to make the operation easy. So don't simply buy a boiler, get a Hitchings & Co. Greenhouse Boiler that is built for economy and convenience from start to finish. Send for catalog.

HITCHINGS AND CO.

GREENHOUSE DESIGNERS AND BUILDERS.
Manufacturers of Heating and Ventilating Apparatus.

1170 Broadway,

NEW YORK.

HERE IS THE MAIN FITTING

that will make for you an enduring pipe bench. You see it clamps together, three pipes,—the legs, the side runner and the cross piece, making a braced combination that for rigidity and strength can't be beat. The eighteen new L. & B. Truss Houses of the United States Cut Flower Company at Elmira, N. Y., are entirely equipped with our bench fittings. No, they are not expensive — you must not be scared out by the prices we name on our circular—it's up to you to write for discounts. Send for the Pipe Bench Circular. It has other good things in it.

We make every part of a greenhouse but the glass. We sell any part.

Lord & Burnham Co., Greenhouse Designers and Manufacturers. New York Office, 1133 Broadway, Corner 26th Street. Branches: Boston, 819 Tremont B'd'g. Philadelphia, 1215 Filbert Street.

Compare this in your mind with other houses built other ways.

THEIR EQUIPMENT

You can well imagine the effect and perfection that the brilliant aluminum finish gives to all the steel parts,—well, then, so much for pure effect — now for durability. These plant beds shown have slate sides, tile bottoms and galvanized iron frames, making an indestructible bench and one with perfection of drainage. That ventilating apparatus is stripped of all needless parts and brought down to a simple, accurately machined, powerful appliance that works with great freedom. You see from the cut what a wonderfully light convincing construction the combining of the roof bar and rafter in one, makes. Why the U-Bar house is the light enduring house it is. Send for the Catalog.

Polygonum Baldschuanicum

There are few more accommodating climbing plants than this *Polygonum* which has now become a firm favorite with all who know of its merits. It is equally at home whether covering a rough, unsightly fence, an arbor, arch or pergola, yet it is not seen at its best in any of these positions. It is most delightful in the position shown in the accompanying illustration, twining and clambering over some dark leaved tree, preferably a conifer, as for instance a juniper, *Thuja* or *Picea*. When once established it grows with extraordinary rapidity and soon festoons a tree with its slender shoots and graceful, creamy-white flowers. In the photograph the flowers are noticeable chiefly towards the top of the tree for the reason that the *Polygonum* is planted on the other side where the lower part of the tree is covered with its blossom. *P. Baldschuanicum* flowers in early summer and remains in beauty for several weeks. Although it grows most readily when established some find a difficulty in persuading it to make a start. When well rooted all aspects and positions come alike to it, it thrives in them all, but when planting it is wise to choose the coolest and shadiest side of the tree so that the roots may have cool moist soil in which to start. In such a position it quickly gets good root hold and when growing freely finds its way in and out of the branches in a most delightful way.

Harry H. Thomas

Season for Tree Pruning

The theories with regard to this important part of arboriculture have been studied and explained by able practitioners as to the best methods to perform it to insure the future healthy condition of the tree.

But sufficient consequence as to results is not attached to the season at which pruning should be done.

DeCurs in his admirable work translated by Professor Sargent, states that "a tree can be pruned at any season of the year and the best is that when it can be done the cheapest and the most convenient."

While attaching, and justly, great importance to the method of making necessary amputations, he attaches none whatever to the season at which this should be performed and which is certainly of equal if not paramount importance.

It is singular too that this statement is contradicted in another page—where it is admitted that "when pruning is done in the autumn sudden and severe frosts are dangerous, and have a tendency to induce decay in freshly made wounds." In the winter "the days are too short and stormy" and "in the spring there is danger of too free a flow of sap."

He also objects to summer pruning on the ground that the leaves will interfere with the progress of the workman—but this appears to be a futile objection because they will not be sufficiently developed to do this to any great extent if the operation is performed at the proper time.

Another objection is that there might be danger of other trees in the neighborhood of those operated upon being injured, but this could only be the result of carelessness, and damages thus caused would, if the season were right, be cured—at once. So far from its being immaterial as when trees should be pruned, I opine that it is of the utmost consequence that it should be done at a certain period of growth.

There is a well established axiom that a continual struggle is going on between growth and decay; one of which will eventually gain the mastery.

Thus when a surgical operation is to be performed the patient is prepared so that he may be in as healthy and vigorous condition as possible—vitality being necessary to a speedy and complete treating of the wound.

Reasoning by analogy, a tree is in the most perfect state of vitality when its sap is in the process of elaboration and assimilation and then it will be in the best condition to produce the new tissue required to cover and heal the cut which may have been made. It is a well established fact that sap has a double action mounting from the roots through every ramification of the tree, to the leaves, in a thin liquid, where it is elaborated, and these having absorbed and decomposed the carbonic acid, the sap descends again in a changed condition and is deposited year after year in the successive concentric layers which form the bulk of the tree.

If that be so the sap cannot be said to descend to the roots, but to have been used up in its progress thereto.

to fabricate the body of the tree. Now while this process is in progress it is easy to understand that important amputations are the least likely to cause decay, because the material required to heal them will be produced at once.

The practical results obtained by actual experiments fully maintain the correctness of this theory.

A number of fruit and ornamental trees pruned in the first week in July were partly healed of their wounds in ten days, and by the middle of August cuts two to three inches in diameter were completely covered with new bark. Now if these trees had been pruned in the autumn, after the elaborated sap had performed its annual functions, the wound could not have been healed and would have been affected by cold, and decay, instead of growth, would have had the first chance—the trees being dormant would have no latent force to repel this decay, which always commences immediately after all severing of parts when unduly exposed to cold, whether in plants or animals.

If the pruning were done at the proper time any application (even coal tar, which is no doubt the least injurious to vegetation) to prevent decay, would be avoided as in the course of the natural development of the tree the protective covering of the wound would be formed, and all applications are more likely to impede than to accelerate the new formation of bark.

In studying the mechanism of a tree the above facts as to the use it makes of the aliments with which nature has provided it wherewith to perpetuate its growth are easily observable, and are infallable guides as to that season of its annual development, when any artificial changes in its formation or character may be effected surely and safely, a matter of even greater importance than the manner of producing such change.

Geo. Moore

The Hippophae, Siberian Sand Thorn

(Also called Siberian Shepherdia or Buffalo Berry.)

This belongs to the *Elæagnus* or wild olive family. The race includes the Russian olive (*Elæagnus hortensis*), the *Elæagnus longipes*, and several other varieties. The Siberian *Shepherdia* was introduced by Prof. Hansen of Brookings, S. Dakota, after one of his Siberian raids for which he is so well noted, when he skims the cream off the land and takes it home with him.

We have just had the pleasure of looking over his grounds and we were greatly impressed with the possibilities of this shrub. There are two branches of this family; one has been cultivated a long time in France but it is not hardy as far north as St. Petersburg. Some trees and shrubs are hardy only in their own locality. Red cedar, grown in southern Illinois, is worthless in Minnesota; white spruce from Maine is of no account in Nebraska. The southern type of the Siberian sand thorn would be useless in our Northern States, but the Professor secured his from well to the north in Siberia and this same branch of the family reaches up to Lapland, making it one of the hardest shrubs in the world. For the Northwest, a shrub must meet two conditions; one is the intense cold and the other is the dry air of winter which sucks the moisture

from the top while the roots are frozen. In bright days in February, we have seen grape vines kill back an inch a day through the influence of the winter drouth. It is not enough that a tree resists the cold, it must also resist the dry air. The Siberian sand thorn does this. The air of Dakota puts this double strain on everything and it is a heroic shrub which can stand the test, but this one meets all the conditions and is as thrifty as can be desired. We never saw a tree or shrub which, in proportion to its weight, bore such an enormous burden of fruit. We have picked a gallon of fruit from *Elæagnus longipes* in Massachusetts, but in this instance the fruit was packed and crowded, clinging to the limb as if in danger of being pushed off, and many limbs were splitting with the weight of the berries. In color, they are glossy yellow. In taste, much like the Japan type, and here is a field for the professor to cross the two. The *longipes* are a little larger and longer and by combining the two the hardiness of the Siberian could be given to the other and perhaps a superior fruit could be evolved. When the West was new people would go a long distance after buffalo berries—these are a sort of winter currant and hang on a good portion of the winter.

We noticed quite a variation in the fruit of the sand thorn, some bushes having much larger berries than others and some, much sweeter. Two bushes were marked for their superior excellence, but when we went to gather the fruit, the birds got ahead of us and they were all gone. The bushes have been marked, however, and will be carefully watched for the next crop. The fruit is much used for tarts, jellies, and jams, and as it hangs on a long time it can be gathered when the rush of work is over. Selections are being made for size and quality and it will not be long before the professor, with his well known success, will evolve something of superior merit.

They are somewhat difficult to propagate and the professor is a little tried with the total failure of nurserymen who will not follow directions and do not get a plant from a bushel of seed. His method is to take the pulp from the seeds and then dry them. There is a coating to the seed which must be rubbed off. When dry they must be kept in a cool place till about the first of December when they are placed in sand and frozen. They must be planted the first thing in the spring under a screen, for the tiny plants, like young evergreens, incline to damping off. The plants should be bought by the dozen or more as they are male and female and only about half bear berries. They make a very ornamental hedge. The savage name of *Hippophae* (horse killer) does not refer to the fruit but to the sharp thorns which give it the dual advantage of hedge and wind-break.

How they will succeed in the Eastern States we cannot tell, but they are a known success in the great Northwest. Last spring was peculiar. May and January held a rollicking carnival. There was an alternation of 80 above and zero, in the same week. While the sand thorns were in bloom, it froze every night this year, but these heroic bushes paid no attention to a little thing like that and proceeded to cover themselves with a marvelous burden of fruit. The professor did a great thing when he introduced these shrubs, but the ultimate value will be in the improvements which he is sure to make.

York, Neb.

Commercial Cypripediums

Cypripediums are admirably useful for floral work; they furnish an exceptional selection of curiously beautiful forms, of easy culture, which when cut are of good lasting quality and carry well. The choicer hybrids one must rule out for obvious reasons, though at the present rate of increase, these, at no distant day, will be both plentiful and cheap. The older types are equally beautiful for all practical purposes.

The need of the moment is for a selection of really meritorious varieties, of vigorous growth and proved floriferous character, giving a reasonable return for investment in quantity. A factor to be borne in mind when making initial outlay is that cypripediums increase in size and value more quickly than do other orchids; then, too, many varieties admit of cooler treatment, and if houses are set entirely apart and filled with kinds needing similar treatment, they may be handled as easily as carnations or roses. Varieties may be selected to secure a succession of flowers the year round, but winter flowering plants such as the following named would be more profitable.

One has often wondered why *Sedenii* and especially its lighter variety, *candidulum* are not more generally grown; if given abundant moisture they flower most freely and if flowers are cut singly one gets a succession of from six to nine on one spike. Given a plant with ten flowering growths, one may have from sixty to ninety blooms on a plant, covering a period of six months; what a houseful would produce is left to the reader's imagination. *Schlimii* is a little gem as a buttonhole flower, as free and easy to grow as *Sedenii* and may have same treatment. The old *insigne* is not to be despised for cutting but I would draw attention to *Sander's insigne montanum* varieties of much more elegant form and a great improvement on the type, many of them superior, in their white dorsal sepals and rich spotting, to either *Mauleior punctatum violaceum*. A goodly number of clear pale yellow forms of much charm are found in importations. Of the *insigne* hybrids *Leeanum* and its varieties are the most useful for cutting. *Arthurianum*, one of the earliest of *insigne* hybrids with the famed *Fairieanum* and having the unique and delicate grace of that variety, is strongly recommended. *Oenanthum superbum* is one of the best dark forms and easy to cultivate. *Lathamianum* combines the good qualities of both its parents—*Spicerianum* x *villosum*—and is worth growing in quantity. Of varieties with lengthy flower stalks suitable for vases are *Lawrencianum*, *Mastersianum*, and *Harrisianum superbum*, all vigorous and free bloomers. Of varieties with small flowers suitable for buttonholes and sprays, *venustum* and *Spicerianum* are useful; the latter may be used in wreaths with fine effect. *Niveum*, with its charming white flowers, may be added; though it needs more warmth and careful watering, it is well worth the trouble.

This list is fairly representative but may be augmented at pleasure. The point to insist on is high culture if they are to be a paying item. Shade they will require and not over much drainage. Use a rough turfy loam, peat and sand as compost; pot level. Sphagnum moss is useful but not necessary. Too much disturbance of the roots is against free flowering; repotting large plants every 3 or 4 years is sufficient. All the

varieties named with the possible exception of *niveum* are such as orchid salesmen are glad to offer at a cheap rate; novelties are the order of the day, and their rapid output places many beautiful varieties in the background which despised of the connoisseur will form the nucleus and in future the reserves of the orchid cut flower trade. In that development "Our Lady's Slipper" will find a prominent place.

Edgar Elvire

Plant Lice

Species of aphidadae, commonly known as plant lice or aphids, are frequently found on ornamental trees, shrubs and plants and roadside weeds. As they are a serious pest in many rose and carnation gardens and on fruit trees numerous inquiries are made concerning the best method to get rid of them.

The plant lice are about one-eighth inch long, green, gray or black and bottle-shaped, being much larger at the posterior end, and having two small honey tubes projecting back. The life-history is unimportant here, the fact that they multiply with amazing rapidity being the only point deserving special emphasis.

As the food of the insect is obtained by sucking the sap, stomach poisons as paris green or arsenate of lead are useless. Instead a substance which will kill by suffocation or penetration is required, or in other words, a contact poison. There are a number of these, all of which will prove effective as the soft-bodied louse is easy to kill. The only thing to be borne in mind is the necessity for hitting each insect, a provision which may make a repetition of the spraying necessary, as the great breeding powers will quickly furnish a new supply if any survive, as undoubtedly some will.

Kerosene emulsion is the standard contact insecticide. It is made by using whale oil or laundry soap, kerosene and water in the following proportions:

Soap	1-2 pound
Kerosene	2 gallons
Water	1 gallon

The soap is grated and dissolved in the water after the boiling point is reached. It is then removed from the fire and the kerosene added while the mixture is hot. All are thoroughly stirred and churned until a creamy mass results, which forms the stock solution. This may be kept indefinitely, and used when needed at the rate of one part to ten or twelve parts of water. Another good remedy is whale oil soap or fish oil soap dissolved at the rate of one pound to six gallons of water.

Tobacco decoction made by filling a pail with tobacco stems, covering with water and soaking for twenty-four hours is good. One-half a pint of the resulting liquid is used to a pail of water.

A number of satisfactory articles are sold under the name of "tree soaps," which are usually good, although the price is somewhat high. Not only are these remedies good for lice but when used in stronger doses will exterminate all the more resistant insects with which they come in contact.

The value of common things

In a summer such as we have just passed through, with lawns sere and brown and much garden material dried up and useless because of the lack of rain, the value of the tough little annuals which are so frequently forgotten in the craze for fancy novelties, becomes apparent. Many a garden bed pretentiously planted with asters of high degree, prize begonias and roses from which much was expected, has been saved from complete wreck through the persistence of such unconquerable subjects as the portulaccas, sweet alyssum, poppies, morning glories and old-fashioned petunias, often self-sown and actually stealing their way into the privilege of simply living. We are not referring to the garden under the constant watch and care of the skilled gardener with every facility at hand for combatting unfavorable conditions, but rather the little home garden of the artizan or business man which in time of stress must often take care of itself, but the existence of which means so much to the seedsmen and plant dealer. The useful qualities of the more resistant of these cheery little subjects under conditions of crude culture or sheer neglect are not always appreciated as they deserve, standing as they often do, between the amateur gardener and utter discomfiture and encouraging him to try again.

Lightening the load

The old saying attributing all kinds of witless simplicity to him who "doesn't know beans" loses its application after one has turned the pages of Mr. Tracy's elaborate bean report to which reference is made in another column of this paper. To know the hundreds of varieties of Boston's favorite food therein described is certainly an attainment far beyond the most of us. One result of the perusal of the report will be to establish a conviction of the absurdity of such a vast number of synonyms and the desirability of reducing to a reasonable length such a puzzling array of superfluous catalogue material. Substantial as is the reduction already made by Mr. Tracy we have no doubt it could and probably will be, in the near future, carried much further. The sentiments of the trade today seem to favor a thorough sifting out and general simplifying of the cumbersome seed, fruit and plant varietal lists and no better evidence that such is needed can be presented than we find in this exhaustive compilation which the Department of Agriculture has prepared. We can recall the time when the exhibitor showing the largest number of varieties of pears, running up into the hundreds, was the proudest personage at the shows of the Massachusetts Horticultural Society. Later on the ambition of the chrysanthemum grower took the same turn and today the devotees of the dahlia are frantically trying to excel one another in the list of sorts they can place upon the exhibition table. The chrysanthemum growers soon got tired of the caprice and now it only requires the production of a superior variety to drive the sensational variety of yesterday into oblivion. The British sweet pea society's course in reading out of recognition a host of superseded varieties is another case in point and we have no doubt that the dahlia lists will in due time get a similar slashing.

HORTICULTURAL EDUCATION AT AGRICULTURAL COLLEGES.

By Theodore Worth, Supt. of Parks of Minneapolis, Minn., at S. A. F. Convention, Philadelphia.

Mr. President, and Fellow Members of the Society of American Florists and Ornamental Horticulturists.

Ladies and Gentlemen,—I have been asked to prepare a paper on "Horticultural Education at Agricultural Colleges," and I hardly know how to approach the subject, for, personally, I have no experience whatever as a student or graduate of such an institution of learning.

I attended school until I was sixteen years old, and when I arrived at that, what I considered very ripe age, and barely graduated with figures which I don't care to remember. I was of the opinion that additional wisdom, to be gained from professors and books, was superfluous technical theory, which would be of little help in practical work. I thought it was a kind of polish that would wear off soon and most likely spoil the leather, and that it would be better to grease the boots to begin with and go to work, and so I did.

I served one of those good Old Country apprenticeships where I had to work three years, not only for nothing, but my governor had to pay my board besides. I don't know now, whether at that time I earned my board, but I had a feeling that I did that and more too. However, I graduated with honors as a full-fledged gardener, and I distinctly remember the great celebration that took place at that memorable time, which clearly shows that my memory was good under the most trying circumstances.

Since then I have followed the noble profession of gardening in many of its branches and in different lands and climates, and have found pleasure, contentment and happiness in all I have approached and worked at, and if I could return to boyhood and had a chance to make my selection of trade again, I would most certainly select the "gardener's" profession.

But, who has passed through life, successful or otherwise as it may be, who would not omit some things he has done and do some things he left undone, if he was to live the same period of life over again? No one—and it is through this, our experience, that we must attempt and endeavor to teach those that follow us, to become wise where we were unwise.

I therefore appear before you, not as a student or graduate from any horticultural college, but as one who wishes he had made use of the opportunity to be such, at the time he had the chance.

I have, in my professional life, come in contact with young men of practical schooling only, men of theoretical schooling only, and men of both, and I have often had occasion to envy the latter. I have observed, however, that among the former two, the first had by far the advantage, but I am convinced that a happy combination, in which the practical schooling is pre-

dominant, is the ideal course for horticultural education.

From prospectuses that I have read of different agricultural colleges, and through conversations which I have had with some of the leading teachers at such institutions of learning, I feel convinced that a sincere interest and support given those institutions by individual and combined effort of our craft, would result in a more progressive and beneficial treatment of horticultural subjects in general, and horticultural interests especially, than is at present the case and possible.

I feel assured those institutions are sincere and anxious to help us with all their available means and opportunities, and if we give them the glad hand of support, interest and appreciation, the combined efforts of both will be crowned with unbounded success to the benefit of all the far-reaching interests concerned. And who is better adapted and able to give that support, and who is closer to that calling than our S. A. F.?

I believe that our Society should take into earnest consideration what could and should be done to further our interests in the horticultural education of the younger members of our craft.

Let us exchange ideas how it might be done. I, for one, wonder whether it might not be possible to select one of the many excellent State Agricultural Colleges, one as centrally located as possible, to make the study of horticulture, and especially floriculture, a special attraction along lines which would meet with our ideas of practical, commercial usefulness. For instance, would it not be practical to have a college equipped with an up-to-date commercial plant, for the culture of plants both under glass and out of doors? Would it not be possible to market the products of this college plant at fair open prices, without creating an unfair competition to local trade in the vicinity of the institution? If so, would not this branch of such a college become more or less self-sustaining, and would not the very desire of making it so, and the need of successfully meeting such commercial competition, spur both teachers and pupils to achieve results far beyond the aim and the possibility of the ordinary college plant and experiment station?

If all this is possible I think it is well worth our while to secure it, and I think it should be our aim. A forceful, earnest combination of our interests and practical experiences with those of the scientific and theoretically advanced researches of the teachers of our colleges, I believe would result in horticultural education along most remunerative lines.

I should like to see some of our leading professional men connected with the Governing Board of such an institution, and I should want some of our successful practical gardeners on the staff of teachers. I should like to see the theoretical and scientific teachings of our professors of botany, entomology, chemistry, etc., brought into uninterrupted and closest contact with the practical experiments and demonstrations of our experienced leading practical gardeners, so that the teachings of both, supplementing each other, may tell the student why and how and when and where.

The merits of such an institution I think would speak for itself, and it seems to me would be universally recognized at any early date of its existence. Its beneficial and educational influence would not be limited to the building up of a young generation of well educated, practical craftsmen, but it would also become the central station of horticultural and floricultural interests in general, a place we all would want to visit, a trial and experimental station open to all introductions and products of our ever advancing skill and progress.

Its seal of merit and excellence should be the coveted prize of professional advancement, achievement and ambition.

Every year a number of our successful and leading fellow craftsmen go to Europe on a combined pleasure and business trip, and we all know that travelling with open eyes means to learn and profit. If a few such travellers would act as a committee and together visit some of the horticultural schools of Germany, France and Switzerland, I believe some of the things they would see there would be helpful towards the realization of my dream herein outlined. True, conditions and requirements here and there differ greatly, but in a general way our aims are the same. There and here we must have and do have at heart the advancement of our noble calling, the profession of a "Gardener," of which I pride myself to be a member, and anything that can be done to further such advancement through combined and individual effort should receive our hearty and active support.

HYDROCYANIC-ACID-GAS FOR WHITE FLY.

Editor of Horticulture,

Dear Sir: I have a greenhouse 12x75 where tomatoes have been growing this summer and the house has become infested with white flies. Please give me the name of that gas that destroys them, also the amount and how to mix and oblige, W. D.

White flies may be eradicated by the use of hydrocyanic-acid-gas used in the proportion of one ounce of pure cyanide of potassium for each 1,000 cubic feet of air space in house, and left over night with all apertures closed. To breathe the gas is fatal, hence great care must be exercised and some way devised for opening the ventilation from the outside after fumigating to clear the house before attempting to enter.

The materials required are 98 per cent cyanide of potassium and commercial sulphuric acid. Small earthen jars are placed in the paths of the houses, one to about every 50 feet in length of an ordinary 18-foot wide house. Into each jar is put first water and then sulphuric acid in the proportion of about half a pint of water and three-quarters of a pint of acid to which eight ounces of cyanide is added later. The cyanide crystals should be wrapped in two or three thicknesses of paper and, when all is ready, dropped into the jar either by a string controlled from outside or by dropping in by hand and then sprinting for the door.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The first meeting of this club for the new season was held in Horticultural Hall last Tuesday evening. The attendance was large—fully one hundred and fifty members being present undoubtedly attracted by the announcement that Mr. R. G. Leavitt of the Ames Botanical Laboratory would talk on the interesting topic of cross-fertilization. Mr. Leavitt evidently "made good," for he held his audience so deeply engrossed for nearly an hour and a half that they didn't know where the time had gone. Mr. Leavitt said that a plant is a machine with a definite structure intended to perform a definite work, and that the hybridist, to attain successful results, must first understand the machine with which he proposes to work. He showed how mysterious laws of cross-breeding are being gradually understood and codified, and how slow must be the work of the scientist in this vast field where, as yet, very few general laws have been determined upon which hybridists agree. The hybridist, when he starts in, cannot tell what is going to happen, each plant being a law unto itself. He then took the specific subject of the mechanism of reproduction, showing by means of a blackboard to various pistillate and staminate organs of flowers, and the operations of pollen and ovary in the process of fertilization, and explaining in detail Mendel's law of hybridization. A hearty vote of thanks was accorded. A vote of thanks was passed expressing the appreciation by the club of the many courtesies extended to its members by the Florist Club of Philadelphia on the occasion of the recent convention.

On the exhibition tables were some interesting contributions, including large specimen plants of *S. A. Nutt* and *La Brette* geraniums from Wm. Nickerson, assistant gardener with James Wheeler at Elmhurst; *Nymphaea Tryon* from Carl Blomberg of the Mrs. A. C. Ames estate, Chatenay and Testout roses from George Page of Newton Highlands, *Helenium autumnalis superbum rubrum* from F. J. Rea, and *begonias semperflorens, gracilis luminosa* and *Fireball* from F. E. Palmer, Brookline.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The monthly meeting of this society was notable for the fine display of outdoor flowers, such as September asters, cannas, dahlias, tritomas, phloxes and various other seasonable subjects. The exhibition of vegetables for the Bodine prizes was also a feature and proved a hard job for the judges to decide between the four very meritorious collections staged. The show was free to the public during Tuesday and Wednesday.

The competition in dahlias was meagre, Joseph Hurley, gardener to James W. Paul, staging the best lot. Samuel Crowther, gardener for Mr.

Brown, also had a fair showing. The season has been backward and too dry, and dahlias are not yet at their best. Asters reflected credit on the chief exhibitors, Messrs. Hurley, Crowther, and William Robertson, gardener at Fair Acres. The latter had also a good showing of hardy phloxes for the Dreer prizes, and a general collection of herbaceous perennials in the same section. The most exciting feature was the competition for a collection of vegetables on a space 41x48 inches. Samuel Hammond took first, Jno. McCleary second, and Joseph Hurley third; but it was a hard matter to tell which was best. W. P. Peacock staged a good collection of named dahlias and was to have appeared personally to talk on same but was unable to attend.

SOCIETY FOR HORTICULTURAL SCIENCE.

Program of the fifth annual meeting held in connection with the meeting of the American Pomological Society at the Jamestown Exposition, September 24, 25 and 26, 1907:—

The Relation of the Adams' Fund to Horticulture, L. H. Bailey, Cornell University.

Importance of Bud Variations and Mutations in the Development of Citrus Varieties, Herbert J. Webber, Cornell University.

Originating New Fruits, G. B. Brackett, U. S. Pomologist, Washington, D. C.

The Origin and Improvement of Some Horticultural Varieties in Ohio, W. R. Lazenby, Columbus, Ohio.

Mendelian Characters in Tomatoes, U. P. Hedrick and N. O. Booth, New York State Experiment Station.

Mendel's Law Applied in Tomato Breeding, A. G. Craig, Pullman, Washington.

On Methods of Breeding for Disease Resistance, W. A. Orton, U. S. Department of Agriculture.

The Plan and Side Issues, C. S. Crandall, Urbana, Illinois.

Plant Breeding as a University Course, John Craig, Cornell University.

Seasonal Influence in Carnation Crossing Relative to Seed Production, William Stuart, Burlington, Vermont.

The Technique of Hybridizing the Potato, E. M. East, New Haven, Connecticut.

Experiments in Strawberry Breeding, S. W. Fletcher, Agricultural College, Michigan.

Breeding to Overcome the "Little Peach" Disease, L. R. Taft, Agricultural College, Michigan.

Variations in Swayzie Apple Seedlings, W. T. Macoun, Ottawa, Canada.

Xenia in Apples, C. P. Close, College Park, Maryland.

Meetings will probably be held in the Court of the States Exhibit Palace. The time of meeting will be announced at headquarters at the Inside Inn, where reduced rates have been secured for members of the society. This hotel will also be headquarters for the other horticultural societies which convene during the week of September 23-28. It is quite likely that some of the meetings will be held jointly with the American Pomological Society.

CHRYSANTHEMUM SOCIETY OF AMERICA.

President Loveless has announced the committees to examine seedlings and sports on dates as follows: Sept. 21-28, Oct. 5-12-19-26, Nov. 2-9-16-23 and 30, 1907. Exhibits to receive attention from the committees must in all cases be prepaid to destination, and the entry fee of \$2.00 should be forwarded to the secretary not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports, to receive a certificate, must pass three committees.

Philadelphia—A. B. Cartledge, chairman; John Westcott, William K. Harris. Ship flowers to chairman, 1514 Chestnut street.

Cincinnati—R. Witterstatter, chairman; James Allen, William Jackson. Ship flowers to Jabez Elliot Flower Market, care of janitor.

Chicago—J. B. Deamud, chairman; Andrew McAdam, George Asmus. Ship flowers to chairman, 51 Wabash Ave.

Boston—Elijah A. Wood, chairman; William Nicholson, James Wheeler. Ship to Boston Flower Market, 1A Park St., care of chairman.

New York—Eugene Dailedouze, chairman; William Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., care of chairman, 55-57 West 26th street; all flowers to be on hand by 2 p. m. on day of examination.

Official scales of the C. S. A. are as follows:

For Commercial Purposes.	For Exhibition Purposes.

Substance15	Depth15
Size10	Size35

Total100 Total100

The following named gentlemen have been secured to pass on the exhibits at the New York show, to be held November 6 to 8, 1907: Eugene Dailedouze of Flatbush, N. Y., James Wheeler of Brookline, Mass., William N. Craig of North Easton, Mass. The show promises to be the best the society has ever held. Make your arrangements so that you will not be obliged to miss it. Send to the secretary for a list of premiums and try to recall if your dues for 1907 are paid.

Work of Committees.

Cincinnati, Sept. 7th.—Golden Glow (Japanese) exhibited by Nathan Smith & Son, Adrian, Mich., scored 90 points commercial scale. The judges speak very highly of this variety, and say it is O. K. in every way, and will be a valuable addition to the early flowering varieties. It was shown in Pittsburgh, Sept. 3rd, in fine shape.

DAVID FRASER, Sec'y.

THE EXHIBITION SEASON

EL PASO COUNTY HORTICULTURAL SOCIETY.

The exhibition of this society which was held at Colorado Springs, Colo., on August 21 to 23, was the best they ever had, financially and also in quality. With a schedule of more than 300 classes and over 1200 entries it is hardly necessary to say that the officials had plenty to attend to. The photograph here introduced shows one section of the tents, the central display being from Glen Eyrie Gardens, the estate of Gen. W. J. Palmer, in charge of C. U. Fohn, head gardener, this exhibition being not for competition. It comprised tuberous begonias, gloxinias and decorative foliage plants.

In the professional classes, the Pike's Peak Floral Co., Frank Hayden and Wm. Clark, local growers, share the principal honors in cut flowers, plants, and decorations, with Frank Hayden of the Colorado Springs Floral Co., in the lead. W. W. Wilmore of Denver easily took first place amongst the large outside growers in the cut flower professional growers' classes, and his exhibit of dahlias was the equal of anything heretofore shown in this country; he also showed some new and beautiful strains in gladioli classes.

In perennials John Berry made a wonderful exhibit from the Monument Valley Park. Mr. Berry has been in charge of the vast and wonderful transformation which has taken place in this heretofore wilderness of a creek bottom which contains upwards of 1500 acres and cost nearly one million dollars, the whole of which has been paid by General Wm. J. Palmer.

In the Corporations and Public Institutions groups, W. H. Dunman of the Union Printers' Home carried off many honors and prizes, while Edwin W. Pierce of the State school for the Deaf and Blind (while at some disadvantage owing to the new additions to the buildings) came a good second. The exhibits from the pupils of the public schools and in the sweet pea classes were not up to the usual standard. This was due entirely to the unfavorable condition of the early spring.

The prizes offered by the society amounted to about \$1500 in cash, besides many valuable cups and other good things. These shows are always held in the centre of the city, in what is known as the N. Park, and this, the ninth, was more liberally patronized than any previous one, so that after paying all debts the society starts the new year's work for civic improvement with a surplus on hand.

NATIONAL DAHLIA SOCIETY.

On September 5th and 6th the above named society held its annual exhibition at the Crystal Palace, Sydenham. A liberal prize schedule was provided and altogether there were 47 classes in which money prizes, medals and several silver challenge cups were offered for competition. In the competitive classes provision was made for all kinds of growers of the various types of dahlias, 3, 6, 12, 18, 24 and 48 cut blooms being the rule. Exhibits in

vases and other floral displays were in excellent form, while the non-competitive miscellaneous displays from the trade were in some cases of great interest and importance.

Most of the well-known dahlia specialists were represented. Messrs. T. S. Ware & Co.'s flowers were artistically arranged in tall bamboo supports, with a front edging of *Isolepis gracilis*. Hobbies Limited also had a fine display, among them the new peony-flowered varieties K. A. Victoria pale lemon yellow, Dr. Van Jansen reddish deep crimson, Rosen Van Groeneker yellow buff, all of them big massive blooms of this modern type.

Messrs. H. Cannell & Sons are well known growers of the dahlia and they staged an imposing and effectively arranged lot, in which the peony-flowered were also well in evidence, Glorie de Baarn, Reine Wilhelmina,

lie Hall, Amos Perry, Beauty of Seven-oaks, Phyllis, etc. Show dahlias: Crimson King, Dr. Keynes, Canary Bird, Mrs. Gladstone, Henrietta, Mrs. Glasscock, Dante, Warrior, Norma, Mrs. Morgan. Pompons: Bacchus, Phoebe, Jessica, Distinction, Gany-mede, Snowflake, Little Bugler, Nerissa, etc. Cactus varieties were by far in the majority. First-class certificates were awarded to the following cactus varieties, viz.: C. E. Wilkins, beautiful shade of salmon rose tinted buff in the centre; Ivernia, very large bloom, bronzy buff tinted deep rose; Rev. A. Bridge, yellow centre, edges of florets tinted deep rose; Mauve Queen, very soft shade of rosy mauve, white centre. Decorative cactus: The Bride, pure white. Singles: Peggy, a pretty flower, rich reddish terra cotta, the outside edged deep rose, yellow centre; Crimson Prince, a beautiful

VIEW IN EXHIBITION OF EL PASO COUNTY HORTICULTURAL SOCIETY

Herzog Heinrich and others being all in good form.

Other good decorative stands were set up by Messrs. Scale, West, Mortimer, John Walker, Burrill & Co., Stredwick, Cheal & Sons, Keynes, Williams & Co., and others.

In the big cut bloom class for 4, distinct, J. Walker came in first for a fine collection of the old florists' show dahlia. Some of the most attractive in his stand were Perfection, Victor, Colonist, Harbinger, Hero, Harrison Weir, Blush Gem, Diadem, Criticism, Lord Salisbury, Shirley Hibberd, John Rawlings, and Miss Cannell.

The first prize in the class for 24 cut blooms old show dahlia was awarded to Keynes, Williams & Co.

Of the many other minor classes we can say but little, considerations of space having to be taken into account. But, going round the exhibition, we noted among the various lots staged good examples of the following: Singles: Robin Adair, Kuroki, Flame, Dorothy, Juno, Victoria, Fabian, Les-

flower, rich velvety crimson with yellow centre. One or two others received similar distinction.

C. HARMAN PAYNE.

London.

ROYAL HORTICULTURAL SOCIETY.

The weekly show on Tuesday, Sept. 2nd was small and select, and characterized by masses of one thing in quantity: for instance, Kelway & Son had a table displaying on it seventy large exhibitors' vases, each holding three spikes of one variety of gladiolus. Aphrodite is a lovely pure white, and Purity another, the last securing an A. M. Primrose is a perfect yellow, with large, individual flowers, long and well poised spike. Rocksand is a rich, crimson scarlet, Alexander Edward a lovely soft cinnabar red and Bond a fine yellow. Lady MacDonald is a deep purple, and Mrs. E. West an exquisite soft lilac. At the back of these was a record exhibit by the Leonardslee gar-

dener, of cut pentstemons, all of the large gloxinia-formed kinds which, even at the close of the show, showed no sign of flagging, but how this was compassed was a puzzle till I inquired and found that each spike, as cut, was placed in a vessel with ample water, so that it had not time to wilt. Some of the sorts were named, but provided you secure a good strain of seed, it is not necessary to propagate by cuttings. Then Guilim had cut double begonias in boxes of all shades of color, the yellows and scarlets being perfect, and the whole occupied one side of a 50 ft. table, while at the back Gunn & Sons had a bank of phlox, embracing a number of fine novelties. Then Mr. H. J. Jones of chrysanthemum fame put up a bank of hybrid fuchsias—fulgens, corymbosa, serratifolia, Dominiana—all of which must prove useful to the decorative florists, as the color of flower and habit of growth, combined with freedom of flowering, must ensure their popularity. One named Coralle (Lemoine) gained an award of merit from the floral committee. Gartenmeister and Fraudchen Bonstedt are two excellent kinds. Perle is a dwarf pale variety, and Eros a fine crimson.

Novelties were scarce, but Veitch & Son deservedly took a first-class certificate for *Cattleya* (Iris) His Majesty, in every way worthy the honor and the name, and another noble orchid was shown by Charlesworth—*Cattleya Gaskelliana alba*. An A. M. was also taken for a yellow semi-double *Gailardia grandiflora*, very promising, from Harrison & Son, named Lady Rolleston. Mr. Shoesmith took an A. M. for cactus dahlia Ella Elrich, of most lovely form and color, and also put up Snowdrift (white), Buttercup (yellow), and a fine dark maroon A. H. Gale. Fruit was mostly shown on trees in pots, the Cranston Nursery Co., Cheals, and Veitch & Son having some well-fruited pyramids in pots of leading kinds, while the first named had grape vines carrying a good crop of the leading varieties, and Veitch a fine collection of figs, as bushes and cordons, all carrying good crops.

Veitch's novelties were *Artimesia cactiflora*, with foliage like an astilbe, and loose panicles of whitish flowers, the North China monkshood, *Aconitum Wilsoni*, and plants of *Senecio clivum* show a financial success. Al-how much this plant varies in foliage, size and form of flowers, when so raised.

THOMAS BUNYARD.

A Montreal Flower Show.

Westmount flower show was a success. It was held under the auspices of the Westmount Horticultural Association in the Victoria Hall, last Saturday, 14th inst. Among the prizes offered were those for the plants given out to the school children last spring. Prizes awarded in the garden competition were also presented.

The craft in Montreal are trying all means to make our next chrysanthemums show a financial success. Already some friends of the club are approaching the members of the legislature for a grant. Others are offering to the club the services of a popular military band of this city.

COMING EXHIBITIONS.

Rhode Island Horticultural Society.

The Rhode Island Horticultural Society will hold its annual November exhibition at Providence, R. I., on Nov. 15 and 16. Chrysanthemums, carnations, etc., are liberally provided for. The secretary's address is C. W. Smith, 27 and 29 Exchange St., Providence, R. I. William Appleton is superintendent of the hall.

Worcester County Horticultural Society.

The Worcester County Horticultural Society will give the following exhibitions at Horticultural Hall, Worcester, Mass.: Thursday, September 26, cut flowers, fruit and vegetables; Thursday, October 10, fruit and vegetables, annual dinner of the society at 12.30 p. m.; Thursday, November 14, chrysanthemums. Adin A. Hixon is secretary; address Horticultural Hall.

Horticultural Society of Buffalo.

The first annual Flower Show under the auspices of the Horticultural Society of Buffalo will be held at Buffalo, N. Y., on November 11 to 17, 1907, inclusive. The preliminary list of premiums has been issued and shows some very liberal prizes for chrysanthemum plants and flowers, decorative plants, orchids, carnations, roses and floral arrangements. It is stated that Buffalo's Flower Show will be the best exhibition seen east of Chicago in many years. Copies of rules and entry blanks may be obtained from John H. Tranter, Sec'y, P. O. Box 904, Buffalo, N. Y.

Florists' Club of Washington.

The Florists' Club of Washington has issued the Preliminary List of Awards offered for their annual exhibition which is to be held in the National Rifles' Armory, Washington, D. C., on November 12, 13 and 14. Copies of same may be had by addressing Charles McCauley, 18th and Kearney streets, N. W. Washington. The list comprises 140 classes, which cover a wide diversity of plants and flowers under commercial and private divisions. The proceeds will be devoted to charitable institutions. Peter Bisset is president of the club.

Monmouth County Horticultural Society.

The tenth annual exhibition of the Monmouth County Horticultural Society will be held in Frick Lyceum, Red Bank, N. J., on Wednesday and Thursday, October 30 and 31. Copies of the premium list may be obtained from H. A. Kettel, secretary. This is essentially a gardeners' exhibition, and some of the best chrysanthemum growers in the country will compete.

New Haven County Horticultural Society.

The New Haven County Horticultural Society will hold its usual chrysanthemum show early in November. Prize schedules will soon be ready and

can be had from Walter Koella, Sec'y, 58 Bishop street, New Haven, Conn.

Horticultural Society of Chicago.

The annual exhibition of the Horticultural Society of Chicago will take place on October 31, continuing until November 6. The preliminary schedule, which has been received from E. A. Kanst, assistant secretary, 5700 Cottage Grove Avenue, Chicago, is quite lengthy and generous, there being 156 regular classes in flowers in plants, with prizes ranging from \$3.00 up to \$100.00 each.

Denison Civic Improvement League.

The Denison Flower Show to be given under the auspices of the Denison Civic Improvement League, at Denison, Texas, on November 6, 7 and 8, promises to be quite an extensive affair, judging from the 474 classes provided for in the prize schedule. A number of the classes are quite unique and evidence a determination to interest all classes and ages of possible exhibitors or visitors. Copies of the very interesting and handsome schedule may be had from the secretary, T. W. Larkin.

Illinois State Fair.

The great Illinois State Fair will open at Springfield on September 27 and close October 5, under the management of the Illinois State Board of Agriculture. The horticultural department as classified in the schedule concerns only fruit, which, to be eligible for competition, must have been grown in Illinois by the exhibitor. All vegetables are included under the classification of farm products, in which cereals are especially prominent, some idea of the scale of this department being possible for the reader when we quote the first prize \$50.00 for bushel of seed corn, Illinois grown, the same duplicated in the "open to the world" class, and similar premiums for white seed corn, the corn premiums alone amounting to about \$3,000.00.

The premiums under the classification of floriculture exceed \$2,300.00, and are very liberal in the cut flower classes. For instance, fifty American Beauty roses have a first premium of \$50.00, and fifty other roses \$12.00 each, and the lesser classes are on the same scale; \$25.00 for 100 carnations and \$6.00 each for the exhibits of 50 carnations in the various colors may also be quoted. The plant list is somewhat disproportionate in certain classes. Entries close Wednesday, Sept. 25. Roses and carnations must be staged by noon, October 1, and other cut flower exhibits, designs, etc., by noon, October 2. Robert O'Dwyer, Monroe and Desplaines street, Chicago, is superintendent and J. F. Ammann, Edwardsville, is assistant superintendent, and prize lists can be supplied by either of these gentlemen upon request.

The following were mentioned at length in last week's issue of HORTICULTURE:

Nassau County Horticultural Society, Glen Cove, N. Y. Special dahlia show in connection with October meeting.

State Floral Society of Arkansas, Little Rock, November 14 to 16.

Lenox Horticultural Society, Lenox, Mass., Oct. 23 and 24. Geo. H. In-stone, Sec'y.

Wappinger's Dahlia Society, Park Hall, Wappinger's Falls, N. Y., Sept. 20 and 21.

New Jersey Floricultural Society, Orange, N. J., dahlia exhibition, Oct. 4. Henry Halbig, Sec'y.

Tarrytown Horticultural Society, Tarrytown, N. Y., Nov. 6, 7 and 8. E. W. Neubrand, Sec'y.

Massachusetts Horticultural Society, Horticultural Hall, Boston. Chrysanthemum show, Nov. 8, 9 and 10. W. P. Rich, Sec'y.

Maryland State Horticultural Society, Fifth Reg. Armory, Baltimore, Dec. 3 and 4. Thos. B. Symonds, College Park, Md., Sec'y.

ST. LOUIS FLORISTS' CLUB.

"Installation Meeting" took place Thursday afternoon, September 12th. When President Irish took the chair and opened the meeting there were twenty in attendance. Walter Retzer, who is with the St. Louis Seed Co., made application for membership, and two new members were added to the roll, L. M. Van Hook, grower, and D. Bova, a retailer.

The newly elected officers were duly installed by President Irish, assisted by J. W. Dunford and E. W. Guy, both ex-presidents. Those who were installed in turn were: Trustee, Chas. Schoeule; treasurer, Fred H. Weber; secretary, A. J. Bentzen; vice-president, G. H. Augermuller, and president, W. C. Young. Each in turn on taking their respective offices made appropriate remarks. President Irish, on leaving the chair, also made a neat talk, in which he stated that the members should stand by the new officers and lend their support as they have in the past, and thanked them for their assistance given him in the past year. Ex-Secretary Beneke's report showed that the attendance during the year had averaged 25 per meeting. Ex-Treasurer Bentzen's report shows a good balance to the club's credit.

President Young stated that a letter from President Stewart of the S. A. F. indicated that St. Louis had sent the largest individual delegation to the convention from the West. The meeting then adjourned to a nearby cafe, where a fine lunch was spread at the expense of the new president, and the plans for the yearly meeting of the club and convention matters were talked over. The next meeting will take place Thursday afternoon, October 10, at two o'clock.

BUSINESS CHANGES.

Miss Georgie Scorgie is about to open a new flower store in the Medina Building, Somerville, Mass.

Johnson & Armstrong have taken the Coolidge Bros. greenhouse at South Sudbury, Mass., and will run it for carnations exclusively.

John Taylor has just started in the nursery and florist business at Fort Myers, Fla., and would like to receive catalogues of seasonable goods.

WE HAVE JUST RECEIVED IN PERFECT CONDITION A LARGE SHIPMENT OF

CATTLEYA MOSSIAE.

WE HAVE ALSO A LIMITED QUANTITY LEFT OF

CATTLEYA SCHROEDERAE.

The above shipments are the finest that have ever reached this country. We have also on hand a number of other Orchids, not yet potted, such as

Laelia Anceps, L. Autumnalis, Epidendrum Vitellinum, Miltonias,

IN VARIETY, ETC.

LAGER & HURRELL, . . . Summit, N. J.

During Recess

"Hang Sorrow; care will kill a cat
And therefore let's be merry."

WASHINGTON FLORISTS AT WHITE MARSH.

On September 17th at 11 o'clock, about forty Washingtonians took the train for Baltimore, where they were met by Mr. Vincent and about one hundred of the Monumental City craft. Thence they all proceeded to Cowenton, where they exchanged train for farm wagons, which conveyed them to the 40-acre dahlia farm of R. Vincent, Jr., and Sons. They were received here under a large shed beautifully decorated with cut dahlias and oak leaves, and were soon busy with a fine dinner served by young ladies, for the benefit of two churches in which Mr. Vincent is interested.

There are now six new houses under course of construction on the place, and six completed, 30x200 ft., filled with geraniums. After enjoying the dahlia display, which embraces all the finest and newest varieties, the train was scheduled to arrive. It was, however, an hour late, and as it steamed up a heavy rain and electric storm burst, which made all especially interested in getting into their respective coaches. Just before Baltimore was reached on the return, the train bearing the florists and families was run into by a heavy New York express, and what would have been a horrible accident, was averted only by the snapping of the coupling joining engine to train, as the former went crashing down a 20-foot embankment. The only casualty reported was the breaking of the engineer's arm. The accident delayed train about two hours, so it was 8 p. m. before Baltimore was reached. Here the excursionists were met by the Baltimore Florists' Club, part of whom took the ladies to supper, while the others escorted the men to the bowling alley, where Baltimore won two games. All then enjoyed a fine supper ordered by the Baltimore Club. The ladies of Baltimore bowled two games against the Washington ladies, and it goes without saying that the Washington ladies were victorious. There were also in the party five gentlemen from the Florists' Club of Philadelphia, who participated in all the festivities with true Philadelphia abandon.

It was about 1 a. m. when the train finally reached Washington, bearing a crowd very tired but thoroughly grateful for preservation from what might have been a horrible disaster.

NEWS NOTES.

Prof. A. B. McKay, J. F. McKay and R. L. Addkinson are to engage in the florist and nursery business at Madison Station, Miss.

A receiver has been appointed for the Albaugh Nursery & Orchard Co., Phoneton, O. The liabilities of the company are given as \$40,000.

John Ingraham has leased the Seawanhaka greenhouses formerly conducted by the late W. L. Swan at Oyster Bay, N. Y., and will grow carnations and orchids.

A gang of fern pickers in the woods at Kent, Conn., were arrested and fined a week ago on complaint of the Fel-louris Company of New York who had leased the fern picking rights on that territory.

At the weekly exhibition of the Worcester County, Mass., Horticultural Society last Thursday, George McWilliam showed Montreal musk-melons weighing from 19 to 21 1-2 lbs. each, and of delicious flavor.

John M. McKenzie, of North Cambridge, Mass., will move to his new office and salesroom on Massachusetts avenue, and the old Hutchins greenhouses which he has been occupying will be demolished.

H. C. Ostertag, F. W. Pape and C. Young have been appointed to represent the florists of St. Louis on the committee to raise funds to illuminate the city for the Million Population Club's celebration in latter part of October.

Andrew Wilson, Summit, N. J., of Plant Oil fame, is making a tour of the florists and gardeners of Boston, Lenox and other New England centres in the interest of his insecticide, the reputation of which had already preceded him, and he is getting a "bar'l of orders."

Seed Trade

The Planters' Seed Company, of Springfield, Mo., are erecting a large warehouse.

As regards the quality of Dutch bulbs this season, the tulips and narcissi are the best. Hyacinths and crocuses are not more than of average quality.

From Connecticut again comes confirming reports that the late varieties of sweet corn are turning out very poorly. The continued dry weather has just about ruined all semblance of a crop. Sweet corn will be valuable property this year.

Corrections of last week's seed trade notes are in order, as follows: Referring to estimates of deliveries, read percentage of Pride of the Market 10 to 20 per cent. instead of 1 to 20 per cent., and for Sultana Excelsior read Sutton's Excelsior.

On Wednesday, September 18, the first anniversary of the opening of the H. B. Fiske Seed Co.'s establishment at 11 and 12 Faneuil Hall Square was celebrated in due form. This company has "made good," and in the short space of one year placed itself in a recognized position of permanence and prominence among the best seed houses of the Hub.

The receipts of Dutch bulbs during the past week have been very heavy, and now what certainly bids fair to be a great season for hardy bulbs being well underway it may be an opportune time to urge all consumers of this class of stock to at once place their orders, if they have not already done so, as from the experiences of the past two seasons the late buyers will not fare very well.

Wax beans, especially "Black Wax," also "Burpee's" and "Giant Stringless" green pods are reported as a very poor crop in the west. Our advices also tend to show that the dwarf varieties of wrinkled peas will fall below the averages given in the interview with a leading grower in our issue of 14th inst.

There is a report (we do not know how well-founded) that there is a failure of some small seed crops, "over the Pond," notably salsify.

Main shipments of Dutch bulb stock reached Philadelphia on the 16th inst. The season is late on account of the cold, damp weather on the other side. Hyacinths and narcissi opened up sweaty and had to be spread out. Tulips were in better shape. Outside of condition, quality and size are distinctly ahead of last year. This covers all subjects. May-flowering tulips are in larger supply, and judging from advance sales the overturn in these will be phenomenal this year. Named Darwins even are now on the list and go readily even at the high prices asked.

PUBLICATIONS RECEIVED.

American Varieties of Garden Beans.

The U. S. Department of Agriculture has never issued a more useful and practical bulletin than that which has just appeared under the above title by W. W. Tracy, Jr., Bulletin, No. 109.

When we consider that there are over four hundred assumed varieties of garden Beans now grown and cultivated in this country, the value of Mr. Tracy's work in classifying and reducing them to one hundred and eighty-five distinct sorts will be appreciated. Not only has this been done most systematically, but the merits and demerits of each kind plainly stated and the synonymous names of each distinct variety given. The publication of synonyms with the names of their introducers cannot fail to have a restraining influence on those given to the practice of re-naming varieties for purposes of deception or gain. We would remark that the sin of re-christening cannot always be charged to the Seedsmen; we can recall several instances where cultivators have concealed the names of vegetables and fruits in order to prevent their competitors in market or in exhibition obtaining stock of a sort, which they had hoped to monopolize. The descriptions are comprehensive, accurate and impartial. The author makes comparison of each sort with others similar to it, and wherever possible gives its history. The latter part of the book is devoted to half-tone illustrations of seeds, pods and leaves; altogether, the bulletin is a trustworthy handbook on garden Beans, which will be fully appreciated by both grower and Seedman. If anything could be added in a future edition, we would suggest that the Department when another trial is made, obtain through its correspondents a collection of the leading European kinds to be tested in comparison with our own. There are not a few varieties like the Flageolet Blanc, Haricot Riz, etc., that so far as we know have never been fairly tried in this country.

We most heartily commend the work of Bulletin No. 109 and we hope that work on this line will be continued by the Department.

Bulletin No. 1 of the Bureau of Horticultural Inspection, Department of Agriculture of the State of New York, has been received. It has been prepared by George G. Atwood and is devoted to information for orchardists and fruit growers relating to certain dangerously injurious insects and diseases, among which are the various scales, borers, root worms, aphids, gall, blights and rots. The book contains 48 full page plates illustrative of these subjects and the methods followed for their extermination. Every owner of trees should have this volume where he can put his hand on it at a moment's notice. Charles A. Whiting, Commissioner of Agriculture, Albany, N. Y., is the office address.

BEDDING PLANTS: THEIR USE AND ABUSE.

(A paper read before the Society of Iowa Florists, August 28, 1907, by J. T. L. Fulber, Des Moines.)

I shall only speak of summer bedding and carpet bedding, since they are the two most in use in this section of the country.

First, summer bedding, where we use cannas, geraniums, coleus, verbenas, ageratum, salvia, vincas, alyssum, petunias, heliotrope, grasses, alternantheras, artemisia, begonias, dahlias, etc. I should plant but one variety of geranium in a bed, bordering the plants with some of the low-growing plants, as artemisia or Madame Saleroi geranium. Again, never use but one color of cannas in a bed and these should be bordered with some tall growing plant, as grass or salvia. As for coleus, they may be planted two, three or four varieties in a bed, provided each variety is placed in its own division. Coleus should be planted where they may be exposed to the full sunshine as the colors are much enhanced thereby.

For dahlias, I prefer mixed colors in the same bed, for the dahlia and chrysanthemum flowers blend well even when the several shades are used together. Stake dahlia plants up, and do not permit many side shoots to grow as this is a detriment to bloom.

Artemisia is considered one of the best plants, used either as a border for geraniums or in carpet bedding. As to begonias, the only fibrous-rooted varieties largely used for bedding are those of the semperflorens type, of which Elfordii and Vernon are the best. Verbenas should be grown by themselves because they demand much room on account of their trailing habit. Propagation by cutting must be relied on if we would keep the choicest varieties true to type.

In the matter of carpet bedding, I am well aware there is a strong feeling against it by the landscape man; yet, in spite of all his objections, the public are lovers of it, provided of course, it is well done. That it may be seen to the best advantage, it should be placed in sunken areas, as we find it in Mitchell Park, Milwaukee; Washington Park, Chicago; and Fairmount Park, Philadelphia.

Plants best adapted for use in carpet bedding are coleus, alternanthera, stevia variegata, artemisia, echeveria, santolina and sedum. All these, except echeveria, will stand pinching which keeps them at a desired height. When carpet beds are well done, they are very attractive, and since they require technical skill and time they certainly deserve appreciation.

I now turn to the last, and to me the most important part of my paper—the abuse of bedding plants. This may be done, first by placing two or more colors of geraniums in a bed, as red and pink, bordering it with a coleus, which is allowed to grow taller than the geraniums. Or, it may be a bed of cannas of two, three or four varieties, bordered with geraniums and possibly ageratum for an outer border. Again, it may be a large, solid bed of salvia, without any border at all to break the monotony. Still again, it may be a bed of six or eight colors of coleus mixed like "Grandmother's crazy patch quilt."

These are some of the abuses we often see, to say nothing of that abuse which allows weeds and grass to rage rampant, smothering the flowers out.

Last, there is another abuse of bedding plants, the watering can. How often it is used with bad effect, since it merely sprinkles the ground, thus encouraging the roots to come to the surface where they are soon destroyed by the hot sun, whereas, if the ground is thoroughly watered and allowed to dry on top, the roots will go downward in search of moisture and not be susceptible to any hot, dry spell.

CATALOGUES RECEIVED.

F. W. Kelsey, New York—"Nature Menders." "He who plants a garden doth mend Nature."

Good & Reese Company, Springfield, O.—Fall trade list for nurserymen and dealers only. Especially strong on peonies and roses.

Bobbinck & Atkins, Rutherford, N. J.—Autumn catalogue of bulbs for forcing and fall planting, peonies, shrubs, bay trees, palms, araucarias, etc. An interesting book fully illustrated.

P. J. Berckmans Co., Inc., Augusta, Ga.—General catalogues of fruit and ornamental trees and shrubs, evergreens, roses, etc. There are several pages of useful information as to planting, care, insects, diseases, etc.

Conard & Jones Company, West Grove, Pa.—New Floral Guide, Autumn, 1907. A colored illustration of "White Souper" and "Pink Baby Rambler" roses adorns the front cover and a tulip group the back.

J. M. Thorburn & Co., New York.—1907 preliminary trade-list of American tree and shrub seeds. This list is an advance offer of some of the leading sorts, subject to the crop and for immediate acceptance. If interested, send for copy at once. Prices are quoted in shillings sterling.

Easton Nurseries, M. M. Dawson, Mgr., Jamaica Plain, Mass. Fall wholesale trade list of choice ornamental trees and shrubs. Contains the cream of all the hardy garden subjects, also a list or herbaceous material in great variety. The same parties are sending out a pretty little pamphlet on native rhododendrons and mountain laurel, beautifully illustrated.

BABY RAMBLERS FOR CHRISTMAS.

Editor HORTICULTURE Please ask some of your experienced readers the best way to treat Baby Ramblers, so as to have them in flower for Christmas.

BARYMORE.

It takes about nine (9) weeks to bring the Baby Rambler rose into bloom from a semi-dormant state; it is now Sept. 12th—about fourteen weeks until Christmas; this allows about a month from date to dry the plants off a little, in order to get the wood in a hard and ripe condition. In drying the plants off care should be taken not to overdo it; sprinkle them occasionally, just enough to keep the bark from shrivelling. In starting the plants into growth the night temperature for the first three weeks should be kept as near 50 degrees to 55 degrees as possible, after which time the temperature might be increased to 60 degrees to 65 degrees at night; the day temperature may go higher, without injury, provided plenty of air be given.

ROET. CRAIG.

Philadelphia.

TO BLOOM BOUGAINVILLEAS IN SUMMER.

I have a lot of large Bougainvilleas which I desire to use for outdoor decorations in summer, but invariably, with exception of a few stray flowers, they fail to bloom. My way of treating them has been to plant them out in the spring and they make a luxuriant growth. In the fall I cut them back and put them in a house kept at about 50 degrees. They start to grow towards spring and would bloom in the house, but as soon as I transfer them to the open the result is very few flowers. Should be pleased to hear from some one that had experience with said plants for early summer bloom.

R.

CHRYSANthemum MAXIMUM.

Of the several forms of this useful border flower the latest was recently shown at the National Dahlia Show. It is certainly a grand novelty and far surpasses King Edward VII and Top Sawyer. Messrs. J. F. Groves & Son of Cedar Nursery, who exhibited it under the name of Mrs. Charles Lothian Bell, had a long table with vases full of cut blooms of great size. This variety has pure white, broad, massive petals of great length, which are borne on long, stiff stems. It is a profuse bloomer, of compact habit, and lasts from May till October. As a pot plant for decorative purposes it promises to be quite an acquisition.

C. H. P.

London, Eng.

AN EXTRAORDINARY PLUM CROP.

Plums were almost given away at Covent Garden on Saturday, when, owing to the extraordinary supply on hand, the fruit could be bought at 7 1-2d. a bushel. Victoria plums were sold at 1d. for 5 lb., and were still cheaper at the end of the day. The best Green Gages sold at 1s. 3d. per half-sieve, an almost unprecedented price. So great is the glut that thousands of tons of fruit still on the trees will probably be allowed to drop on the ground and be given to the pigs.—Journal of Horticulture, London.

Cyclon. (Very Dwarf). White, suffused with lilac; aniline-red eye in the form of a star.	
Eclairneur. (Tall). Brilliant rosy magenta with large lighter halo; an excellent variety.	
Eugene Danzenville. (Tall). Lilac, shading white towards the edges; large white centre.	
Esclarmonde. (Tall). Lilac marked with white; aniline-red eye.	

HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.

HARDY PERENNIAL PLANTS FOR BEDDING AND CUT-FLOWERS.

A paper read before the Society of Iowa Florists by G. A. Heyne, Dubuque.

This class of plants is coming in for its share of appreciation by both the wholesale and retail florists, and certainly with the general public. Would advise that every retail florist plant at least a dozen sorts of each for cutting and bedding where your customers can see them to make their selections for planting, and also to help sell them as cut-flowers. Of course the stock proper may or should be planted where there is plenty of room for them to properly develop and be kept free of weeds. I do not know of any class of plants outdoors that will, with the small amount of care, give as good returns for the ground occupied.

The list of sorts suited for cut-flowers is about one-third of all the commercially grown varieties. For bedding purposes there are at least half the list available; I mean those that will transplant easily. In bedding, the possibilities of arrangement for best effects are beyond mention. Regarding the soil requirements of these plants, three-fourths will grow in good garden soil. While many recommend the planting of a mixed lot for continuous effect, it is certain that massing of some few kinds will give a more showy effect and also allow for some nice color schemes that could not be had with mixed-up plantings. It also helps keep the stock more pure for sale.

For a few minutes let us go over a small garden, and note some of the most showy ones, all easily grown, see the rose-colored buds of the moss-pink on the terraces; this phlox is very fine for covering graves. Blue bells, *Mertensia virginica* with its changing colors of blue and pink bells, making a fine border for hardy candy-tufts with their knots of white buds ready to open when May has a few warm days. At the foot of yonder rockery are the Gold-tufts, *Alyssum saxatile*, a patch of about twenty plants laid out like a large blanket of gold; a ten-cent packet of seed will give several lots like this bright spot. The tufted pansies or violas make a show to repay for the care of covering they received last fall. In May things have more of a height; though *Iris pumila*, on the knoll, is about the showiest now, the German *Iris* with its broad clumps is showing a mass of buds that are useful for cutting, especially the lighter sorts.

Paeonies of the mutabilis, or officinalis type are out, both pink and crimson. This is a flower coming at a time (Decoration Day) when it is twice welcome, when the season is late.

The Chinese paeonies come next in season. There is a clump of fragrance with its large pink flowers, blooming as regular as clock work. Of this class every florist that sells his own grown products should plant heavily. The selection of sorts deserves being treated as a separate subject; now is the time to plant.

A MODERN FLOWER STORE.

NEW FLOWER STORE OF S. HOFFMAN, BOSTON, EXTERIOR

We take pleasure in showing herewith views in the new flower store of Sidney Hoffman, on Commonwealth avenue, Boston's most beautiful residential thoroughfare, at the junction of Massachusetts avenue. A shop of moderate size has been conducted there by Mr. Hoffman since such a

given up by Morton Bros., and with such success that he has now taken the entire front of the building, on the ground floor and basement, and the new establishment was opened to the public last Saturday. It is one of the most attractive and convenient establishments in the country and a credit to Boston.

NEW FLOWER STORE OF S. HOFFMAN, BOSTON, INTERIOR

August is the time to plant Oriental poppies; try a clump of a dozen plants. To make a fine yellow scheme, plant *Heliopsis Pitcheriana* in background, *Gaillardia grandiflora* in middle, and *Coreopsis lanceolata* around edge; the last are all fine for cutting.

If more height is wanted add several clumps of Golden Glow *Rudbeckia*; they certainly grow anywhere and will give flowers by the armful. *Achillea* the Pearl, a most useful plant for cutting, makes better plants if divided every two years. *Gypsophila paniculata* is indispensable as a cut-flower. The hardy phloxes of the newer sorts make a fine display, and should be planted liberally; best time is spring, as the shoots appear above ground; give them

plenty of room between rows. Spring-propagated stock blooms later. The hollyhocks are showing more resistance lately to that dreaded disease. A hardy border is hardly complete without the hollyhock in it; the single sorts hold up better than the doubles.

Foxgloves must not be forgo ten. They are very stately in the hardy border. It is advisable to winter some stock inside, or at least give the protection of a cold frame. Would also recommend this treatment for the following: *Bellis perennis*, *Primula vulgaris*, *Campanula*, *Scabiosa*, *Tritoma*, *Snaydragon*, *Forget-me-not* and *Hollyhock*. This applies to young stock in particular.

Regarding Elies my experience has

thoroughly convinced me of the unusual chances of blooming some of the sorts offered every year. All told, about a half-dozen will repay any care. Would class about this way: *Lilium candidum* and *speciosum album* for white, *roseum* and *rubrum* for colored and *auratum* for spotted; of course including *cligrinum*, single and double, as ironclads; the last two cannot be beaten for hardiness. Of some sorts like *pardalinum*, *umbellatum* or *Parryi*, the chances are one in two or worse; the commercial florist will get no returns worth mentioning out of the other sorts offered.

The following is a list of hardy perennials most useful for cut-flowers. There are a few other sorts that might be mentioned, but these listed will give best results:

Achillea the Pearl, *Asclepias*, *Aster* hardy, late; *Bellis*, *Chrysanthemum*, both summer and late sorts; *Clematis paniculata* and *recta*; *Convallaria*, *Aquilegia*, *Gaillardia*, *Coreopsis*, *Gypsophila*, *Helianthus*, *Heliopsis*, *Iberis*, *Iris* German and *Kaempferi*; *Lilium*, *Lychnis*, *Paeony*, *Phlox* hardy; *Pyrethrum*, *Rudbeckia*, *Spirea*, *Solidago*, *Wall-flower*, *Valerian*, etc.

With those above, recommend the following for massing and bedding, also for specimen clumps:

Alyssum, *Anthericum* in variety, *Aquilegia*, *Anemone*, *Artemesia* in variety, *Astilbe*, *Bocconia* in variety, *Boltonia*, *Caryopteris*, *Campanula*, *Centaurea*, *Clematis*, *Delphinium*, *Dianthus*, *Dictamnus* in variety, *Dielytra*, *Digitalis*, *Funkia*, *Hemerocallis* in variety, *Hepatica*, *Hollyhock* in variety, *Hypericum*, *Iris*, *Lobelia*, *Linum*, *Pentstemon*, *Plumbago*, *Primula*, *Salvia*, *Santolina*, *Saxifraga*, *Sedum*, *Spiraea*, *Tritoma*, *Vinca*, *Viola* and *Yucca*.

INDIANAPOLIS ACTIVITIES.

E. T. Barnes, a dahlia specialist, will give a dahlia show at Bertermann Bros., retail conservatory, Indianapolis, Ind., on Sept. 26. Some 500 varieties of dahlias will be shown. The local florists anticipate the organization of a dahlia society of the middle west in the near future. A club composed of florists and employees was organized at A. Wiegand & Sons Sept. 11th. The purpose of the club is social and athletic only. Officers were elected and so far forty-five names have enrolled. The club meets the 2d Wednesday each month. G. B. W.

FLOWER MARKET REPORTS

BOSTON

Very discouraging conditions prevail in the wholesale market this week.

Short-stemmed roses, asters, gladioli, etc., are coming in to the wholesalers in unwieldy quantities and are unloaded with great difficulty, the shore trade being entirely at an end and no other outlet offering at present. Even lily of the valley, which had been selling well, now drags badly. Carnations are coming on all sides, but with short stems, and as asters are an avalanche still, the carnations create but little interest. Not until frost or some other factor puts a quietus on outdoor material can the greenhouse crop look for much improvement.

The time has come again when business is brightening or "picking up."

BUFFALO

Weddings, fall openings, home comers and a sprinkling of floral work kept the retailer busy the past week. Flowers of all kinds have been plentiful enough, but at times certain lines were a little short in supply. Asters of the best quality find ready buyers, but the short stuff remains with the wholesaler to carry along until life vanishes. The same may be said of gladioli, only the mixed colors with long stems don't move; the solid colored varieties in light shades are most in demand. Some excellent yellow (canary) are seen. Good carnations are scarce. Beauties, Richmond, Carnot, Kaiserins, Detroit are fine. Brides and Bridesmaids are improving daily but short in stems. Lily of the valley has been very active and good quality to be had. Dahlias have made their appearance but no demand whatever. Violets, southern smilax and all greens sold well.

CINCINNATI

Business is improving as fall approaches but thus far the demand has not settled down to any degree of regularity. The market is badly over-stocked with flowers of an inferior grade, while first class stock is bringing a good price and sells on sight. In roses Beauties are in the lead; teas are small and short-stemmed. Lilies are fine and the supply is not equal to the demand. Lily of the valley is good and ought to sell better than it does. A few violets have made their appearance but as they are not up to the standard most of them are consigned to the barrel. The public is tired of asters and gladioli and we now await the coming of chrysanthemums and cool weather.

INDIANAPOLIS

The market is beginning to tone up for the busy season. Trade is better than a year ago and more customers are calling for a better grade of stock. An abundance of good outdoor stock is to be had but there is a scarcity of good roses. All varieties of lilies, asters and gladioli have been the best ever seen here, and prices have held up well. The rose and carnation growers report their plants as in excellent shape and some exceptionally good stock is looked for.

NEW YORK

Heavy supplies of all kinds of flowers are reaching this market, some shipments being of excellent

quality—others quite the reverse—but all obliged to face unpromising conditions, for the market is totally unable to digest the enormous receipts. Prices fluctuate on the high grade goods from day to day according to the exigency, but on the other material, both outdoor and indoor, the basis of valuation is "get what you can."

PHILADELPHIA

Market features less this week, with a slight improvement in spots and a tendency toward better conditions both as to qualities and demand, as cooler weather approaches. Meantime there is much good stuff coming in. The distributors are working harder at present than at any time during the year, and have less to show for it than at any previous season. Beauties are gradually improving in quality and there are some very fair Killarneys and Kaiserins. Carnations sold well latter part of week, but the demand is spasmodic on account of the big supply of choice asters which in most cases are preferred. Gladioli are nearing the end and demand improved. Easter lilies are in fair supply and find ready sale. Lily of the valley is of good quality but demand not brisk. Smilax is selling better. The asparagus men ought to hold off a little. This stock will go better later. New green galax is in. Bronze scarce; no new before December 1st. Tritonias have the call among outdoor subjects. Dahlias improve daily both in quality, quantity and demand.

WASHINGTON

Business for the past week has been better than for some weeks. Everything has moved better in the cut flower line. There is a glut of asters, especially those of second grade quality. Pond lilies are things of the past. The cool weather is improving the quality of roses and some fine Cochetts and Kaiserins are coming in. Dahlias are also coming in rather plentifully but are not of sufficiently good quality to command first-class prices.

OBITUARY.

John Waggoner, florist, of Portland, Ind., died suddenly on September 4, aged 69 years. A widow, one daughter and four sons survive.

Oswald Amies, florist of South St. Louis, Mo., was seized with a dizzy spell while waiting at the ferry landing at East Carondelet and falling into the water was drowned. The body was recovered on the following day.

Flint S. Kennicott, president of the Kennicott Bros. Company, and pioneer of the wholesale cut flower commission business in Chicago, died suddenly of heart failure on Sept. 9. He was 59 years of age and is survived by a widow and two daughters and one son. The funeral on September 11 was attended by the Chicago Florists' Club in a body, and the wholesale houses were all closed for the time being.

PHILADELPHIA NOTES.

Edward Rieger, fresh from his European travels, was a welcome visitor among the wholesalers on Monday.

A. E. Wohler, late of Bala, has moved to Merion, the new location being a part of the old Simpson property. He will devote himself exclusively to outdoor work, his brother Emil having taken up the greenhouse end and located at Swarthmore.

Liddon Pennock, of Pennock Bros., has been making expensive improvements on the old homestead at Lansdowne this summer, and will reside there when the operation is completed.

Latest reports from Samuel S. Pennock and family locate them in Wales, and all well.

A novel feature of the Michell bulb display this fall is a collection of various sized Dutch clogs in which hyacinths, tulips, daffodils, etc., are shown.

J. Otto Thilow and J. D. Eisele of Drees's sailed on the Frau Prinzessen Victoria on the 17th inst. for a month's pleasure trip through England and Germany. This is Mr. Thilow's maiden trip across the Atlantic. G. A. Strohelein arrived home from a business trip through Europe on the 16th.

PERSONAL.

Visitors in Boston: Mr. and Mrs. John H. Taylor, Bayside, N. Y.

William Paul, florist, of Springfield, Mass., has just returned from an extended European tour.

J. E. West, gardener for G. L. Cains, of Montreal, has returned from a six weeks' holiday in England.

John Berry, superintendent of Monument Valley Park, Colorado Springs, Colo., was general manager of the flower department of the State Fair at Pueblo last week.

Jules Vacherot, vice-president of the National Horticultural Society of France, and chief gardener of Paris, has arrived in New York, and will remain in this country until the end of October.

Mr. and Mrs. J. B. Heiss, of Dayton, O., have returned from a very enjoyable trip through Europe, on the S. S. Kronprinzessin Cecilie. Mrs. Heiss is quite enthusiastic about the florists' window decorations all over the Continent, especially in Germany.

William Allen, for a long time assistant superintendent of Mt. Auburn Cemetery, Cambridge, Mass., has been appointed to the position of superintendent of Homewood Cemetery, Pittsburgh, Pa., to succeed the late Mr. Woods. Mr. Allen is a Welshman, who learned his profession of gardener before coming to this country. His first employment here was under James H. Bowditch of Boston, landscape engineer.

Pennsylvania, Sept. 14, 1907.

Dear Sir,—Allow me to congratulate you upon the manner in which you handled copy in connection with the recent convention in Philadelphia, and I would also like to acknowledge particular pleasure in the notes you publish from the other side of the water.—E. P.

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commissions paid on advertising and subscriptions. If you are ambitious, write for terms.

SITUATIONS WANTED

SITUATION WANTED—German, by a practical cut flower and pot plant grower, also experienced in landscape gardening, vegetables, etc., 35 years of age, married, two children. Sober, industrious and reliable in all branches; best of references. Address, L. L., Box 67 Johnsville, Dutchess Co., N. Y.

SITUATION WANTED on private place. Thoroughly capable of taking charge and growing all fruits, flowers and vegetables usually required on a gentleman's place. Apply to Alex. Montgomery, Waban Rose Conservatories, Natick, Mass.

SITUATION WANTED—Young man, single, seeks situation as fern raiser and grower. Several years' experience. Good references. Address J. C. Wams, Verdun Post Office, Montreal, Canada.

SITUATION WANTED by gardener with good record, private place preferred. Married, two children. Address N., care HORTICULTURE.

SITUATION WANTED in general greenhouse work; single, age 35, five years' experience, commercial. Address W. W., care Horticulture.

WANTED. Position as manager of plant and fern growing establishment. Experienced. L, care HORTICULTURE.

FOR SALE

FOR SALE—20,000 feet of land, two greenhouses 20x60 and 12x50 respectively, with nice office; dwelling with six rooms and bath, with good will of greenhouse business. Five miles from Boston. Three lines of cars pass the door. Address Rob. Care Horticulture, 11 Hamilton Pl., Boston.

FOR SALE—A retail florist store situated in the town of Union, N. J. Excellent opportunity for right party to secure a good paying business. Reason for selling; am going into the undertaking business. Terms reasonable. Address, William Schumann, 223 Bergenline Avenue, Union, N. J.

STOCK WANTED

WANTED—Aspidistras, green and variegated in exchange for orchids and stove and greenhouse plants. Address, Aspidistra, Care Horticulture.

MISCELLANEOUS WANTS

WANTED: A second-hand Hot Water Boiler of 500 or more sq. feet direct radiation capacity; also second-hand two-inch and one and one-half-inch piping and fittings, suitable for heating a greenhouse. E. M. Ingalls, 43 Whiting St., Lynn, Mass.

BETWEEN YOU AND ME, What do you think of the Buyers' Directory and Ready Reference Guide of HORTICULTURE? I always look it over before I do any buying

BORDEAUX MIXTURE.

It may seem that the subject of Bordeaux Mixture has been pretty thoroughly considered, but so many questions are constantly sent to experiment stations and publications in regard to its manufacture and use that a discussion may not be out of place.

Its Discovery.

In all bulletins and articles published on plant diseases, Bordeaux Mixture plays a very important part in the recommendations for treatment. It was accidentally discovered in France in the little town of Bordeaux, about 1832, by a man named Millardet. He was losing many of his grapes near the road from depredations of passers-by, so to protect them he covered the vines with a coating made of copper sulphate and lime. In the fall there was such a noticeable difference, in amount of mildew, between those treated rows and the rest of the field that he observed it. By further experimenting, the value of Bordeaux Mixture was discovered.

Its Composition.

As ordinarily prepared, Bordeaux Mixture is a thick, sluggish, bluish liquid composed of copper sulphate and lime carried in water. The fungicidal value comes from the copper, one-millionth part being often sufficient to destroy plant life. If the copper sulphate (commonly called "bluestone") is dissolved in water it will have the same effect as the mixture, but it has the disadvantage of being quickly washed off the trees, and furthermore, has a tendency to burn the foliage, especially where large drops collect. The lime in the Bordeaux Mixture, on the other hand, forms compounds which act as carriers and retainers, liberating but a little of the copper at a time. As a very small quantity is all that is needed, a good

Making Bordeaux Mixture and a Hand Pump for use in Small Orchards.

coating will last through several very heavy, prolonged rains. And the lime prevents burning, thus doing away with the second objection.

An amateur perusing technical bulletins dealing with this subject is very likely to become confused over the large number of formulas, different ones often being mentioned for the same purpose. The 5-5-50 may be considered the basis of them all. This means five pounds of bluestone and five pounds of lime to fifty gallons of water. For different plants and different diseases this is changed to some extent. For instance, dormant trees can stand a heavier dose than those in full leaf. The peach is more liable to suffer from an ordinary formula than the apple or pear, and this susceptibility has to be taken into account. Some men overcome this by adding an excess of lime, others by using less basic material. And so it goes. A carefully made formula may safely vary a little provided there is an equal or excess amount of lime. A weak one carefully made and well applied will give better results than a strong formula hastily put together and carelessly squirted on.

It seems a very easy matter to put copper sulphate and lime together in water, but the actions which take place are very complex, and in fact, not well understood by the chemists. In general, the lime which is calcium hydroxide, has a stronger affinity for copper than the sulphuric acid, and when the two ingredients are put together calcium copper hydroxide comes down as a soft, light blue precipitate while some of the lime is given up and unites with the acid to form calcium sulphate. But there are a number of minor changes, especially with impure materials. A knowledge of these is not important, only in so much as they show the need of very thorough methods to insure a proper mixture.

Its Preparation.

The preparation of the 5-5-50 formula will serve as an illustration. Let us suppose we are to make a hundred gallons of prepared spray. Good lumps of unslaked lime are secured, the best coming from the centre of the barrel. Ten pounds is carefully weighed out (twice the amount called for in the formula, for the hundred gallons), and placed in a bucket or half barrel. It is then carefully slaked by adding water, using only enough to keep the mass dampened and repeating frequently to prevent burning. When thoroughly slaked the lime should be pasty, a little rubbed between the thumb and finger giving no sensation of grit or coarseness. When this is obtained, a very good Bordeaux can be made. Meanwhile the ten pounds of bluestone should be dissolving. It can be put in the night before if so desired. A quick way is to put the bluestone in a burlap bag and suspend this in a barrel or tub. No metal receptacles will do, for the copper corrodes most of the common kinds. Hot water will also hasten dissolving.

Just previous to using the Bordeaux mixture, one-half the lime is placed in a barrel and diluted with clean water to twenty-five gallons. One half the bluestone water is also brought up to twenty-five gallons in another barrel. Then by pouring the lime water and bluestone solution simultaneously pail by pail through a sieve into a third barrel a complete Bordeaux Mixture will result, which will stay in suspension and give the best results when

Spraying for Scale with a Power Outfit.

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
 Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
 Yours very truly,
 GEO. A. SKENE.

Florham Farms, Madison, N. J., December 8, 1906.
 Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
 Yours truly,
 A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

ANDREW WILSON, Dept. 8,

SUMMIT, N. J.

sprayed on the trees. This scheme is for use when the receptacles are barrels. If the spray tank holds a hundred gallons, all the lime and bluestone can be brought up to fifty gallons each and then drawn directly into the tank. Stock solutions of lime and bluestone may be kept on hand. They will do as well as freshly prepared material, if the lime doesn't dry out enough to crack. The addition of water from time to time will prevent this.

Its Use.

In spraying, a nozzle which throws a very fine mist is the best such as the Bordeaux or Vermorel. The material should be kept constantly stirred and driven through the pipes with a high, steady pressure.

When arsenicals are used, they may be carried in the Bordeaux Mixture without impairing it. If Paris green is used a slight excess of lime should be put into the original formula.

Benefit from spraying will be in proportion to the care in preparing the material, thoroughness in spraying, and time of application. Different diseases require different treatment, but the correct data can be obtained from government or experimental station bulletins and reports, or from the various horticultural and agricultural magazines.

Its Limitations.

Bordeaux Mixture is a preventive and not a cure. The spores of a disease are carried by water, wind or insects to the plants. When these minute "seeds" come in contact with moisture they germinate, and, if nothing prevents them, enter the tissues of the plant. When Bordeaux Mixture is present the copper poisons the sprouting germs, causing them to shrivel up and die. Once within the host they are beyond reach, and so the spray must be on before the germs start to grow. However, if infection has started further spraying will prevent damage on uninoculated parts.

While not a panacea for all ills Bordeaux Mixture has a wide range of usefulness, and the grower of a few plants or trees troubled with disease can secure just as good results as the owner of acres.

HEATING THE GREENHOUSE

thoroughly and economically during the coming Winter is the problem now engrossing the mind of the Florist who takes time by the forelock.

I am in a position to help you to the best solution of this problem, I have done it for others, I can do it for you.

It will be to your advantage to consult me and get quotations on your heating plant either erected complete or for material ready for erection.

I have the largest line of C. I. and steel greenhouse boilers on the market and can give prompt shipments.

WRITE ME TO-DAY.

H AND C

EASE OF THE OLD STAND-BY

EVER STOP TO THINK that when you buy a boiler, it is good sense to get it of a firm of long standing and a surety of their continuing in business? You see some day your grate will burn out or a casting break, and it would be a pretty expensive proposition if they couldn't be replaced without going to a foundry and having a special casting made. Be on the safe side and buy the Hitchings & Co. Old Standby, "The Corrugated," or our new friend, "The Greenhouse Sectional." Send for Catalog.

HITCHINGS AND CO.

1170 Broadway,

NEW YORK.

SASH

Yes, sash — the kind of sash that last. Not those twisty, loose jointed affairs, but all cypress frames with double shoulder mortise and tenons held by barbed steel dowel pins. Then through the center, from side to side, runs a round steel rod supporting the bars, and binding and strengthening the entire sash. They can't be beat at any price. Send now for descriptive circular.

We make every part of a greenhouse but the glass. We sell any part.

Lord & Burnham Co., Greenhouse Designers and Manufacturers. New York Office, 1133 Broadway, Corner 26th Street. Branches: Boston, 819 Tremont B'd'g. Philadelphia, 1215 Filbert Street.

Compare this in your mind with other houses built other ways.

THEIR EQUIPMENT

You can well imagine the effect and perfection that the brilliant aluminum finish gives to all the steel parts, — well, then, so much for pure effect — now for durability. These plant beds shown have slate sides, tile bottoms and galvanized iron frames, making an indestructible bench and one with perfection of drainage. That ventilating apparatus is stripped of all needless parts and brought down to a simple, accurately machined, powerful appliance that works with great freedom. You see from the cut what a wonderfully light convincing construction the combining of the roof bar and rafter in one makes. Why the U-Bar house is the light enduring house it is. Send for the Catalog.

Autumn Tints in Trees and Shrubs

Probably above all others, this country is favored in the possession of a large list of trees and shrubs which gladden the landscape with their brilliant coloring in the fall, and also in having climatic conditions which favor in a marked degree the bringing out of such colors to a high state of perfection. In Great Britain this yearly transformation cannot be so sanguinely expected as is the case in this country, for one is not so sure there of a dry sunny autumn which from general observation seems to be conducive to the production of the beautiful coloration during the period of those mysterious chemical changes taking place within the leaf of the plant.

Again, it seems that a too vigorous growth due to an exceeding wet summer or a very rich soil makes a good display in the fall less likely, especially should a wet summer be followed by a dull fall, but, with the weather as we generally get it here, a vigorous growth means a greater wealth of color and year by year we look forward with delight to the transfiguration which comes over many of our deciduous trees and shrubs even though we know it betokens for them the coming sleep of winter. First and foremost among trees noted for their fine colors we must place the oaks, not because there are no others that possess even more striking shades, but there are none which retain their leaves for so long a time after the color has been acquired, and what finer sight could be desired than the scarlet or the pin oak when in their autumn glory. The Sweet Gum (*Liquidambar styraciflora*) and the Sour Gum (*Nyssa multiflora*) are also a worthy pair with their dull red burnished foliage.

Trees furnishing yellow tints are not lacking, for the elm, birch, tulip tree, horsechestnut and a few of the large maples, as the Norway, sugar, and the European sycamore maple, all add their individual beauty. Touching on maples, what is more beautiful than the several varieties of Japanese maples, charming are they from the time they unfold their tender foliage until, tinged with their dying color, the leaves drop one by one, the effect being heightened when a group of them is backed up by some graceful growing evergreen.

Quite a few more trees might be mentioned as possessing autumnal beauty in a greater or less degree, but the shrubs claim a share of our attention, for among these, too, we have some rich colors, as in the sumachs, all of which afford a wealth of warm color to the landscape and for this reason large plantings are made on many estates of *Rhus typhina* and *R. glabra*. Among the lower growing shrubs few can surpass the little *Berberis Thunbergii* in its persistent beauty in the fall and if only for this it will surely remain a favorite with everybody. The mollis section of the azaleas, though fleeting in their autumn beauty, gives us some rare shades in crimson, red and gold, as also do their near allies, *Vaccinium corymbosum*, while another pretty little shrub is *Fothergilla alnifolia*.

A few of the viburnums acquire attractive colors, as *viburnum opulus* and *cassinoides* while the tiny foliage of *Spiraea Thunbergii* though transitory, is very pretty when it puts on its autumn garb. The brambles, *Rubus fruticosus* and varieties also may be mentioned as affording charming effects planted in wild positions where little else would grow and rewarding us generously in the fall with shades of coloring which ought to raise them higher in our esteem.

Lastly a word for some of the vines which all through the summer make beautiful many an otherwise rough and uncouth view and assume rare hues for several weeks in the fall. Of these none is more beautiful than the general favorite *Ampelopsis Veitchii* which even at this early date is commencing to bronze, a sign of the coming of fall. The Virginia creeper, though perhaps not quite as good as the former, is very showy, however, while *Vitis Coignetiae* with its large ornamental foliage and *Vitis Thunbergii*, both of which are not so often seen in this country as they should be, are a sight not easily forgotten, assuming as they do a rich crimson coloring, and when at last "The melancholy days are come and heaped in the hollows of the grove, the autumn leaves lie dead" we cannot forget that they were once beautiful.

Edwin Matthews.

A Few Remarks on Phlox Decussata

At first sight the *Phlox decussata* is perhaps as easy to cultivate as any other hardy plant, but it is a plant that when once in the garden is very much neglected, to its detriment. How many dealers have experienced complaints from their customers, that their phloxes are not as handsome as they were, they are deteriorating, that the spikes and individual flowers are smaller, which shows neglect in some form or other.

There are three good reasons for this backward tendency: First (not often seen), is want of sufficient nourishment; second, they have been too long in one bed; and third, let me emphasize the point strongly, the growth is never thinned out. The best time to do this thinning is when growth is one or two inches high. There are sure to be a number of weak shoots; do not cut them off, but pull them up—if you cut them they will branch and grow again.

Another complaint that frequently comes forward is, "Why do my phloxes mildew?" It is this failing to thin out the shoots when young that probably causes mildew about flowering time. How can they help becoming unhealthy, with so many more stems to feed than the plant can conveniently look after, so that when hot, close days come there is no proper circulation of air. I do not say you will not have mildew if you follow above, but there is decidedly less chance of it.

A splendid preventive for mildew is a peck of lime and half a pound of sulphur. Slack the lime and apply sulphur at the same time. When well mixed, place in a vessel sufficiently large enough to allow of four or five inches of clear liquid after settling. Let stand for two or three days. One part of the liquid to eight or ten parts water is strong enough. Use about twice a week. Stir well and fill up mixture after using each time, and it will last all summer.

Another trouble frequently met with, is the mistaken idea that a phlox bed gradually degenerates to ugly magenta shades. This, of course, is caused by allowing seeds to fall in the bed, and as the ugly colors are always stronger than the pretty ones, the result is inferior varieties eventually predominating. To remedy this, cut off the flower heads as soon as they are through blooming, but do not cut them down to the ground. Take off only the flower head, and you will probably have another season of blooms before frost. Phloxes do well in any position, and in any kind of soil, although a prepared bed similar to that usually made for roses is the best.

When planting do not mix the colors, but plant in as large masses as possible of one kind or color. Fifty or one hundred in a mass will make the finest show imaginable, but it is better to have one variety, rather than one color in several varieties, in a mass, as the flowering season varies from one to three weeks.

There are a large number of named varieties of Phlox decussata catalogued by a number of firms, and each firm naturally considers their own collection the best, and yet I think you will agree with me, that if twenty-five or thirty varieties were selected from every one offering them, all different names, when in flower, the same number of varieties would be all you would need.

In view of this fact I will not attempt to enumerate what we consider the finest varieties, conflicting as I may with other opinions. But let me give one word of advice to those who are all the time introducing new varieties, and that is, do please avoid flat-headed spikes. They spoil any form that the phlox is noted for. Not only are they insignificant, but they do not seem to last in bloom nearly as long as the others, such varieties as Lumineux, Lord Rayleigh and Mars le Tour.

Follow, rather, the old standards, with their enormous conical shaped spikes like Saison's Lierval, General Chanzy, and that splendid late flowering variety, so seldom seen, Coccinea.

Frederic J. Rea.

Characteristics of the Ginkgo

Editor HORTICULTURE.

Dear Sir:—I have been very much interested in the various communications you have published regarding the Ginkgo tree. It has been used very freely in this cemetery as it is not only graceful in appearance and immune from pests, but because it is one of the few trees which do not stain marble.

I presume my friend Robert Cameron having his time occupied in classifying "Job" has not had time to write you on the question of how far apart the seed bearing tree may be from the male species and yet be fruitful. Three years ago the Ginkgo trees at the Botanic Gardens bore fruit, and the nearest male tree was in Mount Auburn Cemetery, about a mile away as the crow flies. At that time it was stated that through investigation by the Japanese horticulturists it was found that the trees were fruitful if not over a mile and a quarter apart.

Respectfully yours,
JAMES C. SCORGIE.

Mt. Auburn Cemetery, Cambridge, Mass.

Zonal Pelargoniums for Winter Flowering

Although geraniums are very showy when artistically arranged for summer bedding they are fast becoming obsolete and have, to a large extent, given place to the more interesting herbaceous plants.

On account of the fact that the single geraniums are more continuous in flowering and can be had in attractive condition during the duller months of the year they are admirably adapted for winter flowering and relieving a strain upon the resources of an establishment when relief is most needed.

The old saying that anyone can grow a geranium is infallibly a false one. Almost every gardener grows more or less of these plants and we very seldom find a good display of winter flowering pelargoniums.

CULTURE

The best time to propagate these plants is in the fall, for winter flowering, securing short jointed firm wood, rejecting all those which are gross and sappy, also avoiding propagating too many varieties. Five or six good harmonious colors are sufficient.

When the cuttings have formed roots, pinch out the points. In a few weeks fresh growth will appear and will require repotting. Firm potting is imperative, otherwise sappy and unfloriferous wood will be the result. Continue pinching the points out at every second or third joint until the latter part of August; by this time they will be in their flowering pots and six to seven inch pots will be found the most servicable for winter flowering.

During the summer the plants should be plunged in a sunny position out-doors to secure short jointed firm wood and frequently turned to prevent the roots from going outside the pots. Young plants invariably give the best results, always provided they are not allowed to weaken themselves by flowering throughout the summer.

TREATMENT

Until near the time for housing, which should be about the end of September, pinch off all the flowers. After housing give ample room—this is an important point—and avoid excess of heat and moisture as this promotes sappy, flowerless growth. They require a temperature ranging from 50 degrees to 55 degrees, with rather a dry atmosphere, with the addition of a weekly supply of liquid manure.

When the flowers begin to open pinch off the first two or three flowers, otherwise the center flowers of the trusses will be past before the truss is fully expanded and a space in the center will be left.

Under this treatment no tying or unsightly stakes will be required and the plants ought to produce abundance of perfectly formed trusses and continue flowering for a considerable time during the duller months of the year.

Andrew McKendry

British Horticulture

HONORS FOR HORTICULTURISTS

The Royal Horticultural Society, a few years ago, established a commendable method of recognizing horticulturists who have distinguished themselves in any special branch. Each recipient is presented with a Victoria Medal of Honor, and the number who are the bearers of this distinguishing mark is limited to 63. The Council of the Society have lately filled these vacancies caused by death amongst this distinguished group by the appointment of Sir John T. D. Llewelyn, Bart., Henry Ballantine and Alexander Dickson. Sir John Llewelyn has for many years taken a keen and active interest in horticultural matters, and he is one of the vice-presidents of the Royal Horticultural Society. He is also President of the National Potato Society. One of the most popular potatoes in commerce bears his name. Mr. Ballantine is orchid grower to Baron Sir Henry Schroder, whose brilliant orchid displays are the delight of visitors to the principal shows of the Royal Horticultural Society. Alexander Dickson is a member of the firm of Messrs. A. Dickson & Sons, Newtownard, Ireland, who have gained wide-spread renown as successful rosarians. Mr. Dickson is a member of the National Rose Society's Committee. The firm's new roses are always the cynosure of admiring eyes at the National show.

THE VALUE OF SPRAYING

In the course of an interview on the spraying of fruit trees, W. E. Collinge, a well known expert, of the University of Birmingham, stated that this practice dates back to the early part of the 16th century, but it was only within comparatively recent years that it has been placed on a sound and scientific basis. As a result of various equipments Mr. Collinge has perfected two fluids which he terms V1 and V2. During the approaching winter he hopes to see thousands of fruit trees sprayed with V1. He intends to personally superintend some of these, and, if necessary, will find the means to defray the cost. Mr. Collinge states that he is perfectly certain of the results, and that they will establish once and for all the practice of winter spraying as an ordinary farm operation. Questioned as to how we stand in this country as compared with the United States, Mr. Collinge said we were very much behind the American fruit growers, who have a magnificent Department of Agriculture at their back, in addition to the various State Experiment Stations. He added, "We are certainly moving rapidly and I hope in future to see the establishment of experimental farms with laboratories attached, so that investigation can be made, and conclusive evidence tabulated on the spot." Mr. Collinge has certainly endeavored to make up for the deficiencies of the British Board of Agriculture.

A FAMOUS ESTATE

The gardens at Madresfield Court, Malvern, belonging to Earl Beauchamp, are noted for their charming features, many of which have been developed by Mr. Crump, who for the last 25 years has been in charge. Great attention is paid to fruit culture. In a nursery of about four acres, fruit trees are raised in quantity and distributed gratuitously to Lord Beauchamp's farm and cottage tenantry, in standard and bush form. About two thousand trees per annum are dealt with in this manner, and though apples predominate, pears, plums, cherries, apricots, currant and gooseberry bushes are also distributed. A trial ground has been set apart to test the varieties suitable to the district before propa-

gation. There are no less than 250 varieties of apples, 80 varieties of pears, 60 of plums on trial at the present time. Any tree that fails to realise three marks in nine years is at once discarded, and replaced by a new one. Of the later introductions in strawberries, Mr. Crump considers that Laxton's new Progress stands out with superiority, owing to its good constitution. Gooseberries, and red and white currants are grown in Y-shaped cordons, each tree with four branches or cordons, trained to iron wire and sticks vertically.

W. H. Adsett.

Eurya Latifolia Variegata

This old greenhouse plant is one of the most useful in cultivation, and the demand is greater than the supply. The difficulty experienced in propagating has prevented its taking equal place with *Araucaria excelsa* and *Ficus elastica* as a hard commercial plant worth growing in quantity. The selection of variegated plants with a constitution is somewhat limited, as variegated stove and greenhouse foliage plants are liable to functional weakness when exposed to extremes of temperature. *Ficus elastica* variegata is an example, undoubtedly a good plant to look at, but it is common knowledge how inferior it is to the type on account of the spotting of the variegation; heralded as an acquisition and propagated in immense quantities it has failed to fulfil expectations, the law of the survival of the fittest working with urgency in commerce as in nature has fixed its place as suited for the intermediate house but not for rough decorative purposes.

Eurya latifolia variegata is without these defects and there are few plants that will emerge from rough treatment with a more presentable appearance. Especially is it suitable as a window plant for cold rooms, growing into a nice specimen in a few years. The secret of success in propagating is to take only small cuttings when growth is starting, putting them in pure river sand in well drained pans; after two months when callous has formed, pot into thumb pots in fine peat and sand, filling the hole for cutting with sand and potting firmly, afterwards plunging in case again in gentle water with care but syringe daily; see to it that the case does not get hot, by shading heavily, or cuttings will shrivel beyond recovery. If the above method is followed 45 per cent. should strike. There will always be a few which form a hard callous but which will never root and after three months they may safely be thrown away. The young plants may be grown on in a cool house, syringing frequently to keep down thrips. Stake up the leader and prune side growth to form shapely plants and in 18 months they should be nice salable stock, but if grown on they are always useful and make good prices as specimens for decorative work. In every way it is a plant worth more attention and if it be urged that its propagation is too slow and baffling for the man in a hurry, do not attempt it, but if one can wait awhile and attend to the trifling details so necessary to good propagating, success is simple and sure. "Trifles make perfection and perfection is no trifle" is equally as true of raising plants as of building monuments.

drought and heat for two or three weeks in mid-summer and yet find smiling brightly on him when he returns is the kind that will win the appreciation of the ordinary type of present-day amateur, and here the annuals such as we mentioned are efficient auxiliaries of the seedsman and plantsman making friends for him where, without them, he would surely be discontent. We might add to the list of tough annuals suitable for low borders and bright bedding effect under unfavorable conditions of weather and attention, the dwarf Phlox Drummondii, verbenas, Zinnia Haageana, single dwarf French marigold, larkspur, acroclonium, rhodanthus, balsam, Dianthus, chinensis, erysimum, eschscholtzia, argemone, coreopsis, schyzanthus, mignonette, nigella and all the mesembryanthemums and similar "fleshy" material. It is a fact not as well known as it should be that the dwarf sweet peas will stand drought and continue full of flower long after the tall-growing types have succumbed. They are extremely pretty, too, as border plants, although not of much use for cutting because of lack of sufficient stem. These observations are the direct result of the exceptional summer through which a large section of the country has just passed. In times of adversity it is as true with plants as with men that faithful friends are proven.

A means of popular education

The Shrewsbury Show, Shropshire's great annual floral and musical fete, according to accounts which we have received, has again demonstrated the mighty possibilities in an affair of this character under clever management. Even our British cousins, given to condemnation of the American propensity for bombastic expression in describing its glories, find themselves obliged to resort to the stock phrase of America's celebrated showman and bestow upon it the title of "The greatest show on earth." And when we read that the attendance on the second day approximated 70,000 persons—a figure more than double that of the population of the town—that the premium list, exclusive of cups and medals amounted to \$6000 and that the entries reached nearly five thousand, it cannot be denied that the claim is not without foundation. It is freely acknowledged that the various side-shows and sporty features of the fete are potent factors in its success and that the bands and fountains and spectacular diversions have a strong influence in drawing the vast attendance which this far-famed exhibition enjoys. We see no reason for adverse criticism on this account any more than we see in the merry games that have become a factor in enhancing the interest and attendance at the summer meetings of our own S. A. F. John Westcott's favorite saying that "to make a successful school you must first get the scholars," is everywhere and always true and applicable. It cannot be gainsaid that the rustic who goes to Shrewsbury with no thought of horticulture returns a more receptive pupil for garden knowledge and consequently a more likely buyer of garden material after inspecting the big display of garden products there presented.

Our brief editorial on "the value of common things" in last week's issue has evoked favorable comment. It was, of necessity only briefly suggestive on a topic on which many columns might profitably be written. The garden which its owner may go away from and leave to the chances of

Some faithful garden friends

DECORATION OF MR. GEO. SCHNEIDER.

Of all the foreign gardeners in England it is doubtful whether there is one who is so highly esteemed by English horticulturists as the genial president of the French Horticultural Society of London. Founded in 1889 by a few French gardeners then resident in London, the society has made enormous progress and rendered much useful service to English as well as French gardeners, and it is now a society of considerable importance.

Mr. Schneider, as one of the original founders and the president ever since its inauguration, has generously devoted much of his leisure to the advancement of the society and the well being of many of the young men who come over from France and Belgium to complete their horticultural training here in England. Such service as this could not fail to be recognized by the French government sooner or later, and in 1896 our good old friend Schneider was granted the Cross of Chevalier of the Order of the Merite Agricole. Since then the society has continued to progress and accomplish much useful work, under the able and devoted supervision of its president, who in spite of nearly 40 years' residence in England still preserves his French nationality. In further recognition of all he has done the Government of the French Republic has now promoted Mr. Schneider to the rank of "Officier" of the Order of which he was already a conspicuous and deserving member.

C. H. P.

NEW ROSE HARRY KIRK.

Messrs. Alexander Dickson and Sons have developed a new Hybrid Tea rose named Harry Kirk, which promises to be a very valuable addition to our list of Hybrid Teas. The color is a rich creamy yellow, shading to orange at the base of the petals. The buds are long, of great substance and have opened up here to four and a half inches in diameter. The innermost petals when the bloom is fully opened curve inward so the flower does not present a flat appearance. The blooms last very well and are strikingly attractive. The plant is a vigorous grower and a good bloomer, with strong, healthy foliage and seems to be admirably suited to our climate. I believe that we have at last obtained what we have been so long looking for, namely, a first rate yellow rose that will do well out of doors. The plants were set out last November at Philadelphia and came through the winter and very trying spring without protection.

ROBERT HUEY.

OUR FRONTISPIECE.

One of the most interesting spots in the Jamestown Exposition, from the standpoint of the practiculturist, is devoted to the children's gardening operations, which is, for the first time, illustrated in the frontispiece to this paper. In the background are seen several of the State buildings, the central one with the cupola being the Massachusetts Building.

PRESIDENT-ELECT CANADIAN HORTICULTURAL SOCIETY.

Mr. John Walsh, who was recently elected president of the Canadian Horticultural Association, was born in Kerney County, Ireland, November 4, 1847. When 16 years of age, he started life in a big private estate, called "Richway's," under a narrow-minded gardener of old, named D. Mealie. Young Walsh soon found out that his work was up-hill and that no knowledge could be got from the head

JOHN WALSH

gardener. In 1868 he came to Montreal, where he has made his home ever since. His first employment was with Mr. B. Gibbs, on St. Catherine street, exactly where the Princess Theatre is being built. He took charge, thirty years ago, of the estate of the late W. W. Ogilvie, where he has remained ever since. Mr. J. Walsh is deservedly popular with his fellow tradesmen of this city and elsewhere where known.

PERSONAL.

Visitors in Detroit: Geo. A. Murphy, Cincinnati, O.; R. Fancourt, Philadelphia, Pa.

W. A. Adams, well known among the trade and a young business man of the best personal standing, is a candidate for the Republican nomination to be supervisor from his ward in Buffalo, N. Y.

There is good news from the sick bed of E. A. Moseley of Newburyport, which will be welcomed all over the country, for there is no better type of the useful citizen and faithful public servant than the secretary of the interstate commerce commission.—Boston Globe.

Harry O. May, the genial young treasurer of the American Rose Society, son of the eminent rose grower, John N. May, was married on September 18 to Miss Charlotte M. Jenkinson, at Newark, N. J. Mr. May, Sr., presented the young couple with a new dwelling at Summit, where they will make their home on their return from a bridal tour.

OBITUARY.

Henry A. Jones.

Henry A. Jones, for the past three years travelling representative of Ralph M. Ward & Co., New York, died at the home of his daughter, Mrs. Florence J. Barton, Cromwell, Conn., on August 23rd. His illness was of short duration, having been attacked with acute indigestion while on the road. He hurried home, but died in four days. Mr. Jones was a man of sterling qualities, genial and companionable, and made a great many friends during his travels. He was born in Baltimore, Md., Feb. 29, 1840. He married Frances Katherine Howser of Baltimore, who died in 1881. Four daughters and one son survive him.

Charles H. Grigg.

Charles H. Grigg, for many years in the retail florist business in Philadelphia, died on the 22nd inst. from an attack of vertigo. Mr. Grigg was at one time a member of the firm of Graham & Grigg, which by its enterprising methods over twenty years ago set a new pace in the business of retailing cut flowers in Philadelphia. Later he was in business for himself and was for a time manager of the Century Flower Shop when that establishment was started by H. H. Battles.

Other Deaths.

Mrs. A. La Rochelle of New York died on September 11, aged 60. For many years she has carried on a retail business at 231 Eighth avenue, which will be continued by her daughter.

Andrew Boylan, gardener at the City Hospital, Philadelphia, Pa., was drowned in the Delaware River on September 10.

NEWS NOTES.

Leon C. Ellis has been appointed a member of the Pine Grove Cemetery Commission of Lynn, Mass.

Charles Uttley of Harrisburg will open a branch store at Altoona, Pa., on October 1 with Miss Elma Heeter in charge.

A defective electric light wire caused a slight blaze in the basement of Mallon & Sons, Brooklyn, N. Y., but the damage was trifling.

Under the name of the People's Floral Co., Max Eller has opened an attractive store at 821 Walnut St., Kansas City, Mo., with J. D. Handler as manager.

G. X. Amrhyn, superintendent of parks at New Haven, Conn., met with a serious accident recently. While driving near Edgewood park the bit broke, the horse bolted and threw Mr. Amrhyn out severely wrenching his leg.

In the Arnold Arboretum are a number of young grape vines, raised by Mr. Dawson from seed procured by Prof. Sargent in China, who believes that the fruit will be found equal to some of the finest tender white grapes. The fruiting of these novelties will be an event of great interest, and should they turn out as hoped for, they will constitute a sensation of more than ordinary degree.

NEWS OF THE CLUBS AND SOCIETIES

CONGRESS OF HORTICULTURE.

The "Congress of Horticulture" was held, according to announcement at Convention Hall, Jamestown Exposition grounds, Norfolk, Va., on Monday, September 23. The attendance was good, there being from fifty to sixty present at the various sessions. The forenoon session was presided over by Warren H. Manning of Boston, instead of J. H. Hale, to whom this duty had been assigned but who was prevented from coming by illness. Under the heading of Cultural Problems, papers were read as follows:

Soils, by Prof. F. H. King, Madison, Wis.; Plant Diseases, by Dr. A. F. Woods, Washington, D. C.; Insect Enemies, by A. L. Quaintance, Washington, D. C. Under the subject of Breeding and Propagation, a paper on Florists' Flowers by W. N. Rudd of Chicago was read by Prof. H. C. Irish of St. Louis, Mo.

At the second session, 2 p. m., Prof. L. R. Taft of Michigan Agricultural College presided. Papers under the heading of Commercial Growers were read as follows:

Garden Vegetables, by W. W. Rawson of Boston; Cut Flowers, by F. R. Pierson, Tarrytown, N. Y.; Forest Trees, by Prof. F. W. Rane, Boston. Under the heading of Local Horticultural Conditions, Prof. W. T. Macoun of Ottawa, Canada, spoke for Canada, J. K. M. L. Farquhar of Boston for the East, L. A. Goodman of Kansas City, Mo., for the Central West, and Prof. Irish presented the plans which are on foot for associating under one central head the national societies representing the various horticultural interests in America.

The evening session was presided over by Prof. S. A. Beach, of Ames, Ia., and papers were read as follows: Civic Horticulture, by Warren H. Manning of Boston; Our National Florists, by W. L. Hall, Washington, D. C.; Landscape Gardening, by John C. Olmsted, Brookline, Mass.; Schools and Experiment Stations, by Dr. A. C. True, Washington, D. C.; Government Aid, by Dr. B. T. Galloway, Washington, D. C.; Horticultural Press, by Leonard Barron, New York; Federation and Cooperation, by J. C. Vaughan, Chicago, Ill. Mr. Atkins, who is at present engaged in the work of civic improvement at Annapolis, Md., gave an account of what he is doing there. Mr. Farquhar called attention to the splendid opportunities enjoyed by the gardeners employed on private estates to advance the practice and knowledge of modern horticulture, and commenting on Mr. Vaughan's views on general horticultural work, as expressed in his paper, mentioned the Society of American Florists and Ornamental Horticulturists as an organization entitled to the highest credit for its work on this line. Mr. Vaughan sharply criticised this statement, characterizing the S. A. F. as a body working on narrow lines. Mr. Vaughan is now president of the "National Council of Horticulture."

Announcement was made of the meeting of the American Nut Growers' Association to be held on the following day, and the sessions of the Ameri-

can Pomological Society, Society for Horticultural Science and Federation of Horticultural Societies assigned for the remainder of the week.

An animated discussion on the well-worn topic of the comparative value of scientific and practical education ensued, and continued until a late hour. Reference to this interesting debate will be made in later issues of Horticulture.

NORTH SHORE HORTICULTURAL SOCIETY.

The meeting of this society, on the 20th inst., at Manchester, Mass., was one of the best ever held. Maurice Fuld, secretary of the New England Dahlia Society, was the lecturer, and his subject was "Dahlias." He gave a history of the dahlia and the origin of the different classes, illustrating his remarks by specimen flowers which he had brought. The work of hybridizing, and producing new varieties, the culture, soils, manures, treatment best suited for successful dahlia growing and the lifting and storing of the roots for the winter were gone into in detail. The work of the N. E. Dahlia Society was also referred to; their chief work being the classification of the flowers. Herman Thiemann followed, on the same subject, interspersing his remarks with his usual wit and humor, advocating the formation of a national dahlia society, whose judgment in all matters relating to dahlias should be accepted by growers in the United States as final. A vote of thanks was extended to both gentlemen. The attendance was good and the speakers were listened to with close attention.

President McGregor had on exhibition two tables of very fine seedling single and anemone flowered dahlias of his own raising. W. T.

MORRIS CO. (N. J.) GARDENERS' AND FLORISTS' SOCIETY.

The main business at the September meeting was the final arrangement for the show, which takes place in Madison on October 31st and November 1st next. Chrysanthemums, roses and carnations in this neighborhood are better than usual at this time, and a fine show seems assured. Over \$500 in cash is devoted to premiums.

A prominent Morristown man gives \$50 in one prize for best 24 chrysanthemum blooms in 24 varieties, and another offers a silver cup for six white and six pink blooms. The cup is for members only; the other prize is open to all.

Geo. H. Hunt, superintendent to Robt. D. Foote, is to read an essay on orchids at the October meeting, and Lager & Hurrell are to put up an exhibit to illustrate the essay.

John Heeremans, superintendent at Glimpsewood Manor, Morristown, announced that he has resigned his position to accept one of larger magnitude and greater opportunities. Mr. Heeremans has been connected with this society for a number of years, having been presiding officer for two terms, continually serving on committees and working indefatigably for the in-

terest of the club, besides being a most successful exhibitor at the club shows. A set of resolutions of regret, showing the esteem in which he is held by his brother members, was adopted by a rising vote. A copy was ordered engrossed and presented to him. He retains his membership and hopes to for many years to come. We all wish him success in his new field. E. R.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Field Day at Marblehead.

Warm and summer-like weather favored the club outing to W. W. Rawson & Co.'s dahlia farms at Marblehead on Saturday, September 21. Two well loaded special cars left the North Terminal Station at 12.44, carrying over 100 club members, their wives and friends. On arrival, the party, which had been largely increased, at once proceeded to the dahlia grounds, where a first-class luncheon was served and very much enjoyed by the large company.

An inspection of the extensive dahlia grounds was then in order, and nearly three hours were spent in closely scrutinizing the extensive collection of hundreds of varieties. The cactus and decorative section were most largely represented and came in for the greatest admiration, but the peony, collarette, single, Twentieth Century, show and fancy classes were all very much in evidence.

Some of the sportive spirits indulged in a baseball game after inspecting the flowers, the married men proving too much for the singles on this occasion. Before separating, President T. H. Westwood, in a few suitable remarks, voiced the thanks of the company for an afternoon's delightful entertainment. Maurice Fuld suitably responded on behalf of the firm. Regret was expressed at Mr. Rawson's absence, that gentleman having gone to Jamestown to fill a lecture engagement. Boston was safely reached on the return journey at 7 o'clock after a very pleasant and profitable outing.

ILLINOIS STATE FLORISTS' ASSOCIATION.

The Illinois State Florists' Association will hold their 3rd annual convention in the city of Springfield on February next, 1908. This will be the greatest convention of the florist and kindred trades that has ever been held in the State of Illinois. Already many inquiries have been made regarding space for trade exhibits. The undersigned committee appointed by the Springfield Florists' Club to look up the matter of exhibits take this opportunity to issue this circular to all interested, and ask them to send in their wants. We can give you all the space you want, whether it be for advertising, banners to hang up, or space on the floor for any and all kinds of exhibits belonging to the trade, and ask your hearty co-operation in making this convention a record breaker.

Springfield, the capital city of Illinois, is located in the center of the

state and will be visited by all florists of this as well as many other states. Springfield is also famous for its horticultural products, no less than eighteen (18) firms being engaged in the growing of cut flowers, plants and vegetables. This being the center of the state, its easy access by steam and interurban railroads assures us of a great many of the trade being with us, thus showing what a factor this convention will be from an advertising point of view.

Hotel accommodations are unexcelled; plenty of room for all at moderate prices. The exhibition and convention will be in the State Armory, with a floor space of thirty thousand (30,000) square feet, with a large gallery surrounding the entire building, fully heated, and the exhibitors need have no fear in sending their choicest stock of cut flowers and plants. Exhibits coming from a distance, and exhibitors not being able to accompany them, will be well taken care of by the local club. We especially urge upon all supply men and dealers in greenhouse building and heating material to let us know at once what space they will want, so that we can arrange exhibits to the best advantage. We will be able to give good space at reasonable rates, which will be furnished on application.

Now, florists, this is your opportunity; come and be with us; we will give you a good time. Springfield, the home of Lincoln, will give you a hearty welcome, and you will all say that it is good to be one of us.

Signed by the Committee,

DAVID WORTH.
FRANK FRIEDLY.
ALBERT HEY.

Address all communications to the secretary of the Springfield Florists' Club, George W. Jack, 217 South 5th St., Springfield, Ill.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of this society was held at the residence of P. A. Chopin, the officers and 25 members present. A lengthy discussion on the advisability of hiring a large hall for a chrysanthemum show when very few potted chrysanthemums would be ready for exhibition, resulted in H. A. Papworth's motion that the plans already made be abandoned, the committee thanked and discharged, which was passed. C. W. Eichling, however, wished to go on record as not being in favor of giving up the show, and was the only one holding out for it. To have a show in November in a hall or store on Canal street, only members exhibiting, was an idea advanced by Paul Abele, which met with unanimous approval, and P. A. Chopin, chairman, H. A. Despommier and Paul Abele were appointed a committee to arrange for a chrysanthemum and flower show. H. A. Papworth tendered his store and it will probably be accepted; the show to continue several days.

On motion, the society unanimously indorsed the projected Panama Bi-oceanic Exposition, to be held in New Orleans in 1915. It is intended that the society get in close touch with the prominent workers and give every aid towards making the New Orleans Exposition renowned for its beauty of

THE PHILADELPHIA PARTY AT R. VINCENT JR.'S, SEPT. 17TH

landscape, the trees, hedges and gardening being started in time to make a decent show when the exposition first opens.

Pres. Eble gave the members an interesting account of his trip to the S. A. F. convention at Philadelphia, where he received an honorable mention for his new variety of fern. He said that New Orleans should have the next convention if possible since the local society had become so much stronger. He was sure that the society could make the expense less than at Philadelphia. Chicago's society had promised their support and it would be

a most profitable meeting for northern visitors.

H. A. Despommier exhibited a three months' old plant of *quisqualis* rooted from a cutting and growing perfectly. On adjournment, the next meeting being set for October 17 at the home of Pres. Eble, elaborate refreshments were served by Mr. and Mrs. P. A. Chopin, which were highly appreciated by those present.

C. R. PANTER, Sec'y.

DETROIT FLORIST CLUB.

The last meeting of the Florist Club was very well attended, special interest being caused by the election of the following officers: pres., J. E. Scribner; vice-pres., Thos. Brown; sec'y, J. F. Sullivan; treas., Walter Taepke; librarian, A. Sylvester.

CLUB AND SOCIETY NOTES.

W. E. McKissick will speak before the Philadelphia Florists' Club on Tuesday evening, October 1.

The Connecticut Horticultural Society held its bi-monthly meeting at Hartford on September 20 and plans for the dahlia exhibition on the 25th were completed. J. F. Huss spoke on hardy perennials.

The Springfield Florists' Club (O.) will place in office at their October meeting the following: President, G. H. Mellen; vice-president, C. W. Schmidt; secretary, G. D. Leedle; treasurer, Leman Bradford. The year just passed has shown a healthy growth.

The florists of Indianapolis, Ind., organized on September 12 with forty-seven charter members. The officers are: President, Sydney Smith; vice-president, Fred Huckleide; secretary, Earl Sellers; treasurer, E. Reiman; sergeant-at-arms, George Wiegand. The club will meet the second Wednesday of each month.

Hector Golin of Merrimac has taken a position in a florist establishment in So. Chelmsford, Mass.

JOHN COCK, BALTIMORE
And his new pink unnamed seedling

THE EXHIBITION SEASON

RECENT SHOWS.

Newport Horticultural Society.

On Tuesday, Wednesday and Thursday, September 17, 18 and 19, the best exhibition of plants, flowers, fruit and vegetables ever seen in Newport was given by the Newport Horticultural Society. The entries were unusually numerous and the exhibits of uniform good quality.

Dahlias were exceptionally fine and of varied character. There were many large exhibits by out of town growers, including W. W. Rawson, W. D. Hathaway, Mrs. H. A. Jahn, Arthur B. Wordell, Wm. F. Turner, The Star Dahlia Gardens, Wm. H. Richardson and H. F. Burt, all of whom met with more or less success. Sisson & Thurston of Newport took first in the class for commercial growers. James Robertson, Newport, was the most successful exhibitor of dahlias in all other classes. Wm. H. Richardson of New Bedford was awarded the society's silver medal for seedling cactus dahlia, which was generally conceded to be the best thing of recent introduction; the bronze medal went to Mrs. T. C. Richardson. A. H. Wingett of Lenox was awarded a first-class certificate of merit for his splendid new decorative dahlia Charles Lanier. James J. Sullivan and Paul Volquardson, certificate of merit for seedlings.

B. Hammond Tracy, Wenham, Mass., won the society's silver medal for a superb collection of gladioli. First-class certificates of merit were awarded to Henry A. Dreer for aquatics and ferns *Nephrolepis Amerpohli* and *N. Todeoides*; R. & J. Farquhar & Co., Boston, for *Lilium auratum* and *L. superbum*; John Lewis Childs, for gladioli; James Garthly, for collection of plants; F. E. Conine Nursery Co., for display of roses; Miss Alice Keteltas for a splendid specimen orange tree loaded with fruit; Mrs. Andrews, for miniature rock garden. W. A. Manda received a certificate for *Dracaena Mandanli* and a gratuity for collection of plants.

Fruit and vegetables, especially the latter, were of unusual excellence. The silver cup offered by Henry A. Dreer for the best collection of vegetables, to be won twice, was awarded to Wm. B. Greene.

In the class for best centerpieces made exclusively of dahlias Gibson Bros., won the first prize. Oscar Schultz was first in the best fancy basket made of dahlias. For the best fancy basket other than dahlias the first prize went to Mrs. William A. Astor with basket of American Beauties.

Other awards were as follows:

Plants.

Group of palms, ferns and flowering plants, tastefully arranged within a space of 100 square feet—1st, Mrs. Robert Goelet, Colin Robertson gardener; 2d, Mrs. William Astor, James Boyd gardener; 3d, Oscar Schultz.

Group of palms, ferns and foliage plants, tastefully arranged within a space of 100 square feet—1st, Oscar Schultz; 2d, Mrs. Robert Goelet.

Group of ferns, palms and foliage

plants, tastefully arranged within a space of 50 square feet—1st, Mrs. William Astor.

Table of decorative foliage plants, each plant to be serviceable for a table, staged on table 3 by 6 feet—1st, Mrs. C. M. Bell, David McIntosh gardener; 2d, Perry Belmont, John Marshall gardener; 3d, Mrs. Robert Goelet.

Group of ferns, tastefully arranged within a space of 50 square feet—1st, Oscar Schultz; 2d, E. J. Berwind, Bruce Butterson gardener.

Specimen areca, in pot or tub not exceeding 16 inches in diameter—1st, Mrs. Robert Goelet.

Specimen kentia, in pot or tub not exceeding 16 inches—1st, Mrs. William Astor; 2d, Mrs. Robert Goelet; 3d, Mrs. T. O. Richardson, James Robertson gardener.

Specimen any other species palm, in pot or tub not exceeding 16 inches—1st, Mrs. Robert Goelet.

Specimen palm, any species, without restrictions on size of pot or tub—1st, Mrs. Robert Goelet; 2d, E. J. Berwind; 3d, Oscar Schultz.

Specimen cycas—1st, Mrs. T. O. Richardson.

Specimen fern—1st, H. D. Auchincloss, John Mahan gardener; 2d, Mrs. William Astor; 3d, Mrs. Robert Goelet.

Six dracaenas, not less than three varieties in pots not exceeding 8 inches—1st, Mrs. William Astor.

Six crotons, not less than three varieties, in pots not exceeding 8 inches—1st, Mrs. Robert Goelet; 2d, Mrs. C. M. Bell.

Six ferns, not less than three varieties—1st, E. J. Berwind.

Six Rex begonias, not less than three varieties, in pots not exceeding 8 inches—1st, Mrs. William Astor.

Specimen pandanus, pot not exceeding 8 inches—1st, Mrs. William Astor.

Basket, pan or dish of ferns, receptacle not over 15 inches in diameter—1st, Perry Belmont; 2d, Mrs. William Astor.

Basket, pan or dish of foliage plants, receptacle not over 15 inches in diameter—1st, Perry Belmont; 2d, Mrs. William Astor.

Miniature flower garden, exhibited by Newport private gardener within a space of 32 square feet—1st, Hugh Williamson; 2d, James Williamson.

Cut Flowers.

Twenty-five gardenia blooms—1st, Mrs. William Astor.

Fifty carnation blooms—1st, Mrs. Robert Goelet; 2d, Mrs. William Astor.

Twelve American Beauty roses—1st, Perry Belmont; 2d, Mrs. William Astor.

Vase of 25 tea or hybrid roses—1st, Perry Belmont; 2d, H. D. Auchincloss.

Collection of herbaceous perennial blooms, named varieties—1st, H. D. Auchincloss; second, Joseph Gibson; 3d, Oakland Farm, A. G. Vanderbilt, Alex. Adam, gardener.

Collection of annuals, named varieties—1st Joseph Gibson; 2d, Oakland Farm; 3d, A. D. Auchincloss.

Fruits.

Two bunches white grapes—1st, H. D. Auchincloss.

Two bunches black grapes—1st, H. D. Auchincloss.

One bunch white grapes—1st, E. J. Berwind; 2d, H. D. Auchincloss.

One bunch black grapes—1st, H. D. Auchincloss; 2d, E. J. Berwind.

Six nectarines—1st, H. D. Auchincloss; 2d, E. J. Berwind; 3d, Mrs. William Astor.

Six peaches—1st, Mrs. William Astor.

Six peaches, grown outdoors—1st, E. J. Berwind; 2d, Mrs. John E. Harrington.

One melon—1st, H. D. Auchincloss; 2d, Samuel Chambers; 3d, Miss Alice Keteltas, W. J. Matson gardener.

Three dishes of apples—1st, Miss Susie E. Gibson.

Six dishes of pears—1st, Mr. William B. Greene, Samuel Speers gardener.

Three dishes of pears—1st, Mrs. John E. Harrington; 2d, William B. Greene.

Dish of blackberries—1st, William B. Greene; 2d, Mrs. J. E. Harrington.

Vegetables.

Peck of potatoes—1st, James Elliott; 2d, Mrs. T. O. Richardson; 3d, H. D. Auchincloss.

Twelve tomatoes—1st, Oakland Farm; 2d, Mrs. William Astor; 3d, Mrs. T. O. Richardson.

Six heads of celery—1st, H. D. Auchincloss; 2d, Mrs. T. O. Richardson.

Twelve onions—1st, Mrs. T. O. Richardson; 2d, Oakland Farm; 3d, H. D. Auchincloss.

Three heads of cabbage—1st, H. D. Auchincloss.

Three heads of cauliflower—1st, Oakland Farm.

Collection of peppers—1st, Joseph Gibson.

Best collection of vegetables—1st, Oakland Farm; 2d, H. D. Auchincloss; 3d, Mrs. Robert Goelet.

The judges were Alex. MacLellan, John T. Allan and D. J. Coughlin.

Greater interest was taken in this show than had been anticipated with the gratifying result that the receipts from admission fees are largely in excess of any previous year.

London Dahlia Union.

This society founded only six years ago held its annual exhibition in the glass corridor and conservatory of the Royal Botanic Gardens, Regents' park, on the 12th September last. The most favorable circumstances attended the show for there was keen competition in most of the classes. The quality was of a high order of merit in almost everything staged.

The schedule comprised 27 classes in all, three and four prizes being allotted in most of the classes.

A detailed report would be of little interest to American readers and the most we can do is briefly to deal with essentials. T. S. Ware and Son had a gold medal for a fine display arranged in a very artistic manner. Cut blooms of every section were arranged in high bamboo supports at the back while vases contained those in front. *Isoplepis gracilis*, bamboos and other greenery enlivened the display by the graceful way in which they were interspersed among the cut blooms. Cactus dahlias of special note were

Faunus, Whirlwind, Mrs. McMillan, Primrose, Cynthia, Hamlet, Caradoc, etc. Decoratives and peony flowered included some noble blooms of Germania, King Leopold, Bloom of Baarn, Queen Wilhelmina and Souvenir de Gustave Dowzon, while among the old show flowers, Peacock, Mont Blanc, Diadem Merlin, Mrs. Langtry and others were none the less conspicuous.

The exhibit of J. T. West, who also received a gold medal, was another fine example of effective arrangement. Every section was well represented but the pompons staged appealed to me in a very special way, Bacchus, Snowdrop, Violet, Midget, Daisy, Nerissa, Ideal, Emily Hopper and Sunshine being delightful little floral gems.

Hobbies Lim'd staged roses and dahlias in grand form and they too were awarded a gold medal for a charming group of no little artistic merit. Cactus varieties of note were Hyacinth, Wm. Marshall, Hamlet, Daisy Easton, Amos Perry, Nelson, Charm. They also had a large display of the peony flowered varieties.

In the competitive classes there were numerous entries. For 12 cactus distinct in bunches of 6 blooms each, Stredwick & Son came in first. H. Shoemith, John Walker and Burrell & Co., followed in the order named. Blooms in this class specially noticed were Uranus, Ivernina, Dr. G. E. Gray, Snowdrift, Buttercup, Flame, Conrad, Celia, Lustre, Eureka, Faunus, Premier. Classes for 24 blooms cactus and 12's also brought forth a good show, the principal prize winners being Stredwick, Burrell & Co., Keynes, Williams & Co., John Walker, Mortimer, Seale and Baxter. Here we noted the following: Pilot, Clincher, Nelson, Ivanhoe, Conrad, Imperial, Primrose, White Lady, Wm. Marshall, Hyacinth. Classes 4 and 5 for 24 and 12 cut blossoms of the show dahlia produced some excellent results of the culture of these grand old flowers. The prize winners here were John Walker, Chas. Turner, Keynes, Williams & Co., Mortimer, Cheal & Sons, Seale, Tranter and S. Cooper. Fine blooms of Purple Prince, Blush Gem, Standard Harbinger, John Walker, Golden Gem Chieftain, W. Keith, Mrs. Langtry, Mrs. Gladstone, Dr. Keynes and others were exhibited in the winning stands.

The class for 3 vases of cactus varieties brought forth some fine lots. John Walker, Seale, Keynes, Williams & Co., and Cheal & Sons, were the prize takers in order named.

For 12 pompons competition was again keen amongst exhibitors already named in other classes, Hecla, Mercia Bacchus, Cyril, Florence, Ideal, Little Mary, Doris, Barbara, Jessica, Queen of Whites being all excellent samples.

Singles were very pretty and freely shown in the various classes. Some of them are delightfully colored and most perfect in form. Among the prize winning stands we admired Colombine, Rosebank Scarlet, Snowdrop, Hector, Kilby, Fuji San, Stromboli, Aurora Formosa, Leslie Seale, Princess of Wales, Mavourneen, Mark Twain. Many other exhibits in other classes were staged especially in the amateur section. Floral art was encouraged by prizes for tastefully arranged vases in which the blooms were mingled with autumn foliage and grasses.

The judges awarded first class certificates to Stredwick & Son for cactus dahlias, C. E. Wilkins, Rev. A. Bridge, and Mercury. H. Shoemith for cactus dahlia, Flame, a fiery reddish crimson of intense brilliancy.

Cheal & Sons for single dahlia, Peggy, Hildegard, a pompon of a very pretty pale lilac mauve, and Brilliant—a single variety of rich reddish crimson, with a yellow centre.

A silver medal was awarded to W. Stephens for a display of 12 cut blooms of cactus dahlia, Wm. Marshall.

Altogether the committee may well be satisfied with their show for 1907, the quality being certainly up to that of the N. D. S. if not even better.

Miscellaneous groups were a decided feature of the show and contributed very materially to interest the numerous visitors. Mr. A. L. Gwillim staged a fine table 36 feet long of begonias, single and double, in great variety, for which he received a gold medal. J. Burrell & Co., had a like award for a grand display of gladioli. Spooner & Sons staged fruit, having a nice collection of which we can only mention in apples Cardinal, Lord Derby, Lord Suffield, Keswick Codlin, Cox's orange Pippin, Worcester Pearmain, Brabant Bellefleur; in pears, Clapp's Favorite, Beason, Dr. Jules Guyot; in plums, Victoria, Pond's seedling and Cox's Emperor.

C. HARMAN PAYNE.

New York State Fair.

At the State Fair held at Syracuse twenty-four first and seven second prizes were captured by P. R. Quinlan & Co. The cash prize of \$350 for display of fruit was won by the Western New York Horticultural Society, whose exhibit included 221 varieties of apples, 131 of pears, 51 of plums, 73 of grapes. In the street parade on Thursday evening the float of P. R. Quinlan & Co. was also awarded the prize in its division.

Michigan State Fair.

The floral exhibits at the Michigan State Fair at Grand Rapids on the week of September 9 exceeded in excellence everything before attempted. The prizes were divided between the Grand Rapids Floral Co., Crabb & Hunter and Charles Chadwick. W. Cukerski was the judge.

Floral Society of Victor, N. Y.

The fifth annual festival given by the Floral Society of Victor was held on September 12 and 13. One hundred and sixty-seven entries were made in the thirty-nine classes, asters and gladioli predominating. M. F. Pierson of Stanley served as judge.

Chestnut Hill Horticultural Association.

The Chestnut Hill Horticultural Association (Pa.) held an exhibition on September 10. Chas. Bustard, James Bell and Frank Gould won the prizes for best displays of dahlias; W. Schneider and J. Little for asters and W. Vandervere for ferns.

Indiana State Fair.

The floral exhibits at the Indiana State Fair, September 9 to 13th, proved quite a success. Good displays were brought out in cut flowers, plants and floral designs. The awards were pretty evenly divided among the exhibitors.

Union Agricultural Society.

At the sixty-ninth annual fair of the Union Agricultural Society, held at Ellington, Conn., on September 18, the exhibit from the North End Nurseries of Chester F. Brainard, Thompsonville, attracted much attention.

Worcester County Horticultural Society.

At the exhibit on September 19 in Horticultural Hall, Worcester, Mass., a display of gloxinias by E. W. Breed was an interesting feature.

COMING SHOWS.

St. Louis Horticultural Society.

The executive committee of this society met on last Thursday afternoon at Sanders' Nursery to formulate plans for the coming fall flower show. The president being absent, Harry Young presided.

The show this year will be held in the new hall of the United Railways Co., which is in course of erection, and has been offered to the society free of rent. The floor space is 100 feet square. The committee decided that the show should open on the morning of November 12 and close November 15, lasting four days. The Henry Shaw prizes, including the Henry Shaw medal, will again be offered. These alone are valued at \$500. The complete prize list is promised by the end of next month. At the close of the meeting the committee present consisting of Harry Young, Otto Koenig, F. H. Meinhardt, Theo Miller, F. C. Weber, A. Jablonsky, John Steidle, Alex. Walbart, and C. Nicholson, together with Mrs. Koenig, Mrs. Miller and Miss Meinhardt were invited by Mr. and Mrs. Sanders to sit down to a lunch which was much enjoyed by all present.

Beginning with next month the committee will meet weekly until after the show.

Marin County Horticultural Society.

The prize list of the first annual flower show of the Marin County Horticultural Society to be held at San Rafael, California, October 26, offers many valuable cups and cash prizes. T. P. Redmayne, San Rafael, Calif., is secretary of the society.

Alabama State Fair.

The florists have secured a large space at the State Fair to be held in Birmingham October 8-16. Table decorations and bridal bouquets are among the special features on the extensive prize list.

Mississippi State Fair.

A chrysanthemum show will be a feature of the State Fair at Jackson, Miss., on November 8 and 9. Twenty-three classes are scheduled and the first prize is valued at \$25.

Notes.

The date of the fall exhibition of the Horticultural Society of Chicago has been changed to November 6-12.

The Massachusetts Horticultural Society will hold their annual exhibition of fruits and vegetables on October 10 and 11. The preliminary schedule of prizes for January, March and May, 1908, has just been issued.

Seed Trade

The warm weather of the past week has been of great benefit to corn and, in fact, all late crops, but just how much of a crop corn will prove to be can only be conjectured. No definite news has come to hand during the past fortnight concerning crops, but no doubt something will be known soon.

There will be onion sets enough in all probability, and the quality promises to be better than last year. It is estimated that the crop will be about 75 per cent. of an average. The crop of Kentucky Blue Grass seed, estimated at over one million bushels (practically a two years' supply), has again been cornered. This time the "Trust Busting" farmers of Kentucky have helped the scheme along. Members of the Society of Equity combined to hold the seed for a certain price, and they got it. Such is the power of organization.

By the way, this Society of Equity has become a great power in the West, and bids fair to become an influential factor in fixing the prices of farm products. In fact, it is such already. It is claimed by its members that they are responsible for the present high prices of grain to a considerable extent. Dollar wheat, sixty-cent corn and fifty-cent oats is the slogan of the Society of Equity, and the writer has information that a movement is afoot to hold back these crops until they can realize the prices named. This possibly accounts in some measure for the comparatively small receipts at the great grain centers, and which resulted the past week in a decrease of nearly 1,500,000 bushels in the visible wheat supply, whereas at this time of year the normal condition should have shown an increase of about this quantity.

Perhaps few of our readers are aware that our erstwhile friend, J. A. Everitt of Indianapolis, is the founder and present very efficient head of the Society of Equity. "Uptodate Farming and Gardening," of which Mr. Everitt is editor, is the organ of the Society of Equity, and has a large circulation.

As a further indication that organization is the order of the day, it may be said that a movement is on foot to organize a "National Society of Truck Growers." If this is successful, it is likely to be in time only an adjunct of the Society of Equity.

Late peas have sold in Buffalo as high as \$2.25 per bushel, and 160 bushels have been picked from a sowing of two bushels of seed. Pretty good business is farming; at least, truck farming.

Reports of damage to the bean crop are in circulation, but how serious has not yet developed. We shall have more reliable information in a week or two.

Unfavorable reports of the potato crop are coming from many sections and if they prove true the "Murphys"

may be among the luxuries in the near future.

Mr. Alfred Emerich, representing Messrs. Vilmorin, Andrieux & Co., Paris, France, will reach New York about September 28th, and will pay his usual visit to their American customers in the seed trade. All communications for Mr. Emerich should be addressed care of H. Frank Darrow, 26 Barclay street, New York.

CONRAD APPEL'S REPORT ON THE 1907 CROP OF EUROPEAN GRASS AND CLOVER SEEDS.

Regarding the Natural Grass Seeds, I beg to mention that the homegrown sorts have much suffered from the unsettled and unfavorable weather in May and June, and therefore we will this season see greatly varying qualities, bright colors will be scarce and in demand.

Of *Agrostis stolonifera* (Marsh Bent Grass homegrown) a shorter yield is expected than last fall, and high prices are offered to the owners already though harvesting will not commence before the middle of this month.

Aira caespitosa (Tufted Hair Grass) brought a smaller result, too, and higher prices than last year must be paid for raw seed.

The yield of *Aira flexuosa* (Yellowish Oat Grass of the trade) is about the same as last year, the quality seems to be better and heavier. Unreasonable prices have been paid by some dealers and therefore, prices will rule higher this season.

Alopecurus pratensis (Meadow Fox-tail) turned out a larger crop than last year. The samples I have already received show a satisfactory quality and contain less larvae than the year before. As you know, last season the owners asked very high prices for the raw seed, and therefore the demand for cleaned seed was not very animated. In spite of the bigger new crop the owners are now quoting much higher figures, having made a combine to keep the prices. Under these circumstances it seems to be very risky to conclude transactions at the present moment, basing upon prices which rule from 90 to 95.—Marks per cwt. of German seaport.—Considering the difficult cleaning of this sort and taking into account the loss in chaff, you will perhaps on the strength of the above prices of the raw seed be able to form yourselves an approximate idea of the prices which have to be quoted this season for high grade cleaned Meadow Foxtail. It is therefore advisable to wait with purchases until the situation of the market is more settled.

Anthoxanthum odoratum (Sweet scented Vernal, true) yielded a particularly short crop and higher prices may be expected for good nice lots. Also *Anthoxanthum puelli* (Sweet Scented Vernal, puelli) yielded a smaller quantity than last fall and will be quoted at a higher rate.

Avena elatior (Tall Oat Grass) brought an average crop in Austria, but the quality cannot compete with the French product. As to the latter correct informations cannot yet be given, as the new harvest is somewhat delayed by rainy weather. Reports announce a smaller crop but excellent

qualities. Firm offers will not come on the market before end of this month.

Avena flavescens (Yellowish Oat Grass, true) I cannot yet give a reliable report, this sort being not yet harvested. The same refers to *Bromus mollis* (Brome Grass) and *Bromus pratensis* (Meadow Brome Grass), whilst *Bromus inermis* (Awnless Brome Grass) is reported to bring a good yield with satisfactory qualities.

Cynosurus cristatus (Crested Dogstail) had suffered by heavy rains during its development and maturity in some principal centres of production, therefore darker colors will probably be prevalent, and bright lots will surely be in strong demand.

Dactylis glomerata (Cocksfoot). The crop in Germany, Austria and France was only limited and higher prices than last year were asked for. The yield in New Zealand is also much below an average crop and especially for bright lots much higher prices than in previous years had to be granted. The demand is very quiet now owing to these high prices, in the end they will have to be granted, as the quantity harvested is not sufficient for the usual requirements.

Festuca arundinacea, *elatior* (Tall Fescue, true). The genuine Rhenish Seed which is only grown in a small district in this neighborhood, brought this season one-third less than last fall, and in consequence higher prices had to be paid to the growers. I was able to obtain the bigger part of the new crop and am already occupied with the cleaning of my lots. The new seed is of an excellent quality, and the germination is very satisfactory, too. The prices for well cleaned seed are ruling favorably considering the shortness of the crop.

Festuca duriuscula, *ovina* (Hard and Sheep's Fescue). At the beginning the outlook entitled to the best expectations, and the owners had the best hopes for a rich harvest. But owing to the continued rainy weather the color of this species has suffered, and the seed is darker than last year's. Bright lots are very rare, and besides, there is a great loss in cleaning, as the new crop contains much light seed and chaff, so that my fancy and superfine qualities will command higher prices than last season.

Festuca ovina angustifolia (Fine-leaved Fescue) yielded an extraordinarily short crop, and consequently was only obtainable at very high prices. The lots are now coming in and the quality turns out satisfactory. It is not yet possible to say anything definite regarding the germinative power and the results of the cleaning of the new crop; undoubtedly high prices have to be charged for well cleaned qualities.

Festuca heterophylla (Var. leaved Fescue, true) and *Festuca rubra* (Red Fescue, true) which sorts grow in Germany only in limited quantities, yielded about the same as in 1906. N.-Z. Red Fescue is this year quoted at such high figures, that it does not pay for our market.

Holcus lanatus (Soft Grass, homegrown). It is still too early to give any information on the new crop.

Lolium italicum (Italian Ryegrass). According to reports from Great Britain this sort is now in harvest, and a

fair average crop is expected, the color will perhaps be a little darker than last year. From France a good crop is reported, and samples already to hand show satisfactory qualities. The seed will be obtainable at about the same prices as last season.

The harvest of *Lolium perenne* (Perennial Ryegrass) is also late this year, and most of the samples represent darker qualities. Heavy lots of more than 26 lbs. bushel-weight will be scarce this season and in strong demand. Prices rule somewhat higher than in 1906.

Phalaris arundinacea (Reed-like Canary Grass) is gathered this year in very limited quantities only, and higher prices had to be granted, so that good quality will be in demand and not obtainable cheaply.

Phleum pratense (Timothy). Will bring a medium yield in Germany, the weather of the next few weeks may influence the crop, which is still in the fields.

Poa nemoralis (Wood Meadow Grass) yielded much less than last fall. The heavy demand has caused a steady upward tendency of the prices for the raw seed, and at present the latter show such figures as never before. By my good relations with the most reliable sources I was able to obtain the bigger part of the new crop and most of the best lots. On account of the high prices for the raw seed it is a matter of course that really good well-cleaned qualities will be offered at much higher figures than last season.

Poa trivialis (Rough Stalked Meadow Grass). According to reports from the North this sort yields a shorter crop than last year, and it is still too early to say anything definite to the quality of the new seed, which is not yet harvested.

Clover Seeds, *Trifolium pratense* (Red Clover). Regarding the new crop in Germany and Austria, the season of the year is not far enough advanced to form at present an idea of the outlook.

Trifolium repens (White Clover) added every year to the existing stocks a larger or smaller crop, and this year, too, a medium crop is expected so that it is not necessary to hurry with covering the requirements. Of course particularly bright seed will be rare and in strong demand at good prices, but the stock of average qualities will be quite sufficient for the wants and obtainable at moderate figures.

Trifolium hybridum (Alsike). Regarding our homegrown products it is still too early to say anything definite.

The trade in *Trifolium incarnatum* (Crimson Clover) was this season very precarious and unsatisfactory. Austria started with fair prices and good qualities as compared with French offers, which represent mostly discolored qualities, and besides, at first high prices were quoted for this sort. France has yielded a good crop, but having no sales prices went down

AZORE GROWN EASTER LILY BULBS

Just received, free from all disease, have given most satisfactory results these past three years. After filling our advance orders we offer the following balance.

BAMBOO STAKES

steadily, so that at present Crimson Clover is on the market at very low prices, offering a fair object for speculation.

Lotus corniculatus (Coarse grained Birdsfoot Trefoil) had a fair average crop and is offered at cheaper prices than last year, the qualities are different, most lots containing a great deal of ribgrass (Plantago). Lotus villosus (Small grained Birdsfoot Trefoil) is not yet harvested, the result is estimated to be smaller than last fall, samples and offers are not yet to hand.

Medicago Impulina (Yellow Trefoil) yielded to all appearance a satisfactory result and will be obtainable at about last year's prices.

Medicago sativa (Alfalfa or Lucerne) Italy reports a short crop and good qualities, whilst in France Lucerne will yield a good average crop, and Lucerne of Provence of good quality will probably be quoted a little lower than 1906.

About the new crop of Anthyllis vulneraria (Kidney Vetch) I have not yet received any information and therefore cannot give a report on it for the moment.

In Hedysarum onobrychis (Sainfoin, one cut) the offers are now to hand, and samples mostly show dark seed, so that bright lots will be in demand, the prices rule somewhat higher than last season. Hedysarum bifera (Sainfoin, two cuts) gave a medium yield, and the qualities are reported to be satisfactory.

Regarding the Agricultural Seeds, viz. Ornithopus sativa (Serradella), Lupinus luteus (Yellow Lupins), Vicia sativa (Spring Vetches), Vicia villosa (Sand or Winter Vetches), Sinapis alba (Mustard) Spargula maxima (Giant Spurry), Spargula arvensis (Common Spurry) a report cannot yet be given, as the crops are not yet harvested.

FORMOSA LONGIFLORUMS.

Since the Bermuda lilies first showed signs of disease, forcers have been looking anxiously for a healthy lily that could take their place. To a considerable extent this was done by the Japan-grown longiflorums, which have, however, the one great drawback that they could not be forced as early as the Bermuda lilies, owing to the fact that they ripened later in Japan and could not be brought to the American market early enough.

A New York importing house seems now to have overcome this difficulty with the Formosa longiflorums, a small trial shipment of which last year turned out entirely satisfactory as far as earliness was concerned, not a single plant showing any trace of disease, and it is confidently expected that this lily will take the place of the Bermuda bulbs in future. This season a few hundred cases of these Formosa lilies arrived in splendid condition. Growers are giving them a thorough trial and large orders are promised if they come up to expectation. The bulbs were dug, thoroughly ripened, the first part of June—earlier or about the same time that Harrisii are taken up in Bermuda—and the shipment reached the Pacific coast on the 20th of July, but unfortunately was delayed overland. Under ordinary circumstances it should have reached New York the first part of August.

Cyclon. (Very Dwarf). White, suffused with lilac; aniline-red eye in the form of a star.	
Eclairer. (Tall). Brilliant rosy magenta with large lighter halo; an excellent variety.	
Eugene Danzerville. (Tall). Lilac, shading white towards the edges; large white centre.	
Eclairmonde. (Tall). Lilac marked with white; aniline-red eye.	

HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.

LIBRARY NOTES.

Any of the books mentioned in Mr. Payne's reviews can be supplied at publishers' price from the office of Horticulture.

In my last contribution under this heading, I alluded to the large number of new books on gardening that have recently appeared, but pressure prevented my noticing only a few of those awaiting notice. I now continue a brief review of some of the others which appear to be likely to interest the readers of HORTICULTURE who, as Bostonians, must be presumed to have some interest in horticulture beyond mere cultural details.

After many years' book-collecting, both ancient and modern, I do not remember ever to have known a period when the publishers of new gardening books have been so actively engaged in their production. The competition seems to be of decided advantage, judging by the general improvement in style and get-up of these new-comers.

Wild Flowers in Their Seasons, by F. Edward Hulme (Cassell & Co., London and New York). This is a dainty volume, small octavo in size. The author is a well-known flower painter and writer, and in the volume under notice he deals with the wild flowers of this country according to their season, and in regular succession. There are 80 full-page, nicely colored plates of the most conspicuous and interesting British wild flowers. A general index and an index to botanical names are given, which facilitates reference, and without which such books ought not, as is sometimes the case, to be published.

A Concise Handbook of Garden Annual and Biennial Plants, by C. N. A. Peake (Methuen & Co., London). There is now quite a series of these concise garden handbooks issued by Messrs. Methuen & Co., of which we have already given brief notices in previous contributions. The contents are arranged as in the other books of the series in alphabetical order, comprising name, country of origin, height, synonyms, whether hardy or otherwise, color and description and cultural notes. At the end of the volume, which contains the full-paged process-block figures of flowers referred to, is an exhaustive list of synonyms.

The Book of Rock and Water Gardens, by Charles Thonger (John Lane, London and New York). The series of handbooks of practical gardening issued by John Lane and edited by Harry Roberts now includes 28 volumes on different subjects, and it is not surprising that so popular a subject as rock gardens has been dealt with in this very excellent series. Mr. Thonger divides his book into 12 distinct chapters which are illustrated with twenty-six views. The titles of his chapters may be briefly mentioned to show the scope of the work and are as follows: "Rock and Alpine Gardens," "Rock Garden Construction," "The Garden of Alpines," "The Rock Garden in Spring," "Rock Garden Plants," "Rock Shrubs," "Wild Water Margins," "Small Water Gardens," "Bog and Marsh Gardens," "Lily Tanks," "Water Lilies," "Aquatics and Bog Plants."

Le dahlia, son histoire, ses progres, sa culture by Rivoire pere et fils (Librairie Horticole, Paris). To our friends of the newly-founded New England Dahlia Society anything no doubt relating to their favorite flower will be welcome. The authors of this little treatise are a well-known firm of nurserymen at Lyons, France. The cultural part of course is intended for French growers who certainly have not up to the present acquired the same degree of skill in dahlia culture as we have here in England. A very casual acquaintance with English and French dahlia shows easily demonstrates this fact. It is to be hoped that the publication of this little handbook may help to raise the standard of dahlia culture in France in the same way as the culture of the chrysanthemum has been improved during the past seven years. There is an excellent article by M. R. Gerard, the eminent botanist of Lyons on the subject of the fertilization of the dahlia to which the reader who understands French may be referred. The book is illustrated but compared with the works previously referred to in this column they are poorly executed and more suitable for a nursery catalogue.

Beautiful Gardens: how to make and maintain them by Walter P. Wright. (Cassell & Co., London and New York). The author of this new book is a well known prolific writer of popular gardening books and in his latest work bearing the above title he endeavors to bring the garden and home into the closest possible association. Looking firstly at the work as a mere piece of book making it must be said that "Beautiful Gardens" is turned out in excellent style. The illustrations are numerous and are full paged but we should much have preferred to see them in black and white instead of the peculiar brownish, almost sepia tint, in which they are printed. To go at once to the practical part of the contents to which over 300 pages are devoted, we may mention that he gives us thirty interesting chapters on particular subjects: "A Garden Year," a story of real doings in a real garden takes the reader from January to December in its various monthly operations, and this is followed by a Garden Remembrancer.

To the amateur, who buys a new house in the suburbs of many of our big towns where the builder has merely left a plot of rough uncultivated ground in the rear this book should serve a useful purpose in one of the most difficult problems that the inexperienced have to contend with. Many a man in such circumstances and without a practical guide to help him has laid out money in waste only to regret it when the work has been finally accomplished. With this book in one's hands many unforeseen troubles may be averted.

The Unheated Grenhouse by K. L. Davidson (Country Life, Lim'd, London.) This, like the preceding is a bulky octavo, and the fact of its being published by the Country Life Library is a sufficient guarantee of the high degree of excellence in which the book is got up. The subject treated is one of intense interest to many of the

small amateur gardeners in this country and elsewhere. Without knowing, one would hardly think it possible to undertake so much that is likely to be successful and a source of much pleasure. The author among many other things treats of plants suitable and unsuitable. The Appendix, occupying about 100 pages, contains useful and instructive lists of plants and flowers blooming at various seasons of the year, hardy foliage plants and flowering shrubs, annuals suitable for pot culture, etc. Between 40 and 50 excellent photograph process blocks adorn this very attractive volume.

Les meilleurs fruits au debut du XXe siecle (National Horticultural Society of France, Paris). Pomology is one of those subjects that must be of peculiar interest to a large number of American horticulturists, as it is to many French ones. We remember the admonition given by the Chairman at the Annual Dinner of the Society of French Gardeners in London last January, when he reminded his hearers of the way in which American apples had invaded the markets of France, and are not surprised at the recent issue of this very imposing volume. For some time past the Pomological Committee of the National Horticultural Society of France has been engaged on the compilation of a work that should be practical and up-to-date. As the outcome of the labors of this committee the Society has now for distribution among its members a work numbering over 600 pages, in which are given details of the best 250 fruits suitable for cultivation in France. Like other publications of the Society this work is arranged on a plan that facilitates reference on the part of the reader. The fruits are enumerated in alphabetical order, with name, synonyms, date of introduction when known, description of the tree or plant, and also of the fruit itself. In each case there is an illustration of the fruit in black and white, accompanied by general observations relating thereto. These details, of course, occupy the major portion of the volume, but apart from these there are a brief history of pomology, tables of maturity and the most advisable forms in which to grow the fruits recommended by the Committee. Very full particulars concerning diseases and insect pests with the needful remedies for their extirpation. A copious index concludes the work, the size of which is 11in. x 7in.

THE OCEAN COUNTY MOSS & PEAT CO.,
Box 11, W. H. Stackhouse, Prop., Waretown, N. J.

London). If we except the "Book of Cut Flowers," briefly reviewed in one of our former articles, there has been, practically speaking, little or nothing published for many years in English on the art of floral decoration. French and German authorities, however, have not been unmindful of this important industry, and most of the modern books have been penned by foreign writers. As we have more than once before observed, being published by the Country Life Library, the style and get-up generally are of the very best, the floral illustrations, about 60 in number, being delightful specimens of the most artistic photographic engravings one could possibly wish to see in book illustrations. The contents include outdoor flowers and foliage November to February, March, right through the year to October. Then room and conservatory decoration, vases, dinner tables, wild flowers in the house, come in for a share of her attention. In many cases the receptacles for the flowers are well shown and appropriately chosen, while many of her floral compositions are such as should bring about a change in the tables of some of our exhibitions where persons who consider themselves to be persons of a refined and cultural taste are apt to display their productions.

The Modern Carnation: How to grow and show it by Hayward Mathias and P. Smith (Horticultural Printing Co., Burnley). This is intended as an Amateur's and Exhibitor's guide to the culture of the flower upon which it treats. It is plainly got up and contains a few illustrations explanatory of the text. On the question of "dressing" our authors have something to say that would appeal very strongly to some of our carnation and picotee growers for show of a past generation and with which we are in close accord. The advocates of showing flowers as grown are generally persons who have no idea of what a florist's flower is and to whom any colored rag, if bright enough, at the end of a bit of stem is a flower. Florists' flowers for exhibition are not field flowers like buttercups and daisies but the work of ardent souls who have an idea before them.

C HARMAN PAYNE,

London.

FLOWER MARKET REPORTS

BOSTON The market condition remains about the same as last week. Small roses are plentiful with a fair demand. American Beauties are coming in in a good condition; also lily of the valley. Carnations are short of stem, and although the stock is good the demand is light. Business on the whole is very quiet.

A severe warm week **BUFFALO** with heavy rain has just passed, but it is somewhat cooler at present. The supply has been heavy on all lines, especially asters and gladioli, though business seems to increase daily. Weddings are as numerous as in June. White roses have been scarce, especially selects; while short Brides were plentiful enough, there was little demand. Beauties were in good supply, but demand a little light; other sorts sold well. Beginning Monday the call was for white roses and lily of the valley, which sold out clean and prices went up a notch. The recent storm has shortened the supply on asters; select stock is scarce. Carnations, especially Enchantress, are coming in more abundantly and find ready sale.

There was quite an improvement in the counter sales notwithstanding the abnormally warm weather during most of last week. A few large fall weddings beside a great number of small ones put a brighter light on the business outlook. Heavy rains the latter part of the week have made asters look gloomy; and with carnations few and short-stemmed, roses will have to bear the first onslaught. Violets are appearing, but very small and bashful.

A slight improvement was felt in this market last week, the Horse Show and one or two other happenings having apparently braced things up a little. A few hot days also had some effect curtailing the rose shipments. Beauties were fairly plentiful but the quality generally was below par. White roses were quite scarce. Dahlias are coming in freely and go fairly well. The average quality is up to standard of other years but it will take some cooler weather to bring out their finer points. Good asters sell but the glut of poor ones is something fearful. Poor asters can't be given away and don't pay freight. Gladioli are nearly over. Cattleyas, oncidiums and dendrobiums are the chief items in the orchid line. Bouvardia is now coming in freely and finds a cordial welcome. Humboldti is not much grown here except as a Christmas crop. Carnations are coming a little better but there are still a great many poor ones coming in. Violets have made their appearance, and while fine as to fragrance are as yet deficient in size. Sweet peas can still be found in spots and quite good, all things considered.

Business is daily improving. All the florists report first class trade the past week. Several

store openings, large funerals and a few weddings collectively, used up quite a quantity of stock. All stock excepting carnations is plentiful. Fine dahlias are in evidence by big majority at the present time. The quality and quantity in all kinds of roses including American Beauty, is quite strong. Tomlinson Hall reports a very dull week. All kinds of greens are very scarce in this section at the present time.

STATEMENT OF PLANT IMPORTS.

There were entered at the port of New York during the two weeks, September 11 to September 24, inclusive, the following plants:

From Holland: C. C. Abel, 57 cs. bulbs; H. F. Darrow, 2 cs. bulbs, 2 cs. plants; Davies, Turner Co., 3 cs. bulbs; J. Dunn, 9 cs. do.; W. Elliott & Sons, 21 cs. do.; F. Hageman & Co., 39 cs. do.; J. W. Hampton, Jr., & Co., 81 cs. do.; Peter Henderson & Co., 9 cs. do.; Hutchison & Murray, 19 cs. plants; McHutchison & Co., 30 tubs trees, 35 cs. plants; C. F. Meyer, 12 tubs trees, 8 cs. bulbs; J. P. Roosa, 19 cs. bulbs; J. Ter Kuile, 48 cs. do.; J. M. Thorburn & Co., 6 cs. do.; Vaughan's Seed Store, 24 cs. do.; R. M. Ward & Co., 130 cs. do.; J. R. Pierson & Co., 2 cs. do.; Sundry Forwarders, 2104 cs. do., 6 cs. plants. Total, 2562 cs. bulbs, 62 cs. plants, 42 tubs of trees.

From France: International Transportation Co., 1 cs. bulbs; Maltus & Ware, 203 cs. do.; Parke, Davies & Co., 19 pgs. plants; Schulz & Ruckgaber, 92 cs. bulbs; C. D. Stone & Co., 3 cs. do.; Vaughan's Seed Store, 16 cs. do.; Wakem & McLaughlin, 46 cs. do.; R. M. Ward & Co., 437 cs. do.; J. M. Thorburn & Co., 13 pgs. seeds; to order, 300 pgs. do.

From London: W. Elliott & Sons, 16 cs. mushroom spawn; H. F. Darrow, 26 cs. seed; Henry & Lee, 162 cs. bulbs; Order, 8 bgs. seed.

From Glasgow: J. M. Thorburn & Co., 21 bgs. grass seed.

Via Southampton: J. Guile, 14 cs. bulbs; R. M. Ward & Co., 14 cs. do.; Forwarder, 1 cs. plants.

Via Gibraltar: Sundry Forwarders, 400 bgs. seed; To order, 85 bgs. do.

From Germany: P. Henderson & Co., 200 bgs. seed; J. M. Thorburn & Co., 18 bgs. do.

Via Pernambuco: Maltus & Ware, 14 boxes plants.

The warm weather of the past two weeks has for the time being interrupted the bulb trade, but the first frost will start the orders with a rush; that is, the retail orders. The wholesale trade has been very heavy ever since the first shipments were received from Holland; in fact, every sign points to the same great sales of the last few seasons—sales that have cleaned up everything in the line of Dutch bulbs several weeks before the final freezing of the ground, resulting in many orders being returned unfilled to belated bulb customers. It is certainly marvelous how the sales of hyacinths, tulips, crocuses and narcissi are increasing every year.

NEWS NOTES.

Visitors in Boston: P. F. Kessler, New York.

M. B. Kingman of Amherst, Mass., has reopened his store for the season.

B. Schroeter of Detroit has his new store front completed. The much larger show windows and general improvements with paint, brush and wallpaper make everything most inviting.

The largest exhibit for years of flowers, fruit and vegetables was made by the Northboro Grange at Marlboro, Mass., on September 18. In spite of the unfavorable season corn averaging 13 1-2 feet in height was displayed. Willis Wheeler, W. W. Warren, Herbert Kendall, J. W. Allen, Mrs. M. S. Wood were in charge of the fair.

The celebration of the fortieth anniversary of the opening of Massachusetts Agricultural College at Amherst to students, October 2-5, will take the form of a conference on rural progress. The program, which covers many phases of work, includes addresses by Dr. A. C. True, Department of Agriculture, Washington, D. C.; Dr. George E. Stone, Amherst; Prof. John Craig, Ithaca, N. Y., and State Forester F. W. Rane, Boston.

Miss Lucy R. Latter, who originated the plan of school gardens in connection with the schools of the London school board, has received a commission from the Government of the Maharaja to institute school gardens in connection with the public school system of Mysore, India. The largest girls' school in Mysore will be placed at her disposal for the introduction of the work and a class of teachers will be instructed by her in order to carry on the work after she returns home. She will be in Mysore six months.

BUSINESS CHANGES.

R. O. Henderson, of Pana, Ill., has taken a lease of the Shaffer greenhouses.

Frank Howard, of Cambridge, Mass., has removed to 21 Boylston street, Boston.

John T. Ingram, of Oyster Bay, N. Y., has purchased the business of the late J. L. Bingham on Tooker avenue.

E. W. Davis has bought the greenhouses of S. B. Ritter at Athens, Ga., and the name of the Athens Floral Co. will be retained.

A. Grasser and J. H. Humphreys, of Joliet, Ill., have purchased the business of the Mt. Sterling Floral Co., Mt. Sterling, Ky., and for the present will carry it on under the same name.

MOVEMENTS OF GARDENERS.

Mr. Nevens, formerly head gardener for J. Martin, Ross Valley, Calif., has resigned and will be succeeded by P. Stahelin.

INCORPORATED.

Oak Hill Nurseries, Boston; W. F. Donovan, M. T. Twomey, J. T. Mahoney; capital, \$50,000.

BUSINESS CHANCES

FOR SALE—Well established florist business with greenhouses in rear of store. E. C. Thimmes, 245 De Kalb Avenue, Brooklyn, N. Y.

?

Is Your Name In The Above List? If Not, Why Not?

SHADE TREE TROUBLES.

Abstract of lecture given before the Worcester County Horticultural Society, by Dr. George E. Stone.

In touching upon the subject of shade trees a few words might first be said in regard to their general value.

There is nothing which adds so much to the beauty of a town or city as shade trees, and persons of good taste appreciate this fact. One will notice in traveling through any portion of the country that the villages adorned with a large number of beautiful shade trees are those in which have existed for some time considerable public spirit, refinement and culture. On the other hand, mill towns whose inhabitants have no permanent homes, are usually notable for their lack of trees and embellishments in general. Many people, however, appreciate fully the value and beauty of shade trees and no argument is necessary to convince them that they are a great addition to any community.

Shade trees, however, possess another value, that of utility, and we wish to call attention to this feature because it is not generally appreciated and furthermore because it will appeal to the practical man who is little in sympathy with the beautiful in any form. The decisions of courts in this country have in more than one instance proved that trees possess a property value, and in many cases from \$50 to \$200 or more have been awarded to the abutter for the destruction of a single tree. It makes little difference whether a tree is located on the street or on private land or whether it is set out by the town or city or by the abutter, since a tree in front of a piece of property adds value to it and the abutter can claim damages for the destruction of such a tree. An elm tree 18 to 20 inches in diameter for example, may be worth \$100 to \$300, and one would experience little difficulty in obtaining recompense for the destruction of such a tree. If a gas leak occurs in front of a certain property and a tree is killed by gas, the owner can take the case before a court and obtain damages, the amount to be based upon the deterioration of the property owing to the destruction of said tree.

There appears to be no legitimate reason why a city or town should not appropriate money for the setting out of trees along streets and highways, although, of course, the tax payer bears the burden of expense. It is recognized that a sidewalk or curb put in front of an estate is an improvement to it, the abutter being taxed for such improvements, and since a tree is an improvement to an estate and has a property value there is no reason why the community as a whole cannot be taxed for such improvements. Moreover, the value of a tree is continually increasing, since a tree which costs \$2.00 or \$3.00 to plant should be worth \$100 to \$200 or more in the course of 50 years. This aspect of the problem should undoubtedly be emphasized at the present time, as many individuals regard trees as merely ornamental and of no utilitarian value.

The matter of selecting trees is important from the point of view of susceptibility to disease as well as from the aesthetic and utilitarian aspect, and the following list, prepared by

Col. W. F. Cox, Superintendent of the State Forest, N. Y., is quite complete.

Wide Streets	Narrow Streets.
American or White Elm,	Norway Maple,
Hard or Sugar Maple,	White or Silver Maple,
Tulip Tree,	Red Maple,
Basswood, (Linden,)	Ailanthus,
Horse-chestnut,	Cucumber Tree,
Sweet Gum,	Ginkgo,
Sycamore, (Button-ball,)	Bay Willow
White Ash,	Pin Oak
Scarlet Oak	Red Flowering Horsechestnut,
White Oak	Black or Yellow Locust,
Red Oak	Hackberry,
Honey-Locust,	Hardy Catalpa,
American Chestnut,	Lombardy Poplar,
Sycamore Maple,	Carolina poplar,
Italian Poplar.	Cottonwood.

Of this list we are all familiar with the sugar maple and elm, as they have been extensively planted in this region for years and they are undoubtedly the best trees for this region. There are many other trees which might be employed to good advantage in street planting, although some of those in the list are not best suited to our conditions. We occasionally find the sycamore maple, horse-chestnut, tulip tree and white ash planted on streets. The horse-chestnut has the reputation of being a rather dirty tree and is not very long-lived. The sycamore is not planted to any extent with us, although it is a native tree and more or less abundant in our river valleys. In Europe it is used quite largely in a conventional form and in this way may be made adaptable even to business streets, provided there is a space two or three feet wide between the curbing and the sidewalk filled with good loam. This would afford sufficient soil for the growth of conventional trees, as the crown may be modified to any desired size by pruning.

The native basswood when young is a well shaped tree, but those we have seen growing on streets are inclined to be tall and slender and are not altogether satisfactory, although their shape might be modified by pollarding.

The various species of oaks are hardy, well-proportioned trees, although they grow rather slowly, but if planted a good distance apart and filled in with some quickly growing tree, like the Carolina poplar, they make excellent trees for roadsides and when the oaks have attained a fairly good size the poplars may be sacrificed. Various combinations of trees may be employed, an especially effective one being maples and Norway spruces, planted alternately.

To obtain the desired effect quickly the various kinds of poplars are frequently planted, the most highly prized at the present time being the Carolina poplar, which in our state grows wild in the Connecticut valley. The Italian poplar grows the most rapidly, attaining a diameter in some instances of 26 inches in 20 years.

The silver maple is a symmetrical tree of rapid growth but is easily injured by ice.

The red maple is not a desirable tree for planting, and about eighty per cent. of them in the state today are in a diseased condition. One of the mistakes often made in planting the red, Norway and sycamore maples on streets, is neglecting to prune them high enough. These species form large branches very low, the large limbs frequently obstructing traffic, and when

mature it is not desirable to prune them.

The Ginkgo, a native of Japan, has been recommended very highly in recent years as a shade tree, and excellent specimens of this tree may be found growing further south. It does particularly well in Washington, where there is a fine avenue of them on the Agricultural grounds. It grows very slowly here, however, as we seem to be out of range for its best development.

Most of our street trees have their enemies, both insect and fungous. The elm suffers chiefly from the beetle and the sugar maple from borers, which may usually be found on trees injured from some other cause, however. The tulip tree is almost always disfigured by some insect, and the horse-chestnut and sycamore are subject to a leaf fungus. The Italian poplar is often affected by rust, the Carolina poplar is subject to borers and many other trees, especially the maples, suffer each year from sun-scorch to some extent.

Most of the injury caused by fungi, however, is the result of poor pruning or mechanical injuries, particularly when antiseptic methods have not been employed in caring for the wounds. There are various wound fungi which testify to the results of poor pruning and lack of proper antiseptic treatment. Some fungi—for example, *Nectria*—are the result of winter killing, and occasional injury is caused by slight discharges of lightning and frost cracks which cause wounds favoring the development of fungi.

Various root injuries occur from changing the grades of the streets, patting in curbstones, digging man-holes, etc., and a too common source of injury may be traced directly to horses' teeth, the injudicious use of lawn mowers, etc. To prevent injury from lawn mowers the sod should be removed from around the tree for a distance of a foot or more, and with the large number of tree guards now on the market at reasonable prices much of the injury from horses' teeth may be obviated. Of the various types of tree guards in use, one of the most practical and cheapest is that cut in strips about seven feet long and wound about the tree.

The practice of placing signs on trees should be condemned, since ugly scars are often caused by the trees over-growing the sign.

One of the greatest difficulties with which trees have to contend is the wire problem. The rights of trees in the street are at least equal to those of wires, but it often becomes a difficult matter to string wires through a street without interfering with trees. Among the different ways of dealing with wires may be mentioned burying them, which is too costly in some cases; using the ring or cable construction in the case of telephone wires, or placing wires on private property in the rear of buildings. In the case of trolley and electric wires, the ring construction method is out of the question, and in some cases placing them on private property is not practicable. Many poles are attached to trees by means of guy wires, and in our estimation there is very little harm in this practice providing it be properly done. We do not believe the lagbolt system is a

good one, but passing a loop around a tree and using blocks to prevent contact of the wire with the tree is better than resorting to the use of duplicate poles and props. In many cases it is unnecessary to attach wires from poles to trees, since the poles can be imbedded in Portland cement and held firmly in place, which would prevent much injury to trees. It should be pointed out, however, that there is always a risk in attaching wires in any way to trees, as lightning discharges are likely to pass from the guy wires to the trees and damage them, and a great deal of disfiguration is caused by live wires coming into contact with dead ones.

No authentic cases are known of an alternating current, of whatever potential, killing trees, and the injuries from this current are restricted to burning and disfiguration. High tension currents are more dangerous than those of low tension, consequently more attention must be given to the matter of insulation. There are authentic cases of a direct current, however, such as employed by electric railways, killing trees, and there is also evidence to support the idea that trees may be injured or killed by being connected by guy wires with this system.

Many more trees are injured by gas than formerly, which is due to the fact that gas is used much more extensively, is conveyed in larger pipes and the system of calking the joints is quite different from that formerly employed.

Occasional injury is brought about by atmospheric gases—the result of the combustion of coal. This is more likely to occur in places where large amounts of soft coal are burned. Evergreens are peculiarly susceptible to gas poisoning, and often die from its effects.

Injury is sometimes caused by the use of crude petroleum or kerosene. These are frequently employed for spraying the trunks of trees for the woolly aphis and other insects, but it is never safe to apply them even when mixed with water, and many of the landing substances which have been used in connection with the suppression of the gypsy moth are extremely injurious to trees.

Much attention has been giving to killing trees in recent years, and by this practice the life of a tree is undoubtedly prolonged. There are two methods of treatment, one consisting in cleaning the cavities thoroughly, removing all decayed tissue and treating the interior with tar or paint. The ori-

fice of the cavity is then covered with tin and painted. In the other method the tree is filled with Portland cement after it has been thoroughly cleaned and disinfected, using the same proportions as are ordinarily employed in construction work. One of the difficulties in the use of Portland cement for this work is the cracking of the cement in large cavities when the tree sways, which allows fungi to enter in and reinfect the trees. Much more attention is given to the care of trees than formerly, and there are several reliable firms which are doing excellent work at the present time.

CONCERNING LEARN- ING SOMETHING

Well, what is your point of view now on cheap material? The time you spent, trying to make things do—getting them to fit, and then waiting for some small, but mighty important items, left out in shipment—has caused more delay, cost more money than you had any idea it would. You have a house with wooden eave plate, nailed on roof bars, and paid out good money for a house weak at the very point it should be strongest—the eaves. In your next house, put in H & Co.'s steel eave plate and roof bar brackets, then you will have a house which takes less time to put up, and that's up to stay up.

HITCHINGS AND CO.

NEW YORK.

MORE FITTINGS

Yes, and order now, and don't do it in driblets! If you are going to need pipe fittings, some hooks, chairs and sleeves, then get them all at once, then the job won't be held up because you held your ordering back. Fittings that fit are the kind you'll get. Prices right. And if you want anything else remember that we make any part of the greenhouse but the glass. Sell any part.

Lord & Burnham Co., Greenhouse Designers and Manufacturers. New York Office, 1133 Broadway, Corner 26th Street. Branches: Boston, 819 Tremont B'd'g. Philadelphia, 1215 Filbert Street.

Not only sunshine but light—all the light possible is what grapes want—and what they get if its a U-Bar house.

THE QUESTION OF GRAPES

Just now when the late vineries are at their best and the results of some of the earlier ones are fresh in your mind, it is a good time to give the question serious thought. The U-Bar house you know has the curved eaves, wide spacing of glass and a total absence of rafters or other heavy supporting members; this means floods of unhindered sunshine and light reaches your vines and fruit. You also know that not only lots of sunshine is necessary but every bit of additional light is a big item in the dull days of winter and early spring. Because of the greatly increased light in U-Bar graperies, the fruit acquires a delicacy of flavor and beauty of finish impossible with other houses. To grasp the force of this thoroughly, get a U-Bar Catalog and go further into its every detail.

Pierson U-Bar Company, Designers and Builders *U-Bar Greenhouses*, Metropolitan Building, Fourth Avenue and 23rd Street, New York.

Burpee's Two New "SPENCERS" for 1908

A Single Flower of the New
BURPEE'S WHITE SPENCER
Exactly Natural Size

Burpee's White Spencer produces in the greatest profusion flowers of enormous size that are *absolutely pure white*. It is white-seeded and comes true to the Countess Spencer type. The standard is *decidedly waved*, crinkled and fluted; the wavy wings are so folded, that the keel is almost hidden. The standard measures from one and three-quarters to two inches across by one and three-eighths to one and five-eighths inches in depth. The wings are fully an inch wide and nearly as deep as the standard. The flowers are borne three and four to the stem and are uniformly well placed. The stems are extra strong and measure from twelve to fifteen inches in length.

The vines are most vigorous in growth, with heavy foliage, and attain a height of from ten to twelve feet. They are nearly covered with bloom, while the flowers retain their enormous size throughout the season. Of fine substance the magnificent flowers are unsurpassed for cutting and for keeping after being cut.

In sealed packets containing ten seeds each: Per pkt. 15 cts., 2 pkts. for 25 cts., \$1.00 per doz. pkts., \$7.00 per 100 pkts.

In sealed packets containing 25 seeds each: Per pkt. 25 cts., 5 pkts. for \$1.00, \$2.00 per doz. pkts., \$13.75 per 100 pkts.

Burpee's Primrose Spencer

This is a fitting companion to *Burpee's White Spencer*. The vine is equally as thrifty and free flowering, but slightly shorter in growth, attaining a height of eight to nine feet. The flowers are well placed on strong, thick stems, ten to twelve inches long, and are borne never less than three flowers, and sometimes four flowers to the stem—as shown in illustration. The standard measures one and three-quarter inches to nearly (if not quite) two inches across by about one and one-quarter inches deep; the wings are an inch across by one and one-eighth inches deep. The texture is fully as substantial as in *Burpee's White Spencer*.

The color is a *pronounced primrose* or creamy-yellow throughout both standard and wings. It is equal in depth and richness of color to *The Hon. Mrs. E. Kenyon*, which, of course, it outranks in form and size. Both standard and wings are thoroughly crinkled or "waved." *Burpee's Primrose Spencer* will hold its own with any of the so-called "Yellow" Sweet Peas in color, while it *surpasses all others of this color* in size of flower, length of stem and vigor of growth. A decided acquisition to the Spencer type and the first of its color to be introduced.

In sealed packets containing ten seeds each: Per pkt. 15c. 2 pkts. for 25c., \$1.00 per doz. pkts., \$7.00 per 100 pkts.

In sealed packets containing 25 seeds each: Per pkt. 25c. 5 pkts. for \$1.00, \$2.00 per doz. pkts., \$13.75 per 100 pkts.

A handsome Illustrated Circular will be mailed upon application

Roses Under Glass

As the season for firing approaches, ventilating and watering must be attended to with extreme care and caution. The transition from natural to artificial heat, is the most critical period in the life of the rose and any neglect, either from carelessness or ignorance, in the administration of the essentials, ventilation, water and temperature, at this season, will inevitably result in trouble.

With the rapidly shortening days, it must be borne in mind that evaporation is on the decline and stock cannot use, with advantage, the copious supplies of water necessary during the summer months. Root action will also become more sluggish, and if the soil is watered indiscriminately the stock will surely suffer. Artificial heat affects the soil in the benches in an entirely different manner from sun heat, and it will be found "where the pipes are in close proximity to the bench bottom" that the soil underneath is dry, while the surface is apparently wet enough. This condition calls for great care and watchfulness to keep the soil uniformly moist and the roots from suffering.

Syringing must now be practiced on every favorable opportunity in order to keep red spider in check. In nearly every house there are places where, by reason of extra pipes, headers, etc., heat accumulates, and the plants so situated should receive special attention as these are the breeding places of the pest, and, if allowed to remain unmolested, will, in a very short time become truly plague spots.

Care bestowed on the ventilation, and guarding against abrupt changes of temperature, draughts, etc., will minimize the danger of contracting mildew. But if this pest has gained access to the house a coating of sulphur and lime on the steam pipes will soon eradicate it.

There are several ways of preparing this mixture. Some growers use only the sulphur and water; others, instead of using water, dissolve the sulphur in linseed oil, but what virtue there is in either method the writer is unable to say, as the following preparation has proven quite satisfactory to us, being at once economical and beneficial, in that the sulphur sticks to the pipes and gives off fumes until it is entirely dissipated. The mixture is composed of quicklime, sulphur and water, the amount of sulphur being determined by the extent of the mildew contracted. Slake the lime in a bucket used for the purpose, and when boiling, or disintegrated, add the sulphur and mix thoroughly, reducing with water to the consistency of paint. In severe cases of mildew two parts sulphur to one part lime will prove effective. For lighter applications use less sulphur.

Disbudding should receive its full share of attention. To encourage the growth of straight, graceful stems, and substantial buds, all lateral shoots must be removed while they are young and soft and not allowed to remain until they are so hard that they have to be cut off with a knife. Tying the plants neatly to the stakes, so that the whole presents an appearance of symmetry and grace, rather than the bedraggled condition in which, unfortunately, we so often see them, will facilitate syringing, and by admitting a freer circulation of air among the plants give tone and texture to the foliage and prevent the moisture from collecting on the lower leaves, a most fruitful source of black spot and other fungoid diseases.

Clifton, N. J.

J. E. Simpson

Forms of *Euonymus radicans*

Editor HORTICULTURE.

Dear Sir:—I wrote you last spring in reference to the forms of *Euonymus radicans* in common use for ornamental planting (letter was published in your magazine Vol. 5, Page 372.) Since then I have found that the three varieties I described have been classified and described in Professor Sargent's "Trees and Shrubs," Vol. 1, Page 129. Following are the scientific names under which they can be found therein, and also English names under which I have sometimes found these varieties described by a few horticulturists, gardeners, etc. (These English names I think might be improved upon.)

Euonymus radicans, var. *reticulatus* (Rehder). Narrow-leaved Evergreen Creeper.

Euonymus radicans, var. *Carrierei* (Nicholson). Broad-leaved Evergreen Creeper.

Euonymus radicans, var. *vegetus* (Rehder). Round-leaved Evergreen Creeper.

As there is considerable use made of these forms it may be of interest to your readers to have these facts brought to their attention, and it may help to establish a more accurate knowledge of the forms in question, something very much to be desired, among nurserymen especially.

Still other varieties have been classified and named, but they are not so apt to be confused as the above.

Very truly yours,

Chas. J. Kochler

Pyrethrum for White Fly

Editor HORTICULTURE.

Dear Sir:—Allow me to say a few words in regard to the article published in a recent issue about "Hydrocyanic Acid Gas for White Fly."

This gas is certainly sure death to the white fly, but it will also ruin the tomatoes and a good many other plants if used in the proportions recommended. A much safer way to get rid of the white fly is to fumigate with Pyrethrum (or Persian Insect Powder, which to all practical purposes is the same thing).

Put a few handfuls of the powder on a saucer at every 25 feet or so, put a few drops of wood alcohol on and light. It will burn itself out over night. Have the house closed tight; fumigate for a few nights in succession and repeat as often as a fly makes its appearance. This is very important, as the fumes will kill the fly but not the larvæ. Don't give the flies a chance to lay eggs and there will not be any larvæ after a while. I have got rid of all the white flies in my houses in this way without injuring anything amongst a great variety of plants including orchids and ferns as well as tomatoes and cucumbers.

The fumes of the Pyrethrum are choking and rather unpleasant but otherwise harmless to human beings.

Protect the pines

The ease with which young pines may be raised from seed and the advisability of their extensive planting on waste tracts all over the country was the keynote of one of the addresses at the horticultural congress at Norfolk last week. In this connection it is very gratifying to note how freely the white pine is coming up spontaneously all over New England, particularly where the deciduous growth which followed the cutting of the primeval pine forests has been taken off. In vast districts of Massachusetts, New Hampshire and Maine it would seem that protection, not planting, is all that is now needed. The coming generation of New Englanders should have pine lumber in abundance provided proper protection is given now against fire and the ravaging pulp-mill.

A point well taken

Long before the advent of the present generation of horticulturists, and continuously ever since, has the discussion on the relative merits of practical and theoretical education in horticulture gone on. Never, however, so far as our knowledge goes, has the insufficiency of the college graduate lacking actual experience been so frankly admitted by those high in college work as at the Jamestown Congress last week. It was asserted that if the agricultural college pupil is to be worth, when turned out, what it cost to make him he must be given teachers a part of whose lives, at least, has been spent on the farm and in the garden, attaining by actual experience that knowledge which books and lectures can never impart but which is now recognized to be indispensable in successful teaching and demonstration. To the ranks of the practical working horticulturists, then, must the colleges go for instructors before they can fully carry on the work for which they have been created. No doubt "the man with the hoe" will acquit himself with dignity and credit when put to the test.

"Hands across the sea"

We draw from the Market Growers' Gazette, a journal published in London, that the relations between the fruit and flower growers and the transportation companies are no more satisfactory in England than they are in this country. At a meeting held at Badsey to protest against existing conditions and rates it was asserted that practically all the proceeds from the huge crop of fruit being marketed from that district this year goes into the pocket of the railroad company. Among the instances cited which will find a responsive echo with some of our flower shippers was that of one man who shipped one pot (?) of asters to a Manchester salesman; the asters were sold for 2s. and the railway charge was 2s. 3d. Another consigned some wallflowers to Newcastle which arrived after two days, spoiled; they were sold for 1s. and the carriage cost 2s. Another protester argued that at the rates demanded shippers should "ask that the produce should not be trampled on by the porters and that it should be quickly delivered!" Fight it out to a finish, gentlemen. You'll get your rights if you only hang on and show them you're in dead earnest.

The credit problem

Seemingly as far off from determination as ever, the old problem of a better system of credits and collections in the wholesale plant and cut flower trade is again agitating the growers and wholesale dealers, who find themselves about to open the new season with books still burdened with accounts receivable held over from last year. The framing of any method of credit limitation, combining the necessary justice, elasticity and effectiveness, is no easy matter. There are to be found, of course, among the retail tradesmen of all large cities, firms of all grades of reliability and the estimates of comparative responsibility in the case of many of them are as divergent as are the experiences of those who have severally had dealings with them. Methods of classifying and rating which work satisfactorily in certain other lines of trade prove impracticable in the marketing of perishable flowers with their widely fluctuating values from day to day or from hour to hour and there are times also, when a consignor's wishes cannot be ignored. Yet the need of reform must be apparent to anyone conversant with the facts. If the extent to which the wholesale trade in the aggregate is furnishing capital for the retail flower trade in the large centres could be known, we believe it would create a sensation.

A CARNATION WITH A FUTURE.

CARNATION SARAH HILL.

THE QUESTION OF THE HOUR.

The contribution from our esteemed editor on "The Question of the Hour" brings up a very important question which ought to be taken up by the organizers of the Boston Landscape School. When we consider how far practical knowledge goes in securing a position, private or otherwise, and also the time and money spent by the members of the Boston landscape class in making themselves more familiar with landscape gardening, besides the cost of securing a small horticultural library which is necessary but is very rarely so with any other class of tradesmen, the incident told by our editor about a gardener having a fourteen-year record in his last position having been offered the large salary of \$1.75 per day, should show to every one that there is something more required than a good practical knowledge of horticulture, good habits, etc. I do not underestimate the value of the Boston landscape course but, as is well known to every one, we can secure through the correspondence landscape school more individual attention than is possible to secure with such a large attendance as at the Boston Landscape School, also a considerable reduction in fees—not forgetting car fares.

We understand the course is to extend over three years. By this time every member ought to be thoroughly acquainted with landscape gardening but all of us have not the almighty dollar to go into business for our-

selves, therefore we have to secure a situation on a private estate or otherwise.

We are also told that the Boston Landscape Class was organized with a view to bringing the best young gardeners to the front, but unless the promoters of this class can assist its members, whether in a small place or as assistant, to secure positions where their ability will be appreciated, the members will just be where they started and probably still have to accept positions with a salary of \$1.75 per day.

For the welfare of the profession and the success of the Boston Landscape Class let us consider what can be done to assist its members to secure remunerative positions and report at their monthly meetings their progress in this direction. By this method, instead of forty members attending the Landscape Class, an increase will be found in a very short time and the organizers will be able to give an assistant to Mr. Howard who could then go among the members of the class and explain more in detail. Without this assistance our readers can judge for themselves the results.

DAVID MILLER.

PERSONAL.

Visitors in New York: Carl Jurgens, Jr., Newport, R. I., Mr. Breitenstein of Brietenstein & Flemm, Pittsburg, Pa.

A reception was tendered to Martin E. Tuohy of So. Boston, Mass., at Ber-

CHARLES KNOPF

Raiser of Carnation Sarah Hill.

The illustration herewith shows the actual size of this superb pure white carnation which, we are told, will be the grandest novelty in its line for 1908.

nice hall on September 16, on his return from a two months' trip to Ireland.

Thomas F. Galvin sailed from Boston on the White Star liner Canopic on October 1. He will leave his family in the South of France for the winter.

Visitors in Boston: R. L. Adams, Salinas, Calif.; Fred Lautenschlager, Chicago; S. S. Skidelsky, Philadelphia; Andrew Wilson, Summit, N. J.; Thos. Knight, Rutherford, N. J.; Geo. F. Struck, Summit, N. J.

Walter F. Sheridan of New York has been quite ill at the hospital for the past two weeks, and present indications are that an operation for appendicitis may be found necessary.

Robert Hunnick, who was for many years head gardener at Rough Point, F. W. Vanderbilt's Newport estate, has purchased four lots of land in the restricted neighborhood on the Annandale road.

Edward Hatch, well-known to all the trade about Boston and to many elsewhere as the treasurer of the Gardeners' and Florists' Club of Boston, and an all-round, whole-souled friend of the horticultural fraternity, is the moving spirit in a new banking institution, The Exchange Trust Company, which opened for business at 33 State street on October 1.

The Knights' Review, a magazine published at Cincinnati, in its September issue presents an excellent portrait of D. Rusconi, the well-known wholesale florist of that city. Mr. Rusconi is a veteran of the war between Italy and Austria, 40 years ago, and a compatriot of the great Garibaldi. He has been identified with the plant, bulb and supply trade in Cincinnati since 1879. He is treasurer of the Cincinnati Florists' Society.

NEWS OF THE CLUBS AND SOCIETIES

MARYLAND HORTICULTURAL SOCIETY.

In the beautiful Court of the States Exhibit Palace, Jamestown Exposition, the summer meeting of the Maryland Horticultural Society was called to order by President Orlando Harrison, who in his introductory remarks expressed to the members his appreciation of the first privilege of presiding over their deliberations, and congratulated the Society on the large attendance. Pres. M. St. George Tucker delivered the address of welcome. After music by the Exposition band, President Harrison introduced Hon. W. McCulloch Brown, who made a pleasing response, thanking President Tucker for his warm welcome, and expressed the appreciation of the members of the Society to the Exposition authorities for setting aside a day to be known as the Maryland Horticultural Society Day and for providing such a pleasant place for the meeting. At the conclusion of this address, the band played "Dixie."

The regular program was then followed and President Harrison introduced Prof. R. W. Silvester, of the Maryland Agricultural College, whose address may be considered the feature of the morning session. Pres. Silvester in an eloquent manner discussed "The great benefit to be derived from the annual meetings and exhibits of the Society," and expressed in no uncertain terms the necessity of the horticulturist as well as the agriculturist to organize in order to protect themselves. He cited some of the great results obtained by similar organizations in other parts of the country to secure their just rights in the sale of their products. He also discussed horticultural education and the great work the agricultural colleges and experiment stations are doing in this country.

The next speaker was Julius J. Heinrich, on "The Troubles of a Landscape Gardener at an Exposition." This address proved very interesting. Prof. L. R. Taft of Michigan was then introduced and he discussed "The Possibilities of the Peach, Michigan vs. Maryland." Prof. Taft brought out the great success of the peach in Michigan, and cited conditions applicable to Maryland. He stated that of course the yellows were found here and there, but the up-to-date orchardist made it a point never to let a diseased tree remain for a day after the detection. Prompt action in destroying the trees will prevent severe injury. He ably discussed the manner of selection and caring for a peach orchard.

"The possibility of nut growing in Maryland" was ably presented by Prof. M. E. Van Deman. Many members of the Society were surprised to know the great profit of the various kinds of nuts that can be grown in the State.

The last address on the program was by Prof. C. P. Close, who discussed "Some of the Newer Strawberries in 1907." Prof. Close brought out many points of interest in connection with the new varieties of strawberries and cited the great success that the Experiment Station is having in this work.

The Secretary, Prof. Thomas B. Symons, then called the attention of the

members to the annual meeting of the Society, which will be held in Baltimore, Dec. 3rd and 4th, in the Fifth Regiment Armory. He pointed out that there would be over 60,000 sq. ft., to cover with exhibits, and stated that it was the desire of the officers to make this the greatest horticultural show ever held in the East. The large amount offered in premiums should be an incentive to all to compete. He urged that members send fruit to the cold storage, and that the florists grow special plants for the show. Prof. Symons thanked the members for their cordial support in making the Horticultural Exhibit at Jamestown Exposition, and stated that he realized the great difficulty in their sending fruit this off year in the State.

After the meeting the members of the Society visited the Horticultural Exhibit. Many were greatly surprised to see the fine peaches and apples shown this year. The fine exhibit of cauliflower also attracted great attention.

The space was beautifully decorated with roses, carnations and a large exhibit of many varieties of dahlias from R. Vincent, Jr., & Sons, of White Marsh, Maryland.

This concluded the program, and after passing the following resolutions, the meeting adjourned:

"Inasmuch as the press of Baltimore City and Counties of the State as well as the press of Norfolk have from time to time freely published accounts of the Maryland Horticultural Exhibit at the Jamestown Exposition, thereby advertising the great horticultural possibilities of Maryland;

Resolved: That the thanks and appreciation of the members of the Maryland State Horticultural Society be expressed through this resolution to all editors in the State as well as in Virginia and to various horticultural and agricultural journals for the cordial support in promoting the aims of the Association in bringing to the public's attention, the great opportunities for this industry in Maryland. Be it further

Resolved: That the members of the Maryland State Horticultural Society are very much gratified with the good work done by Prof. Thos. B. Symons at the Jamestown Exposition, especially when we take into consideration the small amount of the appropriation he had to do it with, and ask that he be commended in all that he is doing for our "Grand Old State of Maryland." Be it further

Resolved: That the members of this Association extend to the officers of the Jamestown Exposition their great appreciation for setting aside September 24th to be known as Maryland Horticultural Society Day and various courtesies in furnishing music at the opening of our session, and providing a most pleasant place for the meeting. Be it further

Resolved: That as the Jamestown Exposition has received so much adverse comment by earlier visitors that would tend to discourage future visitors from the Exposition, that the members of this Association hereby testify to their fellow citizens in the

State that the Exposition in its complete form is more than worth a visit by every Marylander, and we urge upon every one in the State that has not visited same to not miss this great opportunity of viewing a picturesque as well as most edifying Exposition.

LENOX HORTICULTURAL SOCIETY.

The regular meeting of the Lenox Horticultural Society was held September 21st, vice-president W. Jack in the chair. Messrs. E. Jenkins, A. H. Wingett and A. J. Loveless were appointed finance committee for the chrysanthemum exhibition. A Jenkins gave a description of his recent visit to England among the most interesting features being Wolverhampton and Shrewsbury summer exhibitions.

A magnificent cup was presented to the society by Henry A. Dreer of Philadelphia for competition at the fall exhibition, and should prove an incentive for more members to compete in the miscellaneous group of plants. The following questions were found in the box: What is the best soil for sweet peas? What are the best varieties?

A very interesting discussion followed, the consensus of opinion being that a soil well enriched with barnyard manures and deeply spaded, and upon which no similar crop had been grown for some time, was the best suited for sweet pea culture.

With most growers sweet peas have done remarkably well this season, and the following list of varieties were considered the best in their different colors: King Edward, Countess Spencer, Gladys Unwin, Miss Willmott, Helen Pierce, Lady Grisel Hamilton, Othello, Mrs. E. Kenyon, Dorothy Eckford, Nora Unwin, White Wonder, Navy Blue. The novelties such as Frank Doiby, Mrs. Castle and others were grown only in a limited way and it was a general impression that they would have to show a marked improvement before displacing any of the above list.

G. H. INSTONE, Sec'y.

FLORISTS' CLUB OF PHILADELPHIA.

The annual meeting of this club was held on the 1st inst. and was largely attended. A spirited contest developed in the election of officers for the ensuing year. The new board is as follows: President, Fred Hahman; vice-president, William Graham; secretary, David Rust; treasurer, George Craig. An excellent paper was read by W. E. McKissick on the commission man's relations to the salesman and the storekeeper which we hope to find room for in an early issue. Some well finished carnations of standard varieties were shown by William Kleinheinz of the Widener conservatories, who explained to the members his cultural methods in securing such fine results at this early season. A vase of the new pink rose Mrs. Jardine, was exhibited by Robert Scott & Son and excited much favorable comment. The color is a bright rosy pink, shading in the outer petals to salmon pink. It is lovely in form and substance and very fragrant.

The exhibitors claim that this new variety is the superior of Bridesmaid and Killarney in every way, and especially so in mid-winter when these two standards lack color. Mrs. Jardine is a hybrid tea raised by the Dicksons of Newtonards.

WASHINGTON FLORISTS' CLUB.

The regular monthly meeting of the W. F. C. was held Oct. 1st at 1007 G street N. W., with a fairly good attendance. One of the most attractive features of the evening was a fine dahlia exhibit. W. R. Gray of Oakton, Va., had an extensive display, as did R. Vincent and Sons and Henry A. Dreer. Dr. Warrenton Evans, a celebrated dentist of Washington, had a most beautiful array of choice cactus dahlias.

All were glad to welcome back our Vice-President Blackistone, who has been summering near Boyds, Md. P. H. Dorsett of Alexandria was present as guest of the club. Several matters of vital importance were brought up and discussed. A report of the matter allowing Bay and other ornamental trees on the sidewalks was made, to the effect that they could not be placed more than 4 ft. from building. The next regular meeting will be held Nov. 5th at Gude's Hall.

TARRYTOWN HORTICULTURAL SOCIETY.

The regular monthly meeting of the T. H. S. was held in Good Temple Hall Friday evening, September 27, President Howard Nichols, presiding. Wm. Will, Katonah, N. Y., and Alex. Maitland, Irvington, N. Y., were elected to active membership. Some very good exhibits of vegetables were on the tables, which created a very lively discussion as to methods of judging.

The tickets are out for the November show, and our secretary urged the members to push the sale of same.

CLUB AND SOCIETY NOTES.

The charter of incorporation has been received by the Horticultural Society of St. Louis. November 12-15 are the dates set for the fall show.

The Toronto Gardeners' and Florists' Association held their first meeting of the season on Sept. 17, President Edward Dale in the chair. A special exhibit at the fruit and flower show in November will be made by them.

The Birmingham Florists' and Horticultural Society has just been organized in Birmingham, Ala., with officers as follows: President, Hugh Seales; vice-pres., G. B. McVay; sec., Alex Sawyer; treas., Andrew Hague. Meetings will be held on the first Tuesday of each month.

The dahlia show of the American Institute at the Berkeley Lyceum, New York, last week brought out a superb display of this popular flower in all its classes, as well as four collections of gladioli, orchids, decorative greenhouse plants, etc. The Charles Lanier dahlia sent from Lenox created a sensation equal to that produced in Boston on its appearance there recently.

THE EXHIBITIONS

RECENT SHOWS.

Huntington (N. Y.) Horticultural and Agricultural Society.

The fifth annual exhibition of the Huntington Horticultural and Agricultural Society held on September 26th, was a great success. The entries, while not quite so numerous as in some years, were of uniformly excellent quality. A heavy rain storm on Monday had damaged fruit and flowers badly.

Arthur Cowee, the gladiolus specialist of Berlin, N. Y., had a fine display of named and mixed gladioli, many new and interesting shades of color being shown. The stage decoration of palms and ferns by August Heckscher was worthy of note.

Some of the prize winners were: August Heckscher, Adolph Alius, gardener, 1st for ferns, palm, begonia, roses, carnations, basket and bouquet, collection six varieties vegetables; twelve first prizes on vegetables and three on fruit. Walter Jennings, Richard Cartwright, gardener, 1st for floral centerpiece, collection of 12 varieties vegetables; six first prizes on vegetables and four on fruit. W. J. Matheson, James Kirby, gardener, 1st for dahlias, 12 double, cactus, and collection of dahlias; collection of perennials; four 1st prizes on vegetables and two on fruit. Rosemary Farm, J. H. Smith, superintendent, two first prizes on vegetables and two on fruit. George Taylor, Edward Gildersleeve, gardener, three firsts on vegetables and two on fruit. Joseph Mercier, six firsts on vegetables. H. T. & A. H. Funnell, 1st for begonia, specimen flowering plant; special for peppers, first for apples. L. I. Railroad experimental stations at Wading River and Medford, second and third on collection of 12 varieties of vegetables. H. Paulding, first for watermelon, and two firsts on fruit. C. A. Wicks, one first on vegetables, two on fruit. Mrs. S. A. Smith, two firsts on celery. David E. Cisco, first on sweet corn, three firsts on apples.

The Peter Henderson & Co. premium was captured by Walter Jennings. Stumpp & Walter Co. prize by Mrs. S. A. Smith, Vaughan's prizes by August Heckscher and H. T. & A. H. Funnell, Rickards Bros'. prizes by J. H. Smith and August Heckscher.

A. H. FUNNELL, Sec.

Connecticut Horticultural Society.

This society held its dahlia show in Unity Hall, Hartford, on Wednesday, Sept. 25. Owing to the excessively heavy rains of the previous Monday fears were entertained that really good exhibits would be the exception rather than the rule. Happily, however, these fears proved groundless, and the exhibition, as a whole, was excellent. Splendid exhibits were staged by the Black Hall greenhouses, E. H. Steele, manager; J. F. Huss, superintendent of the Goodwin estate; W. W. Hunt & Co., Blue Hill Nurseries; the City Parks, Peter Zuger, head

gardener; James P. Ralph, New Britain, Conn.

The judges were C. H. Sierman, J. F. Coombs and F. W. Davis, and their awards gave general satisfaction.

Miscellaneous exhibits, other than dahlias, added much to the interest of the show. Under this head, special prizes were awarded to J. F. Huss for a fine collection of the newer Japanese anemones and for collection of vegetables; W. L. Goodwin, J. A. Weber, gardener, collection of grapes; Whitney greenhouses, Carl Peterson, superintendent, exhibit of Kaiserin roses; John Coombs, group of decorative plants; City Parks, group of cannas; W. W. Hunt, collection of hardy evergreens.

ALEX. CUMMING.

Aster Show at Spokane.

The eleventh aster show under the direction of the Spokane Floral Association at the Interstate fair grounds on the opening day of the industrial exhibition, Sept. 23 to Oct. 5, was the feature attraction at the end of the Pike. The thousands of blooms were shown under a big white tent, which was filled to capacity when Mayor Moore formally opened the show and presented two handsome silver cups for the best displays, the condition being they must be won twice to become the property of exhibitors. Mr. Moore explained that the purpose of these exhibitions is to encourage the cultivation of flowers and make Spokane more attractive, adding that when the city shall have completed its park system and civic centers it will have 580 acres of land filled with beautiful trees, shrubs and blooms. Mesdames F. Wallace King, Z. A. Pile and W. H. Ludden, judges, made these awards:

Display of asters, silver cup, offered by Interstate Fair Association, Herman Thoeni; second, Miss Carolyn Richards.

Group of asters, silver cup, offered by the City Beautiful committee, Herman Thoeni; second, blue ribbon, Dr. W. A. Watson.

Display of cut flowers, Hoyt Bros.; second, Spokane Florist Company.

Potted plants, first, Spokane Floral Company; second, Hoyt Bros.

Fifty tall growing asters, Mrs. O. M. Sparke; second, E. L. Bloom.

Design, Hoyt Bros.; second, Mrs. A. Gill.

Design, E. L. Bloom; second, L. A. Valentine.

Basket, Miss Carolyn Richards; second, Mrs. John Bantham.

Hanging basket, Lou Riley.

Display of dahlias, Alec Keegan; second, Miss Carolyn Richards.

Mrs. Josephine Brinkerhoff, through whose perseverance and work the culture of asters in Spokane has gained such widespread interest, was highly complimented upon the success attained, and it is hoped she will continue her excellent work. The association was formed ten years ago.

Houghton Horticultural Society.

The three days' show of the Houghton Horticultural Society, Lynn Mass., closed on September 26 with a banquet. Among the commercial growers, E. F.

Dwyer was awarded first prize for selection of cut flowers and second prize for dahlias, W. D. Moon taking first. The society's silver medal was won by George Barker, gardener on the A. F. Estabrook estate.

COMING SHOWS.

Massachusetts Horticultural Society Fruit and Vegetable Show.

The annual exhibition of fruits and vegetables of the Massachusetts Horticultural Society will take place at Horticultural Hall, 300 Massachusetts Avenue, Boston, Thursday and Friday, October 10 and 11.

This is the only exhibition of the Society which is devoted exclusively to the fruit and vegetable interests, and it is intended that it shall represent the products of New England in these lines.

It is expected that every one of the New England states will contribute specimens of its fruits and vegetables which, with the displays of our local growers, will make a grand autumn festival.

The sum of \$500 is to be awarded in prizes for fruits, and \$300 for vegetables.

Special interest centers in the classes for collections of apples, pears and grapes, and in the decorative collections of vegetables, for which large prizes are offered, and the competition in these is expected to be keen.

The exhibition, which will be free to all, will be open Thursday, October 10, from 12 m. to 6 p. m., and Friday, October 11, from 10 a. m. to 6 p. m.

WM. P. RICH, Secretary.

AN ENTERPRISING TEXAS CITY.

A vigorous campaign for the planting of trees in Denison, Texas, during the tree-planting season, has been begun. The splendid success attending the distribution of flower seeds through the public schools in the spring has encouraged the Civic Improvement League to undertake a similar work in the interests of trees during the winter. Plans have not been fully matured, but it is known that Secretary Larkin is figuring on the purchase of several thousand trees which he hoped to buy at a very low figure and in a general way the plan will be to furnish these trees to the school children at actual cost and to arouse them to an understanding of the value of trees. While Texas towns have been ever on the alert for enterprises and have made desperate efforts along certain lines of development, the aesthetic side of the proposition has escaped attention. The important feature of town buildings, that of making it a comfortable place to live in, is too often neglected.

About a year ago the Board of Trade and the Civic Improvement League of Denison united in an effort to improve civic conditions in that busy town, and the results have been highly gratifying and the effects far-reaching. There has been a wonderful awakening among the people and young and old have been stimulated to action in the improvement of the streets and the home grounds.

HORTICULTURE IN THE EASTERN STATES.

Read at the Congress of Horticulture, Norfolk, Va., by J. K. M. L. Farquhar.

Representing, as I do at this congress, the section of this country first settled by the white race, it affords me the greatest satisfaction to point to the very early date at which interest in horticulture found expression.

The very name of their vessel, the Mayflower, must have brought often times to the recollection of the Pilgrims during their long voyage the fragrant and beautiful hedgerows of white and pinkish hawthorn, which in England they called mayflower, a name which they soon bestowed upon the choicest and sweetest of spring flowers of their adopted country. Long before they saw the mayflower bloom, however, the Pilgrims had raised their voices in praise of the beautiful garden products of the new world. The explorers then sent out on the 16th of November, 1620, reported that they had found divers fair Indian baskets filled with corn, some whereof was in ears, fair and good of divers colors, which seemed to them a very goodly sight, having seen none before,

J. K. M. L. FARQUHAR

of which rarities they took some to carry to their friends on shipboard, like as the Israelites' spies brought from Eschol some of the good fruits of the land.

In 1621 Edward Winslow, describing the new country, wrote: "Here are grapes, white and red, and very sweet and strong also; strawberries, gooseberries, raspberries, etc.; plums of three sorts, white, black and red, being almost as good as Damson; abundance of roses, white, red and damask, single but very sweet indeed."

In the spring of 1621 the Pilgrims at Plymouth planted twenty acres of corn and six acres of barley and peas. The corn did well, the barley fairly well, but the peas were not worth gathering, having been sown too late and became sun-scorched while in bloom. Numerous records of farm and garden crops planted by the Pilgrims have come down to us, and many evidences still exist in the locality they occupied of their zeal in garden work. At first the Colonists, of necessity, imported fruit trees and vegetables for their sustenance. Within twenty years of the landing of the Pilgrims, Governor Winthrop of the Massachusetts Colony, at his farm in Charles-

town; Governor Endicott, of the Salem Colony; Governor Prince, of the Plymouth Colony, and Governor Stuyvesant, of New Amsterdam, had established nurseries, dealt in fruit trees or plants, and were promoters of horticulture. Fruits, vegetables and a large variety of herbs were imported and sold. Flowers were too great a luxury for the Colonists, and with the exception, perhaps, of a few roses, honeysuckle and pink milfoil, were not grown.

The First Flower Gardens.

Not until the beginning of the eighteenth century was there opportunity to give much attention to flowers. About that time the wealthier citizens of Philadelphia, Boston and New York began to cultivate large gardens, usually arranged in terraces, after the English style of that period, about their residences. One of these estates in the very heart of Boston was the residence of Governor Bellingham, and afterwards of Andrew Faneuil, who built upon it the first greenhouse in New England. On his decease it became the property of his nephew, the famous Peter Faneuil, who presented to the city of Boston the Cradle of Liberty. So beautiful was this garden that it became known as Faneuil's Seven-Acre Eden.

The Revolution stopped further progress in horticulture until the country became settled under the new government. Then began an era in garden work, marked by greater enthusiasm than ever before—enthusiasm which got its impetus from Washington, as he surveyed his grounds at Mount Vernon and made plans indicating the locations for trees and shrubs, many of which he collected or imported from Europe; and which upon arrival were planted by the same busy hands that earlier in their existence had cut down the immortal cherry tree, and which later in life made pruning their favorite exercise—enthusiasm which drew with it the second and third Presidents of the United States, John Adams and Thomas Jefferson, as well as many other notables of the eighteenth century—enthusiasm so perennial and vigorous that all predictions of progress have been more than fulfilled.

Present Attainments.

A. J. Downing in his excellent work on landscape gardening, published about seventy years ago, said:

"In the United States it is highly improbable that we shall ever witness such splendid examples of landscape gardens as those abroad," referring to Blenheim, Chatsworth, Woburn Abbey and Arundel Castle. That which Mr. Downing deemed improbable has taken place, and gardens more elaborate and costly are being constructed at the present time in the United States than in any other country. Take, for example, the beautiful gardens of Mr. James B. Duke at Somerville, New Jersey, which have been under construction for six or seven years, under the guidance of that genius of landscape art, Mr. Horatio Buckenham, employing twelve hundred men and involving an annual expenditure of half a million dollars or more—a garden covering an area of ten thousand acres.

The Pioneers.

The pioneers of horticulture of a

hundred years ago were the wealthier citizens; there were really no professional gardeners then. The Pennsylvania and Massachusetts Horticultural Societies were organized by these interested amateurs. A similar society was organized in New York in 1818, but ceased to exist in 1837.

The first professional gardener to come to this country was John Hesketh, who settled in Hallowell, Maine, in 1797, and was not afterwards heard of. In 1824, Mr. Andre Parmentier, from Enghien, Holland, settled in Brooklyn, and established nurseries, where he gave an example of the natural style of laying out grounds. As the first American landscape gardener, Mr. Parmentier soon had many clients from all parts of the country, and even from Canada, to whom he furnished both plans and plants. Mr. Downing considered that Mr. Parmentier had done much more for landscape gardening in America than any other individual. It is our turn to pay the same compliment to Mr. Downing, whose masterly works on landscape gardening, although written about seventy years ago, are still the standards.

In the economic line of horticulture there has been progress also. In New England we have now not only delicacies for the sick and luxuries for the wealthy, as our ordinary garden vegetables and fruits were considered in the early days, we go much further; we have gardeners who produce asparagus, cucumbers, tomatoes, string beans, melons, etc., as freely during December, January and on to June or July, as they are produced in the open ground in their season. One Newport gardener ships to his employer in New York a bushel or two of melons weekly. Another on the North Shore of Massachusetts sent in during last March a daily supply of fresh peas, sweet corn, etc.

Possibilities in Fruit and Vegetable Culture.

Notwithstanding the progress made there is still much to be done in fruit and vegetable culture. We are importing hot-house grapes from Europe. We are importing cauliflower during spring and early summer, and we are importing a number of salads, all of which may and in time will be produced here. In case of salads there are many excellent kinds unknown here which should be introduced, and the people instructed how to prepare them.

Among hot-house fruits the lichee should find a place; it is most prolific and equals Muscat grapes in flavor.

In commercial floriculture the East has made great progress. I need only recall the Lawson and Enchantress carnations raised by Mr. Peter Fisher of Boston; the work of the Waban Rose Conservatories, the recent new roses of Mr. M. H. Walsh of Woods Hole, Mass., which are quite as popular in Europe as they are here.

The Gardeners' Opportunity.

The concentration of wealth in New York ensures for the western florist the highest price for choice flowers. It also affords the gardener the largest opportunity for the pursuit of his profession. Within the past five years there seems to have been much greater interest on the part of the wealthy

class than formerly, in horticulture and rural life. This may be accounted for partly by travel and a desire to have such gardens as are seen in Europe, but I think it is due rather to the fact that the automobile has rendered the country home more accessible to the business man. The interest of the well-to-do in horticulture is further manifested by their support and activity in societies for its promotion, as the New York Botanical Gardens, the Massachusetts Horticultural Society and others.

The three largest Eastern cities have each much to be proud of horticulturally. Although the Bowery is no longer the Governor's Garden, New York has a noble horticultural institution in Bronx, Philadelphia has her beautiful Fairmount Park, sections of which were notable gardens of the past two centuries. Boston has always been at the front in horticultural work. No institution in the country has done more than the Massachusetts Horticultural Society. The names of General Dearborn, H. H. Hunnewell, Marshal P. Wilder, C. M. Hovey and F. L. Olmsted are too well known for the great works they have accomplished to necessitate my reviewing them.

Boston's Great Arboretum.

But we have in Boston today one who is doing a greater work for horticulture than any one who has preceded him. I refer to Professor C. S. Sargent. To him Boston and the country is indebted for the finest arboretum in the world, in which there are now growing over five thousand species and varieties of trees and shrubs. He has travelled over the greater part of the globe seeking new material, and his collectors are now busy in hitherto unexplored regions, collecting new material for shipment to Boston with which to enrich American horticulture. Daily he spends hours in his office personally examining and describing species and varieties of trees and shrubs for his Silva, the greatest work relating to horticulture ever undertaken in this country. The magnitude of the work at the Arnold Arboretum may be better understood when learned that three hundred and fifty varieties of Crataegus have been planted in the Order. There are approximately one hundred and fifty varieties of Syringa vulgaris, seventy varieties of Prunus, thirty-five of Pyrus, forty of Malus and about four hundred species and varieties of willows.

The Gardeners' and Florists' Club.

Another medium of horticultural progress is the Gardeners' and Florists' Club which has over five hundred active members. Meetings are held monthly for the discussion of garden topics and a class devoted to the study of landscape gardening meets twice a week during the winter months.

The magnificent private estates with extensive greenhouses of the East, including those of Bar Harbor, Boston and the Massachusetts Coast, Lenox, Newport, Long Island Sound, on the banks of the Hudson, along the New Jersey Coast, and in the vicinity of Philadelphia demand from the gardener the highest degree of energy and progress.

THE COMMERCIAL GROWING OF CUT FLOWERS.

Read before the Horticultural Congress at the Jamestown Exposition, by F. R. Emerson, Tarrytown, N. Y.

A Phenomenal Growth.

The development in the commercial growing of cut flowers in this country during the last thirty years is phenomenal. What might be dignified as the commercial growing of cut flowers practically had its beginning less than thirty years ago. Prior to that time, the quantity of flowers produced was insignificant, the quality, compared with present standards, inferior, and the methods of culture crude in the extreme. With the increase of wealth, there has been a marvelous progress in the production of cut flowers, both in the quality and the immense quantities produced. It seems incredible now that the writer, less than thirty years ago, was advised by one of the foremost florists of that time not to go into the cut flower growing part of the business, because it would soon be overdone. This seems the more incredible when one considers that today many single establishments are producing more cut flowers than the entire greenhouse production of the United States probably amounted to at that time.

Conditions Thirty Years Ago.

New York, which is one of the greatest cut flower centers in the world, thirty years ago depended on Boston for its supply of roses. The leading varieties of roses in those days were Safrano, Isabella Sprunt, and Bon Silene, all of which have practically disappeared, having been superseded by improved sorts, and to-day these one-time popular roses are almost unknown. In carnations at that time the leading variety was Pres. De Graw. A long-stemmed carnation was then unthought of, as many buds being allowed to develop on one stem as possible, and the flowers were cut with no stems. Loose, long-stemmed flowers were then an unknown quantity. These short-stemmed flowers were supplemented by wooden stems and wires, and made up into baskets, bouquets, etc., in the most formal and artificial arrangement, in fact, the inferior quality of the flowers permitted nothing better. The best flowers then produced would simply be unsalable to-day, on account of their small size and short stems. At that time so few roses and carnations were grown that they were necessarily supplemented by French and Dutch bulbs, which in those days were forced in comparatively large quantities.

In the earlier days of the cut flower industry, European methods of culture were in vogue. The few roses and carnations that were grown were grown mostly in pots, the greenhouses of those days being very primitive. Up to that time, the buildings erected for the production of cut flowers were very small and insignificant and comparatively crude affairs. With the introduction of some of the finer roses, like Perle, Cornelia Cook, Catherine Mermet, Pride, and Bridesmaid, a great impetus was given the cut flower industry, and then came the queen of all roses—American Beauty.

The Need for Better Houses Recognized.

I believe that the present up-to-date methods of rose growing had their beginning in the vicinity of Madison, New Jersey. The old pot method was discarded, and roses were grown on shallow benches in light, sunny, airy houses, and the results obtained were exceedingly satisfactory and profitable. Large ranges of rose houses were constantly erected in that section, along the line of the Delaware, Lackawanna and Western Railroad, and at that time Madison, Summit, and other towns in that vicinity were known as the Rose Belt of America; but since then immense ranges of glass for the cultivation of roses have been erected in so many different localities around New York, Chicago, Boston, and other large cities that no place in the country can boast of any particular supremacy.

The same development that occurred in the rose took place in the carnation, but at a considerably later period, and the present fine varieties of carnations that are now grown have all been produced within the last decade. First came Mrs. Thomas W. Lawson, which marked an epoch in carnation growing. This variety was the forerunner of such fine varieties as Enchantress, Mrs. M. A. Patten, Beacon, White Perfection, Winsor, etc. The trade was quick to discern that while these improved carnations could be grown in the old-time houses, they could be grown much better in the improved houses that were devoted to rose culture.

The Violet's Advancement.

Another flower which has become one of the most important is the violet. In the earlier days violets were grown in cold frames, covered with sash and straw mats; and, of course, with our severe winters, the supply was small and uncertain. The same improved methods of culture that have taken place with the rose and carnation followed with the violet; and today violets are grown in large quantities in light, airy houses—entirely under glass,—a method of culture that fifteen or twenty years ago was unheard and unthought of. The violet business has been largely centralized for many years now in the Hudson River valley, especially in the vicinity of Poughkeepsie and Rhinebeck, which has become famous as a violet-growing section, where the variety called Marie Louise is principally grown. Princess, the large single violet, which is not so difficult to grow, has been grown in other sections where Marie Louise has not been grown successfully or profitably. Immense quantities of Princess are grown, especially in the vicinity of Boston, and also in some of the large Canadian centers.

One of the most phenomenal improvements that have been made in any flower has been in the chrysanthemum, which has been developed to such an extent that one who knew it twenty-five or thirty years ago would not recognize the immense blooms grown to-day.

Supremacy of the Easter Lily.

Another very important flower for the florist is the Easter lily, which was grown only in very small quantities

until the introduction of the Bermuda Easter lily twenty-five years ago. Prior to that time, lily bulbs were obtainable only from Japan and Holland, and the sources of supply were very uncertain besides which, the bulbs often reached this market too late to force for Easter. Under these circumstances, the advantages of the Bermuda Easter lily were immediately recognized, as the bulbs could be brought here in July and August, so that it was possible not only to force them for Easter, but they could even be brought into flower by the holidays, so that the Bermuda Easter lily has become one of the most important flowers, especially for the Easter season, and is now grown in immense quantities.

I introduced the culture of the Bermuda Easter lily in Bermuda about twenty-five years ago, and for many years I believe that one-third of the revenue of the Bermuda Islands was derived from the culture and sale of this bulb. It has been grown there in

F. R. PIERSON

immense quantities, the annual output for many years being two million bulbs and up, one year having reached as high as four million. Unfortunately, with bad cultural methods, the quality of the bulb has deteriorated; still, the Bermuda-grown lily is an important factor. But the Japanese bulbs have made great inroads into the demand for the Bermuda bulbs, on account of the lower price for which the former can be supplied, and the fact that by reason of more rapid steamers and transcontinental railroads, it is possible to bring the bulbs here as early as September, so that the Bermuda lily does not occupy the important position today that it did fifteen years ago.

Other Bulbous Stock.

Among other bulbous flowers, the lily of the valley is one that has held its supremacy. This always has been, and probably always will be, in great demand; while other bulbous stock, like tulips, narcissi, and especially hyacinths, do not occupy the prominent place today that they did in former

years. In the larger cities, especially in the east, they are not very profitable. They are more largely grown in the west and in interior towns, where the supply of roses, carnations and the other finer flowers is more or less limited. Bulbous stock is more largely grown in Europe than in this country, because, owing to the lack of sunlight there, roses and carnations can not be produced as easily as they are here, so that the Europeans are more dependent on bulbous stock; but, recently, English growers have found that in following the American method of using shallow benches and building very light houses, very good results can be obtained. This is especially so with carnations, English growers having learned that they can do much better with our improved American varieties than with the varieties that they have grown heretofore; and there is beginning to be a large demand for our newest and best sorts.

Advent of the Wide Greenhouse.

In the character of the greenhouses devoted to the cultivation of cut flowers there has been a wonderful advancement in the past twenty-five years. Twenty-five years ago 11-ft. houses were in the majority. Then came houses 18 to 20 ft. in width, and, when fifteen years ago, we built a range of four iron houses, each 20 ft. by 300 ft., it was considered a model range, being much in advance of anything that had been built up to that time; but during the last five years especially, there has been a marked increase in the size of the houses erected, and today we believe that the best house that can be built is one ranging anywhere from 50 to 60 ft. in width. We are now building houses 56 ft. in width, running east and west, in which we use 16 x 24 glass and reinforced concrete sides, and we believe that houses of this kind are the most economical in construction and operation. While houses 56 ft. in width are seldom seen today, I do not believe that the limit of size has been reached by any means, and I believe that the tendency will be toward still wider houses.

Large ranges have been built of the narrower ridge and furrow connected houses, in an effort to obtain large areas under one roof, but we do not consider this style of construction as advantageous as the large, separate, wide houses. Ten years ago no one had any idea that such houses as are being built today were even practicable. Today the tendency is to gather under one roof more area than ten years ago would have comprised an entire establishment. The reason for this is the tendency toward specialization and the growing of one or two varieties of flowers by different growers, one grower devoting his attention to one variety of roses, like American Beauty, one concern alone growing as many as a hundred thousand of this variety. The same thing applies to carnations—some concerns growing between one and two hundred thousand carnations alone; and, of course, with the increased quantities of one variety, much larger houses have become a necessity. The tendency here in greenhouse construction is to increase the size of the house and the size of the glass, and, by the use of

SPECIAL OFFER

ROSES

2 years, field-grown, extra strong plants, over 100 best varieties, \$10.00 per 100, \$85.00 per 1000.
Crimson and Baby Ramblers, \$12.00 per 100.
Manetti and Briar Stock for grafting, \$10.00 per 1000, \$80.00 per 10,000.

Lily of the Valley finest forcing brand, \$12.00 per 1000 **Kentias, Forsteriana and Belmoreana**, fine plants, \$6.00 to \$25.00 per 100

DRACAENA INDIVISA, strong, well-grown plants, 3-in. \$4.00 per 100; 4-in. \$10.00 per 100; 5-in. \$15.00 per 100.

Rubbers (Ficus elastica) strong plants \$20.00 per 100

Aspidistras, pot-grown, 10 leaves in pot, green, \$6.00 per doz.; variegated, \$8.00 per doz.

Pandanus Veitchii, well colored, strong plants, \$25.00 and \$35.00 per 100

Araucaria excelsa, 2-3 tiers, \$20.00 per 100, 3-4 tiers, \$40.00 per 100.

J. LAMBERT, 150 Nassau Street, NEW YORK, N. Y.

steel rafters, to eliminate as much woodwork as possible in order to get the maximum amount of sunlight, thus enabling the grower to produce the largest number of flowers during the short midwinter days when flowers bring the highest prices.

Large Capital Now Required.

Today flowers are no longer considered a luxury, but rather a necessity. In this connection, we might say that few people realize what it costs to produce the finest flowers, especially during the short midwinter days. In fact, I believe that in midwinter, when flowers seem to bring phenomenal prices, they are actually produced at a loss, when one takes into consideration the capital invested, the fuel consumed, and the labor involved. Even with the prohibitive prices at the holidays, I doubt whether they return the grower an adequate return for the capital invested. Even in California, that land of flowers and sunshine, where nature is so kind, it is necessary to grow flowers of good quality under glass, so that there, where one would naturally expect that flowers would have little or no value, it costs considerable to produce flowers of high quality. In the east, during midwinter, when there is little or no sunshine and when the amount of fuel required is enormous, it is doubly so.

Conditions Required for Success in Future.

Looking back at the progress that has been made during the last twenty-five years, and the improvements that have been made even during the last five years, one wonders what the next twenty-five years have in store for us. Certainly, the end is not yet, for we have reason to expect as much advancement in the future as has occurred in the last quarter of a century. Twenty-five years ago, any one could have gone into the florist business with little or no capital, and if careful and industrious, failure could hardly result; but today, with the large amount of capital invested in large establishments and the consequent ability to produce flowers more cheaply, larger capital is required, and first-class, up-to-date business methods must be practiced. A man cannot hope to succeed under the conditions that exist today as he would have been able to succeed in the earlier days of the business,—in fact, the florist business, as it is conducted now in the larger establishments, is fast assum-

ing the proportions of a flower factory, and the same up-to-date business methods will have to be observed as in any other manufacturing business to ensure success.

In the future, the man who will make the most marked success is the man who is located in the right place; that is to say, where labor is plentiful, where he can obtain a supply of coal at the least possible expense—preferably near a large city, where the shipping facilities are quick and frequent—where an abundant supply of water is to be had, and where the soil is first-class. One of the most important considerations is the selection of a proper location. Heretofore most greenhouse establishments have been located without much reference to this, as they have been developed from small beginnings; but the proper location is a large element to be taken into consideration if one would be successful.

I believe that today America leads the world in the production of fine cut flowers, and, while we have many large establishments that we may well be proud of, I believe that the business is only in its infancy, and that we may expect to see marvelous progress in the future.

WAPPINGERS (N. Y.) DAHLIA SOCIETY.

The capacity of the hall in which the annual exhibit of the society was held on September 20 and 21 was taxed to its utmost capacity by competitors for the prizes which amounted to upwards of \$400. The silver cup offered by the society was won by Irving Grinnell, John C. Galvin, gardener; the Uplands silver cup, offered by W. P. Clyde, by A. Seaman Hunt. The cash prizes offered by Irving Grinnell and the Dutchess County Horticultural Society were awarded to H. J. Osterhoudt, 1st; Wm. Marshall & Co.'s prize to Irving Grinnell, 1st, Thos. Boyle 2d; Mrs. R. W. Rives' prize to Mrs. Frank Hasbrook, 1st, S. Grigg, 2d. Space prevents our giving in full the very long list of general and special awards. Certificates of merit were awarded to the following: Collection of asters, Jas. Vick's Sons, Rochester, N. Y.; gladioli, Arthur Cowee, Berlin, N. Y.; John Lewis Childs, Floral Park, N. Y.; carnations, Adam Laub & Son; one each orange and lemon plants, W. R. Sands; window box of plants, James Ashton; table of caladiums, ferns and group of palms, Irving Grinnell. George Hale, Seabright, N. J., acted as judge.

OUR FRONTISPIECE.

The accompanying frontispiece illustration is from a photograph of *Lælia elegans*, probably the finest specimen ever flowered under cultivation. It was shown before the Royal Horticultural Society and secured a silver gilt medal for culture, with thirty flower spikes carrying two hundred and thirty well-formed highly colored blooms. It was grown by Mr. H. G. Alexander, for Major G. L. Holford of Tetbury, Gloucestershire.

The plant was imported by Sander & Sons in 1903. As many plants of this species have been distributed by Messrs. Lager & Hurrell, Summit, N. J., and others, it may interest your readers to see to what perfection this grand orchid can be grown. It requires similar treatment to that given Cattleyas, and grows most freely suspended in baskets or pans.

London.

A. DIMMOCK.

CINCINNATI PERSONALS.

George Trome, of Cincinnati, better known as "Spunk," will open a floral store at 923 Vine street, Oct. 5. George is not very big but what he loses in size he makes up in energy. His friends are many and he will undoubtedly make a success of his new venture.

D. Rusconi will shortly move to 128 West Sixth street where he has secured a better and larger store. His business has increased to such an extent that his present quarters are inadequate.

Wm. Murphy has returned from the lakes where he spends an enforced vacation each fall to escape the hay-fever—strange how the hay-fever only attacks those who can afford to go away.

F. W. BALL.

HEMLOCK BRANCHES

For Protecting Roses, Rhododendrons, Tender Evergreens, etc.

Butts, pointed, 3 to 5 ft., \$4.00
" " 5 " 7 " 5.00

Tied in bundles, for Quincy or Brockton. Larger or smaller branches furnished. Special prices for large lots. Fine boughs in bundles or large quantities. Address,

G. H. HIGGINS, 125 Atlantic St. Atlantic, Mass.

Seed Trade

Jerome B. Rice Seed Co. have issued their annual report on the onion crop, and while this report is probably not absolutely correct, it is by long odds the most accurate of any published.

This fact is appreciated by the larger growers and shippers of onions who eagerly look forward each year to this report, which is a most important factor in fixing prices—neither shippers nor buyers being willing to name a price in advance of the report on any large quantities.

The acreage by states and counties, also the yield per acre, are given, as well as the varieties grown, as to whether red, white or yellow.

To give the report in full would occupy too much space, therefore the average yield per acre and total crop acreage yield per bushel per acre and total crop of each state for 1906-7 are here given, and the percentage of reds, whites and yellows:

	Acreage		Yield per acre		Total yield	
	1906	1907	1906	1907	1906	1907
Colorado	740	688	490	250	362,000	172,000
Varieties—Yellows 40 per cent—reds 60 per cent.						
Connecticut	1,000	850	215	300	215,000	255,000
Percentages not given.						
Illinois	845	775	335	300	282,500	232,500
Varieties: Yellows, 28 per cent—reds, 68 per cent—whites, 4 per cent.						
Indiana	4,615	4,913	300	154	380,887	753,373
Varieties: Yellows, 58 per cent—Reds, 36 per cent—Whites, 6 per cent.						
Michigan	872	714	235	232	231,036	165,471
Varieties: Yellows, 36 per cent—Reds, 52 per cent—Whites, 12 per cent.						
Minnesota	660	633	384	309	253,450	195,175
Varieties: Yellows, 11 per cent—Reds, 87 per cent—Whites, 2 per cent.						
Iowa	211	187	400	379	84,000	70,800
Varieties: Yellows, 70 per cent—Reds, 30 per cent.						
Massachusetts	1,300	1,100	275	350	357,000	385,000
Varieties: Yellows, 90 per cent—Reds, 10 per cent.						
New Jersey	300	186	300	375	90,000	69,750
Varieties: Yellows, 75 per cent—Reds, 25 per cent.						
Oklahoma	200	200	200	175	40,000	35,000
Varieties: Yellows, 25 per cent—Reds, 50 per cent—Whites, 25 per cent.						
Ohio	4,683	4,648	244	314	1,161,241	1,455,855
Varieties: Yellows, 80 per cent—Reds, 7 per cent—Whites, 13 per cent.						
New York	3,710	3,125	253	364	939,200	1,136,750
Varieties: Yellows, 74 per cent—Reds, 24 per cent—Whites, 2 per cent.						
Pennsylvania	55	50	500	400	27,500	20,000
Varieties: Yellows, 100 per cent.						
Rhode Island	175	100	300	250	52,500	25,000
Varieties: Yellows, 10 per cent—Reds, 85 per cent—Whites, 5 per cent.						
Wisconsin	387	445	326	259	124,000	115,000
Varieties: Yellows, 9 per cent—Reds, 91 per cent.						
Vermont	15	30	500	300	7,500	9,000
Varieties: Yellows, 90 per cent—Reds, 10 per cent.						
Totals	19,915	17,670	283	291	5,626,914	5,140,174

It may be well to say that onion sets are not included in the above estimates, but it would be interesting to learn what the onion set crop has been for 1907, and possibly some of the large growers or shippers can furnish this information.

The initial prices for onions this year are somewhat above last, prices in the field ruling from 10 to 15c. per bushel over a year ago.

In New England figures range from 65 to 75c. per bu.; in Orange Co., N. Y., price is about 40 to 45c.; Central N. Y., 45 to 55c.; Ohio, 50 to 60c.; Indiana and Illinois, 45 to 55c., and quality of the stock is said to be somewhat inferior to last year's, being undersized and showing quite a percentage of "thick necks."

This is said to be especially the case in the West, where wet, cold weather in the early part of the season retarded growth and produced a beautiful crop of weeds, which have kept the onions from ripening down, and they will consequently prove very poor storage stock and are likely to become soft and useless early in the season.

This suggests an interesting situation and will receive attention later.

In considering this report, two important facts are noted: The acreage is about 2000 acres under that of 1906, while the yield is fully 500,000 bushels less, which probably means higher prices for good carrying stock next winter and spring, and this will in turn affect the demand for seed.

With reference to the Kentucky crop of onions, which is grown entirely from sets, this report says: About 500 cars were shipped this year, against 600 cars a year ago. This year the price started at about \$2.25 per bbl. of 150 lbs. and advanced to \$3.75 and \$4.00, most of the crop going at \$3.00 to \$3.50. Last year prices ranged from \$1.50 to \$2.50. These onions usually appear in the market about the last of June and are closed out before Aug. 1st.

It is only just to add that the report from which we have quoted so liberally was prepared mainly by Mr. Chas. P. Guelf, traveling salesman for Jerome B. Rice Seed Co.

Although September ended with several days' rain, which extended very generally all over the country, we should be more than thankful for the good growing weather and ripening conditions the entire month practically gave us—the best growing days of the whole season, without which seed crops would indeed have been failures. As it is, in many directions, results will be quite a little better than has all along been expected. We must now look for killing frosts, which will result in an active bulb business for the next two months.

Cold, rainy weather has been the portion of those that dwell in the New England and Middle states for the past ten days, and at this writing there is no indication of any material improvement. Severe frosts have occurred in the west, but the east has thus far escaped, though the sequel to the long, wet, cold spell will no doubt be the advent of Jack Frost. Let us hope that on his first appearance he will be in kindly mood.

GLOXINIAS FOR FLORISTS' USE.

The accompanying photograph was taken of a recent display of Gloxinias shown by E. W. Breed at one of the weekly exhibits of the Worcester Horticultural Society. Mr. Breed writes: It has been our custom after the spring bedding plants have been taken from the hotbeds, to place three inches of leaf mould on the spent manure, and in this, plant gloxinia seedlings a foot apart. The result is a large number of fine flowers during the summer. We find them very useful for cut flower and floral work, possessing excellent keeping qualities. Careful attention is given to the shading and ventilating. The thrips is kept in check by the use of tobacco stems spread about the plants. For the private gardener or retail florist, who grows his flowers, the gloxinia is certainly a valuable summer flower.

SEED TRADE NOTES.

Henry Nungesser, New York, has just returned from a very successful western trip.

C. D. Brown has retired from the Brown Seed Co., Sedalia, Mo., and the business will be continued by R. W. Tyree under the same name.

George E. Philp, formerly with W. W. Rawson & Co., and more recently with Joseph Breck & Sons has taken a position with Sherman & Ebeile of Albany, N. Y.

A. M. Rennie, recently appointed manager of Vaughan's Seed Store, New York, is critically ill at the hospital in Providence, R. I., where he has undergone a very serious surgical operation.

Pansy is this fall, and will be next spring, one of the scarce items in the line of flower seeds; the growers have been filling their contracts very meagerly, in some cases not exceeding 50 per cent. of the quantities expected.

Stumpp & Walter, of Barclay street, New York, on Tuesday, October 1, observed the tenth anniversary of the organization of the firm. A steady growth has marked their business from the beginning and their store, with its handsome new front now nearly completed, shows every evidence of permanent prosperity.

We noticed among other things displayed in the windows of H. E. Fiske Seed Co., 12 Faneuil Hall Square, Boston, a *Lycoperdon giganteum* or "Giant Puff Ball" mushroom, weighing 61-2 pounds, 14 1/2 inches in diameter, and the circumference 45 inches. This puff ball is edible. The exhibit has attracted a continuous crowd about the window.

THE JAPAN BULB BUSINESS.

To what extraordinary dimensions the Japan bulb business has attained may be shown by a few interesting figures.

The steamer *Monteagle* of the Canadian Pacific S. S. & Railway Companies which left Yokohama on Aug. 27, 1907, for Vancouver, B. C., took the largest cargo of lily bulbs ever shipped from Japan on one steamer. A regular record breaker it is, consisting of the immense amount of 4,699 cases or about 360 tons measurement: 1 ton equals 40 cb. ft. Taking as an average 225 bulbs per case, this steamer carried one million, fifty seven thousand, two hundred and sixty-five (1,057,265) bulbs. The principal portion of this shipment goes to the United States and Canadian cities, although a rather large number reach Europe by this route partly direct via Montreal and partly by transshipment in New York.

The bulbs shipped are at this early season principally *Lilium longiflorum* and its different types and varieties.

ALFRED UNGER.

The exhibitions of flowers by school children in ten of the public schools of Detroit were a great success. The children brought a general assortment of outdoor flowers principally asters, dahlias, gladioli, etc., of mostly very good quality. Messrs. Walter Taepke, Wm. Brown, and J. E. Scribner acted as judges in seven schools while Sullivan, Schroeter and Pouillon took care of the three other schools. Various prizes were distributed; the Detroit Florist Club assisting by not only furnishing the above judges but giv-

ing two Boston ferns as prizes to each school. That sounds like practical work for a Florist Club, does it not?

PLANT NOTES.

Auctioneer W. J. Elliott says that the fall season's sales already show a substantial amount ahead of last year's record at the same date. In the stock recently sold for an old Newark (N. J.) estate was an enormous *Pandanus utilis*, estimated to be over 100 years old.

The dock strike which has been on for the past four weeks at Antwerp has seriously affected the palm and azalea shipments. So great has been the accumulation of goods at Antwerp that much freight has been sent round-about via Rotterdam, where much of it has had to remain for days awaiting room on the steamers. This is not only a great annoyance to consignors and consignees, but the delay in deliveries, which are now two to three weeks behind last year's dates, causes much solicitude as to the condition of the plants when they do arrive.

MOVEMENTS OF GARDENERS.

Alex. Adam, gardener for Alfred J. Vanderbilt, at Oakland Farms, Portsmouth, R. I., for the past three years, has resigned his position. The popularity of Mr. Adam with his fellow employes was impressively demonstrated by the presentation of a gold watch from the laborers and a silver tea set from the foremen and monthly men on the estate, at the time of his leaving.

LANDSCAPE GARDENING.

Read before the Congress of Horticulture, Jamestown Exposition, Norfolk, Va., September 23, 1907, by John C. Olmsted, Brookline, Mass.

Landscape gardening is the art of improving grounds for use and enjoyment with due regard to beauty.

Landscape gardeners should be educated in architecture, civil engineering and horticulture—in architecture, because all works of landscape gardening should be designed or planned in a way analogous to that in which buildings are planned to combine utility with beauty; in civil engineering, because to plan the improvement of ground involves surveys, topographical maps, draughting of plans, profiles, cross sections, drainage and masonry plans, specifications, and other technical training such as civil engineers get; in horticulture (including arboriculture), because every landscape gardening design calls for either trees, grass, shrubs, vines, hardy and tender plants and some or all of these.

To many it may seem unreasonable to place, in the education of landscape gardeners, a training in technical design ahead of a knowledge of civil engineering and of horticulture. It is true that most of the time of architectural students and practitioners is taken up with matters that would be of comparatively little or no use to the landscape gardener but in the absence of adequate means for thoroughly educating landscape gardeners in the aesthetic side of their profession, a training in architectural design is at present the best available for the purpose. It must not be inferred that architects can easily practice landscape gardening. The fact that they appreciate certain fundamental esthetic principles, no more fits them to practice landscape gardening than landscape painting or any other art to which those principles apply. It is certainly better that most architects should confine themselves to architecture.

Civil engineers should not be too much elated by the statement that a good knowledge of and experience in certain branches of civil engineering is more important in the education of landscape gardeners in the ability to design well than horticultural knowledge. Indeed, such a claim may seem paradoxical when we call to mind how many obtrusively ugly works of civil engineering there are in all parts of this country, and on the other hand how much horticulturists are concerned with beautiful flowers and garden plants.

The reason why a certain kind of engineering knowledge is more important to the landscape gardener than horticulture, as a means of developing his general designing ability, is that it has to do with larger and more complex problems of fitting land for human use.

The ability required to successfully design important municipal, railroad, river, canal and harbor works and other extensive plants involves a capacity for investigating physical and human and financial conditions, re-

quirements and limitations and for evolving a logical solution of each problem which is similar in a general way to the capacity possessed by successful architects. Engineering schools do more to educate that capacity than the ordinary methods of educating horticulturists do.

The most essential esthetic requirement of conspicuous works of civil engineering is that they should accomplish their purposes in an appropriate, pleasing and satisfactory way,—and that they should be made pretty by means of ornament applied as an after thought.

The Superiority of Beauty of Form and Proportion.

The main object of this paper is to call the attention of horticulturists to that particular idea—the importance of the esthetic principle that all visible works of man should be expressive and beautiful in their general form and main features before they are ornamented with mere decorative detail.

Esthetic ideas are difficult to explain without illustrations.

Among large constructions, we find a general regard for good appearance has always controlled ship builders. They made many mistakes, from a scientific point of view; they did not always make fast ships; they compelled sailors and passengers to submit to unnecessary inconveniences; but they strove always for such beauty of form and outline of hull and fittings, rake of masts, taper of spars, cut of sails, that sailing vessels have always been the delight of artists. And how conspicuously absent is all surface decoration and applied ornament.

It is shocking to imagine the hideous job the engineer of an elevated railroad would make of an order to build and rig a steel sailing ship, if he should entirely ignore the traditions of ship building and use stock dimension rolled steel beams, bars, angle irons, tubes, rods, and so forth, as he uses them in his elevated trusses and columns and brackets! How much simpler and cheaper it would be for the deck of a ship to be straight from bow to stern and to pitch straight from centre to sides like a flat tin roof! Yet all the demands of the shrewd owners for economy, and all the power of competition were unable to make shipwrights for countless generations build a ship that way. They knew it would be ugly and they wouldn't do it.

The beauty of the typical sailing vessel is a good illustration of the superiority of beauty of form and proportion, of graceful adaptation to useful purposes over a purely scientific and economical but ugly general form superficially decorated. Let us hope that investors and public opinion will more and more encourage civil engineers to take to heart this great esthetic principle that visible structures should be beautiful in form whether there is superficial decoration or not.

If a knowledge of horticulture and its allied crafts and sciences is to be regarded as less essential to the landscape gardener than a training in general architectural designing and in certain selected branches of civil engineering, it is not intended thereby to belittle the importance of a practical knowledge of hardy trees and other plants used in landscape garden-

ing works and of their cultivation, cost and esthetic qualities. Such knowledge is absolutely essential.

The point sought to be enforced is that the landscape gardener should be educated to design first the general plan for a given work, then its constituent parts and details in such a way that they will produce a consistent, well balanced, harmonious whole and to always keep in mind that the inherent, essential beauty of the whole, and its obvious and graceful adaptation to its main purposes are far more important than its superficial ornamentation.

(To be continued)

NEWS NOTES.

A new florist store has been opened at Wethersfield, Conn., by H. S. Griswold.

J. H. Playdon, Andover, Mass., has moved into his new store in the Arco building.

James Souden has started in the retail flower business at 106 Sixth street, Minneapolis, Minn.

Wm. Bruckner of Bayside, L. I., is suffering from a rupture and is in a precarious condition.

John Serah, formerly foreman for A. Leuthy, Roslindale, is about to open a retail flower store in Hyde Park, Mass.

G. W. Pool of Gloversville, N. Y., has won his case against Miss Milligan, who rented potted plants from him for decorating purposes in her millinery parlors.

Henry Bantleman of 1875 Amsterdam Ave., New York, had one of his delivery wagons smashed into last Saturday night and totally destroyed. Driver and horse escaped with slight injuries.

Wernz & Koehne, who have acquired the store of C. Christiansen, 67 East 10th St., N. Y., find it too small for their increasing business, and have now located at the southeast corner of Fifth Ave and 15th St.

J. M. Hodgson, Florist, Inc.—Judge Adams of the United States District Court has appointed William F. Upson receiver in bankruptcy for J. M. Hodgson, Florist, Inc., of No. 718 Fifth avenue and Newport, R. I., with a bond of \$500, and the sheriff and marshals were restrained from the disposing of the assets. It was stated that the plants in the greenhouses were worth \$1000 and needed immediate attention.—New York Commercial.

The stockholders of the New York Cut Flower Exchange have for the last twelve or fifteen years received a dividend of 10 per cent. In addition, in accordance with a resolution passed by the board of directors, May 11, 1907, authorizing the return to the stockholders of a portion of the accumulated surplus then on deposit in savings banks, on September 21 and 28, the treasurer paid out checks at the rate of \$17 per share to all the stockholders, an incident which goes to show that the corporation is in a most flourishing condition.

BUSINESS CHANGES.

L. Crancher has purchased the greenhouse and store of M. J. Dwyer, 1805 West Third Street, Chester, Pa.

W. G. Saltford Co., have leased the greenhouses of Relyea & Son, Poughkeepsie, N. Y. They will be run hereafter as the Saltford Flower Shop.

The floral business at the northwest corner of 75th street and Madison avenue, New York, formerly conducted by Al. Wentworth, will henceforth be under the management of Braxton, late with Fleischman.

The city council of Columbus, O., has finally appropriated \$6,000 for the improvement of Schiller park. Remodeling the greenhouse is the most important work contemplated

FLOWER MARKET REPORTS

BOSTON Prices are not advanced on any particular commodity, but good stock is generally scarce owing to the storm of rain on Sunday, which finished up much of the garden material which had been filling in the demand for florists' work. Asters, gladioli and dahlias suffered considerably. Carnations of better quality are being received, but they are still far from standard and bring all that they are worth and sometimes more than they are worth. The roses are temporarily short in supply but a few bright days will no doubt change the complexion of the market. A few chrysanthemums are being received but they are small and really inferior to a first-class aster.

The warm week which **BUFFALO** caused heavy wind and rain storms did much damage among outdoor flowers and fruits. Asters and gladioli suffered considerably, especially the former. The market opened up brisk on Monday and everything was active; roses, especially white, were in heavy demand, with a rather short supply, the cool, dark weather cutting the supply to one-third of receipts of the previous week. Longiflorum, rubrum and album lilies were in good demand and helped considerably in filling floral work orders. Lily of the valley and gardenias sold well, while violets, which have improved in quality, moved better than in the previous week. Carnations came in more plentifully, but are not given a chance to remain with the wholesaler long, being snatched up as soon as taken from the box. Enchantress is leader and some excellent stock was had, long stems and blooms fairly good size; white and other varieties not so good in quality. Dahlias are helping out and taking the place of asters. Gladioli are not so plentiful, there being no trouble to dispose of the fancy colors, while the mixed ordinary sorts await the cemetery florist after a few days floating along. Greens are in good supply and quite active. The shipping trade has been heavy, and it looks as if the country florists were having their hands full with business.

The supply of cut **CINCINNATI** flowers for the past week has been very meagre. Cosmos and dahlias are about the only out-door stock left. Carna-

tions are not blooming very freely yet which has caused a great demand for roses. The supply of lilies is still limited. Lily of the valley is being forced in quantity in anticipation of a good demand for October weddings. Violets are improving and find a better demand. Several of the craft report large orders booked for this month.

DETROIT Local business conditions are rather unfavorable; plenty of time to do work and plenty of room for flowers. While the weather was such as to retard buying, still the scarcity of flowers prevented the usual displays in the windows. The wholesaler may not always be considering this expense item of the retailer still the latter knows only too well that he must often sacrifice some of his profits by displaying choice flowers in the window to encourage trade but which are in many instances a complete loss to him.

INDIANAPOLIS Business has been unusually brisk the past week, there being a good demand for almost everything. Dahlias are in good supply and quality and make an excellent substitute for asters. Carnations are more plentiful every day, flowers fine, but too short in stem. Stock in general is improving, especially roses. Extra fine Carnot and Kaiserin are in good demand and all grades of Beauties are called for more than ever before at this time of the year. Chrysanthemums are to be had in almost any color, but the price and keeping quality are unsatisfactory. Some violets are seen but quality not up to the standard. There is a good demand for longiflorum lilies and lily of the valley; also for greens, especially those used for decorations. Good plumosus and Sprengeri are to be had while smilax is very scarce.

NEW YORK Last week was a decidedly dull period in this market. The present week starts off under quite different conditions due to the light receipts caused by the cold weather and the heavy rainfall which spoiled for the time being asters, gladioli, dahlias and other garden product for market use. The scarcity of flowers has not been seriously felt, however, as the de-

mand is very light on most lines, the only pronounced call being for blooms of the highest grade, and the street speculator being still the only bidder for the low quality material. *Cattleya labiata* is coming in more freely and in superb shape. Longiflorum lilies are as good as the best ever seen in this market. Carnations seem to come along with unprecedented slowness. A few good chrysanthemums are seen. Violets are present in considerable numbers, but they are of poor quality and, furthermore, people are not ready for them.

PHILADELPHIA General business continues steadily improving. Dahlias are in their heyday. The red varieties such as Katherine Duer and Lyndhurst are the best sellers closely followed by Kriemhilde and Nymphaea in pinks. There is demand for a good yellow—a better keeper than Arabella. Roses are in good demand, whites especially. Beauties sold very good early part of the week but dropped off later. Killarneys are of fine quality at present. Carnations are not a big factor but there are some very good Winsors and Beacons coming in for the season. *Cattleyas* are very choice at present with demand excellent. Lily of the valley has improved both in quality and demand. Easter lilies are quite scarce. Cosmos cuts quite a figure in the market and if carefully packed in small bunches with plenty of tissue paper ships well to long distances; but there is no use trying to handle this rather delicate subject in the ordinary rough and ready manner. Asters and gladioli are about over.

WASHINGTON Despite the fact that most of the Washingtonians have returned to the city and that the "season" is almost upon us, there was not the activity in the cut flower business last week that one would reasonably expect, owing to the almost incessant inclement weather. As the equinoctial period is passed and pretty weather with us once more, the trade have a right to be hopeful of results from now on. There are a fine lot of dahlias now shown. Some carnations are coming in, but are short of stem. There is still a glut of asters, which are hard to dispose of at any price. Cosmos will be in in abundance soon, and if the present fine weather continues, both it and dahlias will be fine.

CARE OF HEATING PLANT WHEN NOT IN USE.

(A paper read before the Society of Iowa Florists, by G. H. Bancroft, Cedar Falls.)

I have been assigned to speak as to the care of steam boilers in summer. Perhaps the best I can say would be to tell how we care for our own. When we quit firing, generally in May or first of June, the flues are thoroughly blown, then scraped and blown again. The entire boiler is cleaned on the outside, back and front, and thoroughly painted with asphalt paint or oil. All the flues are swabbed out with oily rags. All ashes are removed from fire box and soot from rear of boilers. The doors are taken out or opened and

WANTS, FOR SALE, ETC.

FOR SALE

Conservatories and Greenhouses

FOR SALE

To take down; also, Pyramidal and Standard Bay Trees and other plants of the estate of the late C. P. Grimmer, rear of 56 Rockview Street, Jamaica Plain, or 31 West St., Boston, Mass. This offer good till Oct. 19, 1907.

FOR SALE—Well established florist business with greenhouses in rear of store. E. C. Thinnies, 245 De Kalb Avenue, Brooklyn, N. Y.

MISCELLANEOUS WANTS

WANTED—Second-hand Hot Water Heater. H. Taylor, Box 132, Quincy, Mass.

all painted inside and out. The floor and dampers are left wide opened so that a thorough circulation of air is maintained. The inside of the boilers are washed out and manholes are taken out both top and end. This also gives a circulation of air inside of boilers. Our boilers are placed on top of ground in a large high stone shed forty foot square so that we have a good circulation of air and there is no dampness or sweating in the boilers. Our automatic pump used for returning condensed steam to the boilers is dismantled and everything is left wide open so that any dampness that may accumulate drains off from the pump and pipe.

When we used hot water we kept boilers full of water; and although on top of ground in open sheds, they sweat considerably, consequently flues soon rusted out. With a hot water boiler, as most of them are built, it is almost an impossibility to prevent this sweating, but we think it preferable to keep them full of water during summer. A damp boiler shed is a yearly expense in repairs on boiler, and in a few years your boilers are rusted out so they are unsafe and the cost of repairs will soon equal the cost of a good airy boiler room and a trap or pump for returning condensed steam to boiler.

?

Is Your Name In The Above List? If Not, Why Not?

BOILER EXPLOSION AT THE KELLOGG GREENHOUSES.

Our illustrations depict more graphically than we can describe, the havoc occasioned by the explosion of a steam boiler at the greenhouses of George M. Kellogg, Kansas City, Mo., early on the morning of September 26. Had the disaster occurred but 45 minutes later the entire working force would have been on hand and serious loss of life would have been recorded. The boiler that exploded was one of a bat-

tery of five. The effect was terrific, the other boilers being thrown from their foundations, about 100,000 feet of glass being destroyed, timber, brick and stone being scattered in all directions and the country shaken for a radius of several miles. The dome of the boiler, weighing 500 lbs. was carried 600 feet. Mr. Kellogg writes that the damage outside of the loss on plants and their produce is not less

than \$35,000. He says that the gauge had been shut off the boiler and the steam valve letting the steam into the houses closed tight. Two temporary boilers have been put in position and glass is arriving by the car load but lumber for repair work will be hard to obtain. Mr. Kellogg has our warm sympathy and our sincere hope that cold weather will hold off until he gets his houses closed in.

OBITUARY.

Edgar Sanders.

Not expected, but nevertheless touching, comes the news of the death of Edgar Sanders, dean of the Chicago horticultural profession, at the ripe age of 80 years. Mr. Sanders was born Oct. 10, 1827, in Sussex, England, the son of a gardener and one of a large family of children who had to begin early to earn something. He commenced his career in gardening at the age of 13 years at Wm. West's nursery, after which he held various positions in several localities until he came to America in 1853, where his first employment was as gardener to Gen. J. F. Rathbone at Albany, N. Y., whence in 1857 he went to Chicago and started as a florist with a small greenhouse. He is said to have opened the first flower store in Chicago, under the Sherman House, in 1867, and later moved to Dearborn street. He lost everything in the fire of 1871. He held in succession several public offices and did considerable writing for the Country Gentleman, Prairie Farmer and other periodicals and later became the regular Chicago correspondent of the Florists' Exchange, continuing this work until incapacitated by failing health. He served for many years as the treasurer of the Chicago Florists' Club. He was the first president of the American Association of Nursery-

men, Seedsmen and Florists, and was again elected president of that body in 1884, which position he held at the time of the secession of the Society of American Florists, whose first meeting at Cincinnati in 1885 he attended.

THE LATE EDGAR SANDERS

A few years ago he was stricken with a paralytic attack and ever since has been confined to the home of his daughter, which has become a Mecca of the profession locally, and of loving friends visiting in Chicago, who have been glad to call upon the old gentle-

man and help to brighten the tedious hours with their presence. He had failed rapidly of late, and his demise was known to be imminent all of last week. The funeral was numerously attended by members of the Chicago Florists' Club and the profession generally.

Other Deaths.

Barney Nailor, Newville, Pa., passed away on September 21 at the age of 74.

W. S. Taylor, for the past seven years florist at the Morton House, Grand Rapids, Mich., died Sept. 22 at the age of 57.

Mrs. W. H. Kuebler of Brooklyn, N. Y., wife of W. H. Kuebler, the wholesale commission dealer, passed away on Sept. 19.

Charles Schleeter, a florist near Louisville, Ky., died suddenly on Sept. 21. He was 42 years old. A wife and six children survive him.

John C. Hepler, who was superintendent of Charles Evans Cemetery, Reading, Pa., for 27 years, died on September 26. Mr. Hepler was born in Reading April 17, 1829.

F. H. Reynolds, the pioneer nurseryman of the River Raisin Valley at Monroe, Mich., died Sept. 28th, nearing his 90th birthday. He was born in Delaware County, N. Y., and came to Monroe, Mich., when only 20 years old starting in the nursery business.

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
Yours very truly,
GEO. A. SKENE.

Florham Farms, Madison, N. J., December 8, 1906.
Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
Yours truly,
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

ANDREW WILSON, Dept. 8.

H AND C

RIGHT FIT or TIGHT FIT

There is an advantage in knowing your business, for instance, the heating question: a lot of people think they know a good bit about it and tell you the greenhouse men are robbing you. And sometimes you believe it, so in goes a tight fit boiler and piping—that just does your work and no margin. When a cold snap comes you have to crowd your boiler—and be on the anxious seat 'till the mercury lets up. You have burned more coal and got less results for what you burned. Your boiler has been overworked and that is no good thing for any boiler. We know greenhouse heating thoroughly, and refuse to skimp the boilers or radiation. That means you pay a right price for the right thing—and no more. Get in touch with us.

Burpee's Two New "SPENCERS" for 1908

A Single Flower of the New
BURPEE'S WHITE SPENCER
Exactly Natural Size

Burpee's White Spencer produces in the greatest profusion flowers of enormous size that are *absolutely pure white*. It is white-seeded and comes true to the Countess Spencer type. The standard is *decidedly waved*, crinkled and fluted; the wavy wings are so folded, that the keel is almost hidden. The standard measures from one and three-quarters to two inches across by one and three-eighths to one and five-eighths inches in depth. The wings are fully an inch wide and nearly as deep as the standard. The flowers are borne three and four to the stem and are uniformly well placed. The stems are extra strong and measure from twelve to fifteen inches in length.

The vines are most vigorous in growth, with heavy foliage, and attain a height of from ten to twelve feet. They are nearly covered with bloom, while the flowers retain their enormous size throughout the season. Of fine substance the magnificent flowers are unsurpassed for cutting and for keeping after being cut.

In sealed packets containing ten seeds each: Per pkt. 15 cts., 2 pkts. for 25 cts., \$1.00 per doz. pkts., \$7.00 per 100 pkts.

In sealed packets containing 25 seeds each: Per pkt. 5 cts., 5 pkts. for \$1.00, \$2.00 per doz. pkts., \$13.75 per 100 pkts.

Burpee's Primrose Spencer

This is a fitting companion to *Burpee's White Spencer*. The vine is equally as thrifty and free flowering, but slightly shorter in growth, attaining a height of eight to nine feet. The flowers are well placed on strong, thick stems, ten to twelve inches long, and are borne never less than three flowers, and sometimes four flowers to the stem—as shown in illustration. The standard measures one and three-quarter inches to nearly (if not quite) two inches across by about one and one-quarter inches deep; the wings are an inch across by one and one-eighth inches deep. The texture is fully as substantial as in *Burpee's White Spencer*.

The color is a *pronounced primrose* or creamy-yellow throughout both standard and wings. It is equal in depth and richness of color to *The Hon. Mrs. E. Kenyon*, which, of course, it outranks in form and size. Both standard and wings are thoroughly crinkled or "waved." **Burpee's Primrose Spencer** will hold its own with any of the so-called "Yellow" Sweet Peas in color, while it *surpasses all others of this color* in size of flower, length of stem and vigor of growth. A decided acquisition to the Spencer type and the first of its color to be introduced.

In sealed packets containing ten seeds each: Per pkt. 15c., 2 pkts. for 25c., \$1.00 per doz. pkts., \$7.00 per 100 pkts.

In sealed packets containing 25 seeds each: Per pkt. 25c., 5 pkts. for \$1.00, \$2.00 per doz. pkts., \$13.75 per 100 pkts.

A handsome Illustrated Circular will be mailed upon application

TO BUYERS

Patronize our advertisers, they will treat you right

Nymphaea x Ixion. *Blomberg, Hyb. Nov.*

* Del. R. G. Leavitt.

Explanation of the plate. 1, sepal; 2, 3, outer and inner petals; 4, 5, stamens; 6, carpel-tip; 7, margin of leaf.

This new hybrid, which has just now (Sept., 1907) flowered for the first time, has been raised from seed which matured in October, 1905, and sown soon afterwards. The seed parent was *N. x Smithiana*, and the pollen parent *N. x Niobe*. The leaves are circular, the sides of the sinus overlapping, the margin crenulate, and sharply toothed, the upper surface dark green, the lower purplish green. Leaves of the example described measured 17 1-2 inches in diameter. The flower is cup-shaped, 6 or 7 inches in diameter when spread out. The sepals and petals are more or less spreading. The sepals are narrowly ovate, usually obtuse, 5-7-ribbed, 3 1-1 inches long, up to 1 3-4 inches wide, red-green outside, white, deeply tinged with rose-madder inside. Petals in about 3 whorls, the outer obovate, nearly as long and wide as the sepals, the inner lanceolate. Stamens in 5 or 6 whorls; the outer ones pale yellow below, dull orange above, ovate below; the inner lingulate, deep orange. Carpel-tips slightly tapering, obtusish, deep orange. Carpels about 26, their upper surfaces greenish yellow.

During the summer this fine, night-blooming lily has grown vigorously in the open. When given high temperature it is sure, I am convinced, to show improvement in size and brilliance.

Carl Blomberg

British Horticulture.

THE WINTER FLOWERING CARNATION SOCIETY

The first annual report of this society affords evidence of the satisfactory progress made since its inauguration. The committee point out that as the increasing popularity of the carnation will undoubtedly add to the expenses of the society it is most desirable for the welfare both of the society and the flower itself that every individual member should do his utmost to secure adherents, and should afford all publicity to the aims and objects of the society. At present the sphere of its usefulness is narrowed by lack of funds. The society's third show will be held at the Royal Botanic Gardens, on December 11th. An attractive schedule has been arranged. Certificates of merit will be awarded to new varieties. In addition to the cut blooms no less than three plants in bloom of each variety entered is to be shown. A variety must gain at least 30 points to entitle it to a first-class certificate, and 25 points to entitle it to an award of merit. Five points will be awarded for each of the following good qualities: Color, size, fragrance, substance, calyx, general appearance, length and substance of stem, and habit of plant. The popularity of the winter-flowering carnation amongst trade growers appears to be on the increase, in the Channel Islands particularly.

AUTUMN ROSES

As a compensation for the disappointing spring and early summer we are experiencing an exceptionally fine September. A record has been made in the amount of sunshine registered. With these favorable conditions it was not surprising to find that the autumn show of the National Rose Society on Sept. 24th was an immense success—in fact it was the best exhibition of the kind yet seen in London. As was to be expected Ireland was to the fore amongst the prize winners. The gold medal for the best seedling was awarded to Messrs. A. Dickson and Co., who usually score in this section. The new rose shown was *Avoca*, a brilliant crimson. The same firm also showed *Conway Jones*, a new H. T. High honors were secured by Messrs. D. and W. Croll, who took a silver medal for *John Stuart Mill*. Another Scotch firm, Messrs. J. Cocker & Sons, secured a silver medal for the best H. T., whilst Messrs. J. Jeffries and Son had a similar award for a fine *Madame Lambard*. Messrs. Hobbies, Ltd., received a gold medal for best group of cut roses, whilst a brilliant group secured a gold medal for Messrs. Paul and Sons. There was a large attendance of visitors owing to the fine weather which prevailed. The show was kept open in the evening in order that the varieties might stand the test of artificial light. This new departure of the Society in holding an autumn show in recent years has met with a very gratifying result, and will tend to further stimulate an interest in the "Queen of Flowers." It fills the breach between the summer shows and the chrysanthemum displays. The season for the last named exhibitions opened Oct. 2nd when the National Society held their first show of the season.

Plant bulbs freely

The time for bulb planting is now on and we feel justified in repeating our advice, often given before, as to the adornment of available spaces about the offices and wherever it may attract the eye of the passer, on the grounds of the retail florist or nurseryman. A few hours and a few dollars devoted now to the planting of masses of spring flowering bulbs will bring pleasing reward next spring, attracting wide-spread attention as an advertisement, uplifting the home ideals of the public and whetting their appetite for similar displays and thus bringing in many orders for next fall delivery and booming the garden sentiment at the beginning of the season, and then the sale of the flowers will go well towards paying for the entire cost. Truly an investment "all to the good." Add to it now

The S. A. F. and the canna

We are somewhat surprised at the peculiar "digression" of our esteemed Iowa friend in his paper on Cannas which appears on another page of this issue, in which he questions the claims of the S. A. F. to the support of the florists and attributes the formation of the rose, carnation and chrysanthemum societies to dissatisfaction on the part of the growers of these specialties with the treatment accorded them by the S. A. F. We think there is no foundation in fact for the latter proposition. As to the alleged neglect of the interests of the canna which Mr. Temple imputes to the S. A. F. we would ask if Mr. Temple was not chairman of the canna committee to which he refers and if, as he states, the committee was "let off with a meagre report," where should the responsibility be placed other than on the chairman of that committee?

The middleman, his joys and sorrows

The breezy paper presented by Mr. McKissick before the Philadelphia Florists' Club, which appears on another page of this issue, will interest and amuse anyone identified with the growing, selling or buying of cut flowers at wholesale. We are delighted to learn that the prospects for the middleman in Philadelphia are so roseate and extend our sincere compliments on the high plane on which the wholesale salesmen of that town now move but must confess that we are shocked to learn how different they have been in the past. Now that the cat is out of the bag, wholesale dealers in other cities can shake hands with their fellow-sufferers in Philadelphia in full sympathy for their common woes and best wishes for immunity, henceforth, from all vexations that have hitherto made the wholesalers' existence an incipient rarebit dream.

Always more than your money's worth

Commenting upon Leonard Barron's excellent address at the Congress of Horticulture upon the Horticultural Press, and referring particularly to Mr. Barron's complaint of the "quadruplication" of weekly news by four "trade" papers, our New York contemporary submits that while a quadrupling of actual news is necessarily unavoidable yet there is "a wide difference in the character and value of what may be termed the solid or permanent portion of the reading matter provided weekly by each of the four papers alluded to." We agree with our contemporary and also subscribe to the logical conclusion which our contemporary passes over, that, because of the wide difference in character of reading matter provided, the progressive craftsman will not limit his reading to one or two but will make it a weekly duty to at least glance over the pages of all four. Between these papers and between the various issues of each there is certainly a great variation as to practical value, judged, as they must be, by the respective individual needs or tastes of their readers but, take the poorest issue ever sent out by either of these journals and the man who cannot extract from its contents more than full equivalent of what it cost, must be very dull of comprehension. In fact the price asked for these papers—less than two cents per copy weekly—is absurdly disproportionate to their value and yet, undoubtedly, the publishers of every one of them are lying awake nights pondering as to how they can give even greater value for the same price. Economy is a virtue, but one's trade or professional literature may well be exempted from its application.

AFTER ADJOURNMENT.

John Everson of 28 Second place, Brooklyn, and H. Jacobson, of 616 East Seventeenth street, Manhattan, were arrested Friday afternoon on the complaint of E. H. Moore, an inspector of the Park Department, who says that the men were mutilating trees at Radde and Jane streets, where they were engaged in moving a house.—Long Island Star.

Glad to know it. "There's a good time a'coming."

A magazine called "What to Eat" regales its readers with a miraculous story told by an alleged "New York florist" of how he can in the space of an hour raise from seed lettuce fit for salad. The principal point in the recipe seems to be that the seeds are soaked over night in alcohol. Didn't "What to Eat" make a mistake and shouldn't it have said that the florist got the soaking instead of the seed? Or maybe it was the reporter for "What to Eat" who took the treatment. At any rate, if the rest of the contents of that journal are built on the same basis of reliability we should feel safe to take our cue as to "what to eat" from the barker for a "pie alley beanery."

"A Florist" is the signature attached to a protest which has appeared in an issue of the Boston American, calling attention to the control recently secured by the American Express Company over the line of the Boston & Albany R. R. between Boston and South Framingham, with the result of increased rates and much poorer service. It is unfortunate that "A Florist" is so timid that he must hide his identity. He'll never accomplish anything in the way of reform by such means. Monopolies can never be controlled or frightened by blank cartridges. "A Florist" cites the movement of which he complains as an argument against the merger of the N. Y., N. H. & H. R. R. with the Boston & Maine. This is sound reasoning. It is but one of many reasons, however, why Mellen's abominable schemes should be opposed by all New England business men.

The New York Sunday Herald has been giving its readers some thoroughly good reading matter on horticultural topics each week. On September 29 a full page was devoted to an illustrated article on violets which tells the truth about violet culture at Rhinebeck and elsewhere with a free exactness not often found in newspaper accounts of floral matters. A sharp rebuke is administered to those deluded persons, usually women, who write extravagant and misleading articles on the pleasures and profits amateurs may find in violet growing. A picture of a street fakir disposing of his wares from a tray on the curbstone is inscribed "This is how your violets will be sold if you don't succeed in growing first-class flowers." One paragraph among many well worth quoting is as follows: "In mid-September a few bunches of small short-stemmed violets creep into market. Some grower is impatient to begin the harvest. The commission man may throw them into the garbage can but he is likely to send a check. The good will of shippers is worth the price." The whole article is well worth reading, and wears no unnecessary frills.

Los Angeles florists are after the street fakirs and have made appeal to the Mayor for protection against this class, mainly Italians, who are said to buy their flowers mainly from the Japanese who raise their products on cheap-rented land, and then sell it in the vicinity of the high rental stores at prices which cut into the trade of the regular florists. A similar movement is on foot in Indianapolis. The suggestion that these vendors be restricted to a limited area, such as Central Park, and not be permitted to sell flowers in the business zone, bears the stamp of good judgment and is much more likely to find official sympathy than any demand for complete eviction, and we hope will bring just relief to the florists of these cities and at the same time work no hardship to those who are struggling to eke out an existence as peddlers. It has been found in the large centres that these street hawkers fill a place in the economy of the flower trade and that once settled into their place they could not well be spared. But the legitimate florist trade has a right to demand that they be restricted to certain localities, and possibly certain hours of the day, where they may be found by those who wouldn't buy elsewhere and the inevitable surplus of inferior material, unsaleable elsewhere, made to yield some little return for the grower.

AN OPEN AIR WEDDING.

The floral event of the Oranges occurred on October fifth in the marriage of Augusta, granddaughter of the late Orson D. Munn to Israel Tilney, upon "The Terraces," the country seat of Charles Munn of the Scientific American, in Llewellyn Park, N. J. The ceremony took place upon the lower of the seven terraces under an arch of rambler roses and oak leaves. Great as was this event to the principal actors it was greater in its way to the gardener, John Hayes, whose life-work the continuous floral bloom upon these celebrated terraces is, and that it was fully appreciated by the large gathering goes without saying. The assemblage was a brilliant one and required the entire livery equipment of the Oranges to bring the guests to the scene. The collation was served upon the terraces and upon the veranda and lawn in front of the house.

J. B. D.

THE PHILADELPHIA WAY.

While he was extolling marriage as a great institution to a party of young persons gathered in his home a few evenings ago, J. William Colflesh, a wholesale florist, who lives at Fifty-third street and Woodland avenue, was suddenly apprised by two of his sons that he was a father-in-law twice over, as they had been secretly married, their weddings not being known to each other.

These revelations only increased his good humor and strengthened his Rooseveltian convictions, for besides congratulating his two sons and saluting his two new daughters-in-law, who were in the party, he took the two bridegrooms into partnership.—Phila. North American.

PERSONAL.

Walter Morse of Morse & Beals, Lowell, Mass., was recently married to Miss Helen Barnes of the same city.

The marriage of Robert F. Tesson of St Louis, Mo., and Miss Hattie Wilkerson is announced for this month.

James D. Rough, buyer for Thos. F. Galvin's Back Bay store, Boston, and Miss Emma McDonald of East Milton, Mass., were married on October 1.

John Pitchett, formerly with W. H. Elliott, and Robert Dunn, lately with Waban Rose Conservatories, have taken positions with J. A. Budlong & Sons Co., Auburn, R. I.

Mr. John K. M. L. Farquhar delivered an interesting lecture illustrated with lantern slides, on "Gardens Ancient and Modern," before the Board of Trade, Nashua, N. H., on Thursday evening, October 10.

J. H. Small, head of the firm of J. H. Small & Sons, who has been critically ill at his residence on Brentwood Road, Washington, D. C., is, at the present writing, somewhat more comfortable. However, there is little or no hope entertained of his recovery, owing to his advanced age and to a paralytic stroke which he has had.

PHILADELPHIA PERSONAL AND BUSINESS ITEMS.

J. Otto Thilow and J. D. Eisele of Dreer's are expected home from their European trip on the 17th inst. Samuel S. Pennock and family are expected home about the 20th inst. The latest heard of Mr. Pennock's party was from the Giants Causeway in Ireland, which they thought about the greatest wonder they had seen in their long journey. Another very enjoyable feature of the trip was their visit to the Dickson Rose Nurseries at Newtonards.

Among the improvements conspicuous among the local stores are a new store front at Pennock Bros.' and fresh interior decorations; a new cash carrying system installed at the Pennock-Meehan Company's; a new store and new ice system at the Philadelphia Cut Flower Company's, and an entirely new store and location for W. H. McKissick.

The delivery problem of the wholesalers, its costs and benefits and disadvantages, so ably dilated on by Mr. McKissick at the last meeting of the Florists' Club seems to have been tackled in earnest by the Pennock-Meehan Co., who have inaugurated a discount system whereby the storeman who buys in person and takes the stock with him can save anywhere from seven to fifteen per cent. and also get the advantage of a much larger variety to choose from than by the wagon or 'phone methods.

We neglected to mention that the very interesting picture of John Cook of Baltimore, with his new rose, which appeared in issue of September 28, also group of Philadelphia autoists, was from a photograph taken by Fred Lautenschlager.

SWEET PEA CAMPAIGN OF 1908.

The advent of the Spencer wavy type of flower has done much to increase the great popularity of the sweet pea and several very fine novelties in this class are already announced, chief among them being Burpee's White Spencer and Crimson Spencer. According to Lester A. Morse of California, one of the largest sweet pea growers in the world, the White Spencer especially outclasses all other whites, in size, length of stem, waviness and fragrance. Primrose Spencer is considered by the same authority to also excel all others of its color. In addition to the two sensational Burpee novelties the following foreign varieties have received awards: Elsie Herbeit (C. W. Breadmore), Evelyn Hemus (Miss Hemus), Nancy Parkin (H. A. Parkin), St. George (Hurst & Son), Silas Cole (S. Cole), Prince Olaf, The Marquis and Princess Victoria (Dobbie & Co.), Nora Unwin (Watkins & Simpson), and Lord Nelson (I. House & Son). St. George received not only an award of merit at Royal Horticultural Hall but a silver medal and a first-class certificate at the Reading trials on July 18th. All or most of these will doubtless be offered to the American trade through the regular channels in due course. Messrs. Burpee have appointed Hurst & Son, Cooper, Taber & Co., Watkins & Simpson, and Nutting & Sons as their wholesale distributing agents for the British and colonial trade. In a personal letter to the writer under date of Sept. 24th Mr. Burpee reports that "the advance orders for the new Spencers are already coming in at a remarkable rate—one retail house alone sends in today an order for eight thousand packets." The Lord Nelson of Hurst & Son proved at the Reading trial to be identical with Burpee's Brilliant Blue, but the latter variety received the "three stars" of the Royal Horticultural Society, the only other new one to capture that honor being Dobbie's Albatross.

Of all the new ones introduced last year few were more admired in England than Morse's Helen Pierce. Some of Dobbies' new ones are very fine, Menie Christie being particularly captivating. Prince Olaf resembled Sutton's Marbled Blue except for a slight difference in the striping. Robert Sydenham will send out the Evelyn Hemus. Sydenham's Millie Maslin is also a very fine one, a large rich rosy-crimson self very much darker than Prince of Wales. While Hurst & Son's Saint George did not originate from the Spencer type it has developed the wavy trait in the field the past summer. This variety is perhaps best described as a glorified Evelyn Byatt. Messrs. Sutton will send out "The Queen," a beautiful light pink of the Spencer type. Besides the two new Spencers Burpee will send out this year "Midnight," a flower so dark that Squire Aldersee, a great sweet pea specialist, who developed a single plant of the same variety had already baptized it "Jet." It is the nearest to black of any sweet pea grown. We hope to have more to say of the foregoing and other novelties as the season advances.

Among other unfortunate results of the bad weather in England the past summer is the almost complete failure

New Sweet Pea—Burpee's Primrose Spencer.

of the new sweet pea, "Evelyn Hemus," according to reports reaching this side Sept. 20th. R. Sydenham had color plated this fine variety, and others have gone to considerable preparatory expense, but it is now doubtful if it will be offered at all the coming season. Paradise, Cream Paradise and Carmine Paradise are also very short.

G. C. WATSON.

MOVEMENTS OF GARDENERS.

Henry Boet has taken the position of gardener at the Butler Hospital, Providence, R. I.

John Derwin, formerly under gardener for C. L. Bausher of Montclair, N. J., has secured the position vacated by William Bennett as gardener for A. C. Van Gausbeek of Orange.

INCORPORATED.

The North Yakima Nursery Co., located at North Yakima, Wash.; T. Kelley, president and manager.

S. J. Reuter & Son, Westerly, R. I.; president, S. J. Reuter; vice-president and manager, L. J. Reuter; secretary and treasurer, C. H. Nichols; capital stock, \$150,000.

L. L. May & Co., St. Paul, Minn.; president and treasurer, L. L. May; vice-president, F. W. May; secretary, E. W. Reid; assistant treasurer, W. H. Lovell; capital, \$200,000.

San Benito Nursery Co., San Benito, Cal.; W. H. Sturges, San Benito; H. G. Stillwell, Brownsville; F. R. Foley, San Antonio; R. L. Batts, Austin, Texas; A. Heywood, Jennings, La.; capital, \$5,000.

NEW JERSEY FLORICULTURAL SOCIETY.

The dahlia exhibition of the New Jersey Floricultural Society, held in Elks' Hall, Orange, N. J., on Friday evening, October 4th, consisted of an elaborate display of exhibition, single and cactus dahlias, miscellaneous flowers and fruits. The largest contribution, made by J. C. Williams of Montclair, comprised twelve vases of named varieties, chiefly the newer strains. Walter Gray of Maplewood had ten vases. George von Qualen arranged a vase of twenty-four varieties of dahlias. Prizes were awarded as follows:

Twelve blooms in three varieties: 1 A. B. Jenkins, gardener George von Qualen. Twenty-five blooms in variety: 1, S. & A. Colgate, gardener William Reed; 2, Walter Gray. Twenty-five blooms of Single in variety: 1, C. L. Bausher, gardener Philip Cox. Twenty-four blooms of Cactus in six varieties: 1, Walter Gray. Six blooms of white: 1 Walter Gray; 2, W. V. Gray. Six blooms of pink: 1, Walter Gray; 2, S. and A. Colgate, gardener Wm. Reid. Six blooms of yellow: 1, A. C. Van Gaasbeek, gardener John Dervin; 2, Walter Gray. Six blooms of red: 1, Walter Gray; 2, W. V. Gray.

Not for Competition—John Crosby Brown, gard. Peter Duff; vase of dahlias, first class certificate. A. B. Jenkins, gard. George von Qualen; vase of 24 varieties, highly commended. A. C. Van Gaasbeek, gard. John Dervin; vase of Lucy Faucet, certificate of merit. J. B. Dodd, 3 vases, certificate of merit. Dominick Russi, 2 vases, vote of thanks. Walter Gray, 2 vases, highly commended.

Trade Exhibit—Julius Roehrs Company, Rutherford; *Cattleya labiata* Cooksoniae var., a blush with crimson throat of rare albino strain and *Odontoglossum grande*. Lager & Hurrell, Summit; *Cypripedium Fairieanum* and *Cattleya chrysotoxa*. Joseph A. Manda, West Orange; *Laelio Cattleya* seedling. Thomas Jones, Short Hills; vase of dahlias. J. C. Williams, Montclair; 14 vases of named dahlias, and peaches and grapes.

In the monthly competition were: Charles Hathaway, gard. Max Schneyder; Stuart Hartshorne, gard. A. T. Caparn; Stewart Dickson, gard. Albert Larson, and John Crosby Brown, gard. Peter Duff.

George von Qualen secured his first with Grand Duke Alexis, Mrs. Roosevelt, Cuban Giant, and Kaiser William, all exhibition varieties. J. C. Williams received a first class certificate for Cuban Giant, Mme. Van der Halle, Mrs. Agnew, Danish Croso, show varieties, Mrs. H. J. Jones, Countess Lonsdale, cactus dahlias and Pink Century and Gorgeous, single varieties. J. B. D.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular monthly meeting of the club will be held at Horticultural Hall on October 15 at eight o'clock. The lecturer of the evening will be Wilfrid Wheeler, subject, "Fruit Growing." Mr. Wheeler is an able speaker and being an excellent grower will be able to give some useful practical hints to all who attend. Announcements in regard to the coming landscape classes will be made;

they will be started at a very early date. There will be interesting exhibits and other attractions and no one can well afford to miss this meeting.

W. N. CRAIG, Secretary.

AMERICAN CARNATION SOCIETY.

The annual premium list of this society will soon be issued and any one having special premiums to offer is requested to send full particulars of the same to the secretary.

Carnations Registered.

By H. A. Jahn, New Bedford, Mass., Lloyd.—White carnation; flowers three and one-half to four inches; free and continuous bloomer; habit is the very best. Seedling of 1902; parents two pedigree seedlings dating back to Scott and Hinze's white.

ALBERT M. HERR, Secretary.
Lancaster, Pa.

MONTREAL FLORISTS' CLUB.

This club held a very interesting meeting last Monday. It was definitely decided that the chrysanthemum show will take place in the Victoria Rifles' Armory Hall on November 13th and 14th. The V. R. Band will render a selection of classical music from 9 to 10 o'clock each evening. Another very important question brought before the meeting was in regard to the wages. The cost of living, the rent, taxes, etc., are becoming prohibitive to the wage-earners of the trade in this city, and when this question was brought before the club, the remarks which I heard among the members proved without the slightest doubt that the agitation is a very popular one, but one member making objection threw cold water on the matter, and the subject was temporarily postponed.

New Sweet Pea—Burpee's White Spencer

"THE ADVANCEMENT OF THE MIDDLEMAN AND HIS ASSOCIATE, THE SALESMAN."

W. E. McKissick before the Florists' Club of Philadelphia, Oct. 1, 1907

This paper, gentlemen, is not written with an antagonistic spirit; for we wholesalers are far from hunting trouble. A full share is already portioned out for us, and we are pretty sure to get it, without looking for it; but it is written with a hope that it may in a measure bring the middleman and the storekeeper (or the buyer) into closer touch with each other, and with the idea that it will help each to more fully realize and appreciate what one is doing for the other.

The Old Way.

Twelve or fifteen years ago some of you will probably remember how the few wholesale flower houses which were in existence at that time, employed men and boys at from eight to twelve dollars per week and called them salesmen. Their business was to sign for express packages, check up the contents, wait on a customer, or answer the telephone. As a rule their employer was a frank, open-hearted, honest sort of a man himself, and one who felt that his employes were equally so, whether he was on deck or not, and he never thought it necessary to see whether these so-called salesmen were handing out a dollar's worth for a dollar or ten dollars worth. He simply took their word for it, and when the end of the week came, he possibly sat down and figured for hours and hours in his efforts to locate the sale of certain material, which he was positive he had received from his growers, and for which he found no bill of sale. Finally, after all his efforts had been exhausted, he would go down in his pocket, pay for the goods, and take chances of finding the leak later. Another week would go around with possibly the same experience and the leak still unbound.

Bribe or Get "Burned."

Now, in other markets, I am told, it is customary for the buyer (in order to secure a bargain) to pass (on the quiet) to the so-called salesman, a piece of money, and if he did not resort to this method he would probably have to pay an exorbitant price, or to use a common phrase, be burned. The word "burned" needs no explanation; we all know too well the meaning of it. Now, while conditions were in days past nearly as bad on this market, it never came down (to my knowledge) to the deliberate handing out of "cold money." To be sure there were times when material disappeared mysteriously from the wholesale houses, but a cigar, a dinner or something of that sort by some of the buyers and the so-called salesman did the work, and should these buyers have suddenly gotten religion and on the impulse of the moment revealed what they knew to the proprietor, he would probably have had a solution to the leak in his sales.

Other Antiquated Methods.

Another bad feature of the business at that time was the over-generous spirit of the wholesaler, in allowing his employes and others, what was known as a donation. When Saturday

night came it was not considered out of place by the employer to allow an employe a portion of the flowers left over as a donation. But this privilege became sadly abused, so much so, that flowers at times took wings and the privilege had to be stopped.

Another ancient idea was the sale of flowers from the wholesale houses by wagon; this custom you are all familiar with, and while at one time a success, of late years since we have had the telephone and understand more thoroughly what could be accomplished by it, the wagon has almost entirely been abandoned. If it were not for the fact that one of our wholesalers, whom I have the honor to regard as a good neighbor and a close friend, still persists in using his wagon, I would say about him as our friend Mr. Meehan said about the grower who still carries his own stock, "That he was ten years behind times."

The New Type of Salesman.

But, today, gentlemen, things are different. The wholesaler profiting by his past experience, and those of others, and awakening to the call which competition has made, is running his business direct from the shoulder, and on the most up-to-date principles and methods. The day of the donation is past; he has discovered that the flowers in his possession are not his own, but the property of some grower; if his employes want them they are welcome to them at the lowest market price; but they must be paid for. The day of the would-be salesman is done, and in his place we have those who have stood the test and have proven themselves to be capable salesmen without a question of doubt. The wholesalers of today employ the best experienced men he can get, systematizes his business, puts them in their respective places, according to their knowledge and ability, as salesmen, packers, traders and delivery clerks; pays them their price and demands results. He has an eagle eye on the goods coming in: who they come from, how they are handled and graded; how sold and at what price, and how packed and delivered; thus keeping in touch with the stock he is handling from the time it reaches his place of business until it is handed over to the storekeeper and the bill O. K'ed, or delivered to the express company for shipment.

The salesmen in our wholesale houses today are a class of experienced and energetic young men, of whom our storekeepers should well feel proud. As compared with salesmen of fifteen years ago, these are real salesmen and real men, who are fully capable of selling material at its market value, and who do not have to stoop to the low standard of giving the buyer more than a dollar's worth for a dollar, with the idea of securing his business and making a large book, or appealing to be more than he is to his employer as a salesman.

The Secret of Success.

Philadelphia middlemen, I am glad to say, are all progressive, and have made wonderful strides along the line of advancement; credit for which has been handed out to them in various forms. One will say, "He's a wise, shrewd, business fellow"; another will say, "Mr. Blank (his former employe;)

taught him all he ever knew," and still another will say, "His financial backing is his whole success, and without which he would be lost." But, gentlemen, let me put you right, all of these things are in a measure responsible. A man must have a good, level head to manage his business successfully, but a great percentage of his success is due to the ability and untiring efforts the man who plugs away from morning till night to sell the stock, and who after hours will give him valuable suggestions to aid him in the daily routine of business; this man is the salesman. Now where do we get these good salesmen of whom we are boasting? Were they born salesmen or made salesmen? Allow me to answer this by saying that in my judgment it is a question of ability and experience on their part, combined with keeping in close touch with their employer, which has made many of these men what they are; but I hope they will not take my remarks as flattery; they are simply intended to give them the encouragement which they deserve, and which has long been coming to them.

We have few "college-bred" men in our profession, but we have men of character and ability who are slowly but surely pushing to the front. Why not a course in scientific salesmanship for some of these young men, that it may develop and fit them for the positions which will surely be to offer if the wholesale florist business continues to advance with the same speed it has done.

How the Telephone Helps.

Possibly two-thirds of our local business is at the present time done over the telephone. Each wholesaler has his trade divided, and a careful man appointed to look after the requirements of every customer. The stores are only beginning to appreciate what these men do for them in the way of keeping them in touch with the market conditions and especially in the way of process and new material, which some of the out-of-the-way stores would not know about for possibly a week if it were not for the 'phone. As it is they can now find the exact conditions in a few minutes. But does our friend the store-keeper realize the great expense item that the telephone is to us? The total cost to the Philadelphia wholesalers combined for telephone service is probably from five thousand to eight thousand dollars annually, and while we cannot do without them, I assure you the cost is a problem which gives the middleman some occasion at times to put on his thinking cap. With the amount of money expended we expect results, and in most instances we get them, as I am glad to say that the majority of our stores appreciate the telephone service, and the information which it brings; but there are still a few stores where the management is so poor that they allow their employes to treat a call from a wholesale house as a joke, and believe the salesmen have nothing else to do but to make 'phone calls to pass away the time. Again they in reply to a 'phone call will not extend him the courtesy to inquire his business; but as soon as they learn that a call is from a wholesale house,

TRAENDLY & SCHENCK

44 WEST 28TH STREET, NEW YORK

NOW is the time to start your season **RIGHT**.

Our stock of Mums for fall comprises the finest grade of all the best of **EARLY** and **LATE** varieties.

All the leading varieties of fancy carnations — received **DAILY**.

VIOLETS—VALLEY

Our supply of Orchids is second to none.

TRAENDLY & SCHENCK

44 WEST 28TH STREET, NEW YORK

3 Phones — You can always connect.

simply say, "Nothing doing" and hang up the receiver. We can make allowance in some instances, where the store-keeper may be busy with a customer, or again, where he may have a good supply of stock on hand and no prospects of business, but salesmen are human beings, and a little courtesy extended to them (which costs nothing), would work wonders for the store-keepers at some future time, when certain material may be scarce, and the proprietor badly in need of it. Mr. Store-keeper, try my prescription, and instruct your employes accordingly, and if it fails to cure, we will refund you money with pleasure.

Cost of Delivery Service.

Just a word now in regard to delivery service. Our city today is doing for the retail trade what no other city does (as far as I know), giving them prompt delivery service at any hour of the day from 7 A. M. to 8 P. M., and during the holiday season (I may add) any time during the day or night. This is all free to the store-keeper, but not to the wholesaler. To give the proper service, the larger houses are compelled to employ for their delivery at least from five to ten boys at a cost of anywhere from four to five dollars per week. Total this up, add the amount it costs weekly for car tickets, etc., and you will find it runs into money. The prompt delivery service which we are giving today has been brought about by competition. Oftentimes our larger stores will divide a very large order between two or more wholesale houses, ask for immediate delivery, and then watch

carefully to see which house has their order delivered first. This is an important item to the buyer, who makes a note of the best service given him, and in return places the next important order which he may happen to have with the man who gives him the attention, and on whom he can depend. I have endeavored to show you what this service means to our most up-to-date store-keepers, and to make it plain to you that they fully appreciate our efforts, but in some ways the competition has been overdone (in the way of delivery). We have been so ambitious to please the trade that at times we have delivered very small bills of goods, possibly a dollar's worth or less, the commission on which will amount to a paltry fifteen cents. The goods are placed in a box probably worth five cents, and the carefare to the customer may run anywhere from eight to fifteen cents; figure this up yourselves, gentlemen. This is what some of our less thoughtful store-keepers expect and insist on our doing, but I tell you that the wholesaler is beginning to realize that this is making money backwards, and one of our houses has boldly come out recently and told customers in a polite way that while they want their business, they cannot afford and will not deliver a bill of goods under \$2.00 to any point where it is necessary to pay carefare, unless they charge the same in with the bill of goods. This, in my judgment, is a step in the right direction. Every sound-minded store keeper is well aware that the existing competition in our business is bringing not only this service but dollars and

cents to his door every day, and it would be suicide for him to discourage us in our efforts.

The Wholesalers' Sun Is Rising.

To make a long story short, allow me to say that the wholesalers have to be and are a hustling class of men, who are willing to work night and day for results, and who have been doing it for a number of years. Today they are commencing to see light ahead, the grower and store-keeper alike are slowly grasping the fact that he is a better man than they had given him credit for. They have had a look at his brighter and better side, and are profiting in more ways than one by his efforts. The sun is rising for him; I will not say in the east, but just so sure as the sun must rise "somewhere" so sure will the middleman continue to advance.

Our business is in its infancy, and while it is so why not bring it up in the way it should go? We can never form a Philadelphia Florist Protective Association after our experience of one year ago, but we can show our fellow business men, both wholesale and retail, that we are ready and willing to meet them half way on any proposition that will be for the mutual good and advancement of our profession, or that will in any way make this rough road the florist must travel more smooth.

The Detroit park commission has received a large collection of cat-tleyas, oncidiums, dendrobiums, cypripediums, latanias, chamaerops, and other large plants from the estate of the late Daniel Scotten.

HORTICULTURAL SCHOOLS AND EXPERIMENT STATIONS.

Read by Dr. A. C. True, United States Office of Experiment Stations, at the Horticulture Congress, Norfolk, Va.

In the United States education and research in horticulture are mainly carried on in connection with the State agricultural colleges and experiment stations and the United States Department of Agriculture. Some horticultural work is done by all of the sixty experiment stations in the continental United States and in Alaska, Hawaii and Porto Rico, except in the State of Wyoming whose station is located more than 7,000 feet above sea level and has thus far undertaken work in only a few restricted lines of plant production. As reported to the Office of Experiment Stations for 1906 the stations employed 101 horticulturists. The station work in horticulture covers a very wide range. It includes all branches of horticulture and a great variety of horticultural plants, both in the greenhouse and in the field. It ranges from an attempt to select and develop plants suited to arctic conditions, as in part of Alaska, to experiment with mangoes, and numerous other tropical plants, as in Hawaii and Porto Rico. Practically all kinds of horticultural plants suited to temperate and semi-tropical conditions are receiving some attention. As regards its character, the work varies from scientific research of a high order on fundamental problems for the determination of general principles or underlying causes, to the simplest practical tests of varieties and cultural methods. In addition, our stations are doing considerable work in chemistry, botany, vegetable pathology and entomology directly relating to horticulture.

All but seven of the stations are organized as departments of the agricultural colleges and are thus brought into close relations with, and in fact are usually in organic union with, the horticultural departments of instruction in these colleges. The methods and results of station horticultural work are therefore easily and naturally brought to the attention of horticulture in these institutions, and many of these students have some participation in the station work. The progress of agricultural research in horticulture in foreign countries, as well as in the United States, is systematically reported every month to our horticultural investigators, teachers and students through the Experiment Station Record so that on its information side at least there is little excuse if instruction in horticulture in this country does not keep pace with the progress of horticultural research throughout the world.

Practically all the agricultural colleges give some instruction in horticulture. The extent and scope of this instruction varies greatly in different institutions. We have yet at least one living example of such a monstrosity as a professor of agriculture, horticulture and botany, and in a number of colleges, even in a University, one man has plenty of room to recline at full length on the settee of two such vast subjects as horticulture and forestry. But we are doing better than we used to in this respect, and in recent years the general movement for

the differentiation and specialization of agricultural subjects and instructors has affected and greatly benefitted horticultural courses in our colleges.

Fourteen colleges announce four-year horticultural courses in connection with which an effort has been made to systematize instruction in horticulture and co-ordinate the work in this subject with that in other subjects in the curriculum so as to make a more or less satisfactory technical course. In addition, several State universities have broad elective courses and offer a sufficient number of courses in various branches of horticulture to enable the students to arrange quite thorough technical courses and even to specialize to a considerable extent in some horticultural line to which he proposes to devote himself as a profession. In some of the colleges the course which horticulture students must pursue in seeking a bachelor's degree is prescribed during two or three years and electives are offered in the third and fourth years in such a way as to enable the student to specialize in horticulture at least to a certain extent. Short courses in horticulture are offered by 19 colleges. These courses vary in duration from two years to two weeks.

At the University of Illinois, where the elective system prevails, 29 courses are offered under the head of horticulture, besides a somewhat elaborate professional course in landscape gardening. Five of these courses are of a general and somewhat elementary character, 19 are for advanced undergraduates and graduates, and 5 are exclusively for graduates. Among the special courses in this list are those in spraying, viticulture, nut culture, evolution of horticultural plants, experimental horticulture, amateur floriculture and landscape design. Two courses in forestry are also included under horticulture. The horticultural faculty proper includes one professor, three assistant professors and one instructor. There is no professor of horticulture, but a professor and assistant professor of pomology, assistant professor of olericulture, assistant professor of landscape gardening and an instructor in floriculture. The professor of botany and two field assistants in pomology also take part in the horticultural instruction.

Cornell University offers 13 courses in horticulture and the horticultural faculty consists of one professor, one assistant professor and two instructors. The University of Missouri offers 9 courses, given by one professor, one assistant professor and two instructors. Michigan Agricultural College offers 17 courses (two of which are especially for women), given by one professor and four instructors. Massachusetts Agricultural College offers 3 courses, given by one professor and three instructors, and is making special effort to develop work in landscape gardening. The University of California, with a horticultural faculty of two professors, two assistant professors and one instructor, offers 8 courses, two of which are for graduate students. The University of Ohio and the Texas Agricultural College, with one professor and one assistant professor, offer 13 courses in horticulture.

While there are certain advantages, as regards the higher line of work, in the organization of horticultural

courses in connection with colleges and universities, the instruction in such institutions will inevitably be largely of a theoretical and severely technical character. It should, therefore, be supplemented by the establishment of special horticultural schools in which young men and women may be trained for the practical business of horticulture. Some attempts have been made to do this in this country, but we have not as yet any horticultural schools of this character which will compare with those at Ghent and Vilvorde in Belgium, or the National School of Horticulture at Versailles, France.

The station horticulturists are doing a large amount of useful work and they enjoy in large measure the confidence and esteem of practical horticulturists. With the increase of the resources of the stations they are getting better facilities for work, and are enabled to specialize more and to undertake more substantial enterprises. They are now giving more attention to problems connected with a broader organization of their work and with the conduct of more fundamental investigations. On the one hand they desire to cover more completely the field of horticulture and on the other to establish the practice of horticulture more securely on a rational and scientific basis. To accomplish the first of these objects the necessity for more workers and increased specialization is apparent. To attain the second there will be required the multiplication of more thorough investigations and the acquirement more largely of the scientific spirit and attitude.

Besides the special studies made by individual workers, there should be a broad inquiry, preferably by some organization of horticulturists, with a view to determining in a general way the scope and limitations of scientific horticultural work. In other words, there should be an organized effort to define and establish a science of horticulture, differentiated from but indissolubly linked with the practice of horticulture. This is all the more important because the great body of practical horticulturists embraces more intelligent and progressive men than any other great group of workers in the general field of agriculture. I have lately heard one of our leading scientific horticulturists expressing his difficulty in keeping pace with the professional advancement of practical horticulturists and doubting whether there were any subjects to be discussed among scientific horticulturists which might not be just as well discussed in assemblies of practical horticulturists. I do not believe that he expected to be taken too literally but there is food for thought in this remark.

To achieve and maintain leadership the experiment station horticulturists must be able to do certain things better than the practical men, and as I believe must chiefly depend on their ability to establish principles, to work out methods and to discover causes or the rationale of practice. When they leave this field and put themselves in competition with commercial horticulturists they run great risks of failure. It is only in rare cases that experiment station horticulturists are likely to have the means to make tests and selections and to do other things done in commercial practice on as broad

F. R. PIERSON CO.,

Tarrytown-on-Hudson, N. Y.

a scale as the commercial growers do them. How often have experiments in horticulture, as well as other lines of agriculture, fallen into contempt because they were undertaken on too small a scale. The besetting sin of the station horticulturist has been the yielding to the temptation to undertake too many things at one time, to try this and that and the other thing in a picayunish way. His more or less valid excuse too often has been that many of these things were forced upon him by the imperative demands of his horticultural constituency.

Both parties must learn more thoroughly the proper functions and limitations of experiment station work in horticulture. The station man must come to see more clearly that his proper work is to attack the problems which are beyond the practical man, and the latter must recognize that it is folly to impose additional burdens on workers in horticulture at the stations. As an aid to the discussion of the problems connected with the establishment of the science of agriculture room was made for a course in horticulture at the National Graduate School of Agriculture held at the University of Illinois in 1906, and provision for a similar course is being made for Cornell University and the Geneva Experiment Station in 1908.

With the enlargement of the scientific basis of horticulture, mainly through the broadening work of the experiment stations, it should be possible to organize instruction in horticulture in a sounder pedagogical manner and to extend this instruction both inside and outside the colleges so as to reach many more students and benefit horticultural practice much more widely. The formulation and discussion of horticultural courses for different grades of schools should be encouraged.

Especially, efforts should be made to secure the more thorough organization and equipment of horticulture departments in some of the Agricultural Colleges, located in States where horticulture is a great agricultural industry. We need more of such specialization of development by agreement among our agricultural colleges. While all of them would do well to maintain respectable departments of agronomy, horticulture and animal husbandry, one or the other of these lines might properly be emphasized in individual institutions in accordance with its relative local importance. This in New

PUBLICATIONS RECEIVED.

Rawson's Bulb Guide. A brief treatise on the culture of bulbs for fall planting. Published as free literature by W. W. Rawson & Co., Boston.

Proceedings of the annual meeting of the American Association of Park Superintendents, Toronto, Ontario, August 15, 16 and 17, 1907. It appears from this report that the Association is in a flourishing condition and doing good work.

First Annual Report of The Horticultural Societies of Ontario, for the year 1906. Published by the Ontario Department of Agriculture. Contains an account of the papers and discussions at the annual meeting of the Ontario Horticultural Association at Toronto, November 9, 1906.

Thirty-eighth annual report of the West Chicago Park Commissioners for the year ending December 31, 1906. This interesting report is replete with full-page engravings, maps, and diagrams illustrating the multitudinous details of the management of the public pleasure grounds and play areas of a great city.

Report of the Park Commissioner of the City of St. Louis for 1905-1906. A publication handsomely bound and of the highest typographical excellence. The half-tone views are particularly good. It appears from this report that the parks of St. Louis cover 2,184.57 acres, and their total cost to date is \$4,483,709.08.

Bulletin of the Georgia Department of Agriculture, season 1906-1907, contains nearly 200 pages of information concerning commercial fertilizers and chemicals, inspected, analyzed and admitted for sale in the State of Georgia, pure foods, food regulations, etc., prepared under the supervision of Hon. T. G. Hudson, Commissioner of Agriculture, and John M. McCandless, State Chemist.

The Use of the National Forests, Issued by the U. S. Department of Agriculture, Forest Service, Gifford Pinchot, forester, is the author of this instructive little book of 48 pages. The lover of the woods will delight to read the story; it tells of the splendid work which the government has undertaken in the interests of the people in preserving and improving the vast tracts of forest land so wisely secured against wasteful abuse. Everyone should read this book. It will open their eyes to facts they should know.

Field Notes on Sweet Peas, by Lester L. Morse. As the leading grower of sweet peas in the United States (if not in the world), Mr. Morse is without question a trustworthy guide in matters relating to them. Several editions of his Field Notes have previously appeared, the present one bringing the information up to and including his trials of new sorts of 1907. Mr. Morse states that his book is designed purely as a help to the seed seller. As such it has certainly fulfilled its mission. Comparatively few seedsmen have opportunity to make field trials of the seeds they sell and fewer still to make such comprehensive trial of a single subject as this work covers. Over 250 varieties

are included in the classified list, and of these Mr. Morse indicates about one hundred which he designates as his choice. Of these, he gives preference to the grandiflora type, the flowers of which are twice as large as the older forms, like Crown Princess of Prussia, Scarlet Invincible, Queen of England and Butterfly. The notes, as stated, have been made from trials made in California, and allowance must be made in a few exceptional instances for climatic variation, as for example, in the case of Coccinea. This, Mr. Morse places as his first choice of crimson sorts, and in England it is similarly regarded. In the Eastern States it has been badly scorched, and is not considered as reliable as King Edward VII., which, however, is of less vivid color. Such exceptions, however, are rare, and the book cannot fail to be of great service, not only to the seed trade but to all lovers of sweet peas.

PLANT IMPORTS.

There were entered at the port of New York during the two weeks, September 25 to October 8, inclusive, the following plants:

Via Rotterdam: C. C. Abel, 56 cs. bulbs; H. F. Darrow, 18 cs. plants, 5 cs. bulbs; L. D. Crossmond Co., 2 cs. plants; A. W. Fenton, Jr., 36 cs. bulbs; Wm. Elliott & Sons, 4 cs. plants; J. W. Hampton, Jr. & Co., 71 cs. plants, 53 cs. bulbs, 3 cs. trees; Peter Henderson & Co., 100 bags garden seed, 1 cs. bulbs; Hussa & Co., 112 tubs laurel trees, 52 cs. plants; C. A. Haynes, 13 cs. plants; McHutchison & Co., 179 cs. do.; W. Kent, 2 cs. bulbs; F. R. Piereson & Co., 41 cs. plants; J. C. Roosa, 6 cs. bulbs; C. B. Richard & Co., 123 cs. plants, 256 tubs do., 6 cs. bulbs; August Rolker & Sons, 22 cs. plants; A. Schultheis, 2 cs. do.; Ter Kuile, 9 cs. bulbs; J. M. Thorburn & Co., 5 cs. plants, 130 bags garden seed; J. H. Troy, 2 cs. plants; O. Tegelaar, 58 cs. bulbs; Vaughan's Seed Store, 34 cs. plants, 7 cs. trees, 3 cs. bulbs; R. M. Ward & Co., 69 cs. plants; Wakem & McLaughlin, 28 cs. plants; To order, 58 cs. bulbs; Sundry Forwarders, 564 cs. plants, 67 cs. trees and plants, 11 cs. trees, 2 tubs laurel trees, 301 cs. bulbs, 353 bags garden seed.

Via Antwerp: John Dunn, Jr., 4 cs. plants; John Scheepers, 22 cs. do.; Sundry Forwarders, 151 cs. plants.

From Germany: Wm. Hagemann & Co., 1 cs. bulbs; J. M. Thorburn & Co., 8 bags garden seed; Sundry Forwarders, 11 cs. plants, 1 cs. bulbs.

Via Liverpool: Poat Bros., 11 cs. narcissus bulbs; J. Roehrs Co., 15 cs. plants; Maltus & Ware, 7 cs. bulbs.

Via Southampton: Hussa & Co., 22 cs. plants; McHutchison & Co., 1 cs. plants; Sundry Forwarders, 61 cs. plants.

Via Hull: Forwarder, 9 cs. plants.

From Bermuda: Forwarder, 1 cs. plants.

From Glasgow: J. Roehrs, 1 cs. plants.

From London: Vaughan's Seed Store, 1 cs. bulbs.

Owing to the Antwerp strike a great proportion of the exported Belgian grown stock was shipped to this country via Rotterdam that would under ordinary conditions in the shipping trade have been forwarded via Antwerp.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The fruit and vegetable show which opened at Horticultural Hall, Boston, at noon, October 10, is the best show of its kind seen here in many years and in some respects has never been equalled. A strong feature is the displays of vegetables arranged for effect. These are contributed by E. L. Lewis, New Hampshire Agricultural College, W. J. Clemson, Ed. Parker and others, and are almost as brilliant in color as a floral display, the beautiful green and white mats of endive and lettuce, the plummy parsley, the scarlet of peppers and tomatoes, the purple of egg plant, and the yellow of squash, carrot and pumpkin showing up gorgeously. The celery, cauliflowers, apples and grapes are particularly fine, the latter especially excelling the average of New England grown fruit. All three halls are filled comfortably with exhibits. Dahlias suffered from the freeze of Tuesday night, and the only large display of these flowers is by W. W. Rawson & Co., who show about 200 varieties. R. & J. Farquhar & Co. are represented by a fine table of Lillium speciosum rubrum and some superb groups of decorative foliage plants. A fuller account of the show and the prize awards will be given in next week's issue.

Iris Kaempferi (Japanese Iris).

Twelve Choice Single-flowering or 3 Petaled Varieties.

- No. 1. *Iso-no-nami.* Silvery white veined throughout with violet—the earliest in flower.
11. *Hano-no-nishiki.* Violet purple veined with white.
12. *Shippo.* Light lilac veined with purple.
14. *Shishi-ikari.* White ground densely veined and suffused with dark purple.
15. *Gekka-no-nami* A very early pure white.
16. *Kumoma-no-sora* Silvery white suffused throughout with soft light blue; appearing transparent.

43. *Shi-un-ryo.* White, veined with violet blue.
55. *Shuchiukwa.* Crimson purple with white veins and large white halo.
62. *Misutmeshito.* White, marbled with violet purple.
75. *O.ome.* A rich shade of violet purple, sometimes marked with white.
76. *Mine-no-yuki.* White, veined and dotted bright purple.
96. *T.botan.* Violet blue with prominent white veins.

Ten Superb Double-flowering or 6 Petaled Varieties.

4. *Yomo-no-umi.* The finest double white variety.
5. *K ki-no-iro.* Light violet with white veins.
20. *Ku na-funjin.* White ground with a broad border of bright rosy lilac veined with white.
26. *Uchiu.* Bright crimson purple with few white veins.
54. *H-i-e-jo* Rich velvety purple with crimson shadings.
68. *Waku-hotai.* White, veined throughout with violet blue.
72. *Uji-n-hotaru.* Bright violet purple shaded with blue.
91. *Kan-ran.* White, densely veined in centre of petals with rich violet purple.
95. *Raiden.* White ground, densely dotted and blotched with violet.
69. *Fuji-miac.* White, veined and traced with aniline blue.

Price of Strong Roots of Japanese Iris.

Named Sorts (order by name or number. 15 cts. each; \$1.50 per doz.; \$10.00 per 100) Set of 22 Varieties for \$2.25.

Choice Mixed Varieties. \$1.25 per doz.; \$8.00 per 100.

Iris Germanica.

Our collection of German Iris is very choice, the varieties offered being the best in their respective colors.

- Bridesmaid.* Standards pale parma violet, falls deeper, reticulated with violet purple.
- Cel-este.* Standards and falls a lavender blue shading lighter towards the centre.
- Cherion.* Standards lilac mauve, with metallic sheen, falls violet mauve shading to a bluish violet at edges.
- Edi h* Standards light plumbago blue; falls violet purple with white veins.
- Florentina Alba.* Sweet scented, early flowering white.
- Honorabillis.* Standards bright Indian yellow; falls chestnut red with yellow and white markings.
- John De Witt.* Standards bluish violet, shading lighter towards the centre, falls deep violet purple veined with white.
- L'Ayenier.* Falls and standards ageratum blue, shading lighter at base of petals with brown veins.
- Lord Salisbury.* Standards amber white; falls dark violet purple with white veins.
- Madame Chereau.* Standards and falls pure white, prettily edged with light blue.
- Ossian.* Standards straw yellow, falls bluish violet with creamy white veins.
- Plicata.* Standards bright violet purple; falls deep violet purple with lighter shadings.
- Queen of Mav.* Standards bright violet with rosy sheen, falls of lilac blue.
- Shakespeare.* Standards straw yellow veined with burnt amber falls deep carmine violet, shaded deeper and white veins.
- pestabilis.* Standards light violet purple, falls deep violet purple with dark shadings, one of the earliest to flower.
- Wa'neri.* Standards parma violet, shading lighter towards edges, falls bluish violet marked with white at base.
- Price. 10 cts. each; \$1.00 per dozen; \$8.00 per 100.
- Mixed German Iris, all colors. 60 cents per dozen; \$4 per 100.

For full and complete list of Pæonies, Phlox and other Hardy Perennial Plants, as well as all other seasonable Plants, Bulbs and Seeds, see our new Wholesale Price List.

HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.

CANNAS.

A paper read by John T. Temple before the Society of Iowa Florists.

Within the recollection of your essayist the most popular flower for the garden was the verbenia. Dexter Snow of Chicopee, Mass., a verbenia specialist, used to send out a list of over fifty varieties which were quoted from 25 to 50 cents each. After the verbenia lost its popularity through disease and the effects of the verbenia rust, the zonale geranium, as it used to be commonly called, began to loom up as the most popular plant, especially as Lemoine, Bruant and other French florists began to send us their double and dwarf blooming varieties, and John Thorpe and others in this country raised such good sorts as S. A. Nutt, Gen. Grant, Sam Sloane and others. But of late years, either from over-propagation or some unknown cause, the geranium is not what it used to be and the varieties of the present day have not the free-blooming qualities of the early varieties. For the past three seasons the geranium beds are mostly all foliage and have few flowers compared with former seasons. The best bed seen in Des Moines at the present time is one of S. A. Nutt geranium. Most of the local florists will tell you that on account of its color and free blooming qualities they dispose of from three to six plants of S. A. Nutt to any other variety. It is a seedling raised by John Thorpe. Not believing in after-death glorification, I think that the S. A. F. would honor itself by presenting to Uncle John Thorpe a handsome testimonial for the boost he gave to the culture of the carnation, chrysanthemum and geranium by the fine varieties he raised from seed and disseminated while he was in business.

The Claims of the Canna as a Bedding Plant.

Some few years ago the canna became prominent as a bedding plant, especially since the advent of the variety Mad. Crozy. Owing to its value as a decorative plant both as regards foliage and flowers the canna is used extensively. When properly attended to it blooms from June until frost and because of its ease of culture and elegant foliage it is seen in nearly every park and garden in the United States. The question arises, what would our gardens and parks look like if we did not have the canna to embellish them with, or in other words, what would the florists do without the canna to make the effective planting of these modern times? It is everybody's flower through its ease of culture and its bright colored flower and elegant foliage, still the S. A. F. has not given it the attention that should be given to such a popular plant; just appointed a canna committee for a couple of years and let them off with a meagre report. The carnation, rose and chrysanthemum growers, not fancying that sort of treatment have each started a society of their own. The question is, is the S. A. F. worthy of our support? True, it has accomplished some good in certain lines, but not all that a national society could do. But I am digressing from the subject. If your secretary

had asked for the best 25 or even 50 varieties of cannas instead of the best six, it would have pleased me, for there are others that I like better, but they have some fault and would not do for planting by the majority of people. Among the best six that I can recommend from my own experience the first one is Express, a dwarf red sort sent out by Nathan Smith & Son. In some seasons cannas do not do as well as others, but for the last three seasons Express has not failed. Second, Florence Vaughan, the gem of the yellow Crozy type; golden yellow spotted bright crimson, and largely planted all over the country. Third, we must not omit Mr. Crozy's original introduction, Mad. Crozy, red bordered with yellow, which even today is one of the best cannas grown. Fourth, another that is very good is Chicago. The handsomest flower bed in the Iowa State Fair Grounds is one of Canna Burbank, a very effective yellow variety, introduced by Luther Burbank, the California hybridist, which an Eastern critic seeks to disparage, claiming that Burbank and Austria are identical. Sixth, the peer of the best six cannas, equally effective for its foliage as well as its very large handsome red flowers, is King Humbert, a perfect gem which as it becomes better known will be largely planted.

I have named the six, but there are others that I cannot stop without mentioning, such as Black Beauty, grown for its foliage, Kate Gray, Compté de Sachs, Tarrytown, Betsy Ross, Marlborough, Washington, Buttercup, Gloriosa, Pennsylvania, Philadelphia, Louisiana, and numerous other fine sorts raised by Antoine Wintzer.

The victories of peace are equally as grand as those of war, and as it is not feasible to patent a new plant we could or should reward the raisers of highly meritorious new varieties of plants by having something like an American Legion of Honor of various degrees that money could not buy to be conferred upon them for their services, but only after a thorough test in different locations and different soil and conditions.

DEFINITION OF AN AUCTION.

At last Tuesday's plant sale Hubby & Wife attended, accompanied by their youngest child. The boy became curious and asked his father if there was going to be a lecture. Father informed him only an auction sale; child at once wanted to know what an auction sale was, he replying, "Where they separate you from your money and then sting you." After a pause the parent arose to ask the auctioneer a question, when the child called out: "Dady, tome back; you will get stung if you don't!" (Laughter.)

FROST.

The first frost in the Boston district occurred on the night of October 8 and the morning of October 9 brought to light wrecked gardens all around. Dahlias intended for the exhibition at Horticultural on the 10th and 11th were completely ruined and the more valuable garden flowers and vegetables generally were laid low.

COMING EXHIBITIONS.

The fourth annual Ontario Horticultural Exhibition will be held at Massey Music Hall, Toronto, Ont., November 12 to 16, 1907. Copies of the schedule containing rules, entry form, price lists, etc., may be obtained from the secretary, E. F. Collins, 415 Pape avenue, Toronto.

The schedule for the twelfth annual flower show of the Morris County Gardeners' and Florists' Society to be held at Madison, N. J., on October 31 and November 1, offers \$500 in cash prizes for chrysanthemums, roses, carnations, violets, etc., including many special premiums offered by seedsmen and other commercial houses. Copies of the list may be obtained from E. Reagan, secretary, Morristown, N. J.

The following have been mentioned at length in preceding issues of HORTICULTURE:

Menlo Park Horticultural Society, Menlo Park, Cal., Oct. 18, 19. F. G. Hutchinson, secretary.

Lenox Horticultural Society, Lenox, Mass., Oct. 23, 24. G. H. Instone, secretary.

Marin County Horticultural Society, San Rafael, Cal., Oct. 26. T. P. Redmayne, secretary.

Monmouth County Horticultural Society, Red Bank, N. J., Oct. 30, 31. H. A. Kettell, secretary.

Morris County Gardeners' and Florists' Society, Morristown, N. J., Oct. 31, Nov. 1. Edw. Reagan, secretary.

New Haven County Horticultural Society, New Haven, Conn., Nov. 6-8. Walter Koella, 58 Bishop St., New Haven, secretary.

Chrysanthemum Society of America, American Institute, 19-21 West 44th St., New York City, Nov. 6-8. David Fraser, Homewood and Penn Ave., Pittsburg, Pa., secretary.

Nassau County Horticultural Society, Glen Cove, N. Y., Nov. 6-8. J. F. Johnston, secretary.

Denison Civic Improvement League, Denison, Tex., Nov. 6-8. T. W. Larkin, secretary.

Tarrytown Horticultural Society, Tarrytown, N. Y., Nov. 6-8. E. W. Neubrand, secretary.

Massachusetts Horticultural Society, Horticultural Hall, Boston, Chrysanthemum show, Nov. 8-10. W. P. Rich, secretary.

Horticultural Society of Chicago, Chicago, Nov. 6-12. E. A. Kanst, 5700 Cottage Grove Ave., Chicago, secretary.

Horticultural Society of Buffalo, Buffalo, N. Y., Nov. 11-17. J. H. Tranter, P. O. Box 994, secretary.

Florists Club of Washington (D. C.), Nov. 12-14. Chas. McCauley, 18th & Kearney Sts., Washington, D. C., secretary.

Montreal Gardeners' and Florists' Club, Chrysanthemum show, Nov. 13, 14. Victoria Rifles Hall, Montreal, Que. W. H. Horobin, 283 Marquette St., secretary.

State Floral Society of Arkansas, Little Rock, Nov. 14-16.

Rhode Island Horticultural Society, Providence, Nov. 15, 16. C. W. Smith, 27 Exchange St., secretary.

Worcester County Horticultural Society, Chrysanthemum show, Worces-

ter, Mass., Nov. 14. A. A. Hixon, secretary.

Ontario Horticultural Exhibition, Massey Music Hall, Toronto, Ont., Nov. 12-16. H. B. Cowan, Parliament Buildings, Toronto, secretary.

Maryland State Horticultural Society, Fifth Reg. Armory, Baltimore, Dec. 3, 4. T. B. Symonds, College Park, Md., secretary.

BUSINESS CHANGES.

The Alameda Floral Co. have succeeded H. Gresens at 1251 Park St., Alameda, Calif.

Darvell & Fickett have started in the flower business at 670 Sixth Avenue, New York City.

Hillyer & Co. have taken a five years' lease of the Welden Greenhouses, Berlin, Conn.

Gallagher's Flower Shop has succeeded to the business of the Metz Floral Co. at 5005 Page boulevard, St. Louis, Mo.

Chas. H. Fiske will take charge of the store at 548 W. Madison street, Chicago, vacated by H. F. Halle, and carry it on in connection with his present establishment on Ogden avenue. Mr. Halle finds that his new place on Sheridan road, North, requires all his attention.

The "Japana" Cut Flower Holder

A handy article for florists. Sells to the trade on sight. Made of glass in three sizes. The "Anglais" Table Decoration, something entirely new, long needed. The florist and housewife will appreciate this article, as it simplifies the art of table decorating.

FLOWER MARKET REPORTS

BOSTON

The cold wave has shortened up the supply of some outdoor material, but the market is not materially strengthened on this account, as chrysanthemums and carnations are beginning to make a strong showing and more than take the place of anything that may have been cut off. Of carnations the whites are the more salable, colors moving very slowly; quality varies. There are some excellent flowers for the season, but more of them are of inferior quality. Roses are not up to good pitch yet, and the quantity of the smaller weaker grades is beyond the market's capacity. Prices in general are at a standstill.

BUFFALO

Autumn is now in full swing and everybody is busy; social plans taking definite shape, and club and charitable work being resumed as people settle for winter. It is a little early for any extensive indoor entertainment, but informal entertainments for bride-select and similar affairs have been creating a good demand for white roses, lily of the valley, orchids in excess of former fall seasons, and there seems to be no let-up. White chrysanthemums helped out considerably, and while not large in size, have sold at good prices. Demands have been heavy on Beauties, which are of fine quality, also for Bridesmaid, Richmond and Killarney, the supply not being too abundant but good, clean sales daily. The shipping trade has helped to consume a good portion. Carnations are coming in more plentifully, but are cleaned up daily, the greater portion being short-stemmed, save Enchantress, which still leads in quality. Asters and gladioli are beginning to take a back seat, but move to the front when floral work is to be had; the light varieties find very little trouble in being disposed of. Violets show the effect of last week's Indian summer, and are a little on the shaky list, with demand light.

CINCINNATI

The chrysanthemum never received a better welcome than it has this fall. Estelle and Glory of Pacific are the advance guard. Roses, carnations and lilies are still scarce, but will not be so badly missed now. Stock has been bringing more than it was worth for some time, carnations especially. Dahlias have been a promi-

nent flower in the market this season. Some good varieties have appeared in quantity and they have sold well. Business is brisk and the prospects for a good season were never better.

INDIANAPOLIS

The cut flower business seems a little brighter this week. The weather is more favorable and a shortening up in some lines seems to have helped out considerably. The quality of greenhouse stock has steadily improved while the comparatively small supply of outdoor flowers, principally dahlias, has greatly deteriorated and they will soon be a thing of the past. Chrysanthemums are coming in generous quantity and are of remarkably quality for early October. Carnations are steadily improving as to flower and stem and some excellent blooms will be seen at an early date. American Beauty now reigns supreme and has good stems and color. Good tea roses are arriving more plentifully but are far from being equal to demand. Lily of the valley moves slowly. Violets have made a modest beginning. There has been no frost as yet, the weather continuing warm with quite a lot of rain. This has been a good growing season taking everything into account.

MONTREAL

Business in Montreal is picking up. Quite a number of weddings have helped the trade along. Outside flowers are all over, with the exception of dahlias. Roses, carnations and chrysanthemums are getting more plentiful, but the demand is still far ahead of the supply. Wholesale men as well as retailers are satisfied with the present conditions.

NEW YORK

There is a slight stiffening up on prices of flowers of the higher grades as indicated in our quotations, but this must not be construed as any general advance in market rates on an average for the lower grade flowers are just as hard to dispose of as they have been at any time this season and their value has not been at all enhanced by recent weather changes. Chrysanthemums are coming in freely, and buyers are looking for much finer material for the prices they were paying for indifferent quality two weeks ago. Violets continue in over supply and carnations are rapidly multiplying.

There are some fine autumns in the market and these are the ones that sell.

PHILADELPHIA

The commencement of the fall wedding season gave stimulus to last week's market especially in the early part. Lily of the valley, white roses, cosmos and Easter lilies went well. For parlor and church decorations the dahlia is much in favor. On the whole it has been a very good season for the dahlia men, very little good stock going to waste. Early chrysanthemums are now in. Polly Rose and Pink Pacific are most conspicuous but demand is not very active. Beauty and other roses cleaned up well until late in the week. The weakness was then particularly noticeable in the shorter grades. Carnations found excellent market for good stock but far too many short stems are arriving. Prices are a shade easier on cattleyas but these and other orchids move nicely and without waste.

WASHINGTON

Following the beautiful weather of the past two weeks, a fierce wind and rain storm visited portions of the District of Columbia on Oct. 8th. So far, no damage has been reported. Dahlias are plentiful and in their prime. The first chrysanthemums are coming in; cosmos is pretty well launched on the market and of very good quality. Some violets are being shown, though in limited quantities and short of stem.

The great scarcity of cut flowers prevailing in the Detroit market is about being broken, through the arrival of chrysanthemums, the first having reached the Michigan Cut Flower Company from Robt. Klagge, Mt. Clemens.

We have received from a foreign correspondent an interesting account of the extensive bulb growing industry being carried on by Messrs. Van Meerbeek & Co., a Holland firm of over fifty years' existence, who do quite a heavy exporting trade.

The residence of C. J. Foster, florist, of Findlay, O., was damaged by fire to the extent of \$500 on September 24, but was covered by insurance.

In ordering goods please add, "I saw it in HORTICULTURE."

lyn, N. Y.

OBITUARY.

Z. DeForest Ely.

Son of late Ezra Stiles Ely D. D., of
Philadelphia, died Sept. 30, aged 56,
and was buried at Abington, Pa., on
Oct. 3, with Masonic honors. Z. De
Forest Ely was the founder of the
seed firm of that name, which at one
time was quite a factor in the seed
trade of the country. Business re-
verses of some ten years ago under-
mined Mr. Ely's health and he lived
in retirement since then until his
death. His early training was obtain-
ed in the house of Robert Buist & Co.,
of which he was at one time a partner.
Mr. Ely had a very winning, although
mercurial, mentality, and all through
his career showed a brilliant and
progressive intellect. Had he been of
a less high strung and sensitive tem-
perament it is very probable he would
have surmounted his business
troubles, but the delicate organization
snapped under the strain and forced a
retirement, which proved final. What
he did during his span of life he did
well, and he leaves a stainless record
behind him.

G. C. W.

Hugo Book.

Hugo Book, for many years engaged
in the florist business in Worcester,
Mass., died on October 4 in St. Vincent
Hospital after an operation for appen-
dicitis. He was 50 years and 27 days
old, and his death occurred on the 16th
anniversary of his marriage.

He was born in Munster Westfalen,
Germany, the son of Mr. and Mrs. Jo-
seph Book. His father was city clerk
in Munster and a well-known and re-
spected person. He was educated in
the schools at Westfalen. He settled
in Worcester and married October 4,
1891. He learned his business in the
gardens and conservatories at the
Schloss garden of Munster, capitol of
Westfalen.

During his spare time he was very
fond of hybridizing and grafting roses
and possessed a famous garden in
which he had a splendid collection.

He is survived by his wife and two
daughters, Mary, 15 years old, Amelia,
10 and a son, Albert, 12 years.

John E. Olsen.

We regret to announce the death
of Mr. John E. Olsen, an esteemed
employee of the Illinois Seed Company,
Chicago. Mr. Olsen has been asso-
ciated for many years with the Illinois
Seed Company and his death is not
only a sad loss to them but to a
host of friends in the seed business
who knew his worth. We have a letter
from President Green of the Company
expressing his deep sense of personal
bereavement. Mr. Olsen's death was
caused by appendicitis after an illness
of but five days. He leaves a wife and
a four-year-old son.

Other Deaths.

Mrs. M. Rose Wingert, florist, of
Wilmington, Del., died on October 3
at her home, 714 King street.

B. L. Alley, one of the old-time
florists of Danvers, Mass., died on
Sunday, October 6, at an advanced
age.

LANDSCAPE GARDENING.

Read before the Congress of Horticulture, Jamestown Exposition, Norfolk, Va., September 23, 1907, by John C. Olmsted, Brookline, Mass.

(Continued from page 454)

The Florist's Place and Limitations in Landscape Work.

Horticulture is the art of the cultivation of garden plants as distinguished from farm crops. Those horticulturists who raise or sell plants for their beauty are florists. Most florists advise as to or direct the use of ornamental plants. Many florists also branch out into the practice of landscape gardening because their technical knowledge enables them to do so well enough to satisfy those who employ them. Similarly druggists sell drugs without prescriptions of physicians, dealers sell spectacles without prescriptions of professional oculists.

Nevertheless all who can afford it should get advice on matters of landscape design from the best available professional landscape gardener, just as they should get advice as to matters of health from a competent physician. Florists should therefore avoid competing with competent landscape gardeners.

This principle of specialization of knowledge and its application to human affairs is well known to florists, but for one reason or another they do and will continue to practice landscape gardening and it must be acknowledged that to a certain extent and under certain circumstances they are justified in doing so.

The direction in which the work of florists in the field of landscape gardening is usually most open to criticism is in its esthetic qualities.

The mind of the florist is usually occupied either by practical details or is considering the beauty of particular flowers or plants. This tends to unfit him as a landscape designer. If he is to practise landscape gardening, he should subordinate beauty of plants to the beauty of the composition or design as a whole. In doing so he cannot succeed unless he studies first the requirements of the case, the utilization of its opportunities for landscape beauty, its financial limitations and so on. Then he must form in his mind, or on paper, a general plan or solution of the problem embodying such qualities as fitness, harmony, contrast, simplicity or intricacy, proportion, relation of masses, colors and so on.

But even if he refrains from designing landscape the florist should be an artist.

Faculties that Must Be Cultivated.

The very existence of florists depends upon the public demand for beautiful flowers and garden plants. If the florist is to succeed in the esthetic side of his business he must be endowed with certain esthetic faculties and cultivate them to the point of efficiency. A mere love of flowers is not sufficient, any more than an ear for music would indicate the existence of the qualities required for a successful musician. There must be the power to observe and study, to imagine combination and modifications of things seen or learned of, to mentally test them by various standards and rules and by the known effects of similar things that have been or can be seen. There must be the critical faculty, the weighing of advantages and disadvantages, the power to curb impulses and first impressions until reason has passed judgment. Perception, selection, memory, imagination, reason, application, patience and above all will power are some of the more important qualities required for a successful designing florist. All these faculties gain by experience and training and by a favorable environment.

The visual memory must be stored with beautiful things. Nature is a great storehouse of beautiful things, as well as of ugly things, so a lad should be brought up in a beautiful bit of country rather than amid long blocks of plain brick houses. But there is much in nature that is beautiful that cannot be used in the florist's work. Lichens and toad stools, for instance, include varieties having beautiful colors, yet they are not used in carpet bedding owing to practical difficulties. Therefore the visual memory is stored by visiting gardens and exhibitions and by studying illustrations, horticultural books and trade catalogues.

The selective faculty is trained by determining what is worth remembering. We must put some things in the front row of the memory, so to speak, where they can be availed of instantaneously. Other things are set behind and labeled by some bit of detail, a leaf or a bit of color or a word or a taste or a smell or by name. For very many things that may be useful the memory must refer back to the cyclopedia, an indexed periodical, a scrap book, so and so's catalogue, and so on.

The visual memory is trained by repetition, by close application forced by the will power. It is aided by as-

sociation with other sensations, by the sentiments, by novelty, by superlative characteristics and so on.

The imagination is based on memory. We can imagine nothing that has not come into our minds through the senses or that is not due to some combination of ideas previously so gained. Hence the importance of storing the memory with things worth remembering. The imagination must be guided by reason and will power to be useful, but it must be exercised and developed mainly in youth, even by the aid of beautiful things that are not useful. The imagination is stimulated by beautiful things to imagine other beautiful combinations and modifications. An ancient necklace or a decorated book cover, seen in a museum of art, may excite the imagination many years after in the designing of flower decoration. That may be both a pleasant and a useful training of the young florist's imagination, but the study of veined marble, or cloud effects or a specimen of marine alga might be pleasant but probably useless to the florist.

Value of a Scientific Training.

The reasoning faculty may be trained in various ways but may best be trained by the study of cause and effect in the natural sciences dealing with the materials to be handled or controlled by the florist. If he learns scientifically why certain color combinations are pleasing and certain others displeasing he can act as the result of reasoning when the time comes instead of trusting to his own sensations or to what people may say or to tradition. If he has studied agricultural chemistry and plant physiology and meteorology he may sometimes avoid mistakes which others fall into through the misapplication of traditional wise saws, which often for the sake of brevity or of a catching rhyme convey a half truth or even a falsehood.

The training of other faculties need not be enlarged upon. The inference to be drawn is that if the florist is to have such an education as will fit him to produce beautiful floral decoration and to make his vocation compare in esthetic standing with that of the architect and the artist mural decorator and (let no offense be taken) with the landscape architect, he should cultivate his creative esthetic faculties at least as thoroughly and by much the same means of art schools, museums, reading, converse with artists, travel and observation and by the solution of many problems of artistic design.

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
Yours very truly,
New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
GEO. A. SKENE.

Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
Yours truly,
Florham Farms, Madison, N. J., December 8, 1906.
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

WHAT WE ARE GOING TO DO

It is like this: John Jones puts up a certain kind of construction, and Brown, his neighbor, takes Jones' advice and follows suit. Now Jones may know the right construction, and he may not,—how is Brown to tell? Why not give Brown a series of talks on a construction that has rigidly stood time's test, and let him be so thoroughly posted that Jones or any other man cannot lead him astray? Exactly what we are going to do the first issue in November, and continue every week until you and Brown know our Half Iron or the Iron Frame Construction, to its every detail. Then it will be up to you to choose. If you don't want to wait until then, write to us now.

HITCHINGS AND CO.

GREENHOUSE DESIGNERS AND BUILDERS.

Manufacturers of Heating and Ventilating Apparatus.

1170 Broadway,

NEW YORK.

The Newest Wrinkle in Ventilation is Our Encased Self-Oiling Gear

Not that a self-oiling gear is new, but our way of making it *is*. We will tell you two of its strong points, and then want you to write for a full description of the rest, with a price.

One strong point is the *square* bearing shaft which makes slipping absolutely impossible, no matter how heavy the work.

The Other is its Freedom from Complicated Mechanism, its Compactness

Senecio clivorum

Senecio clivorum is a vigorous hardy plant with bold handsome foliage and heads of bright orange-yellow flowers carried on strong stems. It is an admirable plant for the wild garden or the fringe of the woodland, in such a position for instance as shown in the accompanying illustration. The photograph shows a large group of this senecio in the woodland at Kew, where in an open space between large trees it gives a splendid bit of color; it looks especially well in the midst of pines and other conifers for the rich yellow flowers show finely against the sombre surroundings. This species is one of several very handsome senecios introduced within the past few years by Messrs. James Veitch & Sons, through their collector, Mr. Wilson, who sent so many good plants home from western China. *Senecio clivorum* is very free flowering and a mass of plants in bloom is bound to attract attention even from a distance. Moreover the plants increase rapidly, soon developing into large clumps. They seed very freely also. Some idea of the striking effect made by a mass of this senecio may be had when I say that the individual flower heads are four inches or so across. The brown disc in the centre of the orange-yellow florets adds still further distinctness to the flower. This plant flowers throughout a long season and this year has been in bloom from the middle of July until the end of September. No doubt the continual rain that has fallen this summer has helped them to flower rather longer than usual.

Harry H. Thomas

Rose Richmond

This beautiful and fragrant rose is one of the most satisfactory and remunerative products of the greenhouse, providing of course that it is well grown, and much credit is due to the originator for giving us such an all round good thing as Richmond has proven itself to be.

To produce those high grade blooms of good color and substance with a wealth of well developed foliage

and straight stems, the grower must have a good knowledge of the food required by his crops at the different stages of their growth. As the plants increase in size and the benches fill with roots, the limited amount of nutritive substances contained in the few inches of soil on the bench will naturally become exhausted. But by a careful study of the original compost, and watching how the stock progresses, the growers will be enabled to form a correct idea of the quantity and quality of food required to supplement the waste.

It seems to be the popular belief that Richmond is a heavy feeder, but while it does enjoy a rather liberal supply of water, this, within the writer's experience applies only during the summer months, and at this season, like all other roses, Richmond objects to over-feeding or over-watering. Stock planted in May or early in June should now be strong, vigorous plants with a good showing of bottom shoots. Where this applies and the plants are in benches they would thoroughly enjoy a light top dressing of mulch, composed of two parts good manure (not too fresh) and one part soil. The soil lends weight to the material and prevents it from washing all over the bench. Where soils are particularly soft and heavy, a generous sprinkling of bone meal can be added to give stiffness to the stem and substance to petal and foliage.

It is hardly necessary to touch on the causes which lead to black-spot and mildew but during the moderate weather, and especially damp weather, it is advisable to carry a temperature of 60 degrees or more with ventilation, to avoid moisture gathering on the plants. As the season advances and steady firing becomes a necessity, Richmond will be found to do best in a night temperature of 58 to 60 degrees.

Cutting the blooms properly is a very important point which must be learned in connection with Richmond. One criticism which has frequently been directed against this variety, is its poor keeping qualities, but if the buds are cut at the proper stage of development little difficulty will be experienced in this connection and the flowers may be shipped long distances with perfect safety. We have found that if the buds are cut before they have begun to unfurl the petals, Richmond will keep very well and undoubtedly perfect every flower.

The bottom shoots, if left to grow naturally will develop good substantial buds with long graceful stems, but, unless prices are extra high, it is perhaps better to nip the top out of the heavy shoot when it reaches a height of about twelve inches, in which case at least three splendid buds will develop and can be cut with stems varying in length from fifteen to twenty inches thus producing a greater quantity of medium grade flowers.

Red-spider is very partial to Richmond and because of the peculiar cup-like formation of the leaves, is exceedingly difficult to dislodge when once it gets a foothold. Syringing should be practiced at every favorable occasion, on the principle that prevention is better than cure. It is safer to use every precaution now than to have to regret the missed opportunities when dark, dreary winter comes.

One of the most satisfactory roses to handle, one of the quickest to respond to good treatment, Richmond is deservedly popular and a lasting tribute to its originator.

Measuring the bulbs

It is asserted that a custom prevails with some importers of French bulbs, Japan lilies, etc., the prices which are based upon specified measurement of bulbs, to sell according to sizes not mentioned in the import invoice. For instance, Roman hyacinths paying duty as 11—15s are alleged to have been sold as 12—15s. If this be true, buyers can of course easily ascertain by measurement of the smallest bulbs supplied to them and, on finding a mixture of undersized bulbs, their right to reparation can admit of no question.

Give the young men something to do

We would suggest to those who are concerned in the filling of the offices in the club or society for the coming year that they do not overlook the young men. This advice is not new but it will bear repetition as not infrequently we see the offices and committee work confined much too closely within the lines of the older members of an organization. The great value of old and experienced members in work of importance can not be questioned but it is equally true that any organization which is careful to divide the work and responsibilities between its old-time representatives and its younger adherents is taking the best and, indeed, the only course to assure unflagging efficiency and continuous prosperity. Give the young men something to do; they will appreciate the honor and take much pride in fulfilling the duties thus imposed upon them. The busier they are kept the more loyal and enthusiastic they will prove to be.

Design in landscape work

No one who reads Mr. Canning's practical advice in regard to the value of system in private and public improvement work, which we present in another part of this issue of HORTICULTURE, will have much difficulty in calling to mind instances where the dignity and artistic effectiveness of an estate or park reservation have been sadly impaired by haphazard planting, and arrangement of grades, walks etc. Perhaps it is his own home; perhaps it is a neighbor's and, unfortunately the blemish never rights itself but becomes more and more apparent as the years pass. No argument should be needed to show that foresight and systematic design by some one familiar with the material and proficient in its use is fully as essential in outdoor arrangement as it is in the indoor planning of a home. This is even more apparent in the larger and more comprehensive questions of town improvement and no work of this kind should be undertaken without expert advice, or intrusted, as is too often the case, to the judgment of commissions or boards composed of men—however good and public-spirited they may be—which have not at least one member of recognized professional experience and ability in the various departments of landscape work.

A national question

We can think of no general duty which a city government owes to itself as a municipality and to its citizens individually and collectively more important than the protection and preservation of its trees. That this responsibility has not been fully realized in the past is no excuse for neglecting it now and public officials should be held to strict account where the life of a mature tree is concerned. In every agitation of this question there is but one place for the gardener and florist and that is on the side of the tree as against road makers, monument builders, gas companies, line men and tree enemies generally, of whatever ilk. The struggle now going on in Washington to prevent the invasion of the Botanic Garden and the needless destruction of trees of great patriotic and historic interest to make room for a statue of General Grant should call forth an emphatic support from horticulturists everywhere, whose duty it is to take advanced position before the people in such matters. As between these beautiful trees which Mr. Smith has affectionately nurtured for half a century and the blocks of "shacks" which disfigure the neighborhood of the Capitol and that otherwise magnificent thoroughfare, Pennsylvania Avenue, it should not take long to decide which should be removed to make room for a statue.

British Horticulture

A NEW FRUIT BASKET

A new collapsible basket for market purposes has been patented. The sides of the basket are composed of strong canvas, which is made vermin and mildew proof and very durable, and working on the principle of the opera hat, when not in use the rim and bottom are close together. It is estimated that the cost of transit will be from seven to ten per cent. lower when full as compared with ordinary baskets, and 30 per cent. lower when empty. Another advantage is that when empty the basket will only require about one-third of the room of the ordinary basket. This will prove a great boon to nurserymen in towns to whom the saving of space is an important consideration. The ingenious invention has been shown to several experts who have expressed a favorable opinion as to its merits.

GRASS IN THE ORCHARD

In some useful experiments conducted at the Woburn experimental fruit farm, trees grown in grass were found to have made but very poor growth five years after planting and similar results followed the grassing over of pears, cherries, and plums immediately on planting, the check given to them being very severe. A comparison of the yields obtained in New York State from apple orchards in grass and cultivated land respectively showed over an average of four years that the tilled orchards gave a uniformly larger yield than those in grass. These results are supported by some tests carried out at the Hooper Adams Agricultural College. By a series of experiments carried over three years it was shown that the stems of trees in grass had increased only 0.03 inches in diameter, while those in cultivated ground had increased 0.3 inches; the proportion in favor of cultivated land being 10 to 1.

CHAMPION POTATO GROWER

Notwithstanding that the season has been unfavorable in many districts there was a meritorious display of tubers last week at the annual show of the National Potato Society, at the South Eastern Agricultural College, at Wye. The chief awards fell to Mr. B. Ashton, head gardener to Lord Lathom, Ormskirk, who secured for the third time in succession the Carter-Findlay cup, as well as the Llewellyn cup given for the best exhibit in the show. Mr. Ashton also obtained a silver medal for the best white potato (Carter's Royalty) as well as many other prizes. For some years Mr. Ashton has been a successful exhibitor of vegetables at Shrewsbury and other shows. The other silver medal, given for the best colored potato was awarded to Mr. A. Lawson, a Scotch grower. There was a falling off in the trade section. The potato trade has lately been in a somewhat depressed state. About three years ago there was a "boom," heavy sums being paid for new varieties. In one celebrated case £100 (pounds) was paid a pound for a seedling; 14 pounds being sold for £1,400. Large sums were lost in the speculation which took place. The inevitable reaction set in, and many of the high priced varieties were tried and found wanting. The National Potato Society has naturally been affected by the "slump," but it is hoped to continue the useful work which has been commenced. It is felt that there is scope for a society of this sort in protecting the interests of potato growers, conducting trials, distributing information, and organizing shows. Like the fruit growers the potato men are very difficult to organize, owing to the fact that they are scattered over the United Kingdom, and it is hard to organize any system under

which they will be brought in touch with the managing body.

W. H. Adsett.

Gardenias

Under good management the gardenia can be had in flower during the greater portion of the year. The best time to propagate the plants is in the spring, selecting side shoots about two inches long, inserting them in pots and plunging the pots in brisk hot bed. When rooted re-pot firmly and in a few weeks pinch out the points; once pinched they will not require any more assistance to make them bushy.

When a continuous supply of young stock is wanted and the benches are occupied it will be best to grow them on in pots until spring when the benches can be cleaned out and re-filled with these plants to be flowered for one year. By this method a continuous supply of plants is always on hand and they can be used to fill any vacancies caused through disease.

Suitable soil for the gardenia consists of good fibrous loam with a little sand, leaf mold and charcoal.

The gardenia, like every other plant, has several enemies, one in particular being the most common and yet the most dreaded, for which there is no known cure. I refer to the nematode or *Heterodera Radicola*, more commonly known as root-knot, which causes a swelling at the neck of the plant and ultimately its death. This disease can be avoided by sterilizing the soil before planting and securing plants that are absolutely free from root-knot; should this be secured the difficulty in their culture would be greatly diminished.

The root-knot can easily be discovered by examining the roots. Small knots will be found even on strong vigorous looking plants. The mealy bug is another familiar lover of the gardenia. Should ample room to grow be allowed the plants these desperadoes can easily be eradicated with a good sharp spray from a hose at weekly intervals, choosing a bright sunny day for the operation.

Ventilation has also to be attended to with great care, particularly in winter, otherwise the buds will drop off and thus the most important crop of flowers of the whole year will be destroyed.

David Miller

Our Frontispiece

Cattleya Hardyana, which is depicted in our frontispiece for this week is a natural hybrid between *Cattleya aurea chrysotoxa* and *C. gigas*. The plant shown herewith was photographed at Lager & Hurrell's and well illustrates the true type of *C. Hardyana*, the character of each of the parents being equally portrayed in the flower. All the so-called *Hardyanas* coming from the *Hardyana* districts are not distinct but show a wide variation in character, some having practically reverted to the characteristics of one or the other parent.

NEWS OF THE CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The October meeting of this club was attended by between sixty and seventy members. The special feature of the evening was a talk by George V. Nash of the N. Y. Botanical Garden on Water Lilies and other Aquatics. Mr. Nash illustrated his remarks by means of numerous lantern slides, many of which were beautifully colored, showing views in the Bronx gardens, the aquatic ponds of S. C. Nash, and portraits of beautiful nymphaeas of the tender and hardy groups, nelumbiums and other bright flowering water and bog plants, also trees, shrubs and herbaceous plants and grasses suitable for the margins of lily ponds. The lecture covered methods of treatment, planting, culture, insect enemies and other pertinent subjects of interest to the lover of water plants and proved very entertaining to the audience.

The change in the by-laws, constituting a life membership on payment of \$75.00 was adopted and three new members were added to the roll.

On the platform were a number of interesting exhibits. President Totty showed some fine blooms of chrysanthemums, including E. Newman, yellow, American seedling No. 60, white, Mrs. Rider Haggard, white, Beatrice May, white, O. H. Broomhead, maroon incurved, Mme. Loiseau Rousseau and Australian seedling No. 20, old rose with gold reverse, the latter being awarded 87 points and honorable mention. A. T. Boddington showed a fine cosmos named Lady Lenox, grown by Wm. Duckham and received a certificate of merit therefor. This novelty will be introduced during the coming season. Fred Hollander of Ozone Park was awarded honorable mention for a vase of named danlias. From Robert Scott & Son came a vase of their new rose, Mrs. Jardine, to which the judges gave a preliminary certificate. From opinions freely expressed by good judges this beautiful rose is destined to take high place as a commercial florists' variety. Its parentage—Kilmarney and Liberty is a pretty good guarantee of its qualities. In color it is silvery pink, it has the fragrance of La France and as seen on this occasion is one of the most symmetrically formed and elegantly moulded blooms in the Hybrid Tea class. Dailledouze Bros. were awarded honorable mention for carnation Afterglow and H. Beaulieu showed a nasturtium with pretty variegated green and white foliage.

PENNSYLVANIA HORTICULTURAL SOCIETY.

A dozen vases of cosmos and a few vases of good early chrysanthemums were the leading features outside of routine business at the monthly meeting of the above society held on the 15th inst. Wm. Robertson got a first and a cultural certificate on Beatrice May chrysanthemum for a half dozen flowers of gigantic size and unusually good foliage. Nothing as fine in this difficult variety has ever been shown here and good judges declare no other city has yet produced their equal.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting of this organization on Tuesday evening, October 16, was as usual a big one, there being fully one hundred and fifty present to hear the paper on the cultivation of fruit, by Mr. Wilfrid Wheeler. Mr. Wheeler is a worthy representative of the younger element of fruit growers in Massachusetts, fully imbued with the sentiment and love of his specialty and recognized as representing the spirit of revival of an industry which had become almost moss-grown, but which under the impetus and stimulant of new blood and modern progressive ideas promises to exert a big influence on the horticultural prosperity of New England in the near future. We will not anticipate the contents of Mr. Wheeler's address, the publication of which is deferred until next week on account of material of prior date, and will only say that it was clean-cut and practical and was listened to with close attention and was discussed at considerable length after its reading. There were on the platform many dishes of fine fruit left from the Massachusetts Horticultural Society's fruit exhibition of last week, and Mr. Wheeler made use of these frequently to illustrate his remarks and show the different varieties under varying conditions of culture. The impression generally, we may safely say, was one of hopefulness for the future prosperity of garden culture of choice fruits throughout New England districts. The various preparations for the control of San Jose scale and other insects were discussed and it was shown that while "Scalecide" is all right in its effectiveness, it is entirely too expensive for any use outside of garden culture, and that for large operations in orchard work the lime-sulphur wash is the only practical preparation, its chief drawback being the difficulty of preparing it in small quantities.

The committee on landscape classes for the coming season reported readiness to begin work at an early date, and requested that all wishing to take advantage of the opportunity offered by the elementary class and the advanced class send in their names at once. It was stated that J. A. Pettigrew had agreed to occupy three evenings of the course with instruction in practical work in road-making, tree-planting, etc., and that one of the most prominent landscape architects in New York would take charge of one evening.

There were some excellent exhibits on the platform. Nerine Fothergilla major from W. N. Craig, received a report of merit for superior cultivation. Wm. Downs received a similar award for a beautiful plant of *Celosia plumosa pyramidalis*. W. W. Rawson was given honorable mention for a vase of anemones, one of dahlias and an exhibit of colchicums. George Page of Newton Centre showed a vase of flowers of Climbing Kaiserin rose.

Messrs. Wheeler, Holbrow and Rust were appointed nominating committee to report a list of officers to be voted for at the November meeting, and eight new members were admitted.

ST. LOUIS FLORISTS' CLUB.

The local florist club held its monthly meeting on Thursday with 21 members present, President Young in the chair, and all the new officers in attendance performing their duties like veterans. A vase of dahlias was at the president's right from Henry Jenne-mann, a dahlia expert of Webster Grove. The trustees reported through their new chairman, Chas. Schoenle, that the club's show goods had not been disposed of as the offers were too small. They were given full power to act.

Votes of sympathy were extended to our friend George M. Kellogg in his loss of half of his plants by an explosion; and to the Chicago Florists' Club in the loss of their fellow-member, Edgar Sanders, who had often attended our club meetings.

Adolph Brix invited the members with ladies to attend his flower show on November 8, and the invitation was accepted. Fred Ammann of Edwardsville, Ill., spoke of the flower show of the Illinois State Fair given the past week at Springfield, of which he had charge. G. H. Pring of the Missouri Botanical Garden was called on for remarks on what he saw in England this summer. He stated that he had taken photographs of many interesting things and would give a lecture with stereopticon views before the club if desired. This offer was accepted and the December meeting selected, when the entire trade will be invited. The question box brought out many good discussions.

The next meeting of the club will come during Flower Show week, and the trustees were instructed to prepare to entertain visiting florists. On motion J. J. Beneke and Prof. H. C. Irish were added to this committee to confer with a committee from the Horticultural Society to unite in this matter. After adjournment lunch was served at a near-by restaurant where short talks were given. The club seems to have a prosperous year before it.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The nominating committee of the Massachusetts Horticultural Society announces the following list of candidates for the various offices of the Society for the ensuing year which are to be filled at the annual election, November 16: President, Stephen M. Weld; vice-president, Walter Hunnewell; trustees, for three years, Walter C. Baylies, Charles W. Parker, John A. Pettigrew, William Whitman; nominating committee, Wm. H. Bowker, John W. Duncan, J. Henry Fletcher, David F. Roy, Wilfrid Wheeler.

The members of the nominating committee for the present year are: A. F. Estabrook, W. H. Heustis, William Nicholson, E. B. Wilder and Loring Underwood.

WM. P. RICH, Sec'y.

NEW OFFICERS OF THE OLDEST FLORISTS' CLUB.

We present herewith a group picture of the new officers of the Florists' Club of Philadelphia, which has the distinction of being not only one of the most active but also the oldest trade club of its kind, having been organized in 1885 for the purpose of taking care of the Society of American Florists, which met in that city in 1886. The members of the national society were its guests again in 1894, and also last August. This is the first time in many years that an entire board of officers has been elected. The club has a membership of about 300, representing all branches of the trade and keeps its headquarters at Horticultural Hall open every week-day and evening all the year round, with a janitor and two attendants constantly in charge. The club has an open door always for visitors without introduction, and no member of the trade need ever feel lonely when visiting the Quaker City, as there is always somebody on hand at the club to spend an hour with.

William Graham.

The newly elected vice-president of the Florists' Club was born in Philadelphia in 1861. After leaving school he was employed in the office department of Washington Butcher's Sons for four and one-half years, and left only because his father needed him in his newly established floral firm. This lasted for seven years, after which in 1887 he was associated with Graham & Grigg, which was shortly changed to Hugh Graham's Sons, that title continuing until his father's death in 1903, when the William Graham Co. was established. About two years ago this firm took over the assets of his brother Hugh Graham on 13th street and Logan and moved into 104 South 13th street which is now their headquarters. The firm does a large business as growers and retailers and controls the bulk of the large floral decorative work in Philadelphia. William Graham has been popular enough to be elected to represent his ward in councils and is a high dignitary in many fraternal organizations. He is a pen and pencil artist of ability. He has long been an active member of the Schuylkill Navy, the leading sporting club of the city, and for the past year has acted as the chairman of the sports committee of the Florists' Club. His elevation to the vice-presidency is a well deserved compliment.

Fred Hahman.

The president of the Florists' Club for 1907-'08 was born in Philadelphia in 1858. His father was in the leather business, but like most of Teutonic extraction, had a taste for gardening which was largely stimulated by his close friend, George Gross, then foreman at Dreer's, and another close companion, William Joyce, gardener at the Baldwin Conservatories. Young Fred was brought up in an atmosphere of enthusiasm on gardening, which later developed into commercial floriculture. He and his father bought the place at Harrowgate Lane, Frankford, in 1875, which has been the headquarters of the business ever since. The plant contains some 30,000 feet of glass and considerable real

OFFICERS OF FLORISTS' CLUB OF PHILADELPHIA, 1907-8.

Reading from left to right:—Wm. Graham, vice-pres.; Fred Hahman, pres.; David Rust, sec'y; George Craig, treas.

Photo. by Thorburn, Philadelphia—Edwin B. Thorburn is a lineal descendant of Coll's "Laurie Todd"—the founder of the house of J. M. Thorburn & Co., the pioneer seed house of America.

estate and is devoted at present principally to the culture of roses and spring bedding plants. Fred Hahman, outside of being a successful florist, is known as an enthusiastic bee-man, having been secretary of the Philadelphia Bee Keepers' Association since its inception some 25 years ago. He married a St. Louis lady in 1885, a son and daughter being issue, the former dying in infancy, the latter now finishing her course at the Normal School. Mr. Hahman was a classmate of Alexander B. Scott in his high school days, and the friendship then formed continues to this day. He has been vice-president of the Florists' Club for two years and holds the record as a presiding vice-president, proving himself a splendid presiding officer and well deserving the compliment of being elected to the presidency. He is a good speaker, tactful, broad-minded and efficient.

George Craig.

The new treasurer is a man of enviable standing in the community in every way. Of modest and retiring disposition, his merits are nevertheless thoroughly appreciated by all who have the pleasure of his acquaintance. Born in Philadelphia at 16th and Pine streets in 1848, Mr. Craig was associated there in business with his father, Alexander Craig, afterwards removing to 211 South 11th street in partnership with his brother, Robert, under the title of Craig & Bro. This partnership was dissolved in 1890 and has since been conducted as George Craig, and the business is now one of the leading establishments in the city devoted exclusively to the sale of cut flowers and plants. He knows the business thoroughly, is conservative and shrewd, and no amount of clamor or hypnotic suggestion has ever been able to swerve him from the

judicial calm which is his leading characteristic. He has always been a faithful member of the Florists' Club. For a number of years past he has been treasurer of the house committee and his elevation to the more responsible post of treasurer of the club is a well-deserved tribute.

David Rust.

David Rust, the new secretary, is an Englishman by birth but of Scottish parentage, his forbears originally hailing from Aberdeenshire. His father was estate agent for Sir George Jenkinson, at Falfield, Gloucestershire, where the subject of our sketch was born in 1861. He started to learn the gardening profession at Barren Court, Maidstone, Kent, an estate famous for high-grade garden culture of native and exotic fruits. From there he went to Petworth Park, the seat of Lord Leconfield in Sussex, a large estate employing some 40 gardeners, where he remained four years. After a short period in the estate office of the Marquis of Abergavenny, Bridge Castle, Tunbridge Wells, he emigrated to America, commencing with Peter Henderson & Co., where he remained eight months. Thence to the gardens of the George Bullitt estate, Conshohocken, Pa. After some years here he went with the G. E. Lee Mfg. Co. as traveller, and from there to Dreer's in a similar capacity. In 1895 he was elected secretary of the Pennsylvania Horticultural Society, and has been local correspondent of the Florists' Exchange since 1892. On the resignation of Edwin Lonsdale from the secretaryship of the Florists' Club of Philadelphia he was appointed pro. tem. and afterwards elected to fill that office, a very strenuous position the past year on account of the convention. In addition he acted as superintendent of the exhibition in the same connection.

THE EXHIBITION SEASON

RECENT SHOWS.

Massachusetts Horticultural Society.

At the great fruit and vegetable exhibition in Horticultural Hall, Boston, last week, the first prize for collection of vegetables arranged for effect was won by E. L. Lewis; second, third, fourth and fifth were awarded to New Hampshire Agricultural College, Edw. Parker, W. J. Clemson and Mrs. A. P. Peabody respectively. In the regular vegetable classes W. J. Clemson won eight firsts, Ed. Parker and N. H. College each five firsts, E. L. Lewis and A. E. Hartshorn each four firsts, W. W. Rawson three, J. P. Wynman and A. Nixon two each, Mrs. J. L. Gardner, W. H. Teale, F. Cole, Ellicott Moore and C. M. Handley Estate each one first.

In the fruit department the T. S. Hubbard Company of Fredonia, N. Y., received a silver medal for display of fifty varieties of grapes. Apples, pears, quinces, peaches, grapes, cranberries, etc., were shown in great profusion, the winners of first premiums in the various classes being as follows: W. G. Kendall seven firsts, L. F. Priest six, J. S. Chase, C. F. Hayward and F. W. Dahl three each, C. F. Curtis, J. Coolidge, C. W. Libby, Indian Head Cranberry Co., A. Derby, E. Torrey, G. F. Wheeler and G. V. Fletcher two each, J. L. Bird, J. B. Shurtleff, Jr., F. W. Danion, E. B. Wilder, I. P. Gragg, E. B. Parker, F. H. Jackman, E. L. Lewis, E. E. Cole, Wilfrid Wheeler, Mrs. A. F. Estabrook, H. C. Fuller, H. A. Clark, J. Corey & Son, and A. E. Howard & Son one each.

W. C. Strong received honorable mention for seedlings of Weir's cut-leaf maple.

Worcester County Horticultural Society.

The Worcester County Horticultural Society had its 67th fall exhibition and lunch in Horticultural Hall, Worcester, Mass., on October 10. The exhibition filled the main hall and library and was open from 12.30 P. M. to 9 o'clock. During that time hundreds of people visited the hall.

The main hall was used for the exhibit of fruits and vegetables. There was a large showing of both, the apples and pears being especially fine. The flowers were good for the season of the year and filled the library. In the main hall the stage was hidden by an arrangement of palms and ferns by H. F. A. Lange.

At 12.30 o'clock President O. H. Hadwen led the march to the banquet hall on the top floor, where luncheon was served. The tables were decorated with cut flowers brought in by the members for that purpose.

After luncheon President Hadwen welcomed the guests on behalf of the Horticultural Society, and spoke a few words about the founding of the society, its work, and the exhibitions. He then called upon Gen. C. W. Wood, secretary of the State Board of Agriculture, J. Lewis Ellsworth, superintendent of Marlboro schools, O. A. Morton, J. V. Jackson of Marlboro, Charles

W. Smith, secretary of the Rhode Island Agricultural Society, E. H. Burlingame of Providence, Mrs. H. J. Jones of Holden and Secretary Adin A. Hixon for a few words.

The chrysanthemum show of this society will be held on Nov. 14.

New London County Horticultural Society.

On account of recent storms there were fewer entries than usual at the dahlia show of the New London County Horticultural Society held at Norwich, Conn., on October 5. The centre of the hall was occupied by the exhibit of O. P. Chapman, Jr., of Westerly, which included 250 varieties, embracing many of the newer kinds, and received special mention. The dahlias shown by J. J. Kennedy, foliage plants by the Geduldig estate, and grapes and strawberries by G. Newman received honorable mention. The exhibits of S. A. Gilbert and Mrs. Lanman attracted much attention. S. J. Reuter of Westerly, Otto J. Ernst and H. F. Parker were the judges.

Nassau County Horticultural Society.

There was a splendid exhibit of dahlias at the regular meeting of the Nassau County Horticultural Society at Glen Cove, N. Y., on October 9. James Duthrie of Oyster Bay took the first prize with 69 varieties, also the prizes on the cactus and show classes, as well as the Meyer special prize for the largest bloom. J. O'Brien was first in the single class. S. J. Trepass won the prize for the best collection of chrysanthemums; in the point contest on chrysanthemums, A. Janecke got 88, A. Mackenzie 87, and Henry Inatz 75.

COMING SHOWS.

Massachusetts Horticultural Society.

The following additional special prizes are offered for the Chrysanthemum Show, November 8, 9, 10, 1907.

Entries must be made at least three days prior to the opening of the Exhibition.

No. 469. For the best arranged table of cut Chrysanthemum blooms; all classes admissible; tables to be 8x6 feet; for commercial growers only; four prizes, \$40, \$30, \$20, \$10.

No. 470. For the best decorative arrangement of cut Chrysanthemums, with autumn foliage or other suitable material, filling a table 8x6 feet; all classes admissible; for retail store florists only; four prizes, \$40, \$30, \$20, \$10.

No. 471. For the best vase of one hundred Chrysanthemum blooms, of one or more varieties, in the Society's large China vases; tasteful arrangement will be considered; offered by George R. White; four prizes, \$40, \$30, \$20, \$10.

No. 472. For the best vase of fifty Roses, of any one variety; three prizes, (first prize offered by Francis Skinner), \$50, \$30, \$20.

No. 473. For the best six vases of Carnations, distinct varieties, fifty blooms each; four prizes, \$40, \$30, \$20, \$10.

No. 474. For the best made up center

piece of growing plants, suitable for a table of eight covers; offered by the Gardeners' and Florists' Club of Boston; three prizes, \$12, \$8, \$5.

No. 475. For the most tastefully decorated table of Fruits, 8x6 feet; autumn foliage and berries may be used to produce a pleasing effect, and the fruits may be of either native or foreign production; four prizes, \$40, \$30, \$20, \$10.

No. 476. For the best collection of Vegetables of fifteen varieties, not more than two kinds of any one variety admissible; the number of specimens of each variety must be as given in the special scale of points; tasteful arrangement will be considered; to assist in the decoration of the collection parsley or other vegetable greenery may be used; mere size of specimens shown will not necessarily entitle the exhibitor to the highest award; for private gardeners only; four prizes; first prize a Silver Cup valued at \$75, offered by R. & J. Farquhar & Co.; the Society offers second, third, and fourth prizes, \$25, \$15, \$10.

Note.—Savoy, Red, and Common Cabbage will be classed as distinct; so will Cos and Cabbage Lettuce; also Lima, String, and Shell Beans. Separate dishes of Tomatoes will, however, be classed as varieties of one species; this will also apply to Celery, Potatoes, and other vegetables. Melons are excluded.

Only vegetables fit for table use must be exhibited; ripe Corn and dried Beans are debarred.

This class will be judged by the appended scale of points and is for competition by private gardeners only.

For scale of points and number of specimens required of each variety, address the secretary, W. P. Rich, Horticultural Hall, Boston.

Committee on Prizes and Exhibitions, 1907.—J. K. M. L. Farquhar, Chairman; Wm. N. Craig, A. H. Fewkes, I. H. Locke, Wm. H. Spooner, Wilfrid Wheeler.

Horticultural Society of Chicago.

The Horticultural Society of Chicago has adopted the name of "Chicago's Great Flower Show" for its seven-day exhibition which is scheduled to take place at the Coliseum, November 6 to 12 inclusive. The greater portion of the main floor of the building will be covered with sod, thus eliminating dust and giving a horticultural aspect to the show which will make it doubly attractive. Among the other special features will be a booth stocked with plants to be donated to that public school securing the largest number of votes. The display of dinner table decorations will be in rooms furnished with the latest dining room effects. There will be a daily demonstration of the proper method of pruning and potting. Several silver cups for competitions by private gardeners have been promised in addition to the large list in the published schedule. The park departments promise larger and better exhibits than heretofore and altogether the outlook is for a very extensive affair. As three or four hun-

ded trade visitors are usually in attendance at the Chicago shows the inducements for commercial exhibits by growers and others are exceptional. The preliminary list of premiums can be had on application to the assistant secretary, E. A. Kanst, 5700 Cottage Grove Ave., Chicago, Ill. The final premium list is promised for next week.

San Diego (Cal.) Floral Association.

At a meeting of this society held on September 26, plans for the coming flower show were discussed and October 25, 26, 27 were the dates selected for it. A committee was appointed to solicit cups or other prizes of value from interested citizens to be offered to the exhibitors. Mrs. Rodney Stokes is secretary.

The Missouri Botanical Gardens, St. Louis, will hold a chrysanthemum show again this year in the large tent, beginning on the first week in November if the plants are in exhibition form, or as soon thereafter as possible.

Adolph Brix of St. Louis Ave., St. Louis, Mo., will hold a flower show on November 7, 8, 9, in the large hall of the Y. M. C. A., at 19th and St. Louis avenue. No admission will be charged. Mr. Brix is an enterprising florist. In addition to his large store on the avenue he has recently purchased the old Kluckenkemper place.

The following have been mentioned at length in preceding issues of HORTICULTURE:

Lenox Horticultural Society, Lenox, Mass., Oct. 23, 24. G. H. Instone, secretary.

Marin County Horticultural Society, San Rafael, Cal., Oct. 26. T. P. Redmayne, secretary.

Monmouth County Horticultural Society, Red Bank, N. J., Oct. 30, 31. H. A. Kettell, secretary.

Morris County Gardeners' and Florists' Society, Morristown, N. J., Oct. 31, Nov. 1. Edw. Reagan, secretary.

New Haven County Horticultural Society, New Haven, Conn., Nov. 6-8. Walter Koella, 58 Bishop St., New Haven, secretary.

Chrysanthemum Society of America, American Institute, 19-21 West 44th St., New York City, Nov. 6-8. David Fraser, Homewood and Penn Ave., Pittsburgh, Pa., secretary.

Nassau County Horticultural Society, Glen Cove, N. Y., Nov. 6-8. J. F. Johnston, secretary.

Denison Civic Improvement League, Denison, Tex., Nov. 6-8. T. W. Larkin, secretary.

Tarrytown Horticultural Society, Tarrytown, N. Y., Nov. 6-8. E. W. Neubrand, secretary.

Massachusetts Horticultural Society, Horticultural Hall, Boston, Chrysanthemum show, Nov. 8-10. W. P. Rich, secretary.

Horticultural Society of Buffalo, Buffalo, N. Y., Nov. 11-17. J. H. Tranter, P. O. Box 994, secretary.

Florists Club of Washington (D. C.), Nov. 12-14. Chas. McCauley, 18th & Kearney Sts., Washington, D. C., secretary.

Montreal Gardeners' and Florists'

A SCOTCH PRIZE-WINNING GROUP OF FRUIT.

The elegant little collection of fancy fruit shown in the picture was the winner of the silver challenge cup which appears alongside, at the 95th annual show of the Glasgow and West of Scotland Horticultural Society on

September 4 last. It was shown by James Brown, gardener to A. A. Spiers, Houston. The standard of quality shown in this collection of twelve dishes of fruit is, we think, high enough to make any aspiring gardener "sit up and take notice."

Club, Chrysanthemum show, Nov. 13, 14, Victoria Rifles Hall, Montreal, Que. W. H. Horobin, 283 Marquette St., secretary.

State Floral Society of Arkansas, Little Rock, Nov. 14-16.

Rhode Island Horticultural Society, Providence, Nov. 15, 16. C. W. Smith, 27 Exchange St., secretary.

Worcester County Horticultural Society, Chrysanthemum show, Worcester, Mass., Nov. 14. A. A. Hixon, secretary.

Ontario Horticultural Exhibition, Massey Music Hall, Toronto, Ont., Nov. 12-16. H. B. Cowan, Parliament Buildings, Toronto, secretary.

Maryland State Horticultural Society, Fifth Reg. Armory, Baltimore, Dec. 3, 4. T. B. Symonds, College Park, Md., secretary.

St. Louis Horticultural Society, Grand and Park aves., St. Louis, Mo., November 12-15.

Pennsylvania Horticultural Society, Horticultural Hall, Philadelphia, Nov. 12-15. David Rust, Secretary.

AMERICAN POMOLOGICAL SOCIETY.

The American Pomological Society at its Thirteenth Biennial session held at the Jamestown Exposition, Norfolk, Va., September 24th, awarded to Ellwanger & Barry the Wilder Medal, for their display of fruit, consisting of 111 varieties of pears, 96 varieties of apples and 40 varieties of grapes.

Marshall P. Wilder who was for many years the president of this Society, bequeathed to the Society \$1,000, the income of which was to be used from time to time for Wilder Medals for objects of special merit. He also added a further sum of \$1,000 for other uses of the Society.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Work of Committees.

New York, Oct. 12th, "No. 20," dark old rose (Jap) exhibited by C. H. Totty, Madison, N. J. Scored 85 points, exhibition scale.

The Lord & Burnham Company offers a gold medal for the best new chrysanthemum which has never been exhibited in this country before.

DAVID FRASER, Sec'y.

CLUB AND SOCIETY NOTES.

The Minnesota Horticultural Society will hold its annual meeting at Minneapolis on December 3, 4, 5.

The annual meeting of the Northern Illinois Horticultural Society will be held in Peo, December 4 and 5.

At a meeting of the directors of the Arkansas State Floral Society, Little Rock, on September 25, Paul M. Paley was elected manager of the chrysanthemum show.

The regular monthly meeting of the State Florists' Society of Indiana was held October 1st. The fall show will be held in A. Wiegand and Sons' conservatory, Indianapolis, the firm giving the use of the building and decorating it for the occasion.

Jesiah Young's store in Troy, N. Y., was the meeting place for the Albany Florists' Club on the 3d inst. Among other topics, that of holding the meetings in a hall was talked over, and P. Hyde, Fred Henkes and Edward Tracey were appointed to look into the matter and report.

You will find something worth reading on every page of HORTICULTURE.

NATIONAL CHRYSANTHEMUM SOCIETY.

Early Flowering Exhibition.

The English chrysanthemum season for 1907 was inaugurated on the 2nd of October under most favorable conditions, for the N. C. S. once again held its annual display of early chrysanthemums, etc., at the Crystal Palace, the opening day being an ideal one so far as weather was concerned. The weather brought out a nice company of visitors and old friends to view the show, which was an excellent one in many respects, although we do not think the attempt at artistic arrangement of the show as a whole was quite up to the standard of some previous years, nor do novelties in the early section appear to have been raised in any appreciable number since the last exhibition.

A gold medal was deservedly awarded to Hobbies' Limited, who set up a very fine display on a table of great length, broken in the middle by a huge semi-circular group of peony-flowered dahlias. On one side of this group, which was remarkable for the great size and brilliancy of the coloring of the flowers staged, was a fine collection of cactus dahlias; on the other side was a choice collection of cut roses.

T. S. Ware & Son received a similar award for an imposing display, in which cactus dahlias largely figured, relieved here and there by big clusters of Michaelmas daisies and early chrysanthemums, the best of the latter being of Perle Rose, Polly, Horace Martin, Goacher's Crimson, Miss Miller, Roi des Blancs, Perle Chatillonnaise, Marie Massee and many others of equal merit.

Wm. Wells & Co. also carried off a gold medal for a decorative group of a high order of merit both as regards quality of bloom and tasteful arrangement. The early chrysanthemum alone figured here as the prime motive. Carrie, Blush Beauty, Perle Rose, Champ d'Or, Nina Blick, Vesuve, Hector, Roi des Jaunes, were only a few of the varieties staged, and around the front of the half oval-shaped group were dotted at intervals neat little bunches of single-flowered sorts such as Nelly King, Juno, Roderick, Surrey, Charming, Good Hope, Windsor, etc.

H. J. Jones was awarded a silver gilt medal. He had a grand group arranged with a back screen of dark green drapery, in front of which were some tall bamboo supports containing 15 to 20 colossal blooms of Money-maker, Mrs. A. T. Miller and Mrs. W. Beadle. Ferns, bamboos and a few Michaelmas daisies interspersed at intervals materially enhanced the value of this high class for floral composition.

Eric Such had an immense collection of early chrysanthemums, for which he also received a silver gilt medal. We noted specially Perle Rose, LeVactole, Perle Chatillonnaise, Horace Martin, Queen of earlies, Perfection, Goacher's Crimson, Carrie, Champ de Neige and many more.

Other awards were made for early chrysanthemums to Henry Cannell &

Son, R. H. Bath and others. The competitive classes were numerous and well filled, the chief of these being for a floral display of chrysanthemums and foliage in a semi-circular space of 14 ft. by 7 ft. There were three competitors for this, Messrs. John Reed Sons being awarded first prize.

Dinner tables decorated with chrysanthemums, wreaths, sprays, vases, baskets, epergnes and other floral devices were well represented, and a very fine collection of fruit, chiefly apples in many varieties, was staged by Messrs. Spooner, who also had a silver gilt medal. The veteran grower, Norman Davis, sent some grand cut blooms of Mrs. R.H. Pearson, Mrs. Norman Davis and some new seedlings that were quite up to the November standard of show bloom, and also some vivid blue-toned varieties of Aster amellus, most striking in size and color, named Onward Major, C. Davis and Erandis.

First class certificates were awarded to H. J. Jones for a new decorative variety called Minnie Carpenter, and to Wm. Wells & Co. for a huge white Japanese, Le Cygne.

Some Dahlias at the National Chrysanthemum Society.

Although the October show of the N. C. S. is essentially one to encourage the growing and exhibition of the early flowering chrysanthemum, yet dahlias and Michaelmas daisies in great variety are to be found among the numerous miscellaneous groups sent by the trade.

At the last show the two leading types of dahlias were unquestionably the Cactus and Peony-flowered kinds, and the style of setting them up was in most cases very effective. They are often built up in masses of one color each in the form of semi-circular pyramids, with smaller clusters in vases interspersed, ferns, palms and foliage plants being introduced sometimes in front, sometimes at the back, and at other times intervening.

Hobbies, Limited, staged in the Cactus section nice blooms of Mrs. McMillan, W. Marshall, Primrose, Ruby Grinstead, but in the Peony and Decorated section they had an immense display of huge flowers of King Leopold, Nicholas II, Dr. Van Gorkem, P. H. Jansen, Baron de Grancy, Queen Wilhelmina, Kaiserin Aug. Victoria, Nodora Duncan and several others.

T. O. Ware & Son are well known as dahlia specialists, and they, too, sent a fine collection of cut blooms of Cactus dahlias and Peony-flowered. In the former class Daisy Easton, Ivanhoe, Hamlet, Mrs. H. Shoemith, Mrs. Seale, Iris, Rev. Arthur Hall, Lady Fair, F. Cadman were especially noteworthy, while in the latter Baron de Grancy, Souvenir de Gustave Dowson, Glory de Baron, La Riente, etc., excited more than usual interest among the visitors. C. HARMAN PAYNE.

October 7, 1907.

Horticulture:

Please discontinue ad. Plants are all sold.

Yours respectfully,
BLANKSMA BROS.
Grand Rapids, Mich.

THE PLACE OF SYSTEMATIC PLANTING IN IMPROVEMENT WORK.

Address by E. J. Canning before the Massachusetts Conference on Rural Progress, at Amherst.

Systematic planting is the planting of trees and shrubs according to a pre-conceived or definite plan, whether it is for the home ground, public parks and buildings, school grounds or city streets.

In all improvement work a definite plan to follow is equally as important as are plans for the erection of buildings, and I believe a competent landscape gardener is equally as important if not more so, than the architect of a building especially in the selection of a home site and in the planning of the grounds around the home. He can often save the intending builder of a home many times the cost of his fee in the selection of a home site alone, because his practiced eye can see at a glance where expensive grading may be avoided, besides taking advantage of and making the most of all the natural features a tract of land may possess. He is usually a better judge of the type of house best adapted for any particular site; the exact position the house should occupy; the best, easiest and least costly means of approach, and the possibilities of making a landscape picture of the home grounds by the proper selection and grouping of trees and shrubs, together with the cost of carrying out his plans before any improvement work is attempted. And yet it is notorious that even in these days when so many books and magazine articles have been written upon this important topic, that there are many people who will spend much time and money in perfecting plans for a dwelling, and often exhibit excellent taste in the interior decoration or furnishing of their homes, and yet give scant consideration to the setting of the home, and would never think of employing a competent landscape gardener who in the majority of cases could save the owner much money besides insuring a more valuable property. Anyone who has only the most superficial ideas of landscape gardening in going through the residence section of any large city can easily see whether the home grounds have been carefully planned or not.

Examples of a Wise Policy.

There are, however, many shrewd and far-sighted people who can and do appreciate the work of the landscape gardener. The trustees of colleges and other institutions employ landscape gardeners for the proper locating or grouping of their buildings, as well as the laying out of their grounds.

In 1893 the trustees of Smith College employed the Messrs. Olmsted, of Brookline, the well known firm of landscape gardeners, to prepare plans for the establishment of a botanic garden upon the college campus. These plans have been faithfully carried out (except in one or two minor details due to changing conditions) and have proved highly satisfactory, each year seeming to emphasize more and more how far-sighted and carefully their plans were prepared.

There are many instances in this Connecticut Valley where manufactur-

ers and other business men have employed landscape gardeners for the improvement of the grounds around their mill properties and other buildings, much to the improvement of the localities in which they are situated, as well as to the uplifting influence it exerts on the employees.

Real estate companies are falling in line with improvement work. A large tract of land in Springfield has this summer been planned to present as park-like an appearance as possible, and where each lot is considered as a part of the whole. An attractive pamphlet describing the property with a landscape plan of the whole tract has been printed, so that intending purchasers can see at a glance the proposed development of the property.

Value of Village Improvement Societies.

The artistic treatment of school grounds now so common in our New England cities and towns will in the next generation have a great influence towards making cities beautiful. A Village Improvement Society ought to be established in every town and village in the country. The proper location of streets, the selection of shade trees, their planting, proper spacing and care, should be in their absolute control; also all the small city parks, squares and triangles formed by the intersection or junction of streets should be under their direct supervision and no improvement work attempted until a definite plan had been worked out either by themselves or some competent landscape gardener in their employ.

In many of the older streets in our New England towns one may see the result of not having definite plans in the planting of street trees alone. For instance on Elm street in Northampton there are no less than six or seven different species of trees planted, while it should have been devoted to one, and that one the elm, since it is a wide street and perhaps the principal street of the city.

Then too often if the planting is left to the property owners, one man prefers to plant the trees on his own property and not in the space for the tree belt, another plants three or four trees in the space only one should occupy, another will plant elms in a thirty-foot street, or Norway maples in a one-hundred-foot street, which is just the reverse of how they should be planted. Then again some property owners will plant well-grown nursery trees while others will go to the woods and transplant any gaunt-stemmed specimen.

Judgment in the Selection of Roadside Trees.

There is always some part of the world where certain trees attain their highest development. The American elm is most at home in the Connecticut Valley for instance. It is not only one of the most beautiful of all trees but a typical New England tree, therefore it should become typical of our New England towns and villages and be planted on the main and widest avenues or where it has space to develop. Smaller growing trees should always be selected for the narrower streets.

In small city parks, where space admits, the American elm should be planted in preference to other trees.

THE DUTCHESS COUNTY HORTICULTURAL SOCIETY AT UPLANDS.

The members of the Dutchess County Horticultural Society to the number of sixty were the guests of Mr. W. P. Clyde at his beautiful estate,

Uplands, Poughkeepsie, N. Y., Sept. 27. They were escorted through the various gardens and greenhouses and fed royally. Our group picture shows how they looked after the latter operation.

I have often thought that the planting of the young pin oaks in Court Square, Springfield, evidently to take the place of the decaying elms, was a mistake. It looks like "dignity and impudence," to see a majestic looking elm in company with an upstart pin oak; not but that the pin oak is a beautiful tree, but out of place in such company. The proper grouping of shrubbery in triangles formed by the junction of streets, or around the base of public buildings and in many places to be found in all towns and villages, should always be under the supervision of a Village Improvement Society.

I would emphasize once more that a thoroughly practical and systematic plan should in all proposed improvement work be drawn whether for the home grounds, public parks and buildings, mill properties or city streets, even though a small portion can only be carried out each year, it will be found in the end far more pleasing and satisfactory than haphazard planting.

PERSONAL.

Visitor in New York this week, P. R. Quinlan, Syracuse.

Brendell & Schultz are to open a retail flower store in McKeesport, Pa.

Arthur, of Moore, Hentz & Nash, New York, who recently went under an operation for appendicitis, is back again at his post, fully recovered.

F. Gomer Waterer, of John Waterer & Sons, Bagshot, England, is a visitor in Boston this week. Also Superintendent Beatty, of Manhattan Parks.

James D. McGregor, formerly with Senator Guggenheim at Elberon, N. J., has been appointed gardener to the Hon. Levi P. Morton at Rhinecliff, N. Y.

Miss Georgia Humphrey, of Holyoke, Mass., and Charles N. Currier, of Northampton, were married on Oct. 8. Mrs. Currier will continue the business on Dwight street, which she has built up so successfully.

OBITUARY.

Mrs. Hanna Humfeld, mother of W. H. and E. A. Humfeld, passed away on October 2, in Clay Center, Kansas.

Andrew Pryal, one of the most eminent horticulturists in California, was buried, on October 1, from his residence in Berkeley.

Mrs. Laura Cooms, mother of O. B. Cooms, Jr., florist at Jamaica, Long Island, died on October 10. Interment was at Longmeadow, Mass.

E. E. Peterson, of Denver, Colo., died, on September 28, at Los Angeles, Calif., where he had gone in search of health. His body was brought to Denver for interment. A widow and three children survive him.

News of the death in Trinidad of Henry W. C. Dihm, of Astoria, L. I., N. Y., has been received. Mr. Dihm went to Trinidad several years ago, to take charge of a large floral establishment at Daladie, British West Indies. He was 54 years old, and leaves three daughters and a son.

Wm. L. Bond, of Pittsburg, Pa., died, on October 4, at the age of 81. Mr. Bond was a pioneer in the nursery business in this section; was associated for many years with A. J. Downing, and assisted him in the work on the grounds of the Smithsonian Institute, Washington, D. C. He leaves five sons.

The preliminary schedule of prizes for the exhibitions of the Massachusetts Horticultural Society in January, February and March, 1908, has been issued and copies can be procured by applying to Wm. P. Rich, secretary, Horticultural Hall, Boston. Primulas, violets, carnations, roses, orchids, azaleas, forced bulbs, hard-wooded greenhouse plants, Easter flowering plants, pansies, calceolarias, etc., are among the flowers and plants specially provided for.

Seed Trade

As far back as last June it was stated in these columns that both peas and sugar corn were likely to prove short this year, and from time to time since attention has been called to these two leading crops as likely to prove disappointing. Particular reference was made to "canner's peas" as those on which the shortage would be most severely felt. A few optimistic Micawbers took exception to these statements of facts, and with little or no knowledge of conditions predicted abundant crops of everything. Within the past week estimates of deliveries have been sent out by several of the larger growers, and they range about as follows: Alaskas, 35 to 60 per cent.; Admirals, 40 to 65 per cent.; Horseford's Market Garden, 40 to 60 per cent.; Advancers, 35 to 50 per cent.; Surprise, 35 to 50 per cent.; Prince of Wales, 50 to 65 per cent. The above figures are the high and low on each variety, the estimates of the several growers ranging between the two extremes. Only the canning varieties are given, but the general line of garden peas will average much the same.

As evidence of the severe shortage in the canning sorts, it may be said that with the exception of one very prominent firm, not a reputable grower has thus far named a price on spot peas, and the initial prices of the one referred to are as follows: Alaskas, \$1.25; Admirals, \$4.25; Advancers, \$4.75; Horseford's Market Garden, \$4.75; Surprise, \$5.00. These are the prices per standard bushel and are offered in limited quantities only.

Now as the canners' contracts for peas were as a rule much below their actual requirements, and as they will receive an average of less than fifty per cent. of their contracts, it is easy to see that as soon as they learn the real conditions there will be such a wild scramble for seed as has not been known in many years.

In view of the fact that there is an eager rush on the part of wholesale grocers and jobbers to contract cannel peas of the 1908 pack, every canner will aim to extend his acreage another year and get out every acre he can possibly handle. But where is the seed coming from? It is absolutely safe to say that it will be impossible to secure enough of the regular standard sorts, and many canners will have to put up with a nondescript lot of seed or be satisfied with a greatly reduced acreage. This brings us squarely up to the question of whether the demand has not grown much faster than the supply, or in other words, whether consumption has not overtaken production. There seems to be but one answer—that it has.

It may be well here to call attention to an article which appeared in these columns several weeks ago on the subject of growing prices, and every grower, and in fact every one interested in seed peas, is invited to read it thoughtfully and decide in the light of present experience whether the writer's position was not well taken. The arguments seem to be unanswerable, and his views have been vindicated much sooner than might have been expected.

Of course the mere raising of growing prices will not result in an imme-

diate increase in the supply of seed. But this will come in time as surely as effect follows cause. In any event the growers will have to revise their estimate of yields, as they cannot continue doing business on a basis where the chances are three or four to one against them.

Referring again to the subject of supply and demand, some figures may be interesting. In 1900 the total output of canned peas in the United States was, in round figures, about 2,500,000 cases, while that of 1907 is something over 6,000,000. It is hardly necessary to say that the increase in seed stocks has not kept pace with this enormous increase in the canned product, and the growers find themselves so greatly outstripped that they are utterly unable to cope with the situation now confronting them.

As might be expected, there is much wailing and gnashing of teeth from the canners, and the seedsmen and growers are roundly abused. But let these gentle purveyors of more or less pure foods ask themselves if they are wholly free from responsibility for the present situation. Have they been willing to pay the careful grower a price that would enable him to maintain and improve the quality of his seeds stock, and in time allow him to accumulate sufficient to meet their needs? Have they not played low grade, inferior seed against high grade pedigree stocks and compelled the growers of the latter to at least compromise their prices to get business? Have they not most persistently urged guarantees and other onerous conditions which they would not be willing to grant to their customers?

There is no desire to shield the seed grower's neglect where he has been negligent. There should be cordial co-operation between he and the canner, but while many canners are heaping blessings (?) on the head of the seed grower, we may well say, "Let him who is without fault cast the first stone."

Not much has been said about those peas most largely used by seedsmen, and while it is no doubt true that the demand from market gardeners has declined in many sections, much in proportion as the output of canned peas has increased, yet it is still large. The call for early peas has fallen off greatly no doubt, but the output of the large podded varieties, such as Gradus, Telephones, Duke of Albany, etc., has largely increased as a whole. It may also be said that the falling off in the planting of early peas is not wholly due to the canned product, but in many localities to the inability to secure pickers.

The great shortage in sugar corn seed is beginning to dawn on the seedsmen and canners, and it is reliably reported that several thousands of bushels have recently been sold to canners at prices which, to say the least, are surprising; but if information to hand proves correct, the highest levels have not yet been reached.

According to the Government report, the potato crop is some ten points below last year. The Maine crop is undoubtedly very poor in quality, fully fifty per cent. being affected with rot, and it is said that not over 25 per cent. will survive the winter. New York

state, Michigan, Wisconsin and Minnesota all report short crops, but the quality in the main is said to be excellent. However, potatoes will certainly be on a higher price level than last year, and particularly choice planting stock.

Japanese exporters, under the incentive of general crop failures, have competed in buying up small stocks wherever found, and all bulb supplies are already well reduced all over the country. The recent floods damaged the longiflorum giganteum crop greatly, and the shortage on this line is very pronounced.

Lilium speciosum magnificum is said to be in many respects much superior to the popular *Melpomene*, growing taller, having larger flowers and blooming earlier. This lily is being grown extensively in Japan and when better known will take a position of precedence here.

Daniel Deemer succeeds W. D. Elbert as manager with the Gobin-Elbert Seed Co., Rocky Ford, Colo.

PUBLICATIONS RECEIVED.

Perfection Chemical Co., Flushing, N. Y.—Folder of Carman's Antipest, a concentrated insecticide highly recommended.

Andorra Nurseries, Chestnut Hill, Pa.—Price list of specimen trees, shrubs, roses and fruit. A comprehensive and handy little volume.

Vincent Lebreton, Angers, McHutchison & Co., N. Y. Agents.—Wholesale Trade List for Autumn, 1907, and Spring, 1908, ornamental trees, shrubs, roses, etc.

The Transactions of the Massachusetts Horticultural Society, Part 1, for 1907, has been received. This comprises the lectures and discussions of last winter, and the inaugural meeting and official reports at the beginning of the year.

Annual Report of Office of Experiment Stations, U. S. Department of Agriculture, 1906. This publication, a book of 454 pages, covers a vast territory in its accounts of experiment station investigations, educational work, college administration and cultural demonstrations, comprising all sections of the United States, Hawaii, Porto Rico and foreign stations in all parts of the world. It contains sixteen half-tone plates besides elaborate text figures, and the text matter prepared by Dr. A. C. True will well repay a careful reading by anyone interested in

NEWS NOTES.

A new greenhouse on the estate of Thomas Watkins at Sea Cliff, N. J., was badly damaged by the gale on Oct. 7.

Robert E. Berry has been appointed by Superintendent Parsons as arboriculturist and gardener at Central Park, New York.

The Wellsville Cut Flower Co., of Wellsville, N. Y., A. C. Boyce, proprietor, has a promising new scarlet carnation, Clarabelle Worth.

Ellwanger & Barry have received an order for nursery stock, from the United States Government, to be shipped to the Philippine Islands.

At the recent exhibition in New York, Ellwanger & Barry were awarded 2 first prizes for pears, 2 for grapes, 1 for plums, 1 for quinces and a special for apples.

One of the large greenhouses of the Halifax Garden Co., Halifax, Mass., was blown down in the storm of Oct. 8 and all of the houses felt the effects of the high wind.

We learn from Nathan Smith & Sons that their new chrysanthemum, Golden Glow, is meeting with exceptional favor. In our opinion it is well entitled to permanent popularity.

It is stated that the entire floor of the Coliseum will be sodded and turned into a park effect with gravel walks on the occasion of the Chicago flower show, November 6 to 12.

A combination of dealers is reported, with the intention of controlling prices of French nursery stock. If the scheme is successful, higher prices may be looked for within a short time.

Flower Carnival Day will be celebrated at the Jamestown Exposition on Oct. 21. Mr. Heinrich, gardener of the Exposition, will enter vehicles decorated with flowers grown on the grounds.

In an electric storm that visited Chicago recently the greenhouse of Carl Thill in Rogers park was struck by lightning and the chimney was destroyed, in addition to much damage to glass.

Mann & Brown, of Richmond, Va., have purchased the place that they have occupied for several years and will make extensive improvements on the buildings. \$30,000 is said to be the price paid.

Philip C. Warner, florist, of Dayton, Ohio, while crossing the street car tracks on Oct. 6 was struck by an ap-

proaching car and seriously if not fatally injured. He was taken to the St. Elizabeth Hospital.

One of the large willows on the margin of the pond in the Public Garden, Boston, having a trunk diameter of 4 feet, was uprooted by the storm on the night of October 7. Many other objects in the garden were more or less injured.

Lager & Hurrell recently purchased a quantity of established cypripediums which proved to be covered with scale. They state that they used Wilson's Plant Oil, which is advertised in Horticulture, and one application completely exterminated the scale.

A concrete pit, 40 x 60 ft., for the storage of half-hardy plants and shrubbery is being constructed at Mt. Auburn Cemetery, Cambridge, Mass., also a propagating house connected therewith for the propagation of hardy ornamental shrubbery for the nursery.

Victor Dorval, Sr., Victor, Jr., and one or two workmen at the greenhouses at Woodside, N. Y., were scorched by the explosion of gas accumulated in a cesspool which they had opened and undertook to examine by lowering a lighted candle.

The Holland-American Line docks at Hoboken, N. J., are coming in for some severe criticism on account of their overcrowded condition and lack of system in handling freight. Confusion reigns and importers find it almost impossible to get goods within reasonable time.

Lager & Hurrell are having their orchid houses at Summit, N. J., equipped in part with the Wilson concrete benches. These benches are put up by John Wilson, of Short Hills, and are likely to come into general use as a substitute for wooden construction. The supports, as well as the bench proper, are made of concrete, reinforced with strands of twisted wire, and are practically indestructible.

PLANT IMPORTS.

There were entered at the port of New York during the week of October 9 to October 15, inclusive, the following plants, etc.:

Via Rotterdam, C. C. Abel & Co., 93 cs. bulbs; H. F. Darrow, 106 cs. plants, 20 tubs laurel trees; John Dunn, Jr., 35 cs. plants; W. Elliott & Son, 11 cs. plants, 1 cs. bulbs; W. Hagemann & Co., 85 cs. plants; J. W. Hampton, Jr., & Co., 12 cs. do.; O. G. Hempstead & Son, 40 cs. do.; Hirsch & Smith, 10 cs. plants; R. F. HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.

A FIRST-PRIZE AUTO DECORATION.

The accompanying picture shows the automobile decoration winning the first prize as the most original and artistic in the great Arverne Floral Parade on September 1, 1907. The decoration was the work of A. Warendorff, of New York.

NEWS NOTES.

W. R. Goff has taken a position with M. H. Barton of Westfield, Mass.

The directors of the New York Cut Flower Co. had their regular monthly meeting last Tuesday, October 15, 1907.

C. Campbell's store in Montreal is receiving important alteration. The two front windows are being completely renewed. Miss R. Campbell is back again from a trip in the West.

Carl C. Gilmore, formerly connected with the South Kenton Greenhouses, has transferred his business to 213 East Franklin street, Kenton, O. Until his greenhouse is completed he will have a stand at Krause & Ochs' store.

The growers of cut flowers from Bay-side, Great Neck and Manhasset, Long Island, are compelled to send their flowers to commission men instead of the flower market, the Long Island Railroad having taken off the regular morning train.

Henry M. Robinson & Co., Boston, will on October 29th celebrate the anniversary of their establishment as wholesale florists at their present address. They have had a prosperous year and extend an invitation to their friends and the trade generally to call and partake of their hospitality on that date at 15 Province street, Boston.

One of the greatest treats that the flower-loving public of Washington, D. C., has had in some time was furnished by Z. D. Blackstone last week in the way of a dahlia exhibit, the finest thing of the kind up to date. To all registered visitors bunches of dahlias were presented. Mr. Blackstone is well known as the vice-president of the Florists' Club as well as one of the most public spirited florists of Washington.

NEW RETAIL FLOWER STORES.

Mrs. John Smith, at 262 East 31st street, Chicago.

Chas. Fick, at San Mateo, Calif.

Miss Clack, at Palo Alto, Calif.

C. A. Espilin and J. T. Warren, at Fort Collins, Colo.

J. A. McLellan at Brainerd, Minn.

Fay Floral Co., 9 South 7th street, Kansas City, Kan.; D. H. Drummond, manager.

Fifth Avenue Floral Co., branch at 47 N. High street, Columbus, Ohio.

BUSINESS CHANGES.

Henry Collins, lately with Houghton & Clark, has taken a lease of the Sibthorpe greenhouses at Wellesley, Mass.

J. B. Murdoch & Co., of Pittsburg, Pa., will remove to 714 Pennsylvania avenue as soon as improvements are made.

J. S. Pollard, of Eldorado, Ia., has purchased the greenhouses of Theo. Souers at Grundy Center, and will remove them to his place.

Braxton, formerly of DeKalb avenue, Brooklyn, N. Y., has taken the store of A. Warendorff, Seventy-sixth street and Madison avenue, New York

Miss Carmichael, with Jos. Bennett for years past, has opened a store at No. 662 St. Catherine street, west, Montreal. She has her sister as assistant.

RAFFIA

ALL COLORS

RAFFIA IN HORTICULTURE

A skein of raffia is an every-day necessity wherever floriculture or horticulture are carried on. Raffia is the favorite tying material with the plantmen for several reasons. Not the least of these is its comparative inextensibility, but greatest of all is the fact that it neither stretches nor shrinks under the influence of heat or moisture. Once properly adjusted, a tie of raffia does not loosen, releasing that which it was intended to hold; neither does it shrink and cut the plant, perhaps to ruin it. It is soft and pliable, and does not break or ravel when folded or knotted. These qualities bring raffia into general use for many purposes in nurseries and greenhouses, where heat or moisture are always found.

Raffia is also especially adapted for grafting.

WHERE TO OBTAIN RAFFIA

We import only the best selected stock. It costs more, but it is money well spent. We can, therefore, offer a choice grade, selected on account of its clear color for dyeing purposes. The strands are broad and of good length.

We carry in stock an assortment of 20 different colors, including brown, 2 shades; blue, 2 shades; green, 4 shades; red, 3 shades; old gold, orange, yellow, pink, purple, black and white.

Prices on application. Color samples free.

Flower Market Reports.

BOSTON Trade is very good and the outlook is encouraging. Flowers are moving quite freely in response to a general demand from local and outside sources for weddings and other occasions requiring flowers in quantity. Chrysanthemums are coming in but not too plentifully as yet and are, as a rule, in medium and ordinary grades only. Roses are not in excess of the requirements and their quality is much improved. Top grade now is quite a different flower from the top grade bloom on which quotations were given two weeks ago. Carnations are still far from standard in many respects, stems particularly being deficient, and the white varieties are scarce and have enjoyed a very brisk sale for the past two weeks since the asters dropped out. Wholesale dealers express satisfaction with market conditions generally.

BUFFALO The fall trade still keeps up at a good pace, everyone seeming to have their hands full with wedding decorations and other social functions. The flower market has been in a rather healthy condition save one or two days the previous week. A couple of warm days brought on the stock a little faster than desired, and prices were lower than at first of week. Beauties were not as much in demand, but chrysanthemums sold well. The early varieties, Kalb, Pacific and Polly Rose, came in quite abundantly for a day or so, but prices held firm. In Monrovia the quality is excellent, and it is no hard matter to dispose of them. Other stock, such as gladioli, dahlias, cosmos, violets, lily of the valley, and all varieties of tea roses, moved quite freely and a good week's business was had by all.

DETROIT A rather uneventful week has passed and its cause may be found in the general enthusiasm with which the people followed the baseball score. Unfortunately yellow chrysanthemums, the flower of the local fans, were very few and what there were seem to have been spoken for by Wm. B. Brown, who landed the order for the floral tiger to be presented by the city to the local baseball team. Chrysanthemums are coming in increased quantities and sell readily. Carnations and violets are below the demand but roses are rather plentiful. A new design called "Swastika," the form of an old Indian cross, has of late been used in floral work as an emblem of good luck in place of the horseshoe.

INDIANAPOLIS The retail demand is growing daily. There is a market for everything that is good and none too much stock. A marked improvement in all stock is evident. There continues to be an excellent demand for Beauties; in fact all good roses sell well, the extra select grade bringing top quotations. The quality and quantity of carnations is better than a week ago. Dahlias are cutting quite a figure now and will till the frost nips them. Plenty of good lily of the

valley is to be had but it is not moving very well. The supply of cattleyas is well up to the demand. Chrysanthemums have begun to appear in large numbers; the prices hold up well. Wild smilax and boxwood have a good call. The market is well stocked with all kinds of greens.

NEW YORK Business is spasmodic, one day full of encouragement, the next day dull and dispiriting. The views regarding the outlook as expressed by observant florists, both wholesale and retail, are divergent, some holding that the indications are for a very favorable floral season and others predicting the duller season for many years. It is probable that the views last quoted find their origin in the fluctuations of Wall street while the former are based on the excellent crops and high prices for agricultural products which have prevailed. Chrysanthemums of high degree and low degree are abundant on all sides and the daily receipts are rapidly growing larger. Dahlias are still abundant and jostle the chrysanthemums with a persistency that is worthy of better recognition than is accorded them. Violets are plentiful but rather behind the record as to quality and sell with exasperating slowness. American Beauty roses of splendid quality are in evidence and gardenias of unusual excellence of flower and stem are seen and the latter are sold while one is looking at them. Carnations improve slowly and are not abundant—fortunately for them. Orchids are on the increase, especially Cattleyas labiata and Percivalliana and Oncidium varicosum. Lily-of-the-valley is of fine quality and coming in plentifully. The stringency in lilies has ceased and values are not much more than half what they were two weeks ago.

PHILADELPHIA In spite of the big influx of dahlias, cosmos and other outdoor stock last week's business in this market proved above the average in most lines. A curious feature is the early appearance of chrysanthemums in quantity—notwithstanding the late season for all other stocks. The result has been rather disastrous on prices for that staple. Chrysanthemums seem to go by opposites. If it's a late season they are early and suffer. If it's an early season they come late and profit. The rose market was good in

the early part of the week but fell off. Beauties were the only really satisfactory stock all through. Poor reds and pinks were especially on the slump. Carnations were better as to size but until we get colder weather their keeping qualities will remain under par. Wild smilax is one of the most active subjects on account of the numerous store and wedding decorations. Gardenias are very scarce. Some good consignments of double violets are now coming in which prove more satisfactory than the poor keeping singles. Lily of the valley is good and in demand. Easter lilies slow. In greens smilax is going better than plumosa at present.

WASHINGTON A decided air of "hustle" in all of the florist stores demonstrates more plainly than words, that the "season" is about upon us. There is a very decided over-supply of dahlias and they are fine, but pretty much everything else in the flower line moves rapidly. In some portions of the District of Columbia there have been quite heavy frosts, which to a considerable extent have injured the more tender growth, but dahlias and cosmos for the most part remain unharmed. Some of the local growers are behind hand with their indoor planting and they are watching the weather very anxiously.

INCORPORATED.

SITUATIONS WANTED

WANTED position by young man growing roses or carnations, either private or commercial. 5 years' experience in latter. G, care Horticulture.

SITUATION WANTED by gardener with good record, private place preferred. Married, two children. Address N., care HORTICULTURE.

SITUATION WANTED in general greenhouse work; single, age 35, five years' experience, commercial. Address W. W., care Horticulture.

WANTED. Position as manager of plant and fern growing establishment. Experienced. L, care HORTICULTURE.

WANTED—Position in store, young man, five years' experience. Address R, care of Horticulture.

FOR SALE

FOR SALE—One top delivery wagon and one open delivery wagon, suitable for a florist's use; almost new and in good order; also a pair of good delivery horses; the above can be bought at your own price. Ed. Higons, 146 West 28th st., New York.

FOR SALE—Well established florist business with greenhouses in rear of store. E. C. Thinnies, 245 De Kalb Avenue, Brooklyn, N. Y.

TO BLOOM BOUGAINVILLEAS IN SUMMER.

I have a lot of large Bougainvilleas which I desire to use for outdoor decorations in summer, but invariably, with exception of a few stray flowers, they fail to bloom. My way of treating them has been to plant them out in the spring and they make a luxuriant growth. In the fall I cut them back and put them in a house kept at about 50 degrees. They start to grow towards spring and would bloom in the house, but as soon as I transfer them to the open the result is very few flowers. Should be pleased to hear from some one that had experience with said plants for early summer bloom. R.

We have flowered Bougainvilleas outdoors in early summer under the following conditions:

Having strong plants in six, seven and eight inch pots and plunging them outdoors in the month of May, leaving them out until October or until there was danger from frost, prune into shape not later than the middle of August, so that they might have time to make a growth before taking in; this growth would naturally be harder and better ripened than if the plants were planted out without pots. Keep them all winter in a night temperature of not exceeding 45 degrees, and pretty dry until middle of March when they may be watered more freely and gradually started into growth; they may be put outside as soon as danger from frost is over. The ripening by drought in a low temperature, seems to be essential to produce abundant bloom. ROBERT CRAIG.

Is Your Name In The Above List? If Not, Why Not?

THE ADVANTAGES OF BOILER INSURANCE.

The recent boiler explosion in the greenhouses of George M. Kellogg I am sure has set many of our florists to do some quiet thinking. If, as has been reported, the gauge was shut and the main valve closed, it comes under the head of criminal carelessness. I have always said it is the duty of the proprietor to learn something about this branch of the business, and see to it himself that everything is in working order when the firing season opens. It is a duty he owes to his employes and also to his own interests and those dependent upon him.

And I think the safest cause is inspection under a reliable insurance company, one that does that class of business and nothing else. The Hartford is the oldest, having all the up-to-date equipment necessary to insure good work at reasonable prices, and my boilers have been insured in that company for fourteen years. I have always found the inspectors men on whose judgment I could rely, and the officers of the company always ready to give any information within their power free of charge. Many florists have an aversion to this class of inspection because they claim that they would be subjected to unnecessary repairs. In answer to that I will say that during that time all the repairs I have had to make was the replacing of four tubes and the boilers "horizontal tubular" were second-hand to begin with. To those insured the inspectors will furnish plans for boiler settings, plans for chimneys and give their expert advice on all things pertaining to steam for power or heating. They have a record of almost every boiler that is built and can give you that information in a few minutes. This year, as an example, they inspected and gave me records of boilers that, had I gone and had them inspected by the state inspector, the bill would have been almost as much as what my 3-year policy on two boilers cost. I finally bought a boiler from a large heating concern. This boiler being out of the Boston district the home office in Hartford, Conn., was notified. They sent an inspector and at the same time one was dispatched from the Boston office. They examined the boiler and sent in a report which was satisfactory and the boiler was purchased. This is a case where we are getting something for nothing and protection as a valuable asset. Besides, I have in mind a boiler bought by a certain florist in which, after being set up, the tubes leaked so badly that they had to be taken out and new ones put in before a fire could be put under it.

Some people will rave about hydrostatic pressure. I say that class of pressure is all right when a boiler is leaving the shops new, but a thorough inspection is far better than all the pressure that can be put in it. There are many boilers pitted and scaled over; in such boilers the water pressure wouldn't show any defect. Take that same boiler, put it in a different locality, with a change of water, and

the scale will drop off, then your trouble will begin. Cracks in the sheets are also hidden things which a lay man knows nothing about and less where they are liable to be found. A boiler was offered me this summer, a good, clean looking boiler, shell, and all surfaces practically new; when the inspector examined it three cracks were found in the rear sheet. Had I bought this boiler, probably under low pressure those cracks might have rusted and closed up with the heat and some day something would have happened. There are conditions today in boiler rooms that make us shut our eyes and wonder why explosions don't happen. A gentleman last winter wrote me like this: "The state inspector will only trouble us every two or three years and it is cheaper than insurance." This from one of our leading Boston florists! I wonder if he would let his life insurance lapse with the idea of taking it up every two or three years. Those having policies with the above named company get four inspections of their boilers every year, one internal and three external or oftener if wanted.

A good way to apply hydrostatic pressure for those who wish to do so is to fill the boiler with water, set the safety valve to a point beyond the normal pressure and start a wood fire. The expansion of the water will do all that is necessary but, as I have said, this is only guess work and boiler inspection is the only real way and that with an insurance company who have everything to lose, and then should any accidents happen you will have the amount on the face of the policy to pay any damages that may have occurred to life or property.

The new express charges on flowers over the B. & A. R. R. to Boston are causing considerable kicking on the part of those who are called upon to pay the extra fee imposed but that is as yet all that it has amounted to. To my mind what the florists in Boston and vicinity want is a club patterned after the Market Gardeners' Club of Boston, composed of commercial men, with committees of good men who would take such matters up quickly. I have no axe to grind but I think the time has come when such a society for the benefit of the commercial men is sadly needed.

R. MCGORUM.

MAINE APPLE CROP DAMAGED.

Apple producers at Limerick, Me., estimate that \$10,000 damage was done by the wind and rain storm October 8 to farms within 10 miles of that place. A number of farms were ruined; the trees being stripped of apples and many of them uprooted. There was a veritable cloudburst, accompanied by wind of cyclonic force.

The reports regarding Maine's apple crop vary widely. Some say the crop will be up to the average or above, while others say it is so poor and measly that three or more worms have to crowd into one apple. It depends much upon whether the one who makes the talk is trying to buy or sell the apples. There is no doubt, however, that in some sections of the State this crop is very good, while in others it is much below the average.—Portland Press.

LIST OF PATENTS.

Issued October 1, 1907.

- 866,532 Reversible Disk Plow, Charles E. Dixon, Forest Grove, Ore.
- 866,657 Plow. William S. Jennings, Lyon, Mass.
- 866,679 Listing Plow. Gottfrid Persson, Elgin, Tex.
- 866,722 Weeder. Edgar A. Hess, Kendallville, Ind.
- 866,800 Cultivator. Wilkie D. Mullinax, Gore, Ga.

- 866,903 Cultivator Attachment. Willie C. Allbritton, Cairo, Ga.
- 866,917 Sickle Bar. Herschel Climer, Chillicothe, Ohio.
- 866,942 Seed Cleaning Mechanism. Robert A. Little, Buffalo, N. Y.; assignor of one-fifth to Elmer T. Anson and one-fifth to Charles L. Anson, Lockport, N. Y., and one-fifth to Emma Taft and one-fifth to Arthur F. Kraft, Buffalo, N. Y.
- 867,019 Fertilizer Distributer. Samuel K. Dennis and Frank W. Rice, Chicago, Ill., assignors to International Harvester Company, a corporation of New Jersey.

Issued October 8, 1907.

- 867,601. Preparing stalks of grain for forming sheaves. Moses Rice, Philadelphia, Pa.
- 867,731. Harrow. Joseph H. Johnson, near Elmwood, Ill., assignor of one-half to Thomas L. Galpin, Galesburg, Ill.
- 867,865. Harrow attachment for cultivators. August A. Yackee, Roberts, Ill.
- 867,883. Plow. Edmond J. Ingram, Scott, Ark.

DUTY ON CHRISTMAS TREES.

From report of General Appraisers.

No. 16808.—Christmas Trees—Unenumerated Article.—Protests 247553, etc., of F. W. Myers & Co. against the assessment of duty by the collector of customs at the port of Plattsburg. Before Board 3, September 19, 1907. Opinion by Hay, G. A.

On authority of G. A. 4478 (T. D. 21372) Christmas trees were held to have been properly classified as unenumerated unmanufactured articles under section 6, tariff act of 1897, the Board overruling the importers' contention that the merchandise should have been classified under paragraph 700 as wood unmanufactured.

The New England Nurseries, Bedford, Mass., have taken advantage of the opportunity offered by the Food Fair in Boston, to bring their extensive stock into conspicuous notice. The large space secured is filled with attractive specimens of hardy ornamental trees and shrubs displayed invitingly, each one labelled with the botanical and the common name. This firm also furnished the decorations in this line for the Mechanics' Building in which the Fair is being held.

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
Yours very truly,
GEO. A. SKENE.

Florham Farms, Madison, N. J., December 8, 1906.
Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
Yours truly,
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

ANDREW WILSON, Dept. 8.

HEATING THE GREENHOUSE

thoroughly and economically during the coming Winter is the problem now engrossing the mind of the Florist who takes time by the forelock.

I am in a position to help you to the best solution of this problem, I have done it for others, I can do it for you.

It will be to your advantage to consult me and get quotations on your heating plant either erected complete or for material ready for erection.

I have the largest line of C. I. and steel greenhouse boilers on the market and can give prompt shipments.

STEEL RETURN TUBULAR Steam BOILERS Water

What F. R. Pierson says:

JOHNSTON HEATING CO., New York City.
Gentlemen:—The internally fired steel boilers which
you installed last fall are giving us great satisfaction.
They heat very quickly and are very economical. We
are exceedingly well pleased with them and they have
more than met our expectations.—Very truly yours,

F. R. PIERSON CO.

H AND C

THERE ARE MANY SERIOUS THINGS TO CONSIDER when you put your dollars into a greenhouse, but none are as serious as light and endurance. These two things we have worked out, hand in hand—every time our construction has been made more enduring, a lighter house has also resulted. The best example of this was when we designed our Half Iron Frame house and did away with that heavy wooden plate with nailed on roof bars, and substituted the Steel Eave and Roof Bar Brackets that decrease the shade by fully two thirds and add wonderfully to the life of the house. If you want to spend your money for a construction that lasts—here it is. Write us

SAVING OR LOSING GAME—WHICH?

WE have just had our attention called to a man who saved \$50.00 because he followed certain directions in putting up his greenhouse. Now, here is the other side of the question. The directions were all right, but among the materials employed, were wooden eave plate and nailed-on sash bars. Now you know and we know that such a construction will soon need many times that \$50.00 for repairs. Put this point in your construction note book for all time. The eave should be the strongest point in any construction, and wood to wood joints at condensation points are absolutely fatal.

Our Ice Clearing Eave Plate and Galvanized Sash Bar Clasps guarantee a dry joint and a stay put, solid as a rock eave. The moral is—when a man tells you he has saved \$50.00, be sure that it has not cost him \$150.00 to do it. You will want to know more about this eave plate. We have a snappy little circular that tells it.

We make every part of a greenhouse but the glass. We sell any part.

This is more than a beautiful picture, it is a proof of the possibilities of greenhouses with the U-Bar beauties of lines. An argument for the curved eave, light construction and wide glass spacing. No man of exquisite taste, combined with practicalness, is going to place his greenhouses on the garden terraces and connect them by a pergola, as in this instance at Rochester, if the construction does not bear the ear marks of superiority from every point of view. The catalog tells more about this particular proposition. Send for it. **Pierson U-Bar Company**, Designers and Builders U-Bar Greenhouses, Metropolitan Building, 4th Avenue and 23rd Street, New York.

Three Good Odontoglossums

Odontoglossum grande, Lindl. Guatemala

The commercial grower of orchids, who has facilities for handling odontoglossums would find *O. grande*, *O. Schlieperianum* and *O. Insleyei*, three useful and easily grown subjects. In some collections these species are represented by poor sickly, shrivelled plants, and they are usually considered hard to grow. They are, however, all very easy, providing a suitable compartment can be found for them while they are making their growth in summer. In nature they are found at high altitudes in woody moist situations in Central America where the rainy season is long and the percentage of atmospheric moisture high, relieved only by frequent cool winds. In a cool, moist greenhouse where the temperature can be kept down without excessive shade, these conditions can be fairly well maintained. These species do not suffer so much from the humid heat of summer as the Colombian species do.

A good circulation of air, which should not be allowed to become dry, is important. Stagnant corners, or positions where the circulation is not perfect, such as a shelf against a wall, should be avoided. The plants should be hung as near to the glass as possible. If the two extremes—stagnation and a dry atmosphere—are guarded against, the result should be satisfactory.

O. grande, often called the "baby orchid," is the best of the three; the flowers appear in late fall and are extremely handsome, measuring 5 to 6 inches across. The flowers on the accompanying photograph measure 6 1-2 inches in diameter. The color of the sepals and petals is rich yellow barred with reddish brown. The tips of the petals are pure yellow; the lip is cream blotched with brown.

O. Schlieperianum is very similar to *O. grande*; the flowers are smaller and appear in August and September. *O. Insleyi* also has smaller flowers which appear in winter; the flowers are similar to the two preceding species but instead of being barred are spotted and blotched with brown.

In each case the flower spike arises from the base of the newly formed pseudo-bulb and as soon as the growth is mature the plant should be kept fairly dry until new growth commences in spring when, after root action has fairly commenced, a liberal supply of weak stimulant may be given. The best rooting medium for this class of orchid and all which have a decided period

of rest is fern fibre without moss. Shallow pans are the most suitable receptacles.

James Hutchison

Ginkgo biloba

Believing that the readers of HORTICULTURE would be further interested in the valuable tree heading these notes I have secured photographs of at least two distinct forms of same. The one taken at Washington, D. C., was received through the courtesy of Mr. Peter Bisset, president of the Florists' Club of that city. It was taken from the roof of Department of Agriculture Building. (See frontispiece.)

It will readily be seen that while the growth of the trees has an upright tendency, they—none of them—could be classified as pyramidal in form, as is exemplified by the Lombardy poplar—*Populus pyramidalis*. This photograph bears out what was my belief respecting the distinctions between what is considered the type of the Ginkgo and those pyramidal forms as seen in those trees near to Horticultural Hall, Fairmount Park, Philadelphia.

In another photograph which was taken in Girard College grounds by my assistant, Mr. E. Thomas, two Ginkgos are seen; both may be considered the general type, yet both are quite distinct. It would be worth Mr. Chandler's while to stop off at the zoological gardens sometime and examine a Ginkgo growing just outside the grounds and not very far from the entrance and he will, I think, find unmistakable evidences that this particular tree was grafted—for the upper part is of the same pyramidal form as are those in Fairmount Park, but the lower limbs are decidedly sprawling, showing beyond the shadow of a doubt that these sprouts were allowed to grow below where the union of scion and stock had been effected.

The more I see of the Ginkgo the more am I impressed with the idea that it is not only one of the best street trees but it is the very best for that purpose. There are three Ginkgo trees in front of No. 1505 North Broad street, Philadelphia—which is near Jefferson street—and I do not hesitate to say that they present the most satisfactory appearance of any trees along that thoroughfare. These, while they have an upright growth and represent the type, are very different from the fastigate forms seen in Fairmount Park. I wish professional writers for the horticultural press would drop the Carolina poplar from their lists of street trees and recommend in its place the Ginkgo. The reason given for recommending the poplar is because it is quick growing. This in many instances is a decided disadvantage for, in order to keep it within reasonable bounds, after being planted a few years, it has to be pruned and that makes the tree expensive, for it costs at the lowest calculation 50 cents a year to keep it shapely, and another disadvantage is that as soon as it has finished putting forth its leaves in the springtime they commence to fall, whereas the Ginkgo retains its foliage until the first frost. Among quite a number of poplars there are in Girard College grounds and on the outside pavement three which put forth their leaves somewhat later in the spring than do the majority of our trees, nor do they lose their leaves so early in the summer, retaining them quite late. Is this a selection or what? They are distinct in other respects besides those mentioned but it would be difficult to

describe same here, besides our trees receive an annual pruning so that the two types are not growing naturally, which makes it a difficult matter to determine what are the differences besides those noted above. This type would be worth propagating in preference to the type of Carolina poplar generally planted.

Edwin Lonsdale

[According to Downing's Horticulturist there was in 1848 a specimen of *Salisburia adiantifolia* nearly 60 feet high in the Hamilton place, near Philadelphia.—Ed.]

The Ah-oon-ye-ye-pa

PROFESSOR HANSEN'S GREAT WORK WITH THE SAND CHERRY

The good Lord seems to have planned for the coming man ages before he came upon the scene of action. In almost all countries He planted fruits adapted to the climate and all these are subject to great improvement.

I was much interested in my visit to the Brandon Experiment Station in Manitoba. All the plums moved up from the South were failures. They were either too tender or they would not ripen. The Wolf, Forest Garder, and plums of that kind—hardy enough in Minnesota—were found to be worthless. What was to be done? People wanted plums. Well, out in the woods a kindly Providence had planted some wild ones, just as good in quality and adapted to the seasons. A large grove of them was growing under good cultivation. They were green when I was there, yet I noticed they were well laden. but the superintendent said, "This is the off year, you should have seen them last year." "Are they good for anything?" I asked. "Well," was the reply, "you should have been here last August when they were completely loaded. I could get along with my visitors till they came to this plum patch, then they got stuck and could not go on but must fill up with that delicious fruit. Good? Nothing can be better." Here you have it then. Away in the far North, fruits are waiting development. Even the strawberries and raspberries grow in profusion. What is needed is development and selection of the best.

There are two kinds of the Sand cherry, *Prunus pumila*, which grows on sandy and gravelly soils in Michigan, New Brunswick, and New Jersey. This type is not hardy in the North but out on the sand hill and on the adobe soil of the Dakotas, in places where you cannot cultivate, there you find another type of this family, called *Prunus Besseyi* from our own honored professor of botany.

Professor Hansen, with an old Indian guide, made an extensive trip in search of the best of the wild ones. On steep gumb. bluffs, in miserably poor soil they found quite a quantity. The Indians call it Ah-oon-ye-ye-pa. They gather them in large quantities with native choke cherries and pound them up, stones and all, mixing the mass with meat for soups. Having secured the very best types of wild ones, the Professor proceeds to grow them by the thousands and then select the best.

You see what an immense task he had before him. Native seed of the best must be gathered from different places. They generally fruit in three years, then the very choicest are selected, and the rest are destroyed by the thousand. The same method is carried on till now. He has the third generation and some of the fourth.

Now, this of itself is a great task, but it is not all. He is not content to secure the best Sand cherries that can be grown but he is using them for a base for further work—that of crossing with less hardy fruits—thus creating hybrids of excellent fruit with constitution borrowed from these hardy plants—robust enough to stand the rigors of the northern climate.

The Compass cherry is a cross between the Sand cherry and the Miner plum and at present it is having a great run in the North. In Nebraska it is worthless, but it is grown extensively in Minnesota and the Dakotas. The Professor has made a fine cross between the Chinese Simoni plum and the Besseyi. The fruit is of good size and the tree is hardy.

To me, engaged as I am in ornamental horticulture, his greatest triumph is in securing a cross between the Sand cherry and *Prunus Pissardi*—the blood-leaved plum so much used in landscape work. Here he has secured a beautiful cross. We saw over a dozen specimens. The foliage was deep purple, much brighter than that of the parent, and the cross seems perfectly hardy. What we need all through the West and Northwest is trees and shrubs of rich foliage. Rivers beech and the delicate Japan maples are utterly worthless. Here we have a most beautiful and hardy shrub which will just fit the spot and which will be worth thousands of dollars for our ornamental work. It can be successfully budded on the wild plum or on the Sand cherry and from a single bush thousands can be secured. We cannot emphasize this success too strongly. It seemed to me one of the horticultural triumphs of the century. The fruit of the Pissardi is not of much account but in all probability this hybrid will be an immense bearer, and of course, the fruit will be purple like that of the parent, giving us a shrub remarkable for utility and beauty. He is making several of these crosses and we hope he will keep at it along this line where he has won such signal success; for, among a numerous progeny he will be sure of the richest color and also a prolific bearer.

Another triumph is crossing the Japan Sultan plum with the Sand cherry. The fruit of this tree is deep purple all through. This was an off year for fruit. When I was there in August, however, he had a few of these crosses. They were of good size, the fruit deep purple all through, and, as I tested them they were of excellent flavor. These two successes are enough to immortalize a man, but these are only the beginnings. It is a pity that a man with such a record and with such a tremendous task before him should be hampered for a lack of funds. We need another Carnegie at his back or the same one who backed Burbank. He needs more money and more men. He should have a strong out-of-door force to keep the grounds in the finest cultivation. He needs experts in his greenhouse where the work of hybridizing is done. Much as Burbank has done for the Pacific Slope he has done nothing for the great Northwest if we except the Shasta daisy which in its latest form is a success. In California experiments can be carried on out-of-doors. In the bleak North all this work must be done in the greenhouse and in winter and it is a shame to the nation that a man of such skill and such keen intuition should be hampered. Back him up with plenty of money and he would raise miracles and transform all that bleak Northwest.

York, Neb.

Centaurea imperialis

Centaurea imperialis is surely worthy of more attention than it receives. They are very suitable for greenhouse culture and give good returns for the time and space allotted to their care. Being the result of a cross between *C. moschata* and *C. Marguerita* they inherit the vigor of *moschata*; and the artistic shaped flowers resemble *Marguerita* but are twice as large. Their range of color is not extensive but includes pure white, rose, lilac and lavender; they are quite fragrant and have good lasting qualities when cut.

C. imperialis is undoubtedly the finest of all Sweet Sultans, is of easy culture and can be had in flower in 90 or 100 days from the time of sowing the seed. Sow the seeds about January 1st in flats, pot off into 2 inch pots when ready, and again into 3 or 3 1-2 in. pots in any good carnation or rose soil. Plant into benches or solid border when the pots are filled with roots, 12 by 15 inches or thereabouts.

Care must be taken in planting. It is well to ridge the soil and plant on the ridge or plant high and hill up. They are somewhat susceptible to a fungus disease or stem rot if water is allowed to lodge around the stems. It is also better not to syringe at any time. Keep the atmosphere moderately moist, plenty of air, 50 degrees at night with a corresponding rise during the day. It is well to guard against green fly.

British Horticulture

AMERICAN GOOSEBERRY MILDEW

Additional powers have been obtained by the Board of Agriculture to secure the suppression of American gooseberry mildew which is prevalent in some districts in Worcestershire and Norfolk. Under the new Act of Parliament local authorities have power to order the destruction of affected bushes and the spraying of the orchard. Some dissatisfaction has been expressed amongst the growers that although, in the case of an outbreak, they are required to destroy the bushes no provision has been made for paying compensation to the owners. A deputation of Evesham growers has lately waited upon the Worcestershire County Council, with a view to securing some redress. It was explained that a serious hardship would befall growers who were compelled to grub up gooseberry plantations in full bearing, without any compensation. The growers contend that if private property is destroyed for a public object in the interest of the community, then the nation ought to pay compensation. It was also urged that burning would not eradicate the disease, but that it could be effectively kept in check, if not stamped out by pruning and spraying. Growers are not satisfied that the disease will do all the injury in the districts that it had done in other countries. The dangers of the disease, it is contended, have been greatly exaggerated. It has been known in this country, it is stated, for many years, and only appeared to attract serious attention in exceptional seasons. A strong case has been made out for granting compensation, and there is a precedent to go upon. The farmer when compelled to compulsorily slaughter his cattle to prevent the spread of disease receives compensation from the Government, and it is only reasonable to expect that the same treatment should be meted to the fruit grower.

NEW CHRYSANTHEMUMS

First-class certificates were lately granted by the National Chrysanthemum Society to the following new varieties, grown by Messrs. W. Wells & Co. of Merstham (Surrey): *J. J. Hart*, an early-flowering decorative variety; blooms bright yellow with pale reverse; *Cornichts*, a yellow early flowering border variety; *Wells' Scarlet*, a decorative variety of a shade of bright chestnut with crimson shading and bronze reverse. The National Society are holding their annual market show at Covent Garden early in December. This display has become a popular feature amongst commercial growers. Prizes are offered for collections of market chrysanthemums, a group to fill a half circle, 9 ft. by 6 ft., the best novelty in market chrysanthemums not in commerce, the best packed boxes of market bloom, and for a memorial design. As a new departure winter-flowering carnations are to be introduced. There are several market growers who distinguish themselves with this increasingly popular flower and there should be an interesting contest. The carnations will also lend an acceptable variety to the display. Several of the leading growers will be represented, and another successful exhibition is anticipated.

The Botanic Garden trees get a reprieve

We learn that an order has been telegraphed to Acting Secretary of War Oliver and by him transmitted to Gen. Dodge, president of the Grant Statue Committee, directing that action in the matter of cutting

down historic trees in the Botanic Garden at Washington be suspended until President Roosevelt returns to that city. Thus the emergency is past for the time being and we may hope that deliberation and a careful consideration of the problem may result in some acceptable plan for the location of the Grant statue being evolved whereby these valuable and interesting trees may be spared.

The New England apple crop

The surprise of the year in eastern Massachusetts is the enormous apple crop, unprecedented in quantity for an "off year" and unequalled in quality in any kind of a year heretofore. This is directly attributed to the thorough spraying which the trees received last spring for the extermination of the gypsy moth, which also made short work of the codling moth and other pests of the apple growers. This rather unforeseen outcome of the moth campaign will, no doubt, go far to soothe the feelings of the farmers who have been considerably disturbed over the heavy expense of compulsory spraying against the common pest. Apples at \$4.00 a barrel are a very pleasant crop to contemplate and should this circumstance have a deterrent influence on the wholesale cutting down of apple trees which has been going on of late this will be another gain. The only disadvantage apparent this year has been the breaking down of overloaded limbs which suggests the possibility that, if thorough spraying is to become a regular annual operation in apple growing, thinning will also have to be done, as advised by Mr. Wheeler in his admirable lecture on fruit growing before the Gardeners' and Florists' Club of Boston.

To start the money a-moving

Money scarce and collections slow is the general report from the flower trade and those industries which are to any extent dependent upon the florist for business. The average florist must collect before he can pay for there are but few so well supplied with cash that they can pay as they go regardless of whether they collect their own accounts. The banks are wary and borrowing at present is not so simple an operation as in times gone by. The money that circulates through the florist trade takes its start from the retail customer. Through the retail florists' hands it goes, then the wholesaler and the supply man, then the grower, after which the builder, the coal man, the bulb dealer, incidentally the help all along the line and lastly the publisher and advertising man get a chance to finger it for a few moments. The moral is obvious: the retail florist is the man we are all waiting for. It is notorious that, as a class, he is and always has been over-liberal in extending credit to people much better supplied with the "wherewithal" than he himself is ever likely to be. All efforts at reform in the credit habits of the trade must take these facts into consideration. By what means can better methods of collecting and the requisite courage to face the delinquent swell customer with a bill be disciplined into the man behind the flower counter?

CHRYSANTHEMUMS.

A French Audit.

There is always considerable interest in discovering the favorite varieties, and in England audits of the best varieties compiled from returns sent in by a certain number of growers have long been in vogue. In France this has been done more rarely and at longer intervals, but still it is done there, one of the largest having been inaugurated by the "Moniteur d'Horticulture" some years ago. Of course tastes differ and English growers do not always accept the results of these French audits.

At any rate there is some little interest attached to them, and apart from purely patriotic motives, which in some individual cases largely influence some of our growers, it is interesting and instructive to know what our neighbors are doing and think. By this means we may enlarge our view and perhaps become acquainted with the merits of certain flowers we have never before heard of, for it is certain that every one of the new French seedlings does not invariably find its way across the Channel.

The Paris Chrysanthemum Committee of the National Horticultural Society has recently published a little brochure of 100 pages containing a complete record of its last year's work and operations. This committee would in England be considered a respectable society in itself, for at the beginning of the year it consisted of 391 members, of whom 349 are called active members and 42 are designated associates.

The contents briefly may be summarized as follows: Schedule of classes for the ensuing exhibition to be held in Paris, November 8 to 17, 1907, comprising nine different sections divided into 101 classes; annual report; annual revised group of varieties for different purposes; list of best varieties put into commerce since 1903; list of prize winners at the 1906 show; reports of various shows held in France last season; reports of visits to the collections of several prominent cultivators; list of members, etc.

Our present object, however, is to draw attention to the list of varieties since 1903 which are considered the best. Returns were invited from members of the committee and then tabulated, with the result that upwards of 200 were chosen. These varieties received from 3 to 30 votes each, and it has occurred to me that the names of the first 50 may be of interest to readers of HORTICULTURE at this season.

The following is the list, viz.:

Calvat's Seedlings.

This great French grower's annual list for 1907 has just come under my notice again, and I am reminded of his exhibits at the French shows last year. American chrysanthemum growers will do well to keep a look-out for the following novelties of this raiser: Algesiras, Touring Club, Santos-Dumont, Paul Randet, President Dubost, President Fallieres, Mlle. Jeanne de la Croull, Le Lutin, S. A. Naceur Bey, Carlo Krocht. If the American climate suits them there ought to be some fine samples of them this autumn. C. HARMAN PAYNE.

FORESTRY STUDY AT HARVARD.

Through the generosity of James W. Brooks, John S. Ames and others, Harvard College has come into possession of 2000 acres of land in Petersham, Mass., on which is growing the best body of timber now to be found on an equal area in the state. It will be devoted to the use of the division of forestry of the college. Students will be in residence at Petersham during a considerable part of the year. There they will take up in the first of their regular two years' course, and largely in the field, all their elementary work including tree botany, the theory and practice of forest measurement, and the whole subject of silviculture. This will lead them directly to their last year's work, which is mainly devoted to lumbering, forest engineering and the study of forest production as applied to actual problems. The diseases of trees and other forms of injury, and the history of forest policy in the various countries will also form part of the work.

TREE AND SHRUB CHAT.

Juniperus stricta, said to be a form of *Virginiana*, the red cedar, is a neat little fastigate evergreen useful for gardens or veranda boxes and perfectly hardy around Boston.

The nursery trade throughout the New England section of the country is generally reported as lagging and not equal in volume to that of one year ago. The people who are the best buyers of ornamental stock are feeling the effect of the depressed market and financial stringency and it is only natural that garden operations should be among the first to suffer.

Acer Ginnala, classed by some as a variety of *A. Tartaricum* as seen at a distance at the present time can scarcely be distinguished from a clump of scarlet salvia in full bloom, so brilliant is the autumn foliage. Among the other brilliant objects in fall coloring are *Euonymus alatus* and the *berberis Thunbergii* and *Sieboldii*. *B. Thunbergii* is loaded down with its racemes of coral fruit this year.

Commissioner Samuel Parsons has presented a report on the condition and needs of Central Park, New York, and the total cost of the repairs and improvements which he regards as necessary amounts to \$2,676,750. This proposition, he says, must ultimately be faced if Central Park is to remain the pride of the city and the leading park of the country. The estimate includes \$650,200 for loam, \$150,000 for manure, \$50,000 for sod, \$75,000 for shrubbery and trees, and \$60,000 for four years' work of forty men and foremen. Immense sums are also required for roads, lakes, drainage, etc.

The fall planting of nursery stock in Detroit has been started with great vigor and all agents report a goodly number of orders on hand. A nice feature is the policy of some churches to improve their yet vacant lots by planting shrubs and herbaceous plants thereon, and so forming little parks. On looking about one cannot but wish that nurserymen be more careful in selecting their salesmen. The people are ignorant enough about these goods, but they are excusable. For a nursery to send out men on planting work who have not the slightest idea of effective planting is not only inexcusable but suicidal to the business. The reaction hurts not only the nurseryman but also the florist. F. DANZER.

PERSONAL.

John J. Gormley has returned from Minneapolis to his old place with Canner & Gormley, Chicago.

Supt. Jas. W. Boone of Clifton Park, Baltimore, met with a painful accident recently which will confine him to the house for a time.

George Reinberg and Miss Clara Lackey of Chicago were married on the evening of October 16 and started for Colorado on their wedding trip.

A. J. Seiders has accepted a position in the College of Industrial Arts, Denton, Texas, as director of gardening, floriculture, cut flower work, designing. Mr. Seiders' years of practical experience eminently qualified him for this position. The salary is \$1,800 and residence.

THE CULTIVATION OF FRUIT.

A paper read before the Gardeners' and Florists' Club of Boston, by
Wilfrid Wheeler.

In presenting a subject of this kind, which had to be covered by a short paper, I shall have to confine myself to generalities rather than give any extended and complete cultural directions, but I hope that these will lead to a discussion of the subject which will bring out all the important features that the gardener and florist are interested in.

The growing of fruit comes to many of you not as a vocation, but rather as an avocation, or perhaps a side issue to your other work, and to some of you not at all. This important branch of horticulture has received far too little attention from the craft in general; not that the craft is entirely to blame for this, but that conditions have governed the gardener over which he has had little or no control. Now, however, a real awakening in fruit culture is at hand, and the gardener and florist who would be abreast of the times, must be alive to meet this new demand.

The Enthusiasm of Fifty Years Ago.

Not more than fifty years ago, Boston and its immediate vicinity was the scene of a great activity in all kinds of garden fruit culture. Think of Marshall P. Wilder's garden of that time, with over one hundred and fifty varieties of pears, and some of the other gardens of the same period, and find a parallel to them now. No garden then was considered complete without its rows of fruit trees and bushes, as well as its collection of vines and plants. These conditions have gradually changed until we find beautiful beds of flowers and wonderful landscape effects where once the utility garden grew. We have passed from the useful to the beautiful, and have not yet learned to combine the two, and yet, there is probably no garden in the vicinity of Boston but can grow some or all species of native fruits. It is true that certain locations favor certain species, but this is largely due to soil and light conditions, both of which can be changed by artificial means. The gardens of the old world have much to teach us. Not one of them would be considered worthy of the name, unless it had a portion given over to fruit, which portion is made as attractive and beautiful as any other part of the grounds. In some cases the fruit trees and vines are used with ornamentals combining the useful and the beautiful in many graceful forms, and giving an effect most pleasing and satisfying. In this country, we consider that we have a fruit garden if there are a few uncared-for fruit trees and bushes which, by the way, are expected to last a lifetime, as well as produce a good crop of fruit each year. I know there are exceptions to this rule, but they are few and far between.

This subject of fruit growing should interest the gardener and florist more from a point of quality than quantity, for seldom does either of this class of men care to grow fruit for sale, so a wider field is open to them than to the commercial grower, who must be guided in his choice of varieties by their productive quality, while many kinds of fruit are less prolific, yet

yield a very superior quality to the careful gardener.

How to Plan for a Fruit Garden.

In planning for a new fruit garden or remodeling an old one, three general considerations should be kept in mind: 1st, situation; 2d, soil and moisture conditions; 3d, selection of varieties. Choose a site with plenty of sunlight and air. Wherever necessary, plant large growing trees on the north side of the garden, so that the shade from them will not interfere with other growing trees and plants.

1st. Set all vines on the south side of your chosen site, using bush fruits and dwarf trees as intermediate fillers, and where the skill of the gardener will show itself more than in any other part of this work, is in placing these trees and bushes so that they will occupy the least space and give the best results. Where space is very limited, plant currant and gooseberry bushes under the larger fruit trees, particularly under pear trees, as these grow straighter and cast less shadow than apple. Hedges of raspberries and blackberries can be made about a garden and walks and drives set off from the rest of the grounds by the use of dwarf apple, pear or cherry trees, which can be trained on a trellis as grapes are grown, and will give the greatest returns for little trouble and less space.

Usefulness of the Dwarf Tree.

While speaking of dwarf trees, a further word about them may not be amiss. The dwarf tree fills a long felt want in the private and home garden, and its usefulness cannot be overestimated for people who wish to have good fruit quickly and on limited space; then too, it lends itself readily to any form of pruning or training, and its adaptability is of the greatest service in producing artistic and picturesque effects, and these are advantages not to be lost sight of when one has a fruit garden to plan for. If you want a hedge both useful and ornamental, plant dwarf apple trees and train them in a bush form, keeping the centre open as much as possible, to admit air and sunlight. If you need a screen to divide one part of the garden from another, plant dwarf apples or pears, training them to the desired height on wire trellises. If you wish to cover some stone or brick wall, plant dwarf cherries, plums or pears and train them in espalier form; in fact, any available space in the fruit garden can be utilized to advantage by some forms of dwarf fruit trees.

Repairing the Soil.

2d. The preparation of the soil for the fruit garden must be thorough and complete. No one would think of planting a flower garden in unprepared soil, and fruit needs good, careful preparing even more than flowers. All the soil should be trenched at least three feet deep, with plenty of well rotted manure and coarse ground bone worked into it. If the soil is of a sandy texture, add some heavy mud or peat; if it is too clayey or heavy, use sand and finely sifted coal ashes, enough to cut the heavier particles of soil and make it more porous and friable. Drainage should be supplied in all heavy soils, and some form of tile or stone drains will be found best. Nothing is more harmful to the

roots of growing trees than too much water about them. All fruit trees want water to keep them healthy, but it is better they should have too little than too much. This does not apply to fruit plants like the strawberry. Heavy soils are best for pears, strawberries and bush fruits, while sandy or rocky soil is best adapted for grapes; and the apple delights and flourishes in a well drained, warm soil, with plenty of moisture, land such as is more often found on hill-sides.

Selection of Varieties.

Now for our third division—varieties to plant. Many of you are at a loss to know the best varieties of fruit to plant, as a number of the so termed "best" are known so only in a commercial way, and when the gardener who is growing for quality, plants these, he is much disappointed and, after waiting a number of years for the result of his care, is discouraged at the fruit produced. The following is a list of some of the varieties of fruit suitable for garden culture in our climate and adaptable to a variety of soils:

Dessert apples. Early: Williams, Red Astrachan, Sweet Bough, Early Harvest.

Fall apples: Porter, Gravenstein, McIntosh, Wealthy, Golden Sweet, Late Strawberry, Sops of Wine.

Winter: R. I. Greening, Baldwin, Northern Spy, Lady Sweet, Grimes Golden, Newtown Spitzenburgh, Stayman, Swaar, Tolman Sweet, Yellow Belleflower, Winter Banana, Westfield, Red Canada, Roxbury Russet.

For culinary purposes. Early: Duchess of Oldenburgh.

Fall: Fallawater, Pumpkin Russet, Pound Sweet, Ribston Pippin, Twenty Ounce, and many of the French and English varieties, especially when grown as dwarfs.

Winter: Northern Spy, Baldwin, Rhode Island Greening, Jacobs Sweet, York Imperial, Green Sweet, and for very late season use Ben Davis or Gano. Here again many of the foreign varieties may be planted.

Pears. For summer use: Doyenne, Clapps Favorite, Giffard, Wilder, Dearlyn's Seedling, Fall Bartlett, Paradise, Bose, Marie Louise, Louise Bonne of Jersey, Worden Seckel, Belle Lucrative, Seckel, Vermont Beauty, White Doyenne and Sheldon.

Winter: Barry, Anjou, Langlier, Winter Nelis, Dana's Hovey, Clairgeau.

Plums: Wild Goose, Bradshaw, Damson, Lombard, Jefferson. While there are hundreds of varieties from all quarters of the globe, it will be found that a few kinds to plant are better than a great many, and the choice would be from the Japanese group: Abundance, Burbank, Red June, Chabat, Satsuma and Wickson.

Peaches. Of these, the following will cover a long season: Champion, Carmen, Greensboro, Fox Seedling, Early and Late Crawford, Foster and Old Mixon.

Grapes. Moore's Early, Campbell's Early, Worden, Concord, McPike and Cottage, for black. Niagara, Moore's Diamond, Victoria and Prentiss, for white. Delaware, Vergennes, Salem, Brighton and Woodruff Red, for red.

Cherries: Black Tartarian, Coe's

Transparent, Gov. Wood and Yellow Spanish, for eating; for cooking, Montmorency and Early Richmond.

Currants: Fay's, Wilder and Red Cross, for red. White Grape or White Imperial, for white. Black Naples and Champion, for black.

Gooseberries. Red: Industry and Red Jacket. White: Chataqua, Columbus and Triumph, while Downing fills the bill for a small white, and is good for cooking, and when thoroughly ripe is of excellent quality for eating.

Raspberries: Cuthbert for red. Golden Queen for white, and Kansas for black, while Herbert might be mentioned as a close rival of the Cuthbert.

Blackberries: Agawam, Dorchester and Ward.

Strawberries: Marshall, Brandywine, Sample, Parson's Beauty, Cardinal, Granville, Sen. Dunlap; among the newer ones, Chesapeake, Abington, E. H. Eckey, New Home and Golden Gate.

Directions for Planting.

I will not attempt to infringe on your good nature by giving planting and cultural directions for the list that I have just read you, but will say in passing, that you should use the same care in planting fruit trees, plants and bushes that you give to your best ornamental planting, always keeping in mind that a tree well set is half grown, and also that many of our fruit trees have very poor roots to start with, and need even more care at this critical time than many of the ornamentals. Spring setting should be preferred to fall in most cases; one exception to this is the strawberry, which, for garden culture, should be set in August or September.

Cultivation.

All hard wooded fruit plants should have thorough cultivation for at least three months in the year, May, June and July, after which cultivation should be discontinued, in order that the new wood should have time to ripen before cold weather, and where trees and bushes are planted in a space by themselves, the ground should be sowed with a crop of vetch, winter rye or wheat, late in July or early August. This serves to keep the weeds down and protects the ground from freezing and thawing during the winter, whereby many of the small feeding roots are broken. If the ground must be cultivated until late, a mulch of some kind should be put about the roots for winter protection, but not next to the bark of the trees or bushes, as mice are apt to live in this litter and girdle the stems during the winter. This mulch must be applied after the ground is frozen. With the strawberry, cultivation can be kept up through September and possibly a part of October, according to the weather. Before the winter mulch is applied to the strawberry bed, see that there are no low places where water will stand over the plants, and it is always best, if your bed is on flat land, to dig a few holes in the ground at least three feet deep, filling them with leaves. These act as drains for all surface water which would otherwise be kept on top of the plants by the frozen ground. The mulch over the strawberry bed should be

very light, bearing in mind that you do not want to keep the cold out, but the frost in, when once the ground is frozen.

Spraying.

When your orchard and garden are once started and growing, the spraying and pruning of your trees and thinning of your fruit, will largely determine your success or failure in producing good specimens. In these days of insect pests and blights, spraying is as important to the growing of good clean fruit, as the disinfecting of a room after a case of small-pox or scarlet fever, to the preservation of the public health. Spraying should be done at least three times in the year,—November for scale, with Scalecide or lime, sulphur and salt; May, with bordeaux and arsenate of lead in combination, for blight and insects; and late July, for late fruits, with bordeaux, alone. Another spraying can be given in March or April, with benefit.

Pruning.

The subject of pruning alone, could occupy at least one evening's discussion, and then we would only get at some rudimentary principles, but these will be enough for the practical gardener to enlarge upon. There is a difference between pruning and cutting off limbs. Pruning generally helps trees, but cutting as it is done by the average attendant, is no better than butchery. First, in pruning, bear in mind that sunlight and air are as essential to fruit as to flowers; therefore, keep your trees and bushes open to both of these life-giving, indispensable elements, removing all surplus branches, dead wood and suckers, and pinching back soft growths. In bush fruits, such as currants and gooseberries, remove all four-year wood and keep at least two new canes coming on all the time. In raspberries and blackberries, the fruiting wood should be cut off and burned as soon as the crop is gathered. On all standard trees, keep the tops well cut back; in other words, keep the trees low-headed, so it will be easy to work them. In low-headed trees, the work can be reduced at least 50 per cent. All spraying can be done from the ground, while pruning and thinning can be accomplished with a short step-ladder.

One important point to be remembered while pruning, is that you can carry harmful bacteria on your pruning tools from one tree to another. Pear blight, Peach yellows and various other forms of plant disease are carried in this way, so treat all wounds made by pruning with coal tar or creosote, and dip your tools in a solution of corrosive sublimate before going to a new tree. You would never hear of a good surgeon using the same instruments twice, without disinfecting them first, and the gardener must take equal precautions, if he would keep disease from spreading in his orchard. Flies and other insects carry disease from wounds that are not carefully treated, especially if pruning is done too late in the spring.

Thinning the Fruit.

Probably the most important point to the gardener who has a type of excellence always before him, is the

thinning of the fruit, and indeed here lies in a large measure the final and crowning result of his labor; for, to place before his employer or upon his own table specimens which are perfect in form, smooth of skin, large in size and, most important of all, delicious in flavor, is largely due to judicious thinning. A general rule as to thinning, to be followed in all fruit culture is, remove at least one-half of the specimens set, and the time and method of so doing will depend much on your own good judgment. Apples and pears should be thinned when about the size of an English walnut; plums, peaches, apricots and all stone fruits, when about as large as the end of your little finger; currants and gooseberries, as soon after they have formed as possible. Few people realize the value of thinning these bush fruits. You well know what quantities of fruit both these species will set. You have seen currants so thick and so small that there seems to be nothing but currants, no leaves or stem are visible; the strength of the bush has gone towards producing immense quantities of these small, poor specimens. This condition of affairs can be changed through judicious thinning of the heavily laden bushes. Remove at least two-thirds of the fruit, and you will still have plenty of currants left and of a far superior quality. The same rule follows with gooseberries. With grapes, never let more than three bunches grow on one spur, and two are much better than three, and for very fine fruit production, one bunch to a short spur, allowing perhaps a few more spurs to the vine. Strawberries show marked improvement when thinned; cane fruits are the only exception that I know to the rule of improvement by thinning.

Give the Gooseberry a Chance.

Just one word before closing about one fruit which we seldom find in our gardens to-day, or if it is there it is in the most neglected part, overgrown with weeds, perhaps, or covered by a tangled growth of vine and bushes, yet struggling to live, and producing some fruit in spite of neglect. Once in a while it is turned to by somebody, who says "O, it is only a gooseberry." Give this gooseberry half a chance, though, and it will produce fruit which is delicious, both raw and cooked. We are only beginning to realize its value, and in some places are now giving it the position it deserves. Our friends from across the water are not unappreciative of its merits, but they have not interested others who have had less experience with it, in its cultivation. But it is not too late now, so let us plant the gooseberry and enjoy this most palatable and unusually attractive fruit.

I shall feel that my efforts have not been in vain to-night, if you will take away this thought that spraying, pruning and thinning of your fruit are as important to the growing of good specimens, as are watering, disbudding and training of your plants and flowers to the producing of good blooms, and the man who practices these rules will not only derive much pleasure, but he will have the satisfaction of knowing that he is benefiting mankind in producing a fruit beautiful to look upon and pleasing to eat.

THE EXHIBITION SEASON

RECENT SHOWS.

Lenox Horticultural Society.

Never since its organization seven years ago has this society set out for public inspection such a superb exhibition as the chrysanthemum show of 1907 which opened on October 23, in the town hall, Lenox, Mass. The display of blooms was most remarkable for so early in the season and it is very doubtful whether for size, color and finish of blooms this show of chrysanthemums will be excelled at any exhibition anywhere this season. The hall was much too small for the wealth of greenhouse product brought to it by the talented representatives of the gardener's profession who preside over the magnificent estates which abound in the picturesque Berkshire Hills of Massachusetts and the vegetables and the carnations had to be transferred to the basement hall.

Among the cut flower exhibits some of the most interesting were as follows. Large vases of 24 blooms in competition for the Farquhar prizes. Thos. Proctor, gardener to R. W. Paterson, showed assorted varieties; A. H. Wingett, gardener to Charles Lanier, had Beatrice May; E. Jenkins, gardener to Giraud Foster, Wm. Duckham; D. Speirs, gardener to Mrs. J. E. Parsons, a mixed vase. The prizes were awarded in order as given and every exhibit was a stunner. C. H. Totty's special prizes for six long-stemmed blooms of Helen Clay Frick were won by Messrs. Jenkins, Wingett and Speirs respectively with superb specimens. In the gold medal class for six vases of three blooms each Thos. Proctor's winning set comprised the following varieties: Mrs. Henry Barnes, Mrs. A. T. Miller, Reginald Valis, Mrs. J. E. Dunn, Donald McLeod and F. S. Valis, the three first named being new varieties. A. J. Loveless, gardener to Mrs. John Sloane, who won first on set of new varieties of 1907 had in his group, Pres. Loubet, Rose Lawrence, Mrs. Geo. Hunt, H. C. Frick, Reg. Valis, British Empire, Pres. Viger, Mrs. Robt. Lee and Mrs. A. T. Miller. Perhaps the most sensational exhibit in the cut flower classes was a vase of six blooms of Lady Hopetoun by Mr. Wingett; the writer has never seen their equal.

Specimen plants of enormous size were shown by Geo. G. Haven, W. D. Sloane and Mrs. J. E. Parsons, Mr. Speirs' group of plants in 8-inch pots averaging a dozen exhibition flowers each was especially noticeable. We should like to refer in detail to the many other exhibits of high character but lack of space prevents.

The entries in other classes beside the chrysanthemums were of equal interest and high grades. The premiums for arrangements of flowering and foliage plants brought out three groups of sensational quality and effectiveness of arrangement, the winners being E. Jenkins, F. Heeremans and A. J. Loveless respectively. Mr. Jenkins' group contained great quantities of cattleya labiata interspersed with Gypsophila elegans, a combination which fairly sparkled. Oncidiums and Dendrobium

Phalaenopsis were profusely used and the group was crowned with graceful specimens of Cocos flexuosus, while Begonia Turreford Hall, lilies, etc., adorned the base. Neither this nor Mr. Heeremans' group which was awarded second and was good enough to win first prize anywhere had anything of the character of the formal pyramidal style so prevalent in exhibits of this kind, and were an object lesson in decorative plant grouping which should have had a larger hall in order to be seen to advantage. A. J. Loveless showed some glorious orchid groups, including seedling cypripediums and there were magnificent ferns from several exhibitors and many other special exhibits, including a group of crotons of remarkable coloring, not for competition, from Giraud Foster. Roses, carnations and violets were staged in great profusion. The vegetable displays of this society rank highest in the country, and this occasion was no exception to the rule. Fruit was also excellent, Mr. Proctor's Gros Colmar grapes being particularly fine. The judges were: T. D. Hatfield, Wellesley; Robert Cameron, Cambridge, Mass.; James Ballantine and George Middleton, Tarrytown, N. Y. Among the trade visitors were J. K. M. L. Farquhar and W. J. Stewart, Boston, A. T. Boddington, New York, George Struck, Summit, N. J., and Mr. Hay, representing H. A. Dreer, Philadelphia.

California State Floral Society.

The dahlia and chrysanthemum exhibit of the California State Floral Society and the Pacific Coast Horticultural Society was held on October 5 in Polito Hall, San Francisco. Notable displays were made by J. W. Bagge, gardener for Eugene de Sabia, Wm. Kettlewell, gardener for George Pope, William S. Tevis, W. H. Crocker, and R. A. Schultz. The judges were Thomas Monroe, F. A. Miller, Charles Mitchell and J. W. Bagge.

COMING SHOWS.

Pennsylvania Horticultural Society.

The schedule of prizes offered by the Pennsylvania Horticultural Society for the annual exhibition, November 12 to 15 inclusive comprises a large number of liberal special premiums offered by friends of the society for chrysanthemum plants and flowers, ferns, crotons and other foliage plants, roses, carnations, fruits and vegetables. Roses and carnations are to be staged on the second day. George E. Campbell is chairman of the committee to arrange for and superintend exhibitions. The chairman of the committees for awarding premiums are as follows: Plants, J. W. Coffish; flowers, A. B. Cartledge; fruits, John G. Gardner; vegetables, W. Atlee Burpee; new or choice plants, fruits and vegetables, Edwin Lonsdale.

Marin County Horticultural Society (Calif.)

Everything points to the exhibition on the 26th being a grand success. The Armory Hall, the largest in town, has been secured and all available

room will be taken. It was expected that some of the eastern growers of carnation novelties or seedlings would come to the front as the prize offered was one of the highest on the list, but no applications from that source have yet been received. John McLaren of Golden Gate Park, San Francisco, Thomas Wood of San Mateo and Sidney Clack of Menlo Park have been secured as judges.

T. P. REDMAYNE, Secretary.

Denison Show Postponed.

On account of the backward condition of chrysanthemums, the dates of the Denison (Texas) flower show have been changed from November 6, 7, 8 to November 20, 21, 22. This action was deemed necessary for the full success of the show, for which a vast number of chrysanthemums are being grown.

The following have been mentioned at length in preceding issues of HORTICULTURE:

Marin County Horticultural Society, San Rafael, Cal., Oct. 26. T. P. Redmayne, secretary.

Monmouth County Horticultural Society, Red Bank, N. J., Oct. 30, 31. H. A. Kettell, secretary.

Morris County Gardeners' and Florists' Society, Morristown, N. J., Oct. 31, Nov. 1. Edw. Reagan, secretary.

New Haven County Horticultural Society, New Haven, Conn., Nov. 6-8. Walter Koella, 58 Bishop St., New Haven, secretary.

Chrysanthemum Society of America, American Institute, 19-21 West 44th St., New York City, Nov. 6-8. David Fraser, Homewood and Penn Ave., Pittsburg, Pa., secretary.

Nassau County Horticultural Society, Glen Cove, N. Y., Nov. 6-8. J. F. Johnston, secretary.

Horticultural Society of Chicago, Coliseum, Chicago, Nov. 6-12. E. A. Kanst, 5700 Cottage Grove Ave., secretary.

Tarrytown Horticultural Society, Tarrytown, N. Y., Nov. 6-8. E. W. Neubrand, secretary.

Massachusetts Horticultural Society, Horticultural Hall, Boston, Chrysanthemum show, Nov. 8-10. W. P. Rich, secretary.

Horticultural Society of Buffalo, Buffalo, N. Y., Nov. 11-17. J. H. Tranter, P. O. Box 994, secretary.

Florists Club of Washington (D. C.), Nov. 12-14. Chas. McCauley, 18th and Kearney Sts., Washington, D. C., secretary.

St. Louis Horticultural Society, Grand and Park Aves., St. Louis, Mo., November 12-15.

Pennsylvania Horticultural Society, Horticultural Hall, Philadelphia, Nov. 12-15. David Rust, secretary.

Montreal Gardeners' and Florists' Club, Chrysanthemum show, Nov. 13, 14, Victoria Rifles Hall, Montreal, Que. W. H. Horobin, 283 Marquette St., secretary.

State Floral Society of Arkansas, Little Rock, Nov. 14-16. Chas. Vestal, secretary.

Rhode Island Horticultural Society, Providence, Nov. 15-16. C. W. Smith, 27 Exchange St., secretary.

ROBINSON'S

In its first year in the commission business has already become the most popular cut flower market in Boston.

It is **CENTRALLY LOCATED, CONVENIENT** and conducted on the same liberal policy which has made our fern and greens business for years the largest in New England.

THE PROOF

C me and see for yourself. If you are a grower or a buyer we can show you how it will be to your advantage to deal with us. Especially will a visit be appreciated on October 29 when we shall

CELEBRATE OUR FIRST ANNIVERSARY

in the Wholesale Cut Flower Trade and all friends who call will be treated right.

HENRY M. ROBINSON & CO., 15 Province St., and
9 Chapman Pl., BOSTON

Worcester County Horticultural Society, Chrysanthemum show, Worcester, Mass., Nov. 14. A. A. Hixon, secretary.

Ontario Horticultural Exhibition, Massey Music Hall, Toronto, Ont., Nov. 12-16. H. B. Cowan, Parliament Buildings, Toronto, secretary.

Denison Civic Improvement League, Denison, Tex., Nov. 20-22. T. W. Larkin, secretary.

Maryland State Horticultural Society, Fifth Reg. Armory, Baltimore, Dec. 3-4. T. B. Symonds, College Park, Md., secretary.

Pittsburg, Pa., is well supplied with Chrysanthemum Shows this fall. The show at H. C. Frick's conservatories, comprising 1,700 plants, opened on October 20. A similar display is to open at A. R. Peacock's on October 27 and the big Schenley Park exhibition is scheduled for November 3 with 13,000 plants in bloom.

PUBLICATIONS RECEIVED.

The Annual Proceedings and Bulletin of the American Rose Society for 1907 has been received. Secretary Hammond is to be congratulated on the very interesting volume he has compiled and on its typographical excellence, and the American Rose Society should benefit substantially from the dissemination of so instructive a report. A number of half-tone illustrations are included. Every lover of the rose should forward dues for the coming year to Secretary Benj. Hammond, Fishkill-on-Hudson, N. Y., and thus contribute their mite towards the good work this society aims to do.

PLANT IMPORTS.

There were entered at the port of New York, October 16 to 22, inclusive, the following plants, etc.:

Via Rotterdam: O. G. Hempstead & Sons, 19 cs. plants; Maltus & Ware, 19 cs. do., 16 tubs do.; Chas. F. Meyer, 80 cs. do.; A. Rolker & Sons, 9 cs. do.; Forwarders, 27 cs. do.

Via Antwerp: H. F. Darrow, 72 cs. plants; Wm. Elliott & Sons, 2 cs. do.; W. Hagemann, 20 cs. do.; O. G. Hempstead & Sons, 201 pgs. do.; Hussa & Co., 63 cs. do., 25 cs. earth, 183 tubs laurel trees; McHutchinson & Co., 30 cs. plants; Maltus & Ware, 354 cs. do., 2 tubs laurel trees; Chas. F. Meyer, 90 cs. plants; August Rolker & Sons, 45 cs. do.; C. D. Stone & Co., 38 cs. do.; Stumpp & Walter Co., 67 cs. do.; J. Ter Kuile, 79 cs. do.; 8 tubs laurel trees; Wakem & McLaughlin, 17 cs. plants; R. M. Ward & Co., 70 cs. do.

Via Havre: H. F. Darrow, 2 cs. plants; Maltus & Ware, 2 cs. do.; J. M. Therburn & Co., 18 pgs. seed.

Via Marseille: R. F. Lang, 13 cs. immortelles; J. P. Rossa, 1 cs. bulbs; telles; Sundry Forw's, 76 cs. bulbs.

Via Southampton: Maltus & Ware, 4 cs. plants, 9 cs. seedlings; C. D. Stone & Co., 9 cs. plants; Patt Bros., 69 cs. bulbs; Vaughan's Seed Store, 1 cs. plants.

Via Hull: H. F. Darrow, 1 cs. plants; Maltus & Ware, 4 cs. do.; C. D. Stone & Co., 38 cs. do.

Via Liverpool: H. F. Darrow, 4 cs. onion seed.

From Hamburg: R. F. Lang, 18 tubs plants; Vaughan's Seed Store, 8 bags seeds; To Order, 1 cs. plants.

MR. PARSONS MISREPRESENTED.

Commissioner Samuel Parsons of New York parks has denounced as "a tissue of falsehoods" the charges which had been published in a sensational New York daily that in his former capacity as landscape architect he had profited personally through the sale of trees to the city at an advanced price, and that in his recommendation for the expenditure of \$2,500,000 on park reconstruction he had been actuated by the business that this would bring to companies in which he is interested. Mr. Parsons asserts that he has no financial interest whatever in Parsons' Sons & Co.'s nursery, the Rare Tree and Plant Company, or the Landscape Engineering and Construction Company, and denies that these companies have ever enjoyed any advantages over other firms in the sale of trees in the park department. Gentlemen among our acquaintances who are in a position to judge correctly, have expressed to us personally their confidence in Mr. Parsons' integrity, and we are willing to take Mr. Parsons' word every time as opposed to the disreputable sheet that attacked him.

A CORRECTION.

We are advised by Messrs. Robt. Scoot & Sons that our mention of Killarney and Liberty as the parents of rose Mrs. Jardine was incorrect. The rose is a product of seedlings of Messrs. Alex. Dickson & Sons, but whether named seedlings or otherwise we are not informed. Mrs. Jardine will be on exhibition in Boston at the Chrysanthemum Show November 8.

Seed Trade

Most of the leading growers of peas have sent out preliminary estimates of deliveries on this year's crops, and as a rule they are fully as low as has been predicted in these columns from time to time. The quantity of "tramp" peas is likely to prove smaller than usual, and no one will use such seed excepting those who look at everything from the standpoint of price only and as to canners, only those who pack cheap goods and buy the cheapest of everything connected with their business. It is quite useless to talk quality to such persons, and only those who have junk to sell and can "make the price," need apply.

Estimated deliveries on "canners' peas" by one or two of the largest growers are very low, averaging from 25 to 40 per cent. There will be fireworks from the canners, no doubt, but if the growers are delivering their full crops less seed stock, they cannot do more. Those firms making these very light deliveries are liable to find life a thorny path when it comes to booking contracts for the 1908 crop, and some of their representatives may need both sympathy and plasters. The developments of the next four weeks promise to be most interesting.

Nothing definite can be said about beans as yet. But few crops have been delivered, and it will doubtless be December before reliable information will be at hand. That the crop has suffered more or less severely as a result of frost and excessive rains cannot be doubted, but as large reserves were carried from last year's crops, there will be no famine in beans excepting possibly a few special varieties which are elusive short croppers, and should be eliminated from the seedsmen's lists.

Such information as has come to hand during the past week regarding this year's sugar corn crop confirm the gloomiest predictions made concerning it. Without a single exception, every known grower says the crop is in a desperate way, all of the late varieties being yet soft and much of the corn still in the milk. What this means requires no seer to realize and conditions are even worse than we dared believe at any time. Even early sorts are said to be very poor and it really looks as if there is little between us and a seed corn famine except such stock as may have been carried from last year. These are not large, and prices are likely to soar before July 1st next, and the highest prices yet named this season will look cheap in two or three months' time.

The latest information of the vine seed crop indicates that it will prove materially shorter than has been generally believed. Detailed information is not yet at hand, but as soon as received it will be given in HORTICULTURE.

Concerning the general line of small seeds, there is little to add to what was given in a recent issue of this paper, but any new developments of importance will be promptly furnished.

Grave complaints as a result of using imported onion seed the past season have reached us, and it is said that several well-known Canadian seedsmen are seriously involved.

Bulbs grown from this seed are said to have developed a very large percentage of "thick necks," and the crops as a whole are reported to have been of so poor a quality as to be practically unsaleable. Here is a concrete example of the folly of trying to save a few cents a pound on seed. Good seed was procurable, but these dealers preferred to risk unknown stocks, because, forsooth, they were cheaper. Verily, they have received their reward.

Clover seed is again in short supply. Last year thousands of bags were imported from Europe, which kept prices somewhat within bounds. But the European crop is somewhat short this year, and they will have a smaller exportable surplus, and it is possible that new high price records may be established for this year's crop. This is an agricultural commodity for which the farmer may have to pay a long price, and his groans and lamentations will then be heard in the land.

Another vegetable seed which is in short supply is the garden beet, the severe winter having played havoc with this crop. We are dependent largely upon Europe for several strains of turnip beets, and the crop abroad is estimated at not more than half of that of last year.

Speaking of crop shortages, special mention should be made of tomato seed, and because of cold, wet weather during the fall the crop ripened very slowly, and prices are likely to rule high, though not necessarily at famine figures. Owing to the high prices for canned tomatoes, jobbers and wholesale grocers are eager buyers of the 1908 pack and high grade pedigree seed will be in active demand by canners, and should bring strong prices.

Flower seeds of the early ripening sorts are generally in good supply. This includes Queen of the Market and other early asters. The late asters are as yet in doubt on account of threatening weather, but it is not unlikely that there will be a shortage of paeony-flowered Victoria and other late sorts. There will also be a considerable shortage of nasturtiums. The new crop of these and, in fact, of many other seeds will be much below the average in vitality and germinative power. The California crop of sweet peas is much below normal, and several seedsmen are already looking to Europe to complete their stocks, but it is difficult to predict at the present time what their success there may be, stocks of the leading varieties being reported in short supply.

Everything considered, the outlook for seedsmen is very rosy, and despite more or less severe shortages in many lines, it will be their own fault if the coming year does not bring them a handsome profit in their business.

The selection of Mr. F. W. Bruggerhof (president of J. M. Thorburn & Company), to be the president of the Wholesale Seedsmen's League for the coming year, has given great satisfaction to the entire seed trade. Mr. Burnett Landreth was chosen secretary and treasurer of the league for the same period.

Messrs. W. Atlee Burpee & Company are meeting with a most splendid re-

ception for their "Burpee's Two New Spencer Sweet Peas"; in fact, orders have already poured in for a great many thousand packets. It certainly would seem as if no seed firm doing a catalogue mail business, either in this country or Europe, would be without these two taking floral novelties for 1908.

On every side, and by our entire seed trade, the greatest sorrow is felt and expressed for the death of Henry Mette of Quedlinburg, Germany. The deceased was a comparatively young man, and esteemed by a large circle of friends. It has been announced that the renowned seed business which bears his name will be continued as in the past.

Messrs. Peter Henderson & Company of New York are doing some very effective bulb advertising in the local New York and Brooklyn daily newspapers. It is really wonderful how the small flower garden trade for hardy bulbs is every year increasing in and around all our large cities—that is, the strictly local business as apart from the mail trade.

CATALOGUES RECEIVED.

Vaughan's Seed Store, Chicago and New York.—Fall edition of Vaughan's Gardening Illustrated.

United States Nursery Co., Rich, Miss.—Fall and spring catalogues of Field Grown Roses, Peonies, etc. An excellent trade list.

Central Seed and Bulb Company, Chicago, Ill. Descriptive catalogue, 1907. A profusely illustrated price list with colored title page of nasturtiums.

New England Nurseries, Inc., Bedford, Mass.—Specialties for Autumn Planting. A summary of the most valuable varieties of evergreens, roses, hardy plants, bulbs, pot-grown strawberries, etc. The New England Nurseries bid fair to fill a place of leadership in the rapidly growing fancy nursery trade of New England.

Meehan's Manual of Outdoor Plants, 45th edition, issued by Thomas Meehan & Sons, Inc., Germantown, Pa., is, as might be expected, a very full and accurate list of ornamental trees, shrubs and herbaceous material, profusely illustrated and typographically handsome. A colored plate of Meehan's Mallow Marvels accompanies the book.

BULBOUS PLANTS AND TUBEROUS ROOTED PERENNIALS.

Read at S. A. F. Convention, Phila., By
E. V. Hallock, Queens, N. Y.

The most interesting, the least known, and the most misunderstood of flowering plants, are bulbs. In the form of a bulb the latent flower is cared for more easily and longer than in any other form. Bulbs have been used as sustenance for armies, and the caladiums are now used to some extent by Spanish-speaking people, and through the South, as an article of diet.

This paper will not touch on what are known as Holland bulbs but will embrace summer-flowering and winter-flowering bulbs that are used by the amateur and the professional. The profession of raising bulbs for market and for the amateur is vastly different from the profession of raising flowers for market. The person who raises the bulbs seldom sees the flower in so great perfection as the man who flowers the bulb. There are many skilful raisers of bulbs among the amateur cultivators, and in fact I think many amateurs have come to a better understanding of the wants of many kinds of bulbs and raise them in greater perfection, than any profes-

(Continued on page 548)

HERBACEOUS PAEONIES

We are in possession of a fine consignment of roots from Holland, true to name, from 4 to 5 eyes to each division. Varieties such as Modeste Guerin choice rose, Officinalis Rubra red, Festiva white, Mutabilis rose, Rosea Magna cherry red.

BULBOUS PLANTS AND TUBEROUS ROOTED PERENNIALS.

(Continued from page 547.)

sional. These amateurs, however, do not cover a very wide range of bulbs.

Bulb Enthusiasts.

Unless a person has seen the late Peter Hanson holding a bulb in his hand, rapt in blissful contemplation, slowly telling the wants of the bulb in cultivation, describing its habit and its flower minutely, he has no idea of what a hold on the affection a bulb could exert. Mr. Hanson's time and devotion were expended on the lily. He over-estimated its necessities. As I have always found, if you can get a bulb growing you can dispense with many of the directions for growing, but Mr. Hanson, no doubt, took as much pleasure in catering to the growth of bulbs as he did in seeing their flowers.

Mr. Huftelen is the most skilful and successful raiser of *Lilium tenuifolium* from the seed I have ever seen. I think his product exceeded for many years over 30,000 bulbs, of which we bought yearly, during that time, at least 20,000 bulbs at \$15 a hundred—rather good pin-money for an amateur on so little known a variety.

I think it is now about time I got down to the subject of bulbs and bulbous plants. I well know that a paper of this kind to a man who does not raise bulbous plants in a commercial way or as an amateur is positively without interest. Of course, any one knows that a person could talk all day on one class of bulbs, but I propose to skim the subject very lightly.

The Most Valuable Roots.

The most useful, valuable and generally raised classes of bulbs, to my mind, are as follows; their relative proportion of value is indicated by the order in which they are named:

Gladioli; Lilies; Freesias; Peonies (at present a highly worked fad); Tuberoses, for garden and export; and Iris, the Japanese and German, the forcing Irises, and many beautiful species.

Professionally speaking, the introduction of so important a plant as the Freesia—useful and beautiful as it is, so easily kept and readily flowered by both the amateur and the professional—was a fiasco, in the sense that no particular person or firm was responsible for its introduction, and no considerable amount was made by any one with this plant that is so generally used.

The *Amaryllis*, to me, has always been an important family. The habits of most varieties can be so changed that they will flower outside in summer or inside in winter. I much regret that this plant is not more largely grown in this country. The tuberous-rooted begonias have taken their place as summer-flowering bulbs, as well as winter-flowering.

Caladium esculentum is rather largely used as a summer foliage plant.

Cannas are the most important rhizomatous class of plants. Every one knows a good deal about this class of plants. A *Canna* Society has even been suggested.

The Cinnamon Vine (*Dioscorea Batatas*) has some value, particularly to

the person who sells the bulbs. It is a clean, hardy vine, and one peculiarity is that the root grows deeper and deeper in the ground, the older it gets.

Hyacinthus candicans first attracted attention in this country at the Philadelphia Centennial.

Incarvillea is a coming plant, particularly as a garden flower, and undoubtedly can be forced. It has a large, fleshy, good-keeping root; foliage rampant, growth somewhat resembling a fern; immense spikes of gloxinia-like flowers. If you plant five hundred strong roots, the flowers will absolutely come in bloom the same day. It is claimed by some that the roots are hardy.

Madeira Vine bulbs keep almost indefinitely and are, therefore, a good bulb for store trade.

Montbretias. Why this plant is so neglected, I cannot tell. It has many good qualities, is easier to raise, easier to keep and will continue in flower much longer, than the *gladiolus*. The sprays are exceedingly graceful and beautiful. The newer varieties are very striking. The bulbs are nearly hardy.

Oxalis. The summer-flowering varieties of this bulb are largely planted and have some merit, while the winter-blooming sorts, as *Lutea*, *Bowiei* and the so-called Bermuda Buttercup, are among the best of the winter-flowering plants.

Peonies. Can I tell the members of the Peony Society anything about this plant? I think not; but, by the way, it just occurs to me to say that I have bought the past three or four years, from the most reliable firms who raise peonies, some twelve or fifteen of the best varieties, several plants of each kind, for my private garden. When they bloomed this year, should you take out four of the best colors there would be nothing worth speaking of left. Marie Lemoine is what I call a good peony.

Some Mistakes of Dealers.

There are two points I wish to bring to the attention of the profession and the vendors of products.

We all catalogue the different kinds of bulbs as though they were ready for delivery at the same time, and in most cases we try to deliver them. Is it not about time we should state after the description of certain bulbs that they can only be delivered at such and such times? And should not the buyers be taught to wait until the bulbs are in condition to deliver, instead of insisting that they all be delivered at once? Is it not about time that reliable firms should state that such and such varieties will never bloom, or, if in a very rare case they do bloom, that they are not good for anything? Millions of *Anomatheca cruenta* have been sold. Should five out of a hundred of these bloom, as poor as the flower is, it would be a large percentage. Seedling *gladiolus* has been sent to this country for this plant.

How many people here have seen *Lilium Humboldtii* and *Washingtonianum* and *parvum* bloom? I have never seen twelve spikes of these varieties of lilies outside of California, and I have sold tons of thousands of the bulbs, and exported a number each year. This will serve for an evening-up process. *Lilium pardalinum* from

California is a good-keeping, free and sure-flowering lily. Ninety-five per cent. of the bulbs should bloom. *Lilium Parryi* is a very handsome yellow variety from California and is not difficult to bloom. The California bulbs, like *Calochortus*, *Brodiaea*, *Erythronium*, *Comassias*, are all beautiful things and really can be flowered if their requirements of cultivation are met.

On the line of *Lilium Humboldtii*, I will ask what is the use of selling *Lilium candidum* in the spring, and yet many do it.

The Most Useful Lilies.

I suppose it would be well to mention what I consider the most valuable varieties, or species, of lilies. The auratum and varieties are a magnificent class and very popular with most amateurs. You may as well say that the bulbs of the auratum cannot be grown in this country but are imported each year. The varieties of *speciosum* I consider among the most reliable sorts for the amateur to plant.

Double Tiger and Single Tiger and our native lilies, *canadense* and *superbum*, are being used in greater quantities each year, on large estates and in gardens of all kinds. They are low in price, reliable bloomers and very graceful, particularly *canadense*. The *elegans*, or *umbellatum*, or *Thunbergianum*, are very reliable bloomers, bulbs easy growers and good keepers, and many varieties are very handsome. Of course we could easily talk all day on the *Lilium* family, but we shall have to stop somewhere. *Lilium candidum*, and what is known as the Bermuda Easter Lily, are the most important ones for florists' use. *Lilium candidum* should be planted outside, the latter part of September. To me, it is a more beautiful lily than the Bermuda Easter Lily. There are several varieties of *candidum*, but the broad scale, large bulb variety raised in the north of France, is the only one worth forcing. There has been more said, and more can be said, on the Bermuda Easter Lily than ten such papers as this would contain. I think the subject has been pretty well threshed out up to the present time.

Many varieties of lilies have been dropped from the lists of late years, which is probably a good thing. Many sorts could be furnished in good condition if the purchaser were willing to pay for the necessary trouble, and take and plant the bulbs at the proper time. *Lilium Philadelphicum* has almost disappeared from our lists. It can be grown and flowered, but the bulb is so small and the scales so open, that not one in a thousand will bloom. *Lilium Catesbaei* and *Grayii*, also native lilies, are seldom seen except in botanical collections.

Fallacies in Cultivation.

There are some fallacies in cultivation. Many directions for growing different varieties of plants were put in type a number of years ago, when things were thought to require very careful and necessary cultivation. There is a lot of this type that seems to be set up at the present time. I will take as an illustration *Iris Kaempferi*. In 1878, we bought Professor Pringle's entire stock of this plant. There were many very fine

Dreer Specials in Ferns

PTERIS WILSONI We feel very enthusiastic over this fern; it is not only the most graceful, but also one of the hardest of the crested forms of *Pteris*, useful in fern dishes as well as for growing on into specimen plants in 6-inch pans; in this size it appeals to every buyer and meets with ready sales. We have a fine lot of 6-inch pans, \$4.50 per dozen; \$35.00 per 100; 3 inch pots, \$6.00 per 100.

Adiantum Farleyense

A fine lot of 6-inch pots now ready, \$1.00 each.

Adiantum Rhodophyllum

The miniature *Farleyense*, as it is sometimes called, very fine plants,

3-inch pots, \$10.00 per 100.

Adiantum Macrophyllum

The bronzy red or almost crimson foliage of this variety during the Fall months appeals to all. This is the first time we have been able to offer it in quantity and at a popular price; fine 3-inch pots, \$15.00 per 100.

Adiantum Croweanum

We offer a fine lot of this, the most useful and profitable of all the Maidenhair

Ferns for cutting; fine 3-inch pot plants, \$2.00 per dozen; \$15.00 per 100. \$140.00 per 1000.

Nephrolepis Amerpohlii

The Philadelphia Lace Fern—This

is the latest addition to the Ostrich Plume type and is certain to prove a welcome and popular variety, holding for delicacy and gracefulness the same position among the *Nephrolepis* that *Adiantum Gracillimum* does among the Maidenhair Ferns. The pinnae are so finely divided that it reminds one of a piece of fine lace; the fronds are broad and of a depth which gives them a cushion-like appearance. It forms a beautiful specimen and is admired by everyone who sees it. 50c. each; \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000.

Nephrolepis Todeaoides

Todea, or Flimsy Fern-Like Nephrolepis—This is an English intro-

duction that has received a first-class certificate both from the Royal Horticultural Society and from the Royal Botanic Society of London, and is likely to become a most important commercial variety. While in a general way it reminds one of an exceptionally well-grown plant of *N. Elegantisima*, it is entirely distinct from this and all others, in its strong yet compact growth and its bold heavy foliage, which is distinctly tripinnate or three times divided. Specimen plants which we now have growing are admired by everyone and we have great faith in its future. 4-inch pots, ready Oct. 1st, 50c. each; \$5.00 per dozen; \$40.00 per 100; 6-inch pots, ready now, fine plants, \$1.00 each.

A fine lot of Ferns in 3-inch pots, assorted varieties for Fern dish work. \$6.00 per 100, \$50.00 per 1000.

Asparagus Plumosus Nanus

2 1/4 in. pots, 60c. per doz., \$4.00 per 100; 3 in. pots, 85c.

per doz., \$6.00 per 100.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

varieties, and many of the kinds are sold today. We noticed that the clumps when being subdivided for planting had a large center that was entirely dead or dried up; in many you could put your hand right through the center. This came from leaving the clumps too long before subdividing. We were told that this plant required damp, low ground and if it could be covered by water occasionally it would be better. We planted them on common Long Island plains soil, two feet of soil above clear sand, fifty feet above water. William Falconer, in describing our plantation of iris, said he walked "waist deep" through the plants. When transplanting a field of these, we used a cart and wheelbarrows, and subdivided them with an axe. One year we left several hundred plants along the driveway on top of the ground, when transplanting in the spring. In the fall these plants were alive. Personally, I don't think it is necessary that *Iris Kaempferi* should be flooded with water to produce a good growth.

As this subject seems to be large, and it is necessary and proper that this paper should be short, it is pretty difficult to give anything of real value. But the subject may excite an interest in more people than have ever given it a thought before, and I assure you that it will furnish you a new interest so far as you desire to go.

Bulbs represent one of the most wonderful provisions of nature in the vegetable kingdom. Those grown in arid or desert countries conserve their vitality intact longer than bulbs grown anywhere else. The Mexican bulbs,

grown mostly in arid wastes, will remain in perfect condition when kept out of the ground a year. I believe that bulbs of *Amaryllis formosissima* will remain two years out of the ground in good condition. It seems to be a provision of nature to preserve the life of a plant by building around the germ a bulb and this is one of the most convenient and compact of protective forms. The most striking fact about all bulbs is their endless variety and great beauty, often extending to magnificence. It is this which gives fascination to the subject and makes the raising of bulbs a labor of love.

SAN FRANCISCO FLORISTS RE-BUILD.

It gives us much pleasure to present the accompanying picture of a new building being erected in San Francisco by Pelicano, Rossi & Co., for florist purposes. All the trade, we are sure, will rejoice to see these evidences of progressiveness, courage and prosperity

among the florists who suffered so severely in the earthquake fire. This building is located on Kearny street, within half a block of the firm's location prior to the fire. It will be completed December 1, and will be run in conjunction with their store, now at 1345 Sutter street.

OBITUARY.

Francis W. Brewer, the man who did so much to make Hingham beautiful by giving to the town most of its shade trees and by planting many of them with his own hands died at his home in Centre Hingham, Mass., on October 26, aged 61 years. He was an ardent exponent of floriculture and horticulture, and his estate is called one of the most beautiful on the South Shore.

ELBERON HORTICULTURAL SOCIETY.

The winter session was resumed on October 7, when the following officers were elected for the ensuing year: Pres., Henry Wood; vice-pres., Anthony Bauer; secy., George Masson; asst. secy., Adam Worth; treas., James Kennedy.

The society held a dahlia show on October 14, when a fine display was made. The principal prize winners were James Dowlen, Seabright, for display of dahlias in vases; E. O'Rourke, collection of dahlias; A. Bauer, vase of dahlias arranged for effect; J. Kennedy, vase of cosmos arranged for effect; Peter Murray, collection of vegetables. Other exhibitors were B. Wych-off, W. Robertson, Henry Wood and J. Goodwin.

The next meeting will be held on November 4, when the newly elected officers will be installed.

GEORGE MASSON, Sec'y.

THE TORONTO GARDENERS' AND FLORISTS' ASSOCIATION.

The regular meeting of the above association was held on Oct. 15, E. Dale of Brampton in the chair. A very interesting discussion took place on the arrangement and planning of the floor space at Massey Hall for the coming Ontario Horticultural Exhibition and also on the Hanging Garden, which it is proposed by the management to place in the centre of the hall about 14 feet above the floor.

E. Dale gave a most practical and interesting talk on roses and their culture, describing the various methods which they have tried at Brampton from time to time. Mr. White, manager of the Bedford Park Floral Company also gave his methods and their results. A vote of thanks was tendered Mr. Dale for his most interesting address. E. F. COLLINS.

SOUTHAMPTON HORTICULTURAL SOCIETY (N. Y.)

The regular meeting of this society was held on October 14, President Clark in the Chair. There were several interesting discussions, the principal one being on the best method of growing dahlias. J. Ager gave a very instructive address on the care and management of a vegetable garden. During the winter meetings will be held on the second and fourth Mondays of each month. U. G. AGER.

DETROIT FLORISTS' CLUB.

November 1st has been selected as the date for the club's outing to Mt. Clemens. Al. Pochelon, Wm. Hielscher, and Walter Taepke have been appointed entertainment committee.

On November 19 a private exhibition will be held at Harmonie Hall at which chrysanthemums will be the principal feature. The judges, Messrs. Thomas Brown, Robert Unger and Al. Poche-ion, have been given power to distribute \$25.00 in prizes.

CLUB AND SOCIETY NOTES.

At the meeting of the New Bedford Horticultural Society on October 14 H. A. Jahn spoke on "The Cultivation of Bulbs."

The newly elected officers of the Bloomington (Ill.) Florists' Club are, John Gee, president; George J. Foster, vice-president; Ray Smock, secretary and treasurer.

The Tri-City Florists' Association met on October 10 at the home of President Wm. Knees in Moline, Iowa. H. G. Bryant of the Davenport Nurseries led in a discussion on trees, lawns and shrubbery. The next meeting will be held with Otto Boehm, Davenport.

The first horticultural society west of the Mississippi River was organized at St. Louis, Mo., in 1847, and its first exhibition was held on May 1st, of that year. Thomas Allen was president. Meetings were held monthly and one of the first acts was to elect A. J. Downing as an honorary member.

The Chamber of Commerce of Oakland, Cal., are making an effort to have the State Horticultural Association hold its next flower show in May at Idora Park. Florists from all parts of the state will be invited to exhibit, and valuable prizes will be offered. B. P. Miller has been appointed to confer with the association.

Flower Market Reports.

BCSTON The market shows a falling off from last week on all lines. Roses and carnations show weakness and the demand for everything is unsteady and erratic from day to day. Chrysanthemums seem to sell fairly well and the surplus is handled satisfactorily so far. Lily of the valley sells well. For violets the demand is fair, but quality generally is poor. The first sweet peas of the season from under glass have appeared at Welch Bros., and they are very fine.

The shop windows are **BUFFALO** now filled with chrysanthemums and decorated in genuine autumn style, and good displays are seen among the downtown florists. The supply at the wholesalers is abundant, and such varieties as Willowbrook, Duckham, Josephine and others were seen in good quality, while a good many of the ordinary kinds move at a slow gait. Roses, Beauties in particular, have not moved too freely the past week. Select Bridesmaids have not been too plentiful, though Chatenay, Killarney and Kate Moulton have taken their place to good advantage. Kaiserin, Detroit and Carnot are still with us. Dahlias, cosmos, gladioli and asters are gradually moving out of existence, especially the latter. Cosmos has been a drag. Carnations are becoming more plentiful daily; the demand is fair with prices a little weaker. Violets are good and sell well. Lily of the valley is of fine quality and plenty of it; in fact, too much at times, while green goods are in good supply.

Business has been satisfactory **DETROIT** factory all around with a scarcity of stock in every line. Chrysanthemums are coming in more freely, but from all appearances this season will not see that large crop and consequent waste we had one year ago. Those of the trade who cater to the bon ton trade are quite rushed with weddings, receptions and dinner decorations.

The cool, bracing **INDIANAPOLIS** weather of the past week has quickened the trade and the volume of business is increasing. A few light frosts the past week killed all outside vegetation. Chrysanthemums are now quite plentiful and at a much lower price than a week ago. So far this year they have not met with the active demand that has usually prevailed at this season. All roses are getting into winter form, some very choice Beauties being on the market. Carnations are being much called for, the best stock finding ready sale. Lilies are a scarce item at the present time. There is a little demand for violets the quality of which is not up to the standard. Lily of the valley and orchids are in good supply and are assured of a good call during the wedding season. All green goods are in good demand daily.

Business is at a **NEW YORK** standstill. The larger chrysanthemums are not bringing what they were the year previous. Carnations are selling fairly well. All outside blooms are spoiled from the heavy frost on Tuesday last.

Chrysanthemums Cattleyas Wild Smilax

The LEO NIESSEN CO., Wholesale Florists

1209 Arch St., PHILADELPHIA

Open from 7.00 a. m. to 8.00 p. m.

PHILADELPHIA Demand has been very fair and a distinctively better tone now prevails. Roses are improved in quality generally. A limited cut of the new Irish rose, Mrs. Jardine, is arriving, and is eagerly snapped up. Carnations have also hardened up and last much better. Chrysanthemums, while fine, are not yet sensational as to quality, and much low grade stock is coming in, the latter being very poor property. Dahlias are still to be seen in limited quantity but most of the big growers announced their last shipment on the 21st ult., while some of them finished up even earlier. The lily of the valley market is in healthy shape, with an added zest from the advent of the new giant variety, "Fortin," which has now become plentiful enough to be a commercial possibility. Cattleyas are rather too plentiful and Easter lilies are slow on account of the chrysanthemums. Leucothoe sprays are now arriving of extra fine quality and find ready sale. Wild smilax is also in good demand, but ferns and asparagus go rather slow, quantities of autumn foliage being used at present.

WASHINGTON Conditions in the retail market are improving each day, and all the stores are beginning to assume their wonted air of winter activity. There was a killing frost the night of the 21st and but little vegetation escaped, so dahlias that have been such a demoralizing medium in the market are now virtually things of the past. Violets are coming in in rather better quality and more of them. Chrysanthemums are in their prime and demanding good prices. Carnations are still in very limited quantities but are improving in quality.

ORANGE, N. J., TRADE NOTES.

Charles Maillard of Newark has opened a branch store upon Main street, Orange.

Emil Decker has just put in two new Volunteer No. 7 1-2 boilers of make of W. H. Page of Norwich, Conn., and made other preparations for increased winter trade.

Henry Hornacker has made extensive additions to his plant on Central Avenue, one house 18x104 for carnations, one 16x104 for miscellaneous stock and a propagating house 5 1-2x96. He has installed two Hitchings No. 16 boilers.

NEWS NOTES.

A. Warendorff has only one store now, the one located at 1193 Broadway, New York.

The packing house at Evergreen Lodge Garden, Clarksville, Tenn., was burned on October 18; loss \$600, partly insured.

Theodore Lang, formerly of 670 Sixth Ave., will shortly open a florist store at 53rd street and Madison avenue, New York.

Oliver Croucher, florist of Hudson, Mass., has made an assignment to C. P. Tucker, who will sell the property at auction after it has been appraised.

John McKenzie, for the past fifteen years located on Somerville avenue, Cambridge, Mass., has removed to the corner of Massachusetts avenue and Davenport street.

The contract for the landscape plan at Evergreen cemetery, Norfolk, Va., has been awarded to G. H. Brown, formerly of the Department of Agriculture, Washington, D. C.

A. J. Fellouris, 52 W. 28th St., New York, has filed a petition in bankruptcy; liabilities, \$11,892; nominal assets, \$2,218. Of his liabilities \$8,750 are contingent for store rent.

Fred B. Barrington, the Gloucester florist, has taken a five years' lease of the property of J. F. Wonson, 3d, at East Gloucester, Mass., and has begun to stock the greenhouse there.

Lehnig & Winnefeld of Hackensack, N. J., are sending to Moore, Heutz & Nash a novelty in some very fine coxcomb plants in 5 and 3-inch pots. They sell readily and are very fine for window decorations.

A fire of incendiary origin destroyed the potting house of E. W. Pearson of Newburyport, Mass., on the morning of October 17. The loss is about \$1,000. The buildings were insured. Many plants escaped injury, but the carnations will be a total loss.

The case of Joseph Comley, florist, of Newburyport, Mass., against the Newburyport Gas and Electric Company, to recover for damage to his flowers by escaping gas from the main, has been taken from the jury and referred to an auditor, whose decision will be final.

"SOLD OUT."

Niagara Falls, N. Y., July 17, 1907.
HORTICULTURE Publishing Co.

Gentlemen: Please discontinue our adv. for Begonias which you inserted last week. The whole lot was taken by one firm, and to date it is necessary that we return cheques amounting to nearly \$200.00.

We are greatly pleased with the adv., although we regret that we have to return cheques on hand.

Very truly yours,

E. A. LUTLER & SON.

"SOLD OUT."

August 28, 1907.
HORTICULTURE.

Discontinue all my advs. Sold out. Daily have to return cheques for goods cannot get for inquirers.

(Signed) I. M. RAYNER
Greenport, I. I., N. Y.

"APPRECIATED IN INDIANA."

HOETICULTURE Publishing Co.,
Boston, Mass.

Dear Sirs:—Enclosed you will please find check for amount due you to date. Please accept our thanks for waiting on us and for the large amount of inquiries and business your magazine has sent to us. Sincerely the little ad. we placed with you has done us a lot of good and as we cannot keep up with the orders at present we will kindly ask you to discontinue the ad until we notify you again, later on.

Respectfully yours,

THE HEIM SUPPORT CO

"IMMENSE BUSINESS."

Would say and glad to say that I am sold out of my pansy stock. Thanking you very kindly for the immense business your paper has alone favored us with.

Yours truly,

WM. DOBBERTIN.

Rochester, N. Y., April 29, 1907

"RESULTS SATISFACTORY."

Sept. 26, 1907.
Please discontinue ad; will have something else later. Results satisfactory.

W. H. & C. B. NEWMAN,
Akron, N. Y.

"PLANTS ALL SOLD."

October 7, 1907.
HORTICULTURE:
Please discontinue ad. Plants are all sold.

Yours respectfully,

BLANKSMA BROS
Grand Rapids, Mich.

WHY

PAYS.

"ACCURATE REPORT."

June 26, 1907.
HORTICULTURE Publishing Co.

Mr. Wm. J. Stewart, Editor:

Dear Sir: Allow me to congratulate you upon the accuracy of your market reports. "Comparisons, of course, are odious" but I must say that the reports in HORTICULTURE in my opinion (at least as far as this market is concerned and that is the only one in which I am conversant with the conditions) more nearly hit the nail on the head and size up the market better than any of your contemporaries. At least that is the belief of

Yours sincerely,

C. M. A

"WOULD HATE TO DO WITHOUT."

West Newton, Mass., July 3, 1907
Hort. Pub. Co., Boston, Mass.

Dear Sirs:—Enclosed you will find check for \$1.00 to pay subscription on paper "HORTICULTURE" which I would hate to do without.

Very truly yours,

H. M. SHURBERT
1600 Washington St.

"WELL LIKED."

St. Albans, Vt., July 15, 1907
Your Paper is well liked. Find enclosed \$1.00.

HENRY BRYANT.

"INDISPENSABLE."

Doylestown, O., July 15, 1907.
Gentlemen:—Find enclosed money order for \$1.00 for HORTICULTURE another year. We feel we cannot successfully manage our greenhouse without it, and at present we are building an 80 ft. addition.

Yours respectfully,

Wayne Co., Box 307.
C. A. MUSSER.

"IN HIGH ESTEEM."

We hold your journal in high esteem and welcome its weekly appearance.
Very truly yours,
THE ELM CITY NURSERY CO
New Haven, Conn.

"PARTICULAR PLEASURE."

Pennsylvania, Sept. 14, 1907.
Dear Sir:—Allow me to congratulate you upon the manner in which you handled copy in connection with the recent convention in Philadelphia, and I would also like to acknowledge particular pleasure in the notes you publish from the other side of the water. E. P.

THERE ARE A LOT OF LAST THINGS to do around your house at this time of the year.

Things that you haven't had a chance to do until now. There is ventilating apparatus, for instance. Florists are still ordering our Oil Itself Gear for houses put up the early part of the season, and for the propagating houses that open gear which so long ago won its name for speed and great power. All the good points of the open gear are in the Oil Itself, with gear and mitre both completely enclosed and working in oil. Then it has the added advantage of taking up considerably less room. Write us.

NEW YORK.

EAVE PLATE TALK

IT'S not so many years since we used a wooden eave plate, but that was then — this is now; and the man who keeps on using a wooden eave plate to-day, either doesn't know thoroughly what our Ice-Clearing Eave Plate is and how it adds tremendously to the strength and life of the house, while decreasing the shade by more than a half; or he just plain won't listen or look into it. We have a circular that tells about the eave plate question in a "stop all argument" kind of way. Send for this circular.

We make every part of a greenhouse but the glass. We sell any part.

LORD & BURNHAM CO.

Greenhouse Designers and Manufacturers

1133 BROADWAY, cor. 26th Street, N. Y.

BOSTON Branch: 819 Tremont Building

PHILADELPHIA Branch: 1215 Filbert St.

Just another case of inside information on the U-Bar greenhouse. As we said before, it stops all argument when you get on the inside of one. No amount of discussion can then prejudice you against a construction that is a combination of rafter and roof bar in one, and which is as light and beautiful as U-Bar houses undeniably are. But if it is not possible to go where a U-Bar house is, let us send a catalog — it is the next best thing. **Pierson U-Bar Company,** Designers and Builders U-Bar Greenhouses, Metropolitan Building, 4th Avenue and 23rd Street, New York.

BLACK-SPOT

A neatly kept house of Beauties, in a thrifty good growing condition, is at all times a pleasant sight and the grower who can carry his stock along during the transition from natural to artificial heat, without contracting mildew or black-spot is indeed a "grower."

Now that firing is once again on the program, our chances of escaping a visit from either of these pests are more favorable. Still, our greatest safety lies in our ability to avoid those conditions favorable to the germination and growth of these diseases.

Root action being slower now than during the summer, good judgment must be used when watering, as any check to the growth caused by overwatering is almost certain to be followed by a visit from black-spot. Care in ventilating is particularly necessary to keep it from getting a start and should be so regulated that no sudden chill may occur, and also at the same time prevent as much as possible any condensation from taking place. This latter may be accomplished by keeping up sufficient heat to cause a gentle circulation of air, thus preventing stagnation.

Watering and syringing should be done as early in the day as possible, so that the foliage may have a good chance to dry before night. Wet foliage over night is a fruitful source of this trouble, and should if possible be avoided.

If after using every precaution, black-spot makes its appearance in the house, no time should be lost in going after it. Pick off and burn every affected leaf. Some growers are woefully negligent in this respect, and instead of burning the diseased leaves, just dump them outside the door along with the rest of the rubbish. This practice is, to say the least, very unsafe, as we cannot say that some of these leaves will not be returned to the house, thus augmenting, rather than diminishing the trouble.

If the disease shows a tendency to spread it is advisable to use the carbonate of copper compound (cupram) using five ounces of carbonate of copper to three quarts of ammonia and sixty gallons of water. This mixture may be applied either with an ordinary bucket pump, or an automatic sprayer. With the latter, the writer's experience has been confined to the simplicity sprayer, which has proven very satisfactory, as, with this style of pump, the operator's attention may be devoted entirely to the spraying, thus saving time, material and patience. All dead and decaying leaves, and weeds should be removed from the benches and walks and burned, as, apart from the danger of disease lurking in this refuse, it is here that thrips and other insect pests find a refuge from tobacco fumes. Tying the plants so that the air can circulate freely among the foliage, will also prove helpful in combating this dread disease.

J. E. Simpson

Eucharis Stevensii

This fine variety was raised about twelve years ago by the late son of Stevens of odontoglossum fame at Stone in Staffordshire and deserves to be more widely grown. The parents were grandiflora x Amazonica and the result is a good illustration of the value of cross breeding a strong and good variety with a relatively weak and poor one, such as grandiflora undoubtedly is. Stevensii is superior to Amazonica in several important characteristics; the foliage is larger and borne on longer foot-stalks which gives a better appearance; the flowers are white and fragrant but a trifle smaller than Amazonica, the petals being reflexed; the flower is more elegant than that variety and better suited for floral purposes; its floriferous character is much in its favor, good plants throwing up four or five sets of spikes, its flowering period thus covering quite 9 months of the year. The plant is a vigorous grower and so far as my experience goes it is mite proof. Eucharis succeeds best in a warm, moist stove with a liberal supply of syringing; it is a mistake however to water freely except when spikes are pushing up when a little liquid manure is of service. A mild bottom stage suits them well as they do not like drying out too quickly; too much disturbance of the roots is against free flowering, therefore pot in good turfy loam and peat of good texture in well-drained pots. Stevensii as a pot plant for show purposes is a graceful subject but it is well worth growing in quantity on commercial lines for cutting. Planting out in beds is undoubtedly more favorable to vigorous growth and free flowering conditions than pot culture. On all points it is superior to Amazonica, though that well known variety has served excellently in the past.

Edgar Elwin

Care of the Hardy Border

Directly after a few degrees of frost the mixed border becomes unsightly and is often allowed to remain in this condition for a considerable time. In order to secure permanent favor for these interesting hardy plants a little attention at this time of year is recommended.

The beds and borders should be kept in the finest possible condition; the decayed leaves and flower heads that are past should be removed as soon as they become fit. A very common practice is to cut these hardy plants down to the ground after flowering which is certainly a mistake as the tops give a considerable protection to the crowns of the plants throughout the winter. Those which produce berries and some of the iris seedpods may be retained to advantage as they are interesting and brighten the border at this time of year.

All bulbs for spring flowering should be planted by this time. These give much better effect when planted in large groups with some of the taller varieties in the front to give desired irregularity. Much better effect is thus obtained than where excessive uniformity is observed. With such a large list of bulbous plants to choose from the hardy border can be made much more interesting and the flowering season greatly extended.

The public and the chrysanthemum show

An English writer bemoans the abandonment of the "board system" of exhibiting chrysanthemums and is disposed to attribute the abatement of public interest in chrysanthemum shows to the change from boards to vases in staging blooms. It is human nature, from childhood up, to lay blame elsewhere than where it belongs. "Now, see what you made me do," says the little girl to her companion when she gets herself into trouble. It is our recollection that the method of dis-

playing chrysanthemums with long stems and foliage in vases received its first stimulus here in Boston. To a certain extent chrysanthemum shows have lost their sensational drawing power here as elsewhere but it has never occurred to us to charge it up to the disappearance of the sprawling beheaded bloom from the exhibition table. On the contrary, we are satisfied that the showing of chrysanthemums with stem and foliage has helped and not hurt the exhibition in the eye of the public. What is needed now to regain popularity for the shows is more attention to the displaying of the decorative possibilities of the chrysanthemum in all its various classes. Almost without exception our exhibitions are conducted from the standpoint of the culturist. To the expert they are profoundly interesting and instructive but if the public purse is to be allured to the ticket office, something must be done to whet the interest and curiosity of the great majority to whom scales of points offer no inducements.

Postal Progress in sight

The Society of American Florists has listened to more or less discussion of the advantages of a parcels post at its recent conventions and, on two occasions pledged itself, by vote, to work for the establishment of a system of parcels delivery through the post office department on lines similar to those followed in many foreign countries. No doubt the members of that Society, and florists, seedsmen and plantsmen generally, will read with pleasure the sentiments of the new Postmaster General on this topic as presented in another column of this paper and rejoice that at last this reform, long agitated as an antidote for express company rule, is likely to be given a fair trial. Enjoying, as certain horticultural products do, a special advantage in existing postal rates, our particular industries would gain, perhaps, only a minor advantage under the plan now advocated by the Postmaster General but as an "entering wedge" the innovation will no doubt prove most welcome and, the principle of popular service through this method being once established, it is reasonable to expect that its facilities will be gradually extended and lower rates become a reality in the near future. The seed trade has good reason to feel proud that it can claim within its ranks a man who can secure the attention of men of the highest influence in mercantile and political life as Mr. W. Atlee Burpee was able to do in the remarkable meeting at Philadelphia last Saturday evening.

The business outlook

A pessimistic feeling seems to prevail in some quarters as to the business outlook for the coming season. This is especially true in New York and is undoubtedly due largely to the influence of the stock market depression and those interests most directly concerned therewith. Much stress is placed upon recent "shrinkage in values" of various properties and the consequent economies forced upon the class of people who have been good spenders in the flower market. Perhaps it is a case of the wish being "father to the thought" but we are inclined to think that these forebodings will turn out to have been without substantial cause and that the effect of present stock vicissitudes on an otherwise prosperous country has been overestimated. It has been freely charged that the hysterical conditions which culminated in the calamities of the past two weeks were deliberately promoted for the purpose of raising a clamor against the President's policy towards monopolistic corporations. Be that as it may, we see nothing

in the situation that can be construed as boding great disaster to florist, seed or nursery interests. Satisfactory crops of all the great agricultural staples with splendid prices therefor are among the signs of the times upon which we may rely for a continuance of the good business of the past year. Naturally the confidence inspired by this state of affairs will make itself felt first in the agricultural sections but we are greatly mistaken in our estimate if within a short time it is not felt in every part of the country.

British Horticulture

HORTICULTURAL INSTRUCTION

Mr. T. S. Dymond, a well known expert, has published a paper in which he makes a comparison between the different methods of teaching gardening in English and American schools. "At one English school" he writes "I asked how deep the soil was, what the stones were, and whether they were any good (they were chalk stones), what the name of the principal weed was (it was Bindweed), and why it was so difficult to eradicate, and why they sowed their beans deeper than their turnip seed?" To not one of these questions could I get an intelligent answer. Their teacher had not told them. Now, I don't believe in gardening which is merely telling how to do things. . . . This side of school gardening is the side which is unsatisfactory in this country. In America it is the reverse. There, as practical gardening it is almost ridiculous; but as training the children to exercise their intelligence about the things that form their surroundings, natural and artificial, which will be useful to them afterwards in rural life, it is far ahead of ours." In Britain there is apparently a good deal of conservatism in our educational methods. Modern teachers are content to carry on the traditions of their predecessors, without adapting themselves to the new conditions. In many instances, too, the instruction is imparted by men whose knowledge is of a theoretical character only, and whose efforts are consequently considerably handicapped when it is a case of making actual demonstrations to the students.

THE PEAR MIDGE

For the suppression of the pear midge, the Board of Agriculture recommends a top dressing of Kainit. It is stated that growers will find it advisable to give Kainit a fair trial, at the rate of half a ton to the acre, a quantity which may be safely used where the orchards are laid down with grass, or not cultivated with strawberries or vegetables. In support of this recommendation it is said that Kainit has been successful in killing the larvae in the United States, and that experiments in this country have also been satisfactory, provided that the application is made just before the larvae leaves the fruit--that would be the first week in June or, in some districts, a few days earlier. It is admitted, however, that a Herefordshire grower who employed this method in his orchards got negative results. There seems to be a difference of opinion amongst experts as to the efficacy of the remedy. Mr. W. E. Collings, of the Birmingham University, in a recent report on injurious insects states that the application of Kainit as a cure for the pear midge is a waste of time and money. As an alternative he recommends "the simple method of turning the surface soil." By this means, he asserts, the pear midge has been almost entirely destroyed in many orchards. When experts disagree in this manner, who is to decide? The standard work of the late Miss Ormerod favors the Kainit remedy, this being supported by the

successful experiments made by Professor J. B. Smith in New Brunswick.

THE NATIONAL CHRYSANTHEMUM SHOW

The principal show of the season, arranged by the National Chrysanthemum Society takes place at the Crystal Palace on November 6 and two following days. There is usually at this exhibition a good display both in the trade and amateur sections. The chief class is that for a display of cut blooms, to include four distinct sections, and to be arranged on the floor with foliage plants, in pots or otherwise, and to occupy a space of 300 ft. Medals will be awarded as prizes. One of the favorite classes is the President's prize of five guineas for 24 Japanese distinct. An interesting correspondence has taken place respecting the advantages of exhibiting chrysanthemums on boards in preference to vases. Norman Davis, of Framfield, an experienced grower, considers that the introduction of vases for showing has been the cause of a decline in the interest taken in the exhibition. W. J. Godfrey, another leading exhibitor, takes a similar line. The latter writes: "No one can deny the fact that the public do not attend the autumn shows in the same numbers as in days gone by, neither are fanciers of the Chrysanthemum in the same numbers." Mr. Godfrey has suggested that the National Society should call a conference of growers to discuss "boards v. vases," and also "How to increase the popularity of the Chrysanthemum." One cause, I consider, of the falling off in the attendance of visitors at the National show is the change of location. The old centre provided by the now-demolished Westminster Aquarium proved very convenient owing to its being in the midst of London, convenient for most railway termini. The Crystal Palace necessitates a journey out of London of about seven miles, which has to be performed on a line not noted for its quickness or convenience of service.

PROGRESS OF THE ROSE SOCIETY

It is satisfactory to record that steady progress is being made by the National Rose Society. At a recent committee meeting, Mr. E. Mawley, the Honorable Secretary, reported that 216 members had joined during the three months ended Sept. 30. Next year the Society will hold four exhibitions instead of three, two in London and two in the provinces. The Metropolitan show is fixed for July 9th at the Royal Botanic Gardens, Regents' Park, which on previous occasions has been found very suitable for this purpose. The northern show will be held at Manchester in association with the White City. The usual autumn show will take place at the Royal Horticultural Society's Hall, Westminster. The southern show has been revived for the purpose of enabling amateurs in the south to exhibit under the best possible conditions. The place and date of this show have not yet been fixed. The committee are evidently doing their utmost to continue the good work commenced by the late Dean Hole, and the increasing roll of members is a forcible proof that the "Queen of flowers" is enlarging the number of her liege-subjects in the British Isles. An interesting feature is the strong rivalry which exists amongst the trade growers in each branch of the United Kingdom. The advantage secured at the autumn show by the Scottish growers will stimulate the southern rosarians to increased efforts.

W. H. Adsett.

PARCELS POST IN PROSPECT

A NOTABLE EVENT AT PHILADELPHIA.

Under the hospitable roof of the Union League of Philadelphia, on invitation of and under the inspiration of that master-mind of the seed trade, W. Atlee Burpee, there took place on Saturday evening, October 26, a most notable gathering of the business men of Philadelphia with a number of other invited guests from other cities to meet the honorable George von L. Meyer, Postmaster General of the United States, for discussion of parcels post, postal savings banks and other subjects in the line of postal advance.

The dinner was held in the main banquet hall and the tables were arranged as they were at the famous banquet in honor of Prince Henry of Prussia. Autumn leaves, chrysanthemums, roses and palms were blended in the decorations, while electric chandeliers on the tables and in special wall designs added to the brilliant scene. Screened by palms, an orchestra played throughout the evening, and in every detail the dinner and service upheld the traditions of the Union League.

Mr. Burpee, who has for many years been an enthusiastic advocate of postal progress sat at the centre of the long table. The Postmaster General was at his left and Senator Penrose, chairman of the Senate Committee on Postoffices and of the Joint Committee of Congress for Investigating the Business Methods of the Postoffice Department, was at the right. Sitting next to General Meyer was W. W. Potter, former Minister to Italy, a post since held by Mr. Meyer, the two being intimate friends. Two seats away sat John Wanamaker, a former Postmaster General and himself an advocate of parcels post and many other reforms in the postal service. A letter of regret had been received from still another former Postmaster General, Charles Emory Smith, Philadelphia having furnished two holders of this portfolio within recent administrations. Representatives Moon and McCreary sat side by side at the left of Senator Penrose.

Mr. Burpee, in introducing Postmaster General Meyer, referred to the need of postal reforms and declared that one law, at least, under which the department was conducting business dated from 1792.

"That is too far back even for conservative Philadelphia," he declared, amid laughter.

Before presenting the guest of the evening, the chairman proposed a toast to the President of the United States, which aroused great enthusiasm. The band struck up the "Star Spangled Banner," and all hands joined in the chorus. After emphasizing the great importance of the topics chosen for the evening's discussion, Mr. Burpee presented Postmaster General Meyer, who was received with rousing cheers.

In beginning his remarks the Postmaster General indicated that his address would be in the nature of a forecast of his forthcoming report to Congress. He said:

"Three matters of great importance are the extension of the present parcel

W. ATLEE BURPEE

post, the installation of a special parcel post on rural routes and the establishment of postal savings banks.

"What I am attempting to do is to abolish an injustice and one might even say an un-American practice. I refer to the policy of charging our own people 16 cents a pound, with a weight limit of 4 pounds, while giving a rate of 11 cents a pound, and a limit of 11 pounds on packages destined out of the country to 22 foreign countries. Consequently I shall recommend the same rate and the same limit of weight for parcels, whether intended for points in this country or abroad, which means a reduction of 4 cents a pound and an increase in the maximum weight to 11 pounds. This certainly is only equitable."

The Postmaster General explained that the parcels post is already here, and what he proposed was merely an extension.

"Heretofore the opposition to the extension of the parcels post has come in the first instance from the express companies, and then from the retail merchant and the country storekeeper, the fear in his case being that the mail order house would derive a benefit to his own disadvantage. Now, I can disarm the criticism of the retail country merchant and storekeeper by the fact that I shall recommend a parcels post system on the rural delivery routes, a special rate to be charged on packages for delivery from the distributing office of the rural route, or if mailed by a patron of any rural route for delivery to a patron on the same route or at the distributing office of said route. The rate would be 5 cents for the first pound and 2 cents for each additional pound up to eleven pounds. This will be a great boon to the farmers and others on the rural routes because when they are able to order their goods by telephone or postal card, it will relieve them of the inconvenience of going to town to obtain the necessities of life."

Mr. Meyer spoke at length in favor of the establishment of postal savings banks and displayed an insight into large national movements which was a convincing evidence that the post office department under his management will surely "get a move on."

Ex-Postmaster General John Wanamaker was the next speaker.

"The footprint of the mail carrier," said Mr. Wanamaker, "is the sign of civilization. The Postoffice Department of the future, I believe, will have more to do with the election of our presidents and Congresses than all the national, state and city committees. The big majority of President Roosevelt was brought about by the rural free delivery. The country people reading and thinking in the silence of their own homes made up their minds what was the right thing to do.

"Regarding parcels post, I urge it, believing that the interests of 85,000,000 of people are greater than those of only 5,000,000 storekeepers. I speak with full knowledge when I say that the large department stores which have mail order departments, of which the country storekeepers are afraid, are not profitable departments. Those establishments which do no other business do, I admit, conduct the mail order business with a profit. But they send no samples, as do the department stores; the merchandise is selected from a catalogue picture. But the mail order department of the retail store, feared so much by country storekeepers, is not a paying investment.

"To my mind the unfairness in the world is the refusal to increase the Post Office appropriation because of the Post Office deficit. The cost of the ship Post Office subsidies is charged to the Post Office, whereas, it does not belong to it. It is an encouragement to the merchant marine. Why should the Post Office Department be burdened with it? Why should the Post Office Department encourage the merchant marine? It is a wrong system of bookkeeping.

"It seems to me reorganization is needed in the bookkeeping department. Why should a deficit of this character be charged to the Post Office Department any more than to the navy or to the seed department of the Bureau of Agriculture?"

Senator Boies Penrose, Postmaster Ashhurst of Philadelphia. Hon. Wm. Potter, late ambassador to Rome, Finlay Acker and J. Horace McFarland, each made interesting speeches, all on progressive lines excepting Mr. Acker's repetition of the long-discredited assertion that the present second-class mail rates are responsible for the apparent annual deficit in the post-office department. Mr. McFarland made a forcible presentation of the needs of the commercial interests of the country who use third-class mail, for straight pound weight rates. Following is the list of guests.

E. W. Alexander, Robert Buist, Ralph Blum, Gabriel Blum, Isaac Blum, Rudolph Blankenburg, A. E. Brown, William Findlay Brown, Cyrus H. K. Curtis, John G. Croxton, William

M. Coates, Robert Craig, William F. Dreer, Charles Gibbons Davis, Colonel James Elverson, Jr., Howard M. Earl, Congressman W. W. Foulkrod, William F. Fell, Robert T. Frothingham, John E. J. Fanshawe, Howard R. French, Henry A. Fry, William H. Helsier, Samuel Y. Heebner, James F. Hope, Samuel Heilner, David Hutzler, H. O. Hildebrand, W. A. Higinbotham, Hon. Albert G. Hetherington, John M. Harper, Professor Jacob H. Hollander, W. G. Huey, Joseph DeF. Junkin, W. G. Johnson, Herbert W. Johnson, Constant E. Jones, Mahlon N. Kline, N. B. Kelly, William A. Law, J. Bertram Lippincott, Burnet D. Landreth, Samuel D. Lit, Isaac M. Loughhead, William H. Maule, William L. McLean, George P. Morgan, A. C. McGowin, Thomas Edwin Murphy, H. S. Prentiss Nichols, George W. Ochs, Hon. W. W. Porter, Harold Pierce, Theodore Presser, Fred. Powers, Max Riebenack, District Attorney Samuel P. Rotan, William T. Rolph, A. Maxwell Sheppard, John F. Simons, William J. Stewart, Alex. B. Scott, John Sailor, John L. Stewart, Walter F. Stokes, James F. Sullivan, Edw. S. Strophar, Joseph Snellenburg, William R. Tucker, William T. Tilden, E. A. Van Valkenburg, Theodore Voorhees, Henry M. Warren, H. W. Wood, S. F. Willard, Douglas M. Wylie, Clinton Rogers Woodruff, Colonel Francis E. Waters, Hon. Harmon Yerkes.

A QUESTION OF NOMENCLATURE.

THE NOMENCLATURE OF HYDRANGEA ARBORESCENS STERILIS.
(GRANDIFLORA ALBA.)

Editor National Nurseryman:

This new Hydrangea is now being catalogued by nurserymen, who naturally regard Bailey's Cyclopaedia of American Horticulture as the standard of authority in nomenclature. The name under which this work describes the new candidate for public favor is given at the head of this article and is botanically correct, descriptive, and was the first published. This plant has since been registered with the Society of American Florists as "*H. arborescens grandiflora alba*." This name is descriptive but is long and is so similar to the *H. paniculata grandiflora* as to cause confusion in the minds of the people as well as on the packing ground. Permit me to suggest that nurserymen catalogue this plant according to Bailey, who is our "law-giver" as to names.

J. W. McNARY.

Dayton, Ohio.

Note:—How is this brother Registrar of the S. A. F.? What about the rule of priority?—Ed.

The above communication appeared in the last number of the "National Nurseryman." As it seems to suggest some doubt as to the validity of the name registered with the S. A. F. by the introducers of the plant in question, we wrote to the E. G. Hill Company for their views, and have received the following letter, which, we think, will prove interesting reading to the trade. It affords convincing proof of the wisdom of being up-to-date in matters of horticultural interest, by taking advantage of existing mediums for publicity and by becoming identified with the only national body which has, so far, made any serious effort to provide a means for establishing plant names. It appears to us that upon the publication of the registered name by Mr. Hill

those who had known the plant by another name should have immediately informed the secretary of the S. A. F., who, not being omniscient, would, no doubt, have been grateful (as Mr. Hill would also have been) to get the information:

Mr. Hill's Letter.

Richmond, Ind., October 28, 1907.

Wm. J. Stewart, Boston, Mass.

Dear Sir:—The name given to the new hydrangea was suggestive, we thought, of its character, color of the flower, etc. We did not know the hydrangea had been named by Mr. Bailey in his Encyclopedia of Horticulture previous to the name *Abborescens grandiflora alba* having been registered with the S. A. F. by our firm. Had we known of this, we would not have suggested any other name. The name registered by the S. A. F. has been adopted by nearly all if not all the catalogue men both in America and Europe and such being the case and as "*Sterilis*" has not come into general use why not let it go as registered?

We were the first to bring this plant into notice through a published description and also, we believe, the first to introduce it commercially, hence we were perfectly right in appending the name given and registered. This hydrangea had been growing under the very noses of J. W. McNary and E. Y. Teas for years and years yet they never saw it or, if they did, they did not give publicity to the fact.

A word about the variety. It has been found growing near Kokomo, Ind., Columbus, Ind., Allegheny City, Pa., Yellow Springs, Ohio, and was widely distributed through the Miami Valley. There are a number of bushes in Dayton, Yellow Springs, Urbana, Springfield and Piqua. Some, or in fact most of them, are quite ancient, judging by appearances. We know of two plantmen who were importuned to propagate the variety with a view to its distribution but failed to do so but now are great admirers of this most beautiful of all hardy shrubs.

Yours,

E. G. HILL.

IN TOUCH WITH THE BEAUTIFUL.

"When God planned the universe. He built a vast flower garden. Each star shines with a beauty all its own. One is a ruby, another an amethyst. There is an opal. Off in the distance is an emerald and beyond a sapphire. When the Great Horticulturist drove his plowshare through the field of azure, He strewed the furrows with stars, which are like vast bouquets in the hand of the Infinite. Up there we shall see as God sees, with no diminution in ratio as to distance, Orion of the Pleiades, with broad landscapes of marvellous loveliness. The distant Milky Way, which lies like a snow-drift far away, will roll up before us into limitless fields of beauty. The Southern Cross will be a floral cross, and every star an immortal. Vast abysses of glory flooded with the mingled effulgence which comes from myriads of suns, will lie over all that immensity, and it will be beauty—beauty everywhere.

"Such being our inheritance up there, would it not be a good plan to get in touch with the beautiful down here? Don't you know that you can gather tints from these sun mantles and from the rainbow and weave them into gardens of beauty down here, and brighten up this old somber world of ours so it will be a prophecy of what lies before? Then peering out of the unseen are myriads of forms of surpassing loveliness human eye has not yet seen, and there they are patiently waiting for you to introduce them to the world."—C. S. Harrison.

AMERICAN POMOLOGICAL SOCIETY.

A Letter from the Secretary.

Mr. W. J. Stewart,
Editor HORTICULTURE,
Boston, Mass.

Dear Sir:—I observe in your recent report of the meeting of the American Pomological Society and allied organizations at Jamestown, that your correspondent informs the public that the National Council of Horticulture "assigned" to the American Pomological Society the dates occupied by them at their recent meeting. The matter is so small that it is hardly worth mentioning, but on behalf of the Pomological Society I feel called upon to state that this national organization first selected the dates mentioned, namely, September 24-26, and that the other horticultural societies, as the Society of Horticultural Science, the National Nut Growers, and the Maryland Horticultural Society, agreed to hold their respective meetings on the same week. When these arrangements were made, the National Council then decided to hold its session the day preceding the opening of the American Pomological Society's convention. The American Pomological Society has not thus far recognized the authority of any publicly organized, or self-constituted body to "assign" a date or dates for its biennial sessions.

Yours sincerely,

JOHN CRAIG,

Secretary Am. Pomological Society.
Ithaca, N. Y.

OHIO HORTICULTURAL SOCIETY.

A Letter to the National Council of Horticulture.

Mr. H. C. Irish, Sec'y,
National Council of Horticulture,
St. Louis, Mo.

Dear Sir:—It occurs to me that we as fruit growers are not giving sufficient attention to the matter of keeping the people informed as to the desirability of making fruits an important part of their daily food. In other words, we need an acting bureau of publicity.

This season we do not realize the necessity of this, but if this lean season should be followed by one of plenty, which will probably be the case, we may find that the people who have from necessity been sparing in their use of fruit this season will continue to use it sparingly, to the great loss alike to producer and consumer.

In working for our own selfish interests, in this case we are also doing a great good to the public at large.

It seems to me that your National Organization should take up this matter and bring it before the state societies at their annual meetings this winter.

Yours truly,

W. W. FARNSWORTH,
Secy. Ohio Hort. Society.

Waterville, O.

The Garden, London, sends out a striking colored print of paeony Christine Shand with its issue of October 12. This is one of the anemone-flowered forms sent out by Kelway & Son. The guard petals are of delicate flesh color, the centre petals being lemon white.

NEWS OF THE CLUBS AND SOCIETIES.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The annual meeting of the C. S. A. will be held on the first day of the annual show, Nov. 6th, at 4 p. m., in the rooms of the American Institute, New York City, and it is hoped that the members and the craft in general will avail themselves of the opportunity to be present at this meeting. A very interesting programme has been prepared. Mr. Wm. Duckham has kindly consented to read a paper on the Cultivation of the Chrysanthemum for Exhibition Purposes, and Mr. C. H. Totty one on Single Varieties, which should prove interesting. The exhibition promises to be the best in the history of the society, and, no doubt, the great show to be held in Chicago next fall will form an interesting topic for talk at this meeting.

Work of Committees.

Chicago, Oct. 26.—Virginia Poehlmann; white (Bonnafont type). Exhibited by Poehlmann Bros. Co., Morton Grove, Ills. Scored 89 points, commercial scale.

Chicago, Oct. 26.—Pacific Supreme; pink (Glory of Pacific type). Exhibited by Nathan Smith & Son, Adrian, Mich. Scored 87 points, commercial scale.

New York, Oct. 26.—No. 90; creamy white (Jap. reflexed). Exhibited by John N. May, Summit, N. J. Scored 74 points, commercial scale.

New York, Oct. 26.—No. 9; white (Jap. incurved). Exhibited by John Marshall, Newport, R. I. Scored 85 points, commercial scale.

Philadelphia, Oct. 26.—No. 66-5-06; white (Jap.). Exhibited by Nathan Smith & Son. Scored 81 points, commercial scale.

Philadelphia, Oct. 26.—Miss Frances P. D. Fell; orange yellow (Jap. incurved). Exhibited by H. B. Surman, Ft. Washington, Pa. Scored 87 points, commercial, and 85 points, exhibition, scale. DAVID FRASER, Sec'y.

TOLEDO FLORISTS' CLUB.

Election of officers brought a good many of the club members to the last meeting, the first respectable attendance which we have had in a long time. The old officers were re-elected by acclamation, but the office of treasurer and secretary, Mr. Peck, who resigned, was given to J. L. Schiller. It was quite a lively meeting, and it was decided to hold a chrysanthemum show on a day between the 10th and 20th of November. This is mainly to interest the public, and no prizes will be given. Outsiders will be asked to contribute and thus help to make the affair a success. W. W. Krueger and J. L. Schiller will have charge of the show. On November 1st a number of the members will join the Detroit Florists' Club, upon invitation, on their outing to Mt. Clemens.

NEW ORLEANS HORTICULTURAL SOCIETY.

Regular meeting of the above named society was held at the residence of President Chas. Eble on October 17. P. A. Chopin, on behalf of the committee on chrysanthemum meeting to be held during the month of November, reported that they had not been able to secure a suitable hall. They were granted further time.

A general discussion ensued on the prospects of chrysanthemum flowers for All Saints' Day, the 1st of November, and the consensus of opinion was that there would be sufficient for all purposes, although several growers had practically lost their entire crop through thrips.

The meeting then adjourned to the dining room, where a sumptuous repast was spread, and the members were waited upon by Mr. Eble's two sons and his niece, while his daughter regaled the members with choice selections on the piano. It was regretted by all that Mrs. Chas. Eble was not able to be present owing to illness. Appreciative speeches were made by several members.

C. R. PANTER, Sec.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of above society was held in County Building, Hartford, on Oct. 25. Vice-President Huss occupied the chair. There was a large attendance of members. Mr. Huss exhibited new strains of streptocarpus and cosmos which, on account of the extraordinary size and substance of the flowers, created much interest and were awarded diplomas. Both are of English origin, and are distinct acquisitions, the cosmos especially being valuable in that, in addition to the greatly improved flowers, it comes into blooms several weeks earlier than the familiar type. Mr. Huss gave an interesting and instructive talk, describing the cultural methods he employed for streptocarpus and cosmos in order to get the best results, whether grown in the open borders or as pot plants. He received a hearty vote of thanks for his thoroughly practical address. The question box contained a number of pertinent queries, all of which were answered satisfactorily.

ALEX. CUMMING.

NEWPORT HORTICULTURAL SOCIETY.

A meeting of the Newport Horticultural Society was held October 22, President Butterton in the chair. Nine new members were admitted. Mr. MacLellan announced that Senator Wetmore had offered the use of a part of his lawn to the society, whereon a tent may be erected for the accommodation of a part or all of the exhibits when the society settles to hold an exhibition next year. The offer was appreciatively received with the understanding prevailing that in all likelihood there will be but one show next year—a big one and that on the grounds of Senator Wetmore. D. M.

THE NATIONAL FLOWER SHOW COMMITTEE.

It being impossible for me to write a second time to every member of the Committee of Fifty, individually, I take this means of informing them that the meeting of the committee will open promptly at 2.30 p. m. on Nov. 8, at the Auditorium Annex, Chicago.

WM. F. KASTING, Chairman.

CLUB AND SOCIETY NOTES.

Walter P. Stokes will give an informal talk on forcing of lily of the valley before the Florists' Club of Philadelphia on Tuesday, November 5

R. Vincent, Jr., & Sons Co., of White Marsh, Md., have promised an extensive display of hardy pompon chrysanthemums, under the personal supervision of R. Vincent, Jr., and T. A. Vincent, at the Boston chrysanthemum show, November 8th.

The Pacific Coast Horticultural Society and the State Floral Society combined in giving a complimentary dahlia show recently at San Francisco, at which Wm. Kettlewell, gardener for Geo. A. Fope, and H. Maclean, gardener for Mrs. W. H. Crocker, carried off all the first prizes. H. Maier, superintendent of the Stockdale Nurseries, exhibited a fine lot of cyclamens and Nephrolepis Whitmanii, for which he was awarded special prizes.

HELPLESSNESS OF CULTIVATED PLANTS.

We rarely realize how helpless man has rendered the plants he cultivates by the centuries of protection from their weed enemies that he has given them. An experiment that well illustrates this point was made on one of the Government farms some time ago. A field about one acre in extent upon which wheat had been grown for forty years in succession was not harvested but allowed to stand and shed its seeds as it would. The next year a fair crop of wheat came up, but the weeds were gaining the ascendancy, and by the fourth season all the wheat had disappeared from the field and the weeds held full sway. If man should suddenly disappear from the earth it is certain that his cultivated crops would soon follow him. And yet these very plants held their own against their competitors before man took them under his care. The reason they can no longer persist in the face of competition is not alone because they have grown weaker, but in a measure because the weeds have grown stronger. In protecting his crops man has constantly killed out the weak and least persistent weeds, and only those were left to perpetuate their kind that were able to elude man himself. One species, the self-heal (*Prunella vulgaris*), which ordinarily grows a foot or more high, has produced a variety so low that it is able to thrive on a closely mowed lawn. Darwin never considered the lawn-mower as one of the factors of evolution, but undoubtedly this Yankee invention has played its part in the great struggle.—American Botanist.

The Exhibition Season

RECENT SHOWS.

Royal Horticultural Society, London.

At the exhibition on October 15, Low & Co. showed fifty dishes of what may be called London apples from standard, pyramidal and cordon trees grown at their Enfield nursery, such as the old Tyler's Kernel, Potts' Seedling, Wealthy, Northern Greening, etc. They also had a striking bank of orchids, mostly hybrid cypripedes, as *C. x Olivia*, Lord Derby and others. Jas. Veitch & Son put up quite an exhibition of new nepenthes, some carrying three and four pitchers, which attracted considerable notice from visitors; also Begonia Agatha compacta, and a vigorous erect-habited kind, labelled Elatior, which will be a gain in this flower to florists. The exhibit was elegantly edged by small plants of *Selaginella amoena*. Other fine orchids were put up by J. Hudson (with Baron Leopold de Rothschild), Sander & Sons and others. Low & Co. again showed their new small-foliaged *Ampelopsis Lowii*, which, if it will only keep its close-growing character, will prove a formidable rival to the popular *A. Veitchii*. It seems to be intermediate between that and *A. sempervirens*. Named in honor of Mrs. Wilson, who shared the dangers and inconveniences of Mr. Wilson's North China tour, Veitch had a compact, free-fruited berberis of quite a new type, the berries not yet colored, and *Symphoricarpos mollis*—pendulous in habit and fruiting at the points of its slender shoots, the berries being larger and whiter than those of the type. Reuther's novelties were *Polygonum polypetalum*, with its elegant long, drooping spikes of deep carmine flowers, which are good for cutting, *Watsonia alba* and *Salvia azurea grandiflora*, which is quite hardy at Keston, as well as a complete collection of colchicums, including *speciosum rubrum* and *autumnale alba*. Chrysanthemums were sent by Jones, Lewisham, who had Moneymaker and Mrs. A. T. Miller, both A-1, and Mrs. Knox, which is certainly one of the best early golden Japs. Wells also had decorative chrysanthemums, Singles, Pompons and Japs, all in good form.

THOMAS BUNYARD.

A Pleasing Display of Chrysanthemums.

At the residence of H. C. Frick, Homewood avenue, Pittsburg, there is an exhibition of chrysanthemums, orchids, begonias and other flowering plants, of which Pittsburgers are justly proud. It is the custom here to make two special displays in the year, at Easter and at chrysanthemum time. The local newspapers give publicity to the fact that there is an exhibition open to the public at the Frick greenhouses, and hundreds of people take advantage of the privilege.

David Frazer, superintendent, known to readers of HORTICULTURE as secretary of the Chrysanthemum Society of America, has this year a better display than ever. Pittsburg is not an ideal place to

Pacific Supreme is intermediate in color between Glory of Pacific and Wm. Duckham, being a very delicate shade and yet sufficiently illuminated so that it may be allowed to fully develop without danger of the usual fading. Height, 3 1-2 feet; 6 inches in

grow chrysanthemums, yet in spite of the disadvantage under which he labors, he has arranged an exhibit of chrysanthemums which, even in more favorable sections of the country, would be considered highly creditable. All his plants are grown in pots and the foliage is clean and healthy and the flowers large and well finished.

It is worth while to mention that all the plants grown are exhibited; there are no "culls." Standard varieties are well represented and well grown. Amongst the newest varieties Brighthurst, a noble pink, is one of the best. Mlle. Ogez is very fine, but has an extremely long neck. The finest of all is the beautiful white Miss Helen Clay Frick, a sport from Wm. Duckham. It originated somewhere in Scotland, and is by far the best white grown here, although Mr. Frazer does not deny that it has received a little better treatment than the majority. Lady Roberts is a good single pink, an excellent variety for cut flower purposes.

The orchids are exceptionally fine. Amongst those in flower are a fine batch of *Cattleya labiata*, *Oncidium varicosum*, *Miltonia candida*, *Oncidium Forbesii*, *Dendrobium Phalaenop-*

diameter; cut Oct. 20th; foliage closely resembles Glory of Pacific, but freer in growth. This fine novelty scored 87 points and was consequently certificated at Chicago, October 26, being exhibited by Nathan Smith & Son.

sis and *Oncidium ornithorhynchum*. All are well grown and effectively arranged. Begonia, Gloire-de Lorraine and Turnford Hall. The former in baskets and pots is one of the main features of the exhibition.

A fine effect is obtained in one of the compartments by the feathery celosia and adiantums on a level stage. Other things used to advantage in quantity are *Acalypha hispida*, *Torenia Fournieri*, cyclamens, *Primula obconica* and *Cosmos sulphureus* var Klondyke. Everything that is attempted is grown well, and all who visit this charming display are enthusiastic in voting Mr. Frazer a master, not only in the art of culture, but also in artistic arrangement.

JAS. HUTCHINSON.

Menlo Park Horticultural Society.

The Menlo Park (Calif.) Horticultural Society held their fall exhibition in their mammoth tent in Menlo Park Oct. 18 and 19. Chrysanthemums were a special feature and were certainly of extra good quality. First prizes were awarded as follows: James L. Flood, gardener Geo. Nunn, for decorative plants, orchids, crotons, potgrown chrysanthemums, also several first and second prizes for cut

chrysanthemums. S. E. Slade, gardener Charles Ehrich, for collection of ferns and for specimen fern. Mrs. A. Taylor, gardener Francis G. Hutchinson, for collection of coleuses and tuberous begonias. J. Donohue, gardener J. A. Carter, for collection of rex begonias and 12 seedling dahlias. Geo. A. Pope, gardener Wm. Kettlewell, for dahlias. A. J. Marcus, H. Dicks gardener, for chrysanthemums. Mrs. W. H. Crocker, H. Maclean, gardener, took one chrysanthemum prize and three dahlia prizes. All the prizes awarded were for money, which was turned over by the Hopkinses, Floods, Donahues, Crockers, Taylors, Popes and other exhibitors to their gardeners.

Amongst the commercial growers, H. Goertzhain received several first and second prizes for chrysanthemums. M. Lynch was first for vase of pink chrysanthemums. S. Clack received first prize for a fine vase of Liberty roses. Kenneth Murray received four first prizes for carnations. F. Mills also received several first and second prizes for carnations.

S. Clack was manager of the show and Chas. Abraham of San Francisco, Geo. Walter of Ross Valley, and Thomas Wood of San Mateo, acted as judges.

Exhibition at Washington.

The annual Chrysanthemum Show by the Department of Agriculture began the 25th and will continue each day from 10 A. M. till 3 P. M. (except Sunday) until November 7th. This will give the public a breathing space before the show, which is to be given by the Washington Florists' Club on the 12th, 13th and 14th of November. The flowers of the present show are the finest ever displayed in Washington, comprising in all two hundred different varieties. A collection of single flowering varieties is one of the most attractive features of the show, one, the "Daisy," so closely resembling its namesake as to be almost indistinguishable. The "Mrs. Roosevelt" is a great favorite, being of an unusually fine form and rich color.

COMING SHOWS.

The following have been mentioned at length in preceding issues of HORTICULTURE:

New Haven County Horticultural Society, New Haven, Conn., Nov. 6-8. Walter Koella, 58 Bishop street, New Haven, secretary.

Chrysanthemum Society of America, American Institute, 19-21 West 44th St., New York City, Nov. 6-8. David Fraser, Homewood and Penn Ave., Pittsburg, Pa., secretary.

Nassau County Horticultural Society, Glen Cove, N. Y., Nov. 6-8. J. F. Johnston, secretary.

Horticultural Society of Chicago, Coliseum, Chicago, Nov. 6-12. E. A. Kanst, 5700 Cottage Grove Ave., secretary.

Tarrytown Horticultural Society, Tarrytown, N. Y., Nov. 6-8. E. W. Neubrand, secretary.

Massachusetts Horticultural Society, Horticultural Hall, Boston, Chrysanthemum show, Nov. 8-10. W. P. Rich, secretary.

Florists Club of Washington (D. C.), Nov. 12-14. Chas. McCauley, 18th and

BUMPER CROP MELONS.

The fields of musk melons, or cantaloupes, cover in a combined area many acres in the town of Irondequoit, N. Y. The yield from some of these fields during a favorable season is a source of considerable income to the gardeners, while other fields are almost a total failure, in so far as quality, at least, is concerned, the yield also being somewhat less.

This has been a fairly good year. A "bumper" crop has been raised, the stock has been of unusual size and flavor, and the price good. The blight has not been so noticeable this year. It has been so destructive in some past years that the prospects of a good crop are changed within a few days.

The blight on musk melons takes different forms of attack, and there are several names given to the disease. The most important are leaf-spot, downy mildew, leaf-mold and damping off. The fungus which causes the dis-

eases, produces angular black spots on the leaves, and elongated black spots with light colored centers on the petioles of the leaves and vines. When the petioles are attacked, the part affected gradually shrivels and that portion of the leaf and vine above wilts and dies. The small fruits are killed. Black spots appear on them, the small melons in some instances turning black and dropping off. When the fungus does not kill the small melons they do not develop on the side attacked by the fungus.

On the larger and more mature melons cavities of various sizes are formed, occasionally as much as two inches in diameter and nearly an inch deep. The cavities usually have a black border and are covered with gummy masses of pink spores that ooze through the rind. Beneath the cavities the rind is thickened and separated from the pulp.

H. R. PEACHEY.

Kearney Sts., Washington, D. C., secretary.

Horticultural Society of Buffalo, Buffalo, N. Y., Nov. 11-17. J. H. Tranter, P. O. Box 994, secretary.

St. Louis Horticultural Society, Grand and Park Aves., St. Louis, Mo., November 12-15.

Pennsylvania Horticultural Society, Horticultural Hall, Philadelphia, Nov. 12-15. David Rust, secretary.

Montreal Gardeners' and Florists' Club, Chrysanthemum show, Nov. 13-14, Victoria Rifles Hall, Montreal, Que. W. H. Horobin, 283 Marquette St., secretary.

State Floral Society of Arkansas, Little Rock, Nov. 14-16. Chas. Vestal, secretary.

Annual flower show, Waco, Texas, Nov. 13-16. Capt. J. D. Shaw, President.

Worcester County Horticultural Society, Chrysanthemum show, Worcester, Mass., Nov. 14. A. A. Hixon, secretary.

Ontario Horticultural Exhibition, Massey Music Hall, Toronto, Ont.,

Nov. 12-16. H. B. Cowan, Parliament Building, Toronto, secretary.

Denison Civic Improvement League, Denison, Tex., Nov. 20-22. T. W. Larkin, secretary.

Maryland State Horticultural Society, Fifth Reg. Armory, Baltimore, Dec. 3-4. T. B. Symonds, College Park, Md., secretary.

There will be no chrysanthemum show, from the present indications at the Botanical Gardens at South Park, Buffalo, N. Y., this year. There will be a sort of exhibition with the public invited, the same this year as ever, though the usual gorgeous exhibition is off for the very good reason that there are not enough of the flowers to make a show. The smoke and gases which have been making life more and more miserable each year for the Botanical Gardens have done their fell work quite thoroughly this year and the chrysanthemums have been particularly unfortunate. In fact, according to Supt. Cowell, the Gardens will have to be removed or their attractiveness will soon be a thing of the past.

LIBRARY NOTES.

Any of the books mentioned in Mr. Payne's reviews can be supplied at publishers' price from the office of Horticulture.

The Small Town Garden, by H. M. Swanwick (Sherratt & Hughes, Manchester and London). This is a plain cloth-bound book without any great pretension to style, but has the merit of appealing to the townsman who has a love for gardening, in a useful and practical manner. The reader is given several comprehensive lists and tables of plants arranged with name, height, kind, period of flowering, description and short cultural directions which are easy for reference besides being in close compass. The sub-headings throughout the work are numerous and cover the whole area of garden requirements and operations for the town gardener.

A Garden in Venice by F. Eden. (Country Life, Lim'd, and George Newnes, London). Here we have a new and cheap edition of one of those high class and artistic volumes for which the Country Life Library is especially noted. The book is the author's record of his own garden in Venice and is beautifully printed in old style type and adorned with 21 illustrations. To anyone who has been in an Italian garden in Italy—for there are so-called Italian gardens elsewhere, this charming volume will be of special interest for it breathes both in the illustrations and the text the very spirit of the genuine article. Many of the pictures transport us back to days long ago when we too wandered through Italian gardens in that land where there are so many beautiful and interesting examples.

Select Carnations, Picotees and Pinks, by John Fraser, (MacLaren & Sons, London). Carnation growing has here in England assumed a considerable importance of late years or perhaps we might say revival, and as a result we have at the present moment three new books on the subject lying before us. The one by Mr. Fraser is perhaps the most voluminous and comprehensive for it runs into nearly 200 pages. The cultural matter is of essentially a practical and not a purely aesthetic manner, as we have seen in some of the recent gardening books. Descriptive lists are given and every phase of carnation culture appears to have been dealt with in a sensible and practical way.

C. HARMAN PAYNE.

PUBLICATIONS RECEIVED.

Number 8 of the Dahlia News, with articles relating to the National Dahlia Society of England, the German Dahlia Society and the sensational new dahlia, Charles Lanier. The membership of the New England Dahlia Society is now 200.

The extent of the popularity which the American type of carnation has already attained in England is revealed in the very practical little 132-page volume which has just reached us, under the title of "The Perpetual Flowering Carnation." The author is Montagu C. Allwood and the book is published by Hugh Low & Co., Bush Hill Park, England. The topics covered comprise: A Plea for the

Henry F. Michell Co., 1018 Market St. Phila., Pa.

Perpetual Flowering Carnation, The Origin of the Perpetual Flowering Carnation, Propagating, Handling Young Carnations, Growing the Perpetual Flowering Carnation, Potting, Stopping, Staking and Tying, American System of Cultivation, The Raising of New Varieties, Pests and Diseases, Manures, Calendar of Operations, Review of Varieties, Malmaison Carnations, Border Carnations. The illustrations show a 250-ft carnation house at Bush Hill Park, Mrs. Lawson in centre bed; a vase of Mrs. H. Burnett; method of raising cuttings; White Perfection; Victory; house of Enchantress; White Enchantress; Harlowarden; Lady Bountiful; Britannia; Malmaison four years old.

The price of the volume is two shillings and the American carnation grower who sends for a copy will not regret the investment.

The school children of several cities are now receiving instruction in the art of gardening. It is not at all likely that many of them will ever, in consequence of such instruction, become good gardeners, but it is likely that the efforts put forth in their behalf will be productive of much lasting benefit to the children and to the nation, not to speak of what it may mean in the years to come to horticulture in its broadest sense. Therefore, every possible encouragement should be given to those instrumental in inaugurating this commendable movement.

There is no reason to doubt the prediction that a bright future is in store for the dahlia as a thing of practical utility for florists, but, again, it is reasonable to suppose that the craze for huge collections, embracing all the varieties obtainable, good, bad and indifferent, is either dying slowly or already gone. The substantial basis upon which the permanent popularity of the dahlia will rest will be its usefulness within the bounds of a reasonable number of varieties of two or three types. The Cactus type has undoubtedly the greater fascination for the enthusiastic amateur, but it is doubtful if, as a type, it is of as much utility as either the Single or Decorative; or, in other words, can a florist get from one end of the season to the other as much and as good material for cut flower purposes out of the Cactus type as he can out of the Decorative or out of the Single?

AMERICAN PEONY SOCIETY.

To the Peony Growers of the United States.

As Chairman of the committee on peony diseases, I wish to bring before your attention some lines of work which this committee proposes to undertake during the coming year, and to ask your hearty co-operation in the same.

It is proposed first, to bring together all the literature bearing upon the subject of peony diseases. This, the Chairman of the committee expects to complete during the coming year and will present a paper on the subject before the next annual meeting of the society. In connection with this work it is especially desired that all persons interested in peony growing will send to the Chairman references to any literature on the subject of peony troubles of which they may know.

Second, we will endeavor to get together all of the observations and experience of peony growers with diseases of the plant. This will include any experiences they have had with diseases, methods of treatment and success or failure of the same. On this point it will be necessary to appeal directly to the grower, and it is hoped that everyone interested in the matter will write out briefly and clearly anything they may have to offer and send it to us.

Third, we shall endeavor to get together specimens of the different diseases of peonies for the purpose of studying them carefully and making experiments to determine their cause and methods of their treatment. It is planned to continue this work for a number of years in order that we may arrive at some definite conclusions in regard to the matter. Growers are urged to send in any diseased plants whenever they find them, transportation prepaid. In return for which the Chairman of your committee promises to give whatever information he can in regard to the trouble and to prepare from time to time short articles on some common and destructive disease, that will appear for publication in the proper magazine, etc. These specimens should be carefully wrapped in a box or stout package and mailed directly to our address.

BY WIRELESS FROM ROBERT CRAIG.

Mr. Craig acknowledges that *Ficus pandurata* is the most profitable plant specialty he ever handled. He attributes the failure of some growers with this plant to the fact that they have tried to propagate from single eyes, the result being in all cases spindling, feeble specimens. Propagation by mossing the tops of the plants he finds to be the only successful method. As showing the wonderful tenacity of *Ficus pandurata* and its value in decorative work, one specimen may be cited in evidence. It is over 10 feet in height and carries 56 enormous leaves, never having lost a leaf, and all this in a 12-inch tub.

Among the most sensational things seen at the establishment of the Robert Craig Company are a number of crotons of remarkable brilliancy of coloring, raised by Edwin Lonsdale. A fact worthy of note is that these splendid varieties, varying greatly as they do in form of leaf and markings, all came from one seed pod. One of the handsomest has been named Edwin Lonsdale, and it gives promise of being a popular plant for holiday basket arrangements.

"Light-pink Lorraine," the form of *Begonia Gloire de Lorraine* which originated with Edwin Lonsdale, is much more substantial than the ordinary type, and on this account is preferred by many for dwelling house use as well as for exhibition purposes, its ability to withstand the conditions of the exhibition hall for several days being a good point in its favor. Of the more recent begonia hybrids *Agatha* promises well, especially for early blooming.

The *Amerpohli* fern fronds are being used extensively in Philadelphia in floral decorative work and bid fair to give asparagus a tussle for pre-eminence in this respect. This fern planted in hanging log baskets makes a lovely object. *Amerpohlii* as a spreading form and *Todaecoides* as an upright form will probably displace all the older plumose forms of *Nephrolepis*, excepting only the *Whitmanii*.

Mr. Craig's selection as the best of the pompon chrysanthemums for cut spray purposes comprises *Lula* for white and *Quinola* for yellow. *Kitty Bourne* leads in the yellow singles; it bears a profusion of daisy-like flowers and was "all the go" in London last season.

Mr. Craig has taken up *Adiantum hybridum* in preference to *Croweanum* for cut frond purposes. He asserts that it is more productive than that popular variety.

Pere Charon is a dracaena which, when it becomes more plentiful and is more widely distributed, will leave no room for the old terminalis.

CROMWELL NOTES.

In a recent conversation with A. N. Pierson of Cromwell, Conn., we learned from that most astute and successful wholesale grower that he has 25,000 plants of Killarney this season. This with *Richmond*, *Bride*, *Bridesmaid* and *Beauty* constitute the great-

PHOENIX ROEBELINI.

Phoenix Roebelini, the character of which is so well illustrated at the head of this column, needs no further commendation than the picture discloses as to its graceful habit and usefulness as a decorative plant. Its

scarcity heretofore has been its only drawback but seeds are now offered at reasonable prices and no florist needs to be without a good stock of this elegant representative of the palm family, which is at all times graceful, be the size large or small.

er part of his rose stock, although there are some *Kaiserins* and *Ivorys*, the latter being grafted plants now in the seventh year and apparently as productive as ever, and the former are now about to give way to lilies, which have been started in pots in frames. The *Beauties* are on solid beds without drainage, yet are in robust health and productiveness, and the *Richmonds* are in their second year, with the cane tied down. *Cromwell* is a good place to visit in search of practical and profitable processes.

The only glass added this year to this extensive establishment is one house, 40 x 430, which is now full of chrysanthemums. Mr. Pierson is much attached to *Early Snow* as a first crop white; its flower and foliage are both excellent. *Rosiere* is the favorite pink early and *Monrovia* the best yellow. For a crop to follow *Monrovia* and precede *Col. Appleton* *Zimmer's Yellow* is grown. Mr. Pierson's plan is to set two plants together in each case and allow each to bear two blooms. Among the carnations, which are a leading specialty in Cromwell, *Winsor* takes the lead in beauty and promise at the present time. The selection in scarlet has been cut down to two varieties—*Victory* and *Beacon*.

Gardenias in bench are in splendid luxuriance and a steady crop of flowers is being cut, the demand far exceeding the supply. A little nitrate of soda is applied with beneficial results whenever the foliage shows any inclination to turn yellow. Plants now

in second year in bench appear first-class and hold their buds even better than those grown in pots.

PLANT GROWERS ORGANIZE.

The plant growers of New York and New Jersey and surrounding vicinity, having met with circumstances which made necessary some means of procuring uniformity and certainty in the customs and usages in their trade and of obtaining information as to the standing of the dealers connected with their trade, have organized and incorporated under the name of the New York and New Jersey Association of Plant Growers.

Among the objects for which the corporation was formed are the fostering of the trade and the interests of its members, to obtain and diffuse accurate and reliable information as to the pot-plant growing and as to the standing of merchants and dealers in the general horticultural trade, to procure uniformity and certainty in the customs and usages in the trade, to protect its members and customers against unscrupulous dealers and to promote a more enlarged and friendly intercourse between plant growers and horticulturists generally.

The Association has been very successful in the beginning of its career, and has so greatly increased its membership that it now includes almost every grower within its jurisdiction. New York and New Jersey Association of Plant Growers.

W. H. SIEBRECHT, JR., Secretary.

Dreer Specials in Ferns

PTERIS WILSONI We feel very enthusiastic over this fern; it is not only the most graceful, but also one of the hardest of the crested forms of Pteris, useful in fern dishes as well as for growing on into specimen plants in 6-inch pans; in this size it appeals to every buyer and meets with ready sales. We have a fine lot of 6-inch pans, \$4.50 per dozen; \$35.00 per 100; 3-inch pots, \$6.00 per 100.

Adiantum Farleyense

A fine lot of 6-inch pots now ready, \$1.00 each.

Adiantum Rhodophyllum

The miniature Farleyense, as it is sometimes called, very fine plants,

3-inch pots, \$10.00 per 100.

Adiantum Macrophyllum

The bronzy red or almost crimson foliage of this variety during the Fall months appeals to all. This is the first time we have been able to offer it in quantity and at a popular price; fine 3-inch pots, \$15.00 per 100.

Adiantum Croweanum

We offer a fine lot of this, the most useful and profitable of all the Maidenhair Ferns for cutting; fine 3-inch pot plants, \$2.00 per dozen; \$15.00 per 100. \$140.00 per 1000.

Nephrolepis Amerpohlii

The Philadelphia Lace Fern—This is the latest addition to the Ostrich Plume type and is certain to prove a welcome and popular variety, holding for delicacy and gracefulness the same position among the Nephrolepis that Adiantum Gracillimum does among the Maidenhair Ferns. The pinnae are so finely divided that it reminds one of a piece of fine lace; the fronds are broad and of a depth which gives them a cushion-like appearance. It forms a beautiful specimen and is admired by everyone who sees it. 50c. each; \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000.

Nephrolepis Todeaoides

Todea, or Flimsy Fern-Like Nephrolepis—This is an English introduction that has received a first-class certificate both from the Royal Horticultural Society and from the Royal Botanic Society of London, and is likely to become a most important commercial variety. While in a general way it reminds one of an exceptionally well-grown plant of N. Elegantiissima, it is entirely distinct from this and all others, in its strong yet compact growth and its bold heavy foliage, which is distinctly tripinnate or three times divided. Specimen plants which we now have growing are admired by everyone and we have great faith in its future. 4-inch pots, ready Oct. 1st, 50c. each; \$5.00 per dozen; \$40.00 per 100; 6-inch pots, ready now, fine plants, \$1.00 each.

A fine lot of Ferns in 3-inch pots, assorted varieties for Fern dish work. \$6.00 per 100, \$50.00 per 1000.

Asparagus Plumosus Nanus

per doz., \$6.00 per 100.

2½ in. pots, 60c. per doz., \$4.00 per 100; 3 in. pots, 85c.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

NEWS NOTES.

S. Burdette Reed, of Bound Brook, is now connected with W. L. Andrews' greenhouse, Elmwood, Conn.

The H. J. Heinz conservatories, Pittsburg, Pa., were opened to the public on October 28 for the winter.

Robert Newsham and Louis Buchler have taken positions with the Metairie Ridge Nursery Co., New Orleans, La.

Peter Murray, of Fairhaven, Mass., has vacated the Winsor greenhouses and is now located in his new houses on Washington street and Temple

Henry A. Bester and William Bester of Hagerstown, and R. Vincent, Jr., & Son of White Marsh, Md., had notable exhibits at the Hagerstown Fair on October 16.

A. Leuthy & Co., of Roslindale, Mass., have just received one of the largest shipments of azaleas and other decorative plants, that has ever come into the port of Boston.

Ernest C. Rees has purchased the greenhouse of Oliver Croucher, Hudson, Mass., and will continue the business in connection with his present houses on the Gates Pond road.

L. Pilivet, proprietor of the Neuchatel Nursery, San Francisco, has resumed business at his old place at Burlingame, which he abandoned immediately after the earthquake.

Auction sales of foliage plants have come to a close and auctioneer W. J.

Elliott reports the most successful fall season in several years. Boxwood, conifers, rhododendrons, Azalea mollis, etc., are now in order at the sign of the red flag in Fulton St., New York.

Prof. or Stone, Rhode Island State Commissioner for the suppression of the gipsy moth and other injurious insect pests, is now enlisting the services of Newport gardeners by suggestion and otherwise to aid him in formulating plans for the complete eradication of the San Jose scale. This scale has already worked great damage to fruit and other trees in this city.

HENRY M. ROBINSON & CO., FLORISTS' SUPPLIES 15 Province St., and 9 Chapman Pl., BOSTON

THE WILSON ESTABLISHMENT AT BROOKLYN, N. Y.

Our illustration, reproduced from a recent photograph taken by Fred. Lautenschlager, shows the establishment of one of Brooklyn's most progressive retail florists, Robert G. Wilson. This is the old Shannon place,

on Greene avenue, Brooklyn, N. Y., which Mr. Wilson has remodelled, and is running as an adjunct to his retail store on Fulton street. It is a good example of a compact establishment within the closely-built precinct of a great metropolis.

NEWS NOTES.

Harry Walthers has entered the employ of McLean, the florist, of North Phelps Street, Youngstown, Ohio.

The first good mignonette of the season is coming to the New York market from A. Sauter, of Nyack, N. Y.

Peter Gerlaid, of 57 W. Twenty-first street, New York, nearly lost his life last week, trying to stop a runaway team. He is very badly bruised.

The firm of Spaulding & Hodgson, florists, of Newport and New York, has been joined with A. Warren Spaulding and Charles F. Hodgson as partners.

Peter Brown, a retail florist, has rented a part of the floor space from Perkins & Nelson, wholesale florists, at 55 W. Twenty-sixth street, New York.

The stock of Mrs. Mary Fisher, florist, Worcester, Mass., was considerably damaged by water and smoke in a recent fire in the block in which her store is located.

The plants, fixtures and practically all the other movable property of the Hodgson firm at Newport, R. I., will be sold at auction November 1, for the benefit of the firm's creditors.

Chas. Stappenbeck, 1207 Polk St., San Francisco, is moving into his new store, which is built on the same place

where he was located before the fire. It is said to be the handsomest and most up-to-date store in San Francisco.

S. N. Peck, of Toledo, O., intends to sell his retail place on Broadway, on account of the sickness of his wife, who has so long attended to his interest there. He will thereafter confine himself to his new place and grow carnations exclusively.

On Tuesday evening, October 29, H. Robinson & Co. celebrated the first anniversary of their entry into the wholesale cut flower business by a reception to the trade at their place of business in Province street, Boston. A lavish entertainment of music and refreshments was provided throughout the evening which was enjoyed by nearly two hundred growers and dealers. The store was handsomely decorated with laurel festooning and boxwood garlands.

Reed & Keller, New York, have just issued their new catalogue and copies may now be had on application. It is a 180-page book with thick, flexible covers, illustrated with hundreds of high grade half-tones of florists' supplies in great variety. It is a superb production, highly creditable to this well-known and enterprising firm. With a few exceptions, all the goods listed are of American manufacture.

'TIS FREE TO EVERYBODY IN THE TRADE

H. BAYERSDORFER & CO., 1129 Arch St., Philadelphia, Pa.

Flower Market Reports.

BOSTON

Reflecting in some degree the atmosphere about the retail florists, whose customers are in a subdued frame of mind as a result of the recent financial strain, the wholesale market shows a decided downward tendency. This condition cannot fairly be attributed to the influx of chrysanthemums thus far although their effect on their products may be apparent later. Chrysanthemums themselves are not doing as well in proportion to the general trade as they did at the same season last year. Roses are greatly improved in quality, all varieties being seen in high grade but a good proportion of the receipts must look to the street fakir for consolation in the present stagnation. Colored carnations hang fire also, but the white ones find a fairly responsive market; there are enough of the latter, however, for all needs. Lily of the valley and violets are decidedly on the quiet list.

Trade opened only fair and remained rather quiet throughout the week.

The supply has been somewhat heavy, especially in the chrysanthemum line. Fancies were not too plentiful but a good lot of short and ordinary stock filled the market and prices were at low ebb. The last cutting of Monrovia, Polly Rose and a few other varieties were had and only of poor quality and many were carried along for the bargain seeker. A few of the late varieties are coming in and Duckham is leader in pink, Mrs. Weeks in white and Appleton in yellow, all of which were sold readily. Tea roses were in good supply, also Beauties but demand light. Carnations are increasing in quantity and find ready sale. Other stock is in good supply.

INDIANAPOLIS

Trade last week, though at no time rushing, could be classed as fair to good throughout. Every line seemed to share in a fairly active call. Out-door stock has been all through for about two weeks, but some good gladioli are being shipped in from the South. Chrysanthemums are coming in in large quantities, though, perhaps, not sufficient to call it a glut. The impression in general is that they are not bringing the prices they did a year ago. So far, they have not cut in on the sale of roses and carnations to the usual extent, as fancy Beauties are still in good demand and supply, while Teas are holding their own. Lily of the valley is too abundant for the demand and is not bringing top notch prices. Violets are improving daily, but do not clean up well. Cattleyas are seen everywhere. The usual quantity and prices prevail in green goods.

NEWPORT

We are now experiencing those conditions inseparable from the departure of the great mass of summer residents to their winter homes in the large cities where no doubt their presence will have a directly opposite effect on business, or will after the financial goblins now hovering around have vanished. It is surprising the effect such a scare as is here referred to has had no business even in a place like

NIESSEN This name represents satisfaction to the customer whenever flowers are wanted.

PHILADELPHIA The leading center of the cut flower interests of the country—where the best can always be got—if it can be got anywhere.

THIS WEEK We invite you especially to try us on Chrysanthemums, Beauties and Richmond.

Leo Niessen Co. 1209 Arch St. Philadelphia

Open from 7 a. m. to 8 p. m.

Newport after the greater number of millionaires have gone. It is very fortunate that a greater panic was averted otherwise the horticultural interests of this city would indeed suffer during the coming year if not before.

NEW YORK

The situation in the cut flower market here at present is very unsettled. Recent financial furries have unfavorably affected the trade of some dealers while others state that business is unusually good for the season. The wholesale markets maintain their equilibrium much better than might reasonably be expected, a fact due largely to the moderate size of the general product thus far. A heavy influx equalling the cut of last year at this date would disorganize things considerably. Chrysanthemums are now beginning to accumulate and prices are tending downward in anticipation of the expected surplus. Qualities are generally fine but prices are already much below those realized last season for the same quality under even conditions. Roses are improving in quality and some very fine carnations are beginning to come in. Violets are not yet up to standard and the demand for them has shown but little life so far.

PHILADELPHIA

A much better tone prevailed all along the line in this market last week. Improvement was especially notable in chrysanthemums, the finer varieties, such as Appleton, Florence Harris, Golden Dome and Ivory being plentiful and dominating the situation. No very large figures are quoted, but the demand is, and has been, excellent. Pompons in sprays in yellow, white and other colors are popular. The rose market is a little sluggish as to demand, but the cool weather has greatly improved the quality. Killarney, Chateaufort and Richmond are especially good. Carnations have also improved in quality and are selling well. Violets also are going better. The cattleya supply is larger than ever in the history of the trade, yet they seem to move off in pretty good shape. Dendrobiums are scarce.

SAN FRANCISCO

Business is quiet at the present time; in fact, we have had very little in the line of society events as yet, which is perhaps partly due to the unsettled conditions owing to the coming city elections and the graft prosecutions, in

the latter of which many of our leading society people are involved. Chrysanthemums are a glut on the market. They are of very good quality, both grown under glass and outdoors. Violets are also coming in in good quantities. Carnations and roses are in fair supply and of pretty good quality for the time of year.

After the rain and wind storm of the 27th and 28th, all nature is smiling once more, and business is improving right along. Cosmos and dahlias are virtually things of the past for there have been killing frosts in every section. Chrysanthemums are here in full ranks and are as much a favorite of the public as ever before. Carnations are responding to the cold weather, and both stem and color are much improved over the past few weeks.

BUSINESS CHANGES.

Robert S. McMurray succeeds Poole & Purlant at 605 E. Columbus avenue, Bellefontaine, O.

William Milley, Buffalo, N. Y., has sold out his business to his brother John, recently with the Erie Floral Co.

The business of Dietrich & Huston, 1146 Wall St., Los Angeles, California, will hereafter be carried on by Mr. Dietrich, his partner having retired from business.

The business of Alex. Emslie & Co., Barre, Vt., under the skilful management of George Emslie, has outgrown its old quarters and has been moved to the Woods block, where more room and modern conveniences are had.

A. L. Randall & Co., 19-21 East Randolph St., Chicago, have increased their capital stock from \$10,000 to \$50,000, a fact that speaks eloquently for the growth of the business and the strength of the firm.

ROBERT J. DYSART,

Public Accountant and Auditor

Simple methods of correct accounting especially adapted for florists' use.

OBITUARY.

O. B. Hadwen.

O. B. Hadwen, for many years president of the Worcester County (Mass.) Horticultural Society, died October 21, at the age of 63 years. Mr. Hadwen was a farmer and fruit grower, who took great interest in trees and pre-

THE LATE O. B. HADWEN

sented an area of about 50 acres, known as Hadwen Park, to the city of Worcester several years ago. He officiated as president of several other societies during his career, including the American Pomological and Massachusetts Horticultural Societies.

Other Deaths.

Michael C. Ring, for the past twenty-five years engaged in the florist business in Quincy, Mass., died on Oct. 26 at his home. Mr. Ring was born in Ireland in 1830 and came to America in 1855. He is survived by a widow and three children.

While he slept, Renn Thauer, a gardener employed by Frederick Fenster, of 345 Linwood avenue, Buffalo, was asphyxiated by coal gas in the barn at the rear of the Fenster home. His lifeless body was found in bed by Mr. Fenster. The police and Deputy Medical Examiner Howland were summoned. Dr. Howland believes the man fell asleep after filling the stove with coal and was soon overcome. Thauer was 65 years old.

Last week there passed away in the person of Dr. Frederick Bradley one of the most devoted and enthusiastic horticulturists in the city of Newport, R. I. Although as a horticulturist classed an amateur, Dr. Bradley was nevertheless an ardent supporter of every movement tending to the advancement of those practically engaged in the calling. He was at one time president of the Newport Horticultural Society and a member at the time of his death.

The Julius Roehrs Company, Ruthersford, N. J., are sending out an illustrated folder, introducing their beautiful new Rambler rose, Newport Fairy. A colored plate of this fine novelty is shown and gives a good idea of the rich pink tinting of its flowers.

WESTERN NEW YORK APPLE CROP REPORT.

According to reports from growers, the apple crop as a whole has made progress in the right direction lately. A recent windstorm blew many wormy apples to the ground, but the sound fruit on the trees was benefited. Winter varieties, especially Baldwins, have improved considerably since August, and the crop will turn out much better than expected a month ago. At the same time, however, it cannot be said that early deficiencies will be entirely recovered. The crop will fall short of last year in both quantity and quality, although there will be some fine stock.

Greenings have so far matured and ripened that they are being picked in various orchards. Results are irregular, some fruit showing up fine and some poor.

Taken as a whole, however, the out-turn may be called disappointing. At least, that is what many have termed it. One grower said that in his orchard where the crop looked pretty good earlier in the season, he was picking from one to two barrels of No. 2's in every ten. The fruit is being moved daily now into storage. Most of the storage space is leased, although some houses are still advertising that they have a little room left. The New York "Packer" says:

"The best Greenings have been bought at prices running from \$3 to \$3.75 a barrel. The best orchards are being picked up daily. The action of the middle western men has stimulated the buying movement. The operators from the west have been buying freely, paying the top prices as though they had money to burn and were not afraid to take a chance. Many of the eastern buyers passed up what the western men stumbled over each other to get. Some New York buyers would just as soon rob Peter to pay Paul, but they don't feel like robbing themselves to pay farmers four plunks for apples that will stand them from \$5 to \$6 a barrel. Such prices, they say, are too dangerous for the effete East. Consequently quite a few of them are letting the western operators bite off just as much as they want, and it is intimated that maybe some of them have already bitten off more than they can chew. Fruit that costs from \$4 to \$5 or more barreled and on top of that has to stand the storage charge, to the cautious eastern man looks like a questionable investment when money is tight and the investment field offers other more promising opportunities."

We are glad to learn from George M. Kellogg that, although it is only four weeks since the disastrous boiler explosion at his greenhouses in Pleasant Hill, Mo., he has already got the place into fair shape, the 67 houses, each 250 feet in length, all of which were damaged by falling fragments, being repaired and glazed. It took one thousand boxes of glass to accomplish this. The expense together with the cost of new boilers amounted to \$20,000. Mr. Kellogg says his greatest help lay in the fact that he had a carload of reserve glass on hand when the accident happened, and he recommends this as worthy of consideration by his brother florists. Mr. Kellogg desires to express through HORTICULTURE his appreciation and gratitude for the many words of sympathy which have come to him from every part of the country.

?

Is Your Name In The Above List? If Not, Why Not?

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants. Yours very truly,
New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
GEO. A. SKENE.

Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons. Yours truly,
Florham Farms, Madison, N. J., December 8, 1906.
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

H AND C

THE VITAL PROBLEM

in a successful greenhouse business, is the keeping down of running expenses—any florist admits that, but half of them forget that repairs really come under running expenses. We build a Half Iron House with steel eave, steel posts, etc., that because of its durability has won great favor, but it is our Iron Frame Construction that has a lease of life of half a century and more. That is why we always recommend to you our Iron Frame.

Write us.

HITCHINGS AND CO.

GREENHOUSE DESIGNERS AND BUILDERS.

Manufacturers of Heating and Ventilating Apparatus.

1170 Broadway,

NEW YORK.

THIS IS IT

The new greenhouse ventilating catalog. It differs from other catalogs because it not only shows gears and names prices, but goes into their merits, and special purposes to which they are best adapted, in an interesting way, just as we would talk it over together. Along with the rest we would probably bring up the question of where best to hinge the sash, and the merits of long or short runs—well, the catalog has its say-so on them, too. It is the kind of catalog every grower wants for reference. Drop us a postal and we will send it along.

We make every part of a greenhouse but the glass. We sell any part.

LORD & BURNHAM CO.

Greenhouse Designers and Manufacturers

1133 BROADWAY, cor. 26th Street, N. Y.

BOSTON Branch: 819 Tremont Building

PHILADELPHIA Branch: 1215 Filbert St.

The point is this: Here is a house that you can stand outside of and have an almost unobstructed view of what is inside—that means there are no heavy structural hindrances to obstruct your view. By the same token, all possible light reaches the plants. No gutter at eaves—light supporting members—and wide glass spacing *only* will give such growing results as U-Bar houses hold the record for. Get to know the U-Bar construction whys. The catalog points them out—besides its interesting reading. **Pierson U-Bar Company**, Designers and Builders *U-Bar Greenhouses*, Metropolitan Building, 4th Avenue and 23rd Street, New York.

CHRYSANTHEMUM SOCIETY OF AMERICA

The annual meeting of the Chrysanthemum Society of America was held in the Assembly Hall of the American Institute, New York City, on Wednesday afternoon, November 6, President A. J. Loveless in the chair. A letter explaining the unavoidable absence of Secretary Fraser was received and A. Herrington was elected secretary pro tem. The secretary's report was read, calling attention to the regrettable lack of organized enthusiasm among the chrysanthemum growers.

President Loveless read his annual address, which was listened to with close attention and was liberally applauded. It was as follows:

The President's Address.

Gentlemen,—When you chose me for your president at the Chicago meeting, it was with some reluctance that I assumed the responsibilities of the office, knowing the importance of the work undertaken by the society, and the reputation which had to be maintained; but with the assistance of all the officers, I look back with pleasure on the efforts of the past year.

Discouragements we have had, but I think I can with confidence say, that we are in a better and more promising condition than we were a year ago, but there is still need for a more general combined effort to place the society where it should be, and make it what it stands for, and professes to be, a really national society in every sense of the word. Individual responsibility can alone accomplish this, but the right spirit is still lacking among our membership, and if the society ever expects to maintain its position, every member must be up and doing, and make the growth of the society a personal obligation.

While we have steadily increased our membership, there are hundreds who should come in and help by their influence, to give impetus to the work of the society. It has been impressed upon the society the importance of personal solicitation. I emphasize that recommendation, and would also suggest the advisability of making an effort to put our society upon a more national basis.

I do not believe that the best interests of the society can be served by merely holding an annual exhibition in the autumn, as it has a tendency to localize the work in the immediate vicinity where the exhibition happens to be held.

A national society should have broader lines, and reach out so as to embrace every town in this country, where an exhibition of chrysanthemums is held, but this phase of the work can only be undertaken when the society has a regular standard membership, to insure sufficient funds to cover any expenses incurred. To this end I would suggest that the various horticultural societies throughout the country be invited to join the Chrysanthemum Society of America as auxiliaries, paying the national society an

amount to be determined by the membership of each individual society, pro rata. By this means every horticultural society in the country can become a part of the national society, and be enabled to compete for its special premiums, within its own jurisdiction.

Every lover of the chrysanthemum should belong to the national society, for when we consider the gradual improvement which has taken place in the quality of the flower, and the excellent blooms we see on our exhibition tables today, it inspires us with greater zeal for the further development of these gorgeous flowers, along the lines of superior quality, and nothing has done greater service in bringing about the results which we have witnessed today, in developing and encouraging

not be foreseen, and while we get some marvellous flowers from varieties originating in England, France and Australia, I feel sure the United States is capable of producing something even more phenomenal in size, and with a constitution suited to our climatic conditions, and while the whole world looks to us for the latest developments, let us be equal to the occasion, and by careful and systematic hybridization produce varieties which will be sought after the world over for their excellence.

We must work out our own problems in matters of cultivation, for no cultural methods successfully practiced in foreign countries can be adopted and carried out here with any degree of success, our climatic conditions being entirely different, this also being true of different sections of our own country.

A new era seems to have commenced by the introduction of the large-flowered, early varieties. These, I feel sure, will be very welcome, as in some localities the season for chrysanthemums is all too short, and we are fairly well supplied with late varieties, excepting, perhaps, a red variety that would come in for Christmas, the improvement seems to be in the right direction. The single varieties are also becoming more popular year by year, and as these are improved in quality and color, the general public will accept them as desirable plants for the home, and also for decorative purposes.

These are being grown more generally than is supposed, most every house of chrysanthemums containing a few singles, and as we become acquainted with them, our love for this class of blooms increases and we find a little more space devoted to them each year. The improvement of these varieties should be the work of our society, every encouragement being given to exhibits as opportunity offers. The importance of the Chrysanthemum Society of America as a factor in the chrysanthemum world can be appreciated when we learn that information is being sought after from Northern India by an admirer of our society, who is trying, as he says, to enlighten his ignorant countrymen and requests his name put upon our mailing list, that our publications may be forwarded. I cite this only as an instance which goes to show how the world is watching our progress, and it behooves every member of our society to consider the importance of a steady improvement in our work in keeping with the national character of our society.

A word regarding our annual report. I think it would be of the greatest importance could we arrange to include in its pages the reports of the various exhibitions held throughout the country, classifying the exhibits, naming the winning varieties in every case, and compiling these into a reference list, so that anyone could see at a glance which varieties had been most

ALFRED J. LOVELESS

President Chrysanthemum Society of America.

the growth of superior varieties, than the splendid work of the various committees appointed in the different sections of the country for this purpose, and here I would add that this society is indebted to these various committees for their untiring, unselfish devotion to the aims and purposes for which they are appointed, and which they so faithfully fill, for when we look through the various reports of exhibitions, we invariably see the prize winners are those varieties that have passed the censorship of these committees. Their work prevents anyone private or commercial, from needlessly occupying valuable space with worthless or doubtful varieties.

It is true that some varieties do not turn out as well as one might expect, but this fact is unavoidable and can-

successful in the exhibitions of the year, making valuable memoranda for the future.

I wish to thank the horticultural press for their courtesy in printing our notices, and also for their interest in the work of the society, and I hope in the future a column can be devoted to items of interest to chrysanthemum growers, and be contributed to by members of the society.

I also wish to thank the various committees who have so readily performed the duties of their office, to the donors of special premiums we also extend our thanks, and to the American Institute who have so kindly taken care of us during this convention, and to all those who have contributed in any way to the advancement of the interests of the Chrysanthemum Society of America.

Wm. Duckham then read a paper on the culture of the chrysanthemum, in which he contended that larger, nobler and more stately flowers is the key to continued popularity for the chrysanthemums. This paper will appear in these columns next week.

C. H. Totty then read an interesting paper on Single Chrysanthemums, which we present herewith.

Single-Flowered Chrysanthemums.

This type of chrysanthemum is not new, in the sense that it is a recent break from any other type, and yet it was until the past two years practically unknown by the majority of flower buyers in America.

There are several reasons for this, the principal one, perhaps, being that the general public has been educated to the large flowers and could not see their money's worth in the more modest singles, putting them down in their own minds as merely outdoor hardy flowers. Today things are changing and the single varieties are becoming recognized at their true worth.

I will confess that it was the working of the law of supply and demand that caused me to turn to the single varieties. Americans travelling in Europe and noting the many beautiful types of singles and the varied uses to which they were put, asked their superintendents why these singles were not grown more in America. As in every walk of business life the demand created the supply, and today I can point you to many private establishments where the singles are grown in ever-increasing quantity for conservatory decoration as pot plants, and where they are highly appreciated for cut flower use. One day last week I spent a few minutes in a high-class retail store; on the counter were two vases of singles, one Kitty Bourne, a yellow, and the other Ladysmith, a light pink. During those few minutes I noticed that two sales were made of those varieties, and though this may be only a straw, does not the old proverb say that a straw shows how the wind blows?

Aside, however, from the financial side of the question, the singles make beautiful pot plants, they are easy to grow, and there are few homes whose occupants cannot enjoy them if they care anything for flowers at all. There is no fear that the singles will displace the big fellows either on the show table or for large decorations; both

have their place and should be recognized.

I am not aware that the Chrysanthemum Society of America has ever made provision in its classification or scale of points for the single flowered types, but I submit it to the executive board for their consideration at some future date. The American hybridizer is busy raising new singles, and if the C. S. A. will give him encouragement and an ideal to aim for, I think we could soon see wonderful improvement over present types. I do not happen to know the scale of points of the British Society, but for the sake of uniformity it might be well, perhaps, in case this Society takes up the matter, to find out and see how they would apply to our own case.

A good type of singles to my mind should be first dwarf in habit. The weedy, loose-growing forms are not so well adapted for pot plants, nor do they make the showing as a cut flower that the dwarf or closer type does. The flower should be almost flat when opened; if the petal droops too much it destroys the shape of the flower, which should be circular—also the flower should not have too many rows of petals. A semi-double flower cannot be called a single in any sense of the word. If one add to these qualifications a flower of good, clean color, the result is a thing of beauty, which if not a joy forever is at least a source of great satisfaction to the grower and a boon to the gardener who has to produce a good deal of stock from a limited space.

Culturally, the singles present no problems to master. There is no question of crown or terminal buds, since the plants are allowed to develop naturally and of course give flowers only from terminals. I find it pays to disbud slightly, as the flowers then come out much finer and the plants respond to generous feeding as readily as do the big fellows.

A selection of good varieties would run about as follows: White—Miss Irene Cragg, Nancy Perkins, Gertrude, Miss T. C. Warden, and Merstham White. Pink—Ladysmith, Mrs. E. Roberts, Gracie Lambert, F. W. Smith, Reine des Roses, Katie Covell and Marvel. Yellow—Kitty Bourne, Lily Beer, Golden Star, Miss A. Holden, Pretoria and Kathleen Bunyard. Odd colors—Mary Richardson, salmon-red—one of the finest we have—Crown Jewel, a fine bronzy yellow, Belle of Weybridge, chestnut; Felix, chestnut; Linton, a large flowered deep blush; Rev. W. E. Rewfrey, a crimson maroon; Ethel Beer, a bright terra cotta.

The list of varieties runs into the hundreds and all have some merit, though many are almost identical in color, and one naturally looks for the cream only.

In conclusion, gentlemen, permit me to say that few plants will give better return for the amount of time and trouble involved in their culture than the once-despised single chrysanthemum.

Elmer D. Smith spoke in approval of the suggestion that the Society should recognize the different types of pompons, singles, etc., and provide a scale of points to meet all requirements in judging same. A motion by Mr. Totty

to appoint a committee to report a scale of points accordingly was carried.

Mr. Herrington addressed the meeting, urging that something be done to make the Society more truly national, and R. Vincent made an appeal on behalf of the hardy pompons, the only flower of the home gardens at this season of the year. He said that more than two-thirds of the hardy chrysanthemums now on the market had originated with him. Messrs. Totty, Smith and Duckham were appointed the committee to consider the interests of the pompons and single varieties.

Election of officers followed and the result was the re-election by a unanimous vote of all the officers of the present year, except the vice-presidency, for which August Poehlmann of Chicago was chosen. The selection of the next meeting place was left for the executive committee to decide.

Elmer D. Smith advocated action to get into co-operative relations with other societies. Mr. Herrington spoke in approval, as did also W. J. Stewart, who called attention to the existing committee on closer relations of the Society of American Florists, who would doubtless be glad to confer with a similar committee of the C. S. A. Mr. Herrington made a motion for an affiliation committee, which was carried, and the president appointed W. N. Craig, A. Herrington and Wm. Kleinheinz accordingly, with instructions to report as soon as possible to the executive committee.

President Loveless made an ideal presiding officer. He had as a special bodyguard the following members from Lenox, Mass.: Thomas Proctor, A. H. Wingett, Edwin Jenkins, Thomas Page, Frank Nash and Walter Fenn.

The Work of Committees.

Cincinnati, Oct. 26th. Commandant Mathien. Yellow, Jap incurved. Exhibited by The E. G. Hill Co., Richmond, Ind.; scored 87 points commercial and 88 points exhibition scale.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular monthly meeting and floral display was held on the 1st inst., at the Society's rooms in Orange. Among the more prominent exhibits were: A specimen *Cosmos* "Lady Lenox" in an 8-inch pot and a vase of same, by John Crosby Brown, gardener Peter Duff, also a standard bush chrysanthemum, "Lady Lydia," from the same hand. Vase of exhibition chrysanthemum blooms from Sydney and Austin Colgate, gardener William Read. Vase of Pink Ivory, from Chas. Hathaway, gardener Max Schneider. Vase of mixed chrysanthemums from Stewart Dickson, gardener Albert Larson. *Cypripedium insigne* Sanderai, grown and exhibited by Edwin Thomas, and fruit from Stuart Hartshorne, grown by A. T. Caparn and Chas. Hathaway. John Derwin, gardener for A. C. Van Gaasbeck was placed in nomination, and Charles Schweinfurth was elected to membership. Final reports were made upon the forthcoming show on the 7th and 8th, and the acceptances read of John N. May, Charles H. Atkins and Anthony J. Manda to act as judges. A letter of sympathy to A. S. Rose, who is ill with pneumonia, was ordered sent by the secretary. J. B. D.

GARDENERS' MUTUAL PROTECTIVE ASSOCIATION OF NEW ORLEANS.

At the last meeting of this association the main discussion was in reference to the screening of open wells which the local board of health contends must be done to avoid the rapid breeding of mosquitoes. A committee of this association was appointed to call the health officers' attention to the fact that these open wells do not breed mosquitoes, for the simple fact that they contain minnows, fish which eat the larva of the mosquitoes, and as a consequence they are an assistant in killing the mosquitoes. The discussion brought forth also the fact that if these wells were screened or were equipped with tight covers and a pump attached, the water would become stagnant and injurious to young plants, especially lettuce, cucumbers, chrysanthemums, etc. The secretary of this active organization is John Parr. Meetings are held at 2 P. M. on the second Sunday of each month.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual meeting of the Massachusetts Horticultural Society for the election of officers for the ensuing year and for the transaction of such other business as may be legally presented will be held at Horticultural Hall, 300 Massachusetts avenue, Boston, at 11.45 A. M., on Saturday, November 16, 1907.

The officers to be elected are a president, vice-president (for two years), four trustees (for three years) and a nominating committee of five members.

The election will be by Australian ballot and the polls will be open continuously between the hours of twelve noon, and four in the afternoon.

WILLIAM P. RICH, Sec'y.

NORTH SHORE HORTICULTURAL SOCIETY.

This society held its regular meeting Nov. 1st, President McGregor in the chair. The report of the show committee for 1907 was read and accepted.

James Salter was awarded a special prize for a seedling anemone flowered chrysanthemum, lavender in color with fine quilled petals.

Eric Wetterlow received a certificate of merit for a fine collection of pompon and anemone flowered chrysanthemums.

The subject for discussion was Nitro-Culture, opened by William Till. Cultures, dried on cotton and in liquid form were used by the speaker to illustrate his remarks, also roots showing nodules; without these nodules a leguminous crop impoverishes the soil of its supply of nitrogen instead of enriching it.

The object of nitro-culture is to inoculate the seed of leguminous plants, or the soil in which they grow, with nitrogen-fixing-bacteria, which collect or enable the plant to collect, free nitrogen from the air and deposit it—through the roots—in the soil for the use of present and succeeding crops. Cultures for any leguminous crop and directions can be obtained free from the Bureau of Agriculture, Washington, D. C., on application. The society extended a vote of thanks to Mr. Karl Kellerman of the Department of Agriculture, Washington, for his courtesy in sending samples of cultures and for information concerning the subject.

DETROIT FLORISTS' CLUB.

The outing of the Detroit Florists' Club to Mt. Clemens last Friday was a great success, and the large number of club members participating was increased by 13 fellow-florists from Toledo, O., who joined in the merry round.

Visits were made to Messrs. J. F. Sullivan, John Breitmeyer's Sons, Robt. Klagge, Taylor, Stevens, Carey, Boeslager, and many interesting features were noted everywhere. Especially noticeable was the good condition of crops, particularly violets, which have been a disappointment for years back. Mr. Klagge's new boiler house with two 16-foot horizontal Atlas boilers was voted the best yet. Mr. Boeslager's new office, erected of cobblestones and fitted out with concrete benches tastily arranged with ferns, etc., was also greatly admired. This excursion lent itself well for some great surprises in the way of showing the club's appreciation for the faithful services rendered by some of its members. Among these was a presentation of a beautiful set of drawing tools to Mr. Dilger through J. F. Sullivan; the former then presented Mr. Sullivan with a gold watch, while Pres. Scribner surprised the watchdog of the treasury, Walter Taepke, with a fountain pen.

On November 19 the local club will hold an exhibition at Harmonic Hall for its members and friends. Any florists desiring to show novelties may do so by consigning them to the Michigan Cut Flower Exchange.

FLORISTS' CLUB OF PHILADELPHIA.

One of the best meetings of the club was held on Tuesday evening. President Hahman was in the chair and all the newly elected officers were present. George Craig was elected treasurer in place of J. Wm. Colflesh, resigned.

A pleasant feature of this meeting was the enjoyable time provided by the new board of officers. Walter P. Stokes spoke on the forcing of lily of the valley. He stated that the main point in successful valley forcing was to secure the best "pips" available; not how cheap but how good must be the watchword. Berlin pips were found to be the most satisfactory in preference to those known as Hamburg. Samples of pips were shown. Two bunches of the forced article were on exhibition, showing the difference in bunching preferred by the New York and Philadelphia markets. Those for the latter were tied up in a more natural way than the New York style demands, where the flowers were bunched in the centre of the leaves and projecting above same.

A vase of Robert Scott & Sons' new rose, Mrs. Jardine, was on hand and much admired.

Chas. Zimmer and Sons, West Collingswood, N. J., exhibited two vases of good commercial varieties of chrysanthemums, Zimmer's Yellow and Mrs. Perrin. The latter variety has the honor of being the only chrysanthemum scoring 100 points, which it did as a novelty before the New York committee of the Chrysanthemum Society of America. It is still admired for its color and form, but in these days it seems to lack size.

Exhibitions at the regular meetings are recommended by President Hahman to be made more of a feature in the future, and he instructed the newly appointed committee on exhibits that each member thereof would be expected to solicit contributions of new, rare or interesting flowers or florists' supplies, etc.

CLUB AND SOCIETY NOTES.

The Cleveland Florists' Club (Ohio), at its next regular meeting, November 11, will hold its annual chrysanthemum exhibition.

The next meeting of the Indianapolis Florist Club will be held November 13 at the Walhalla, 333 E. Washington street. All visiting florists are invited.

The following officers were elected at a recent meeting of the Wood County Horticultural Society at Bowling Green, Ky.: President, J. F. Lundy; vice-presidents, S. S. Vermilya and S. S. Rodgers; secretary and treasurer, I. M. Hower.

Mr. Editor, HORTICULTURE, Boston:

I must say that when you started your paper I did not care about it but either it has improved or else I have, for I look upon it as preferable to either of our western trade journals now. It has been making friends and I hope it will continue to.

Very truly,
K. F.

Wisconsin.

The fall awakening

Unfortunately for those who would like to attend as exhibitors or as interested spectators the many widely separated fall shows, there are insurmountable limitations of time and space to which all must submit and the most ambitious traveler must content himself with a visit to comparatively few of the pleasant affairs with which this week and the next are crowded. Again, there are many who by reason of location or business confinement, will be deprived of the advantage of attending even one of these events which are so inspiring

and instructive to those who are willing to learn. There is no greater incentive to new aims and activities than the opportunity to see what others are doing and this is not only true in the case of the florist but applies equally to the people to whom the florist looks for patronage. Nothing so awakens the desire to possess beautiful plants and flowers as the opportunity to see them at their best. Here is where the "fall opening" comes in and the retail florist who does not take advantage of this to such extent as his means and opportunities permit, rejects a valuable aid, for there is no better trade stimulant than a well-managed and widely-advertised fall opening exhibition.

A serious plight

President Wm. Dutcher of the National Association of Audobon Societies is authority for the assertion that because of the decrease in birds the United States is losing yearly a sum larger than the capitalization of all the national banks in the country. This statement was made by President Dutcher at the annual meeting of his association in New York City last week, statistics being given to show that eight hundred million dollars' worth of agricultural and horticultural crops are destroyed by insects every year, the destruction being directly traceable to the rapid decrease in the number of insectivorous birds. The savage instincts which thrive on killing as a pastime are allowed entirely too much liberty. The hordes of immigrants of low intelligence which we are admitting are, no doubt, responsible for much of the trouble but not for all. The boy with the shot gun is entirely too numerous and his elders encourage him in the notion that the more lives he can take in a given time the greater his claim to distinction. It is time for the horticultural and agricultural interests to wake up, now that the truth is out, and ally themselves with the game protective associations and other instrumentalities with a view to put a stop, as soon as possible, to this wholesale slaughter of the best friends of the tillers of the soil.

Monuments and trees

The happy outcome of the widespread protest against the proposed destruction of the historic trees that adorn the National Botanic Garden must be interpreted as an expression, through the press and the nation's representative men, of the higher estimation of tree life which is obtaining with the people. It would seem that henceforth sanction for the removal of useful or noteworthy trees to make way for so-called public improvements will not be so readily granted and that it will be necessary to make out a very strong case before such destruction as has been tolerated in the past can be repeated. The lesson has been a slow one to learn but the public are at last coming to a realization of the fact that the penalty for recklessness in forest destruction, bird and animal slaughter and other interferences with the established balance of Nature's operations is not only inexorable but insufferable. We agree with the editor of one New England paper who says that arboricide ought to be regarded as a crime and that every movement calculated to impress the young and inspire public opinion to resistance against the encroachments of those who have no regard for trees other than their value as wood is a true philanthropy. As between a tree which has required half a century to mature and a monument or building which can be constructed in a few months there should be no hesitation. The country is big and there is abundant room for monuments but we have no trees to spare.

THE FASTIGIATE GINKGO.

No. 1.

No. 2.

No. 3.

Dear Mr. Editor:

It is to be regretted that the photographs that I had hoped to have appear in *HORTICULTURE* with the one taken at Washington, D. C., were lost, because the reading matter would have been more understandable if all had been printed in same number. However, Mr. Thomas had kindly made others, which I now send to you with these notes.

The one labeled No. 1 was taken in Girard College grounds on one of the play grounds. Two Ginkgos may be seen in the picture, both of which are

No. 4.

quite distinct, yet which more nearly represent the type than do those in Nos. 2, 3 and 4. These are growing in Fairmount Park, Philadelphia. No. 2 shows the pyramidal form quite satisfactorily on account of more "sky-line" than could be gotten in No. 3, although, as seen growing, this is the better tree. No. 4 is seen in the rear of the Liberty Statue—erected during the centennial year. All the illustrations prove, I believe, that this particular variety of Ginkgo is a selection and has been propagated by grafting or possibly from cuttings.

EDWIN LONSDALE.

DAHLIA CHARLES LANIER.

The sensational dahlia which is the subject of our frontispiece this week was raised from seeds resulting from a number of careful crosses made by A. H. Wingett, gardener on the estate of Charles Lanier at Lenox, Mass., five years ago. At Lenox, Newport, New York and Boston where it has been shown it has been the feature of the exhibition. Our characterization of it as the "Col. Appleton" of the dahlias at the time it was exhibited in Boston, will perhaps carry as good a conception of this magnificent flower as any description we can give. The rich yellow flowers are from 5-1-2 to 7 inches in diameter carried on strong, straight stems high above the foliage and are produced in remarkable profusion. The symmetry and fullness of the blooms are well shown in the illustration. We learn that Mr. Wingett has disposed of his entire stock of this novelty to R. & J. Farquhar & Co., Boston, by whom it will be disseminated to the trade during the coming season.

I get more instruction and benefit from "*HORTICULTURE*" than from any other magazine. J. A. G. Massachusetts.

BEGONIA PERLE DES MULTIFLORES.

Trans. by Hort. Trade Journal.

This variety might at first sight be taken for a member of the *B. semperflorens* section, but it is a tuberous rooted plant with leaves that remind one of *B. Pearcei*. It is an extraordinarily abundant bloomer, the blooms double, and of a light-red tint, and 4-5 cm. in diameter. The height of the plant is about 25-30 cm. and the diameter 30-35 cm. and the stems are very thickly set with small leaves. The plant has an equal value with the well-known *Begonia Lafayette*, and when in full flower it has an even finer effect. Unfortunately there being no pollen, no seeds form, but the plant furnishes cuttings abundantly, which strike and grow readily.—G. Besoke, head gardener with the firm of Ernest Benary, at Erfurt, in *Moller's Deutsche Gartner Zeitung*.

NEXT WEEK.

The next issue of *HORTICULTURE* will contain full reports of several of the most important exhibitions, including those at Boston and Chicago, the latter from the pen of the veteran chrysanthemum enthusiast, John Thorpe.

PERSONAL.

H. L. Belcher, florist, of Winthrop, Mass., and Miss Edith Moses were married recently.

F. Gomer Waterer sailed for England on the Adriatic from New York on November 6.

Last reports from Mrs. A. M. Henshaw, New York, who has been critically ill, are reassuring, and her recovery is now confidently expected.

L. Smith, florist, of Tewksbury, Mass., who was recently married, was given a Halloween surprise party by his Lowell friends, which proved a most enjoyable affair. John Reidy was master of ceremonies.

A CORRECTION.

Some little inaccuracy crept into our "Wireless from Robert Craig," in last week's issue. In mentioning the crotons raised by Edwin Lonsdale, instead of "one seed pod" we should have said "one cross-fertilization," as anyone who has seen crotons fruiting will understand. The topic is, however, otherwise an interesting one, and we hope to present an illustrated article shortly, from the pen of Mr. Lonsdale, giving more in detail his experiences in crossing crotons.

THE EXHIBITION SEASON

RECENT SHOWS.

The New York Exhibition.

The combined exhibitions of the Chrysanthemum Society of America and the American Institute, which opened at the Berkeley Lyceum, New York City, on Wednesday, November 6, was remarkable for the superb quality of the chrysanthemum blooms staged. It can safely be said that the annual meeting of the Chrysanthemum Society has never brought out so fine a display, and much regret was expressed at the entirely inadequate size of the hall, everything being of necessity crowded together so that much of the beauty was lost to the visitor.

Beyond all other exhibits and surpassingly beautiful was the vase of Montigue, incurved yellow, which won the C. S. A. silver cup offered for the best ten blooms, any variety. The exhibitor was Thomas Proctor, gardener to R. W. Paterson, Lenox, Mass. The Lord & Burnham gold medal for best six blooms of any new introduction went to C. H. Totty, who staged the new English variety, W. Moir, white. Other winners of special premiums were Wm. Kleinheinz, gardener to P. A. B. Widener, Phila., vase of ten yellow, with Mrs. Wm. Duckham; three blooms of M. F. Plant (the Stump & Walter prize); six blooms of any new American variety with Lynwood Hall, incurved white (the Nathan Smith & Son prize); twelve blooms of Miss Clay Frick (silver cup). Harry Turner, gardener to Howard Gould, ten each Beatrice May. Wm. Duckham and Col. Appleton (the F. R. Pierson cup); twenty-four blooms in six varieties (the Dreer prize). Wm. Turner, gardener to M. C. D. Borden, twelve blooms in four varieties (the Thorburn prize). John Downing, ten blooms Beatrice May (the Boddington prize). Six blooms Miss Miriam Hankney (the Wells medals), gold medal to C. H. Totty, silver medal to W. H. Waite, bronze medal to Thos. W. Head. Twelve introductions of 1907 (C. H. Totty prize), won by Nathan Smith & Son, with the following varieties: Miss L. H. Corkett, Dakoma, Villa de Paris, Winifred, Miss Clay Frick, Dubuisson Froubert, Henry Hughes, M. Louiseau Rousseau, Mrs. O. H. Pierson, Ongawa, Mrs. Walter Jenks, Pres. Loubet. These were the main features of the C. S. A. section, and the judges were W. N. Craig, North Easton, Mass., and Robt. Cameron, Cambridge, Mass.

In the Institute section the exhibits were also superb. Among the most remarkable were John McNicoll's ten varieties, one bloom of each; Wm. Turner's twenty ditto, and C. H. Totty's thirty ditto; Thos. Proctor's ten blooms in variety; the groups of ten in specified colors in which first prizes went to John McNicoll for Mrs. Partridge, Wm. Turner for Col. Appleton, Wm. Duckham and Nellie Pockett; the classes of six each, specified colors, first prizes going to Thos. W. Head for M. F. Plant, C. H. Totty for Mirza, W. Turner for Ethel Fitzroy, W. R. Church, Cheltoni and Wm. Duckham,

G. H. Hale for Merza, Wm. Duckham, White Carnot, Mrs. E. Thirkell and Mrs. H. Partridge, and Thos. W. Head for John Frazer.

Two specimen plants from Peter Duff, Orange, N. J., were good evidences that this renowned grower had lost none of his skill. There were some splendid displays of pompon varieties from R. Vincent, Jr. & Son, of White Marsh, Md., and anemones from J. J. McNicoll, C. H. Totty and others. A. H. Wingett showed Cosmos Lady Lenox, and John Cook of Baltimore had on exhibition a seedling rose of rich pink color which was greatly admired.

The Tarrytown Exhibition.

Agreeably to its fine record in past years the Tarrytown Horticultural Society put up an exhibition at Music Hall, Tarrytown, N. Y., on Wednesday, November 6, of which any society might be proud. It was not a chrysanthemum show although, of course, chrysanthemums were a prominent factor. The hall was elegantly decorated by L. A. Martin and the exhibition was so large as to rather over-crowd the hall. The front of the stage was banked with pompons, palms, etc., by F. R. Pierson Co., who also added, not for competition, a table of carnations comprising their specialties, White Enchantress, Beacon, Melody and Winsor.

There were in all 375 entries in the various classes, as against 200 last year. The schedule was remarkable for the large number of special prizes.

There were two superb groups of foliage and flowering plants by Mr. Berolzheimer, gardener D. McFarlane, and S. Untermeyer, gardener W. H. Waite, Mr. McFarlane being awarded first and Mr. Waite second. The special class V. (Pierson U-Bar prize) for most effectively arranged table of decorative plants, also brought out notable groups of crotons, dracaenas and drooping grasses from these two experts. The Untermeyer special prize for Lorraine begonias brought out six elegant entries.

A feature of the chrysanthemum bloom section was D. McFarlane's set of twelve varieties in competition for the Archbold prize, the varieties included being Mrs. D. West, F. S. Valis, Ben Wells, Mrs. J. E. Duane, Mrs. F. F. Thompson, Mrs. E. Thirkell, Mrs. Partridge, Morton F. Plant, May Seddon, J. R. Upton, Lady Hopetoun and Glenview.

F. R. Pierson showed a superb specimen of his *Nephrolepis superbissima*.

Scott Bros. showed a handsome red seedling rose, a cross between Killarney and Gen. MacArthur. Col. Wm. Jay, gardener A. L. Marshall, showed a striped sport, from Carnation Lady Lountiful.

The above is only a fragmentary report of one of the best exhibitions of the year. The judges for the first day were Wm. Eckels of Islip, W. C. McCullum, Islip; Jas. McCullum, Paterson, N. J.; and John Grant of Stamford, Conn.

Many of the regular and special

classes were reserved for the second day.

A partial list of the awards follows:

SPECIAL PRIZES.

Society's silver medal for new decorative plant not in commerce. The F. R. Pierson Co. with *Nephrolepis superbissima*. F. R. Pierson prize for 25 blooms each of Winsor, Helen M. Gould and Enchantress. First, silver cup, S. Untermeyer, gard. W. H. Waite; second, Frederick Potter, gard. W. C. Roberts.

CHRYSANTHEMUMS.

Archbold prize for 12 blooms, distinct varieties, height 15 inches. First, Emil Berolzheimer, gard. D. McFarlane; second, Wm. Rockefeller, gard. Geo. Middleton.

Lewis cup for 24 blooms, distinct varieties, height 15 inches. First, D. McFarlane; second, Geo. Middleton.

C. B. Johnson prize for pompons grown outdoors. O. B. Jennings, gard. Oscar Carlson; second, C. H. Wetherbee, gard. Francis Milne.

Nichols prize, for six pot plants, six varieties. First, Henry Siegel, gard. Thos. Atkinson; second, Geraud Foster, gard. E. Jenkins.

Special, for 12 blooms Miss Clay Frick, 24-in. stems. First, E. Jenkins; second, D. McFarlane.

Vaughan prize for six blooms, distinct varieties. First, W. C. Roberts; second, W. H. Waite.

Vanderbilt prize for largest bloom and Osborn prize for 36 blooms, six varieties, D. McFarlane.

A. Johnson prize for vase of 25 blooms. First, W. J. Buckley; second, Thos. Atkinson.

Pierson U-Bar prize for table of decorative plants. First, D. McFarlane; second, Joseph Eastman, gard. Robert Angus.

Julius Roehrs Co. prize for table of orchids and ferns in pots, W. H. Waite.

Dreer prize for collection of stove plants. First, W. H. Waite; second, R. Angus.

Boddington prize for 12 varieties of vegetables grown outdoors. R. & H. Scoville, gard. W. Angus; second, E. Jenkins.

Siegel prize for table of flowering plants and ferns, W. H. Waite.

Untermeyer prize for six plants Begonia Gloire de Lorraine. First, Mrs. Stuyvesant Fish, gard. W. J. Buckley; second, Thos. Atkinson.

Chrysanthemums in pots, D. McFarlane, W. C. Roberts, Thos. Atkinson, W. H. Waite. Other plants in pots, Francis Milne, D. McFarlane, W. H. Waite, W. J. Buckley, J. S. Walquist, H. Nichols, T. Atkinson. On cut blooms of chrysanthemums, W. C. Roberts, five prizes; Howard Willets, gard. A. Weisenberger, H. Bowman and R. Langle were the winners in the violet classes. In fruit, prizes went to J. P. Sorenson, W. H. Waite, Geo. Middleton and H. Nichols, and in vegetables to Walter Angus, E. Jenkins, Geo. Middleton, D. McFarlane, O. Fallon.

Pittsburg Exhibitions.

The fall exhibition in the Schenley Park Conservatories opened November 2, and in spite of the inclemency of the weather was very well patronized. This show is a popular one and in a great measure helps to popularize the chrysanthemum in Pittsburg. Situated as the greenhouses are, in close proximity to the smoky sections of the city, the culture of the chrysanthemum is rendered more than doubly arduous. J. Jones and his staff had on exhibition over 8,000 plants and about 2,000 later varieties in reserve. About 1,500 of those on exhibition are planted, the remainder are in pots. The manner of arrangement is particularly effective; the colors are massed and usually with a background of tall evergreen temperate plants. Large masses of Vivian Morel are particularly pleasing. This variety does well here, being extra well colored. Large masses of Charles Davis make a good show. Cheltoni, F. S. Vallis, Mrs. W. Duck-

ham, Golden Gate and Golden Age, all good yellows, are used to advantage. Some of the best pinks are M. Loiseau Rousseau, Mm. Armand Detroyat, which is a fine light pink, Leila Filkins, Reine Wilhelmine, Kinkora, Beatrice May, Orizaba, Mayor Weaver, which is a great favorite here and the popular trio, Balfour, Enguehard and Duckham. May Seddon is a very large white. Large masses of Nellie Pockett were noticed and some well developed Mrs. H. C. Frick. A majority of the flowers are of a good size and quality, some particularly large; the largest of all is a mammoth flower of Mary Ann Pockett, bronze. In other compartments are many things worthy of mention, chief amongst these are the nepenthes which are really a fine sight; the *Cattleya labiata*, *Lilium Harrisii*, crotons and *Nephrolepis Whitmani*. The stove plants are looking particularly well, and in the reserve or growing houses are many good things, notably some healthy plants of *Phalaenopsis*. The management of these conservatories deserves great praise for the efficient manner in which these gigantic structures are run. The people of Pittsburg are particularly fortunate in having an opportunity to study plants and flowers in such variety and on such an elaborate scale.

At the Peacock greenhouses, North Highland avenue, Superintendent T. P. Jenkinson has an exhibit of chrysanthemums, begonia and orchids of a high grade of quality, the chrysanthemums being splendid examples of cultural skill and the arrangement a triumph of executive ability. Over 3,000 plants are grown; the flowers of the majority are above the average in size and finish. Amongst the finest are Lady Cranston, Lady Lennard, Miriam Hankey, President Viger and Beatrice May, all pink, Mrs. Geo. Hunt and Rose Lawrence, yellow, and Reginald Vallis a fine cerise. The usual standard varieties, including Col Appleton, Cheltoni, Balfour and Duckham, are well grown. The orchid house is of special interest to visitors and contains some well flowered plants of *Odontoglossum grande*, *Cattleya labiata* and *Percivaliana*. The Begonias Gloire de Lorraine are fine plants, just coming into flower; a little late for the present exhibition but will make a splendid show later.

J. HUTCHINSON.

Morris County Gardeners' and Florists' Club.

The Madison Flower Show, viewed from whatever point, was a big success. Wm. Duckham and Arthur Herrington, usually the largest exhibitors, were unable to show on account of deaths in the immediate families of their employers, but their identity was not lost. Mr. Herrington decorated the stage in his usual masterly manner and Mr. Duckham put up the central group, a centre piece of a fine palm with single chrysanthemums in many colors and hues. The quality of the exhibits was better than ever in all classes. The big fluffy chrysanthemum blooms pleased the public most. The biggest thing in them was in Class 7, 24 blooms in 24 varieties, 12 inch stem. The first prize was \$50.00 cash. A large number of entries came. Chas. H. Totty was 1st; Wm. Turner, Oceanic, 2nd; Wm. F. Lyons of Mor-

ristown, 3rd. It was the hardest class to decide. The margin was close and Turner gave Totty the race of his life. The O. H. Kahn silver cup for two vases of pink and white chrysanthemums was won by John Downing, "Brooklawn," Morris Plains. That, too, was a well-earned prize, as the judgment was very close.

Other classes were well filled and when the judges were ready for lunch it was three o'clock P. M. They earned their meal. Amongst the first prize winners in chrysanthemums were: John Downing, James Frazer, C. H. Totty, H. B. Vyse, Peter Duff, A. R. Kennedy, and Wm. F. Lyons. In roses, L. A. Noe, L. B. Coddington, Frank L. Moore, Wm. G. Badgley, Edw. Reagan and Wm. Inglis. The carnation exhibits were better in quality and more numerous than ever before, there being 58 entries. Edw. Reagan was first in the Farquhar Special, with Robt. Craig, Rose Pink Enchantress and White Perfection. A. R. Kennedy was first in Vaughan's Special with Victory. John Downing won the F. R. Pierson prize for Winsor. Wm. Inglis won Class 33 and C. H. Totty Class 34. One of the finest things in the show was a vase of new carnations, Afterglow, from Daille-douze Bros., which got certificates of merit. This vase of 50 Afterglow sold at auction at the close of the show for \$7.00. In the winning classes of carnations were invariably White and Rose Pink Enchantress, Robt. Craig, Victory and White Perfection. In the groups of chrysanthemum plants and foliage plants 50 sq. ft., John Downing came out first, winning the Pierson U. Bar Co. prize. These groups are always well contested and are the best features in the show. Taste in arrangement shows up strongly in the winning. Violets were scarce, and only a few exhibits were on hand, Peter Duff and Wm. S. Herzog were winners. Peter Duff brought fine specimen plants. He won first prize with John Downing a close second. Vegetables were better than last year. James Frazer got the Poddington and the Burnett prizes and H. B. Vyse the Henderson prize. Lager & Hurrell's collection of orchids was an especial feature the general public could not fully appreciate, as it contained many rare specimens. A. B. Kennedy had a dozen well flowered *C. labiata*.

The single varieties of chrysanthemums were very striking, grown naturally, no disbudding. They were in pleasing contrast to the great Goliaths that were so numerous throughout the show. In the opinion of good judges the best chrysanthemums of 1908 introduction shown were W. W. Moir, pure white; Mary Donnellan, deep yellow; Mary Mason, cerise and bronze; Mrs. N. Davis, white; J. H. Broomhead, rose; and Mrs. W. Wells, a bronzy red. There are some more good ones, but these seem to be the cream.

United Bay Shore Horticultural Societies.

The sixth annual show was held on Nov. 1 and 2, with a fine display of flowers, fruit and vegetables. While the number of chrysanthemums was possibly not quite as large as last year, the blooms surpassed anything yet shown. S. T. Peters and Louis Bos-

sert had the finest displays of this flower. Mrs. C. A. Schierer won the silver cup for best six varieties of vegetables, and showed the best vegetables grown from Thorburn's seeds. Other competitors were H. G. Timmerman, W. B. Cutting, W. Dick, F. H. Kalbfleisch, J. Kempster, J. H. Dick, E. P. Strong, Mrs. J. Gibb. The judges were Peter Duff, Orange, N. J.; Wm. Turner and N. Rutterbach, Oceanic; Robt. Angus, Tarrytown.

Monmouth County Horticultural Society.

The annual exhibition of this society was held on October 30 and 31, at Red Bank, N. J., with the usual array of fine plants and blooms that are always produced here, together with many novelties, among which were cosmos by William Turner, and seedling chrysanthemums by W. W. Kennedy, the latter taking the special Hartshorne prize. H. A. Kettle won the Hartshorne prize for 25 carnations. A. Bauer, gardener at the O'Day estate, was first in chrysanthemum group. Other successful exhibitors were Wm. Turner, N. Butterbach, G. Hale, M. Tierney, Geo. R. Kuhn, Wm. Dowlen. The judges were C. H. Totty, of Madison, Peter Duff, of Orange and Jas. Ballantyne, Tarrytown, N. Y.

New Haven County Horticultural Society.

The exhibit of the New Haven County Horticultural Society in Music Hall, New Haven, Conn., which is in progress as we go to press, presents a fine display from a general viewpoint. In the group of plants and cut flowers and display of seeds, bulbs, tools and garden fixtures, F. S. Platt Co. took the prizes. David Kydd was first in group of foliage plants as in several other classes. Robert Patton, O. Carlson, Henry Cliff, J. H. Murray, J. P. Sorenson are other prize winners. E. Jenkins, Lenox, Mass., again won the Scoville challenge cup, which now becomes his property. A fuller report will be made next week.

San Diego Floral Association.

The San Diego Floral Association opened their three days' flower show in Germania Hall, San Diego, Cal., on October 25 with an address by Mayor Forward. The exhibits were attractively arranged, and among the commercial growers were G. F. Otto, Coronado Nursery, K. Sessions, E. Benard and Oceanside Floral Co., all of whom are among the prize winners. The attendance was unusually large and the exhibition was a decided success financially.

COMING SHOWS.

St. Louis Horticultural Society.

The program and premium list for the flower show to be held at St. Louis, Mo., on November 12th to 15th has been received. On the first day the Shaw premiums aggregating \$500 for decorative foliage and flowering plants, chrysanthemums in pots, etc., will be awarded; also the S. A. F. medals and the premiums for cut chrysanthemums, roses and carnations and floral displays amounting to nearly \$500. The second, third and fourth days provide

for special exhibits with equal liberality. Copies of the prize list can be obtained from Otto G. Koenig, secretary, 6471 Florissant avenue, St. Louis.

The following have been mentioned at length in preceding issues of **HORTICULTURE**:

Florists Club of Washington (D. C.), Nov. 12-14. Chas. McCauley, 18th and Kearney Sts., Washington, D. C., secretary.

Horticultural Society of Buffalo, Buffalo, N. Y., Nov. 11-17. J. H. Tranter, P. O. Box 994, secretary.

St. Louis Horticultural Society, Grand and Park Aves., St. Louis, Mo., November 12-15.

Montreal Gardeners' and Florists' Club, Chrysanthemum show, Nov. 13-14, Victoria Rifles Hall, Montreal, Que. W. H. Horobin, 283 Marquette St., secretary.

Pennsylvania Horticultural Society, Horticultural Hall, Philadelphia, Nov. 12-15. David Rust, secretary.

State Floral Society of Arkansas, Little Rock, Nov. 14-16. Chas. Vestal, secretary.

Annual flower show, Waco, Texas, Nov. 13-16. Capt. J. D. Shaw, President.

Worcester County Horticultural Society, Chrysanthemum show, Worcester, Mass., Nov. 14. A. A. Hixon, secretary.

Lake Geneva Gardeners' and Foremen's Association, Lake Geneva, Wis., Nov. 15, 16. Albert Meier, Lake Geneva, Wis., Sec'y.

Ontario Horticultural Exhibition, Massey Music Hall, Toronto, Ont., Nov. 12-16. H. B. Cowan, Parliament Building, Toronto, secretary.

November 16 is the date selected by the Toledo Florists' Club, Ohio, for their chrysanthemum show.

Denison Civic Improvement League, Denison, Tex., Nov. 20-22. T. W. Larkin, secretary.

Maryland State Horticultural Society, Fifth Reg. Armory, Baltimore, Dec. 3-4. T. B. Symonds, College Park, Md., secretary.

The chrysanthemum show of the Columbus Florists' Club (Ohio) will be held on November 12. Two special prizes of \$3 each will be given for the best 6 and 12 cut blooms.

LOCAL AND FLORISTS' SHOWS.

November 2 was observed as Chrysanthemum Day at the experiment station, Burlington, Vt.

Highland Park Conservatories, Rochester, N. Y. Chrysanthemum exhibit during November.

The display of chrysanthemums by Henry Barton, Westfield, Mass., surpasses anything in that locality.

Julius Dubois, New Orleans, La., is holding his customary chrysanthemum show with some magnificent blooms.

The second annual show of C. Peterson & Sons, Escanaba, Mich., closed

on November 4 and was satisfactory to both visitors and the firm.

John Schoonmaker & Son, 94-100 Water St., Newburgh, N. Y., had a magnificent display of chrysanthemums from October 19-29.

Lincoln Park greenhouses, Chicago, are open from November 3-13, for public inspection of the chrysanthemums which are very promising this season.

The annual exhibition of chrysanthemums, orchids and foliage plants at the Central Park Conservatory, New York City, will begin Nov. 9, and continue for a month.

In the greenhouses at Eastside Park, Paterson, N. J., in charge of John Prince, about 2,000 chrysanthemums have been displayed since Oct. 31. The show closes on Nov. 10.

The conservatories of W. T. Hanson, Schenectady, N. Y., were opened to the public on Nov. 2 for the benefit of the Hospital Fund, and the choice collection of rare plants was admired by throngs.

Preparations for the Tournament of Roses at Pasadena, Cal., are under way. The executive committee consists of Messrs. George P. Cary, F. S. Allen, F. V. Rider, Hugh E. Montgomery, Kingsley N. Stevens and Edward T. Off.

The annual show of chrysanthemums at Elizabeth Park greenhouses, Hartford, Conn., is now on and a large crowd of visitors is in attendance every day. The chrysanthemums are under the care of Peter Zuger, the park florist.

TREES AND LIGHTNING.

The trees most apt to be struck by lightning are those that conform most naturally to the law of electrical motion—that electricity moves along the path of least resistance. Flammarton, the great French scientist, published in 1905 a list of different kinds of trees, showing the number of times each species had been struck by lightning during a given period. The figures are: 54 oaks, 24 poplars, 14 elms, 11 walnuts, 10 firs, 7 willows, 6 beeches, 4 chestnuts, but not a single birch.—The Reader.

INCORPORATED.

Kirkeby & Gundestrup Seed Co., Chicago, Ill., by Marius Kirkeby, Knud Gundestrup, A. E. Ray; capital, \$50,000.

The Farmers' Nursery Co., at Phoenix, Ariz., by A. C. Smith, E. M. Miller, A. T. Snow; capital stock, \$100,000.

The Fairview Floral Co., Beatty, O., by C. H. Kay, Mary S. Kirkpatrick, G. D. Leedle, A. K. Hahn, C. E. Glenn; capital stock, \$10,000.

MOVEMENTS OF GARDENERS.

James Niven has taken a position with H. E. Botkin, Ross Station, Calif.

THE VALUE OF ART AND SKILL IN INDUSTRY.

A paper read by Carroll D. Wright at Massachusetts Agricultural College, Oct. 2, 1907.

To create is the province of the Omnipotent. The divine power creates the raw material; it makes the ore, but it does not undertake to develop the ore. God has given to man the brain and the skill of hand which enable him to make the watch. Thus God begins things, and leaves it to the skill He has given to man to finish them. It is omnipotent power only that brings into existence the beautiful and grand effects of nature, as witnessed in mountain and valley, river and lake. Natural scenery cannot be produced by the very highest skill of created man, but God does not in all this make the picturesque; it takes His power as represented in the ingenuity, the skill, and the taste of man to make the picturesque. Nature and man create the art side of nature. This developing power of man is a great attribute, and it allies man to his Creator. Thus in all the things that enter into material, intellectual, and aesthetic progress are the co-ordinate works of the Creator and His grandest creation—man. Herein lies the very fundamental principles, the God-given basis of all technical training.

Training was not sufficiently diffused to have its effects on the industrial arts. Art in its highest sense belonged to the few; it was exclusive, and persistently held as exclusive, so that the man of general affairs, the common man, the great body of humanity, had neither any knowledge of the art which projected grand structures in the past nor the skill to carry out the projects.

Science means knowledge, a comprehension of facts and principles. All training therefore which develops the ingenuity of man belongs to the realm of science. All technical training thus becomes one of the grandest elements of the purest science. Science means the application of brain power, of skillful ingenuity, to the affairs of life, to the development of practical things, and this means the real utilities which are necessary for development. Let us speak of this part of our subject first.

We must understand the application of science in every direction. We must know how to develop. We must take the raw pigments out of which the colors are produced and apply the skill which comes from a knowledge of effects. This principle has been applied in mechanics, in agriculture, in artistic design, but perhaps more than in all other things in the great engineering enterprises of the past half century. We do not know what powers were used, or how they were used in constructing the Pyramids, but I doubt if there was skill enough in the whole world at the time the Pyramids were built to have constructed the Mont Cenis tunnel.

In the mechanical arts there is a specific illustration of what can be done by technical training. I do not speak particularly of manual training in the public and private schools, but more specifically of trade and technical training. Manual training is without definite purpose; its motive is to ac-

custom the minds and the hands of boys and girls to the use of tools, but not to teach them any particular trade. The graduates of manual training schools more easily adapt themselves to trades and semi-professions belonging to the mechanic arts than those who have not had manual training. Manual training does a vast deal of good and little or no harm, but the technical training which is illustrated here in your own college is something different. It is aimed to secure a definite purpose—to teach a man how to conduct his brain and his hand to those lines in mechanic arts which will give him superiority over those who have not had such training.

When the exposition celebrating our centennial was held at Philadelphia in 1876 there was brought together the manufactures of the different producing countries of the world. Germany then acquired an active interest in industrial and manual training; and so did England. Bismarck inquired of the officer in charge of the German exhibit at Philadelphia as to the effect of the comparison of German goods with those of other countries. The reply was: "Our goods are cheap and wretched." Germany had become the military equal of France, but she was not her industrial equal. France for years had been applying skill and the results of technical training in trades and in all industrial arts in her manufacturing establishments, through schools first supported by private benefaction and then by the government. France stood out at the centennial as superior to all other countries in those manufactured goods which displayed skill and training. Germany took her cue from this and immediately entered upon a career which has brought her to the front rank in the production of goods both useful and artistic. England took her cue also. She had been fearing the competition of France. She had sneered at the technical training which had been in vogue in France, but she found out all at once that in order to preserve her industrial supremacy she must not only be the equal of France in artistic designing and in the training in the application of superior skill, but that she must rise above France—that she must surpass her in all things in which France had gained her celebrity. Then began the crusade for the establishment of training schools, the inauguration of manual training and industrial education in every direction, and England for a while held her supremacy. Other countries—Italy, Austria, the Scandinavian countries, Switzerland—applied skilled training in ordinary manufactures.

Then the United States began to see the truth. Light was beginning to dawn, and while for years after the centennial our country was content to take from English manufacturers, from French establishments, from German institutions, from the world of skill and art, men who could conduct our own industrial affairs along the lines which have given them distinction, today you may take from a hardware establishment or a manufactory of machinery common tools and machines and send them to any exposition in Europe and win a prize in competition with tools and machines which have been especially manufactured for exhibition. This application

of skill and art in the United States has brought us to our position today of industrial supremacy, and it has now brought us within the last few years, to the grand position of commercial supremacy in the world.

Everywhere now in the United States we are seeing the effect of industrial training. This grows out of the necessity as well as the desire to secure wealth.

All the grand movements of our time, which are the movements of great communities, are carried on by inventive skill, by the application of ingenuity, and these things teach us the absolute necessity of knowing how to do something and to do it well. The grand summation of the value of skilled training is therefore found in our modern system of industry. I do not care how well educated a man may be, if he has not learned how to make his education useful, if he has not learned how to support himself and his family as a result of his education, he is an ignorant man.

Do you wish to be dependent upon foreign countries for the skill necessary in the manipulation of all these great forces? Can you not train among you the men who can build your own railroads, locomotives, steamships, and tunnels, develop iron mines, and bring that alliance of industry, agricultural and mechanical, out of which alone can come prosperity? Develop your trade so that you have at your doors the cash market for your products. It is this that makes a community wealthy; it is this alliance that has made the per capita wealth of some parts of our country greater than that of other parts.

In discussing these things the question is usually asked, But what about what may be called the spiritual forces of life? I do not use the word in any pietistic sense, but because I have not a better one to illustrate these things which do not belong to the material utilities of our environment. The relation of what is called the modern system of industry, which is the industry that grows from technical knowledge, to intellectual stimulation, and even to the force it exercises in developing our schools and higher institutions of learning, is not usually understood; in fact I believe that by many the present order of things growing out of industrial education is supposed to have a dwarfing influence upon intellectual and mental attainments. I think, however, that

this supposition arises from a superficial examination of modern establishments of industry where a cheap and often an ignorant body of laborers is employed, the appearance being that skilled and intelligent workmen are constantly replaced by unskilled and unintelligent workmen, this appearance leading to the false conclusion that the modern system of industry brings the skilled and intelligent workman down in the scale of civilization. The student of sociology reaches a directly opposite conclusion. To him the modern system gives the skilled and intelligent workman an opportunity to rise in the scale of employment, in intellectual development, in educational acquirements, and in the grade of services rendered, while at the same time it enables what was an unskilled and unintelligent body of workers to be employed in such ways, under such conditions, and surrounded by such stimulating influences that they in turn become intelligent and skilled and crowd upward in the scale into the positions formerly occupied by their predecessors.

It is the very province of technical skill, as illustrated in our modern system, to reach down and lift up those employed in the lowest occupations. This means mental activity, and mental activity is the great element of our own time. Formerly all competition consisted of muscle against muscle, or brain against muscle. Today competition is between brain and brain, skill and skill. There are many who cannot withstand the requirements of skill. They naturally fall in the rear; they become what has been called left-over men; they cannot keep up in the race, largely because in their younger days they did not have the advantage of the mental training which is being given broadcast everywhere today, and mental training allied to manual work has been found the soundest method of preserving a sound mind in a sound body.

Trade education, technical education, manual training—every feature of instruction in the mechanic and industrial arts—are efficient elements in the reduction of crime, because they all help to better and truer economic conditions. I sometimes think that in this lies the elements of solution of some of our problems. Justice to la-

CATALOGUES RECEIVED.

B. W. Stone & Co., Thomasville, Ga.
—Fruit Guide and Catalogue for 1908.
Paper-shell pecans a specialty.Samuel C. Moon, Morrisville, Pa.
Folder of seedlings and cuttings of deciduous and evergreen shrubs and trees for lining out.

Peter Lambert, Trier A. Mosel. List of nursery stock, principally roses, 1907-1908. Of the latter the list is very comprehensive; we did not count them but there must be fully one thousand roses described. As a reference book, this catalogue will be found very convenient by the rose fancier.

Seed Trade

The meeting of the Wholesale Seedsmen's League seems to have resulted in framing a list of prices that will be a genuine surprise to those who still cling to the illusion that there are bountiful crops of everything in the seed line. But even these prices are not really as high as conditions would warrant, albeit as high as the concentrated wisdom of the leading wholesalers think advisable at this time. The regular January lists will more nearly reflect the real situation.

Slowly the truth about the shortage in sugar corn is penetrating through the craniums of the seedsmen and canners, particularly the latter, and prices that would have aroused their ridicule four weeks ago, are now paid with surprising alacrity. Even yet the real condition of the 1907 crop is only dimly realized. But enough has been said and the sequel must be awaited, as the doubting Thomases must be shown.

What a transformation in only one year—yes, in six months! Only as far back as last April both seed corn and canned corn were scorned by all. Both were selling below cost of production. Stowell's Evergreen could be bought at considerable under a dollar per bushel, and the canned corn at about 50c. per dozen. Now the latter sells readily at 90 and 95c., and the seed—well, it may not be judicious to say just at what prices it is selling, but the advance is even greater than on the canned article, and the end is not yet, and the advance will continue as the demand develops. This demand is certainly growing, but will not reach high water mark for some weeks yet. It will materialize more slowly than the demand for seed peas. Conditions regarding peas are now fairly well known, and there is a lively scramble to cover shortages which is slowly gathering momentum, and will soon be at its height. The mills of the seedsmen are beginning to grind and in a few weeks will be humming merrily.

Bulbs now hold the center of the stage; but a few weeks more and they will be displaced and the regular seed trade hold sway.

Clark Nitbeck of Schenectady has sold out his seed business to his brother, who will continue and push the business. With intelligent, energetic effort he should build up a fine trade, as he is practically the only seedsman in that town of 75,000 people.

It is reported that one or two of the California seed growers are growing or buying onions at Greeley, Colo., which they are shipping to California. As the soil and climate of this section of Colorado seems well suited to the crop it may be the means of saving the situation when the supply of bulbs in California proves insufficient. It is certainly a long way in advance of resorting to "picklers" which are simply the largest bulbs screened from onion sets.

Investigation during the past week of the condition of the sugar corn crop of Connecticut, confirms the most pessimistic views expressed in these columns at any time, and a condition

Lilium Auratum as Occasionally Grown in Japan.

equally as serious as that of 1903 confronts all interested parties. Very little of the 1907 crop of the large growing late varieties will make seed, a large proportion of it still being in the milk, and much of it in fairly good condition for the table. It of course goes without saying that such corn can never make seed, while even the most matured is yet soft and will require artificial heat to cure it. Very few of the seed corn growers have any way of applying artificial heat and as a consequence very little seed will be made from this year's crops. A prediction of \$10 per bushel for Stowell's Evergreen of good vitality seems within measurable distance of realization.

Reports of heavy rains in the bean growing districts of California and of consequent damage to the crop have been floating in for the past week, but definite information has not been received, and all are warned against ac-

SEED TRADE.

(Continued from page 611)

cepting California estimates of damage. With the recent exaggerated estimates of damage to the onion seed crop fresh in mind, people in the east must have proofs of all damage reports emanating from California. While admitting that damage may have followed the rain the extent of it is not known at present.

Canner's peas continue to advance in price, a sale of several hundred bushels of Alaskas being reported within a few days at \$5.50 per bushel. Advancers and Horsfords are being offered by a few dealers in a moderate way at \$5.50. Few Admirals are being offered, and still fewer Surprise.

Some information concerning beans is coming to hand and confirms earlier reports of damage by frost and wet weather. Hand picking will prove a costly job, many growers estimating it from 40 to 60 cents per bushel, while the shrinkage will range from 30 to 40 per cent. Were it not that a large surplus was carried from last season beans would now be in the class with peas and corn, but while they will be materially higher than last year prices on standard varieties will not be extravagantly high.

Conflicting reports of the Maine potato crop continue to circulate but there is little doubt that it is much more than half of last year's and of very poor quality.

It is certain that New York and other states will be heavily drawn on for seed stock this coming season.

Few seedsmen have either time or inclination to enter the field of politics, but H. W. Gordinier, the genial Troy dealer who has been treasurer of his bailiwick for the past two years, is a candidate for reelection and his many friends will wish him success and an increased plurality.

A large number of cases of lily bulbs are reported short-shipped on S. S. Empress of China. This will make Giganteum and Speciosum (quite a quantity) about two weeks later than usual. However, as Easter comes later next year, we do not anticipate any trouble in the forcing. The short-shipped bulbs left on S. S. Iyo Maru and are now en route from Seattle to New York. Giganteum prices have advanced 20 per cent. according to latest cables from Japan.

Lily of the valley coming on S. S. America, due in New York on the 9th, will be, we believe, the first arrival or nearly so—at any rate none has arrived yet, so far as we can find out. Two weeks' delay is caused by very bad weather in Germany.

New York importers now have to stand in line and get the real yellow bills from their banks for duty. It's tough, because banks will not pay out the cash every day.

NEW VEGETABLES.

Among the interesting tests of new and foreign varieties of vegetables reported by the Long Island Agronomist from the Wading River Experimental

Station, are the Sakurajima radish from Japan and the Venetian squash. The former in its native country, it is said, grows to weigh 20 to 30 pounds. This radish, while so perfectly enormous, is said to be most delicate and delicious; peeled and sliced thin it cannot be surpassed by the most dainty spring radish. It grows best during the summer and may be kept until late in the fall if buried in sand in a cool cellar.

The Venetian squash resembles in shape a huge acorn in its cup. The color is dark green with occasional white stripes, weighs 17 pounds; the flesh a rich golden yellow. The seed cavity is small and the flesh thick; flavor particularly rich and creamy.

PUBLICATIONS RECEIVED.

Bulletin No. 288 of the New York Experiment Station at Geneva gives attention to "Ringing," which is a practice sometimes employed to apparent advantage in vineyards, as by it the bunches of grapes are in some cases made larger and earlier. It seemed feasible to apply the same practice to herbaceous plants, but tests made upon tomatoes and chrysanthemums at the Station at Geneva proved the theory fallacious. With neither class of plants was there any gain in yield, increase in size or hastening of maturity; but in nearly every case the ringing was detrimental. So marked was the injurious effect in many instances, especially upon the root systems of the plants, that the authors are led to doubt whether the practice is not more injurious than useful, even upon grape vines where the apparent advantage is most evident. These tests are recorded in Bulletin 288 of the Station, which will be sent free to applicants.

Bulletin No. 289 gives some interesting fertilizer tests. Many old orchards are undoubtedly in need of good applications of fertilizers; but not all orchards need potash and phosphoric acid. The old apple orchard at the New York Agricultural Experiment Station at Geneva is typical of many orchards in Western New York, and in this orchard liberal applications of wood ashes and acid phosphate, extending over 12 years, did not give profitable increases in yields. Neither did these applications improve the color of the fruit uniformly or profitably. The orchard did respond to the use of leguminous green manuring crops, and showed marked benefit from a system of clean cultivation. Full details of these tests are given in Bulletin No. 289 of the Station, which can be secured on application, without charge.

Bulletin No. 290 says: Careful potato growers can no longer doubt the advantages of spraying in "blight" but some doubt whether the practice is profitable year after year. Tests along this line have been continued for five years by the Experiment Station at Geneva; and the evidence presented in Bulletin No. 290, giving details of the fifth year's test and summaries of preceding ones, seems conclusive in favor of the practice. The gain each year has been profitable; and there is already much more than enough excess of gain over cost to pay for spraying five years more. Similar gains, though

not quite so great, were obtained by farmers under tests carefully checked by the Station and by much larger numbers of farmers who sprayed independently. If you grow potatoes, it will pay you to get this bulletin from the Station—it costs you nothing, not even postage—and study it carefully before your crop management is planned for next year.

Water Lilies and How to Grow Them, by H. S. Conard and Henri Hus. Published by Doubleday, Page & Co., New York. The more cultural chapters have been supplied chiefly by Mr. Hus, with the co-operation of the veteran cultivator, Mr. James Gurney, of St. Louis. The remaining chapters dealing with the relative merits of the different varieties of nymphaeas, also the lists for special purposes, are mainly by Professor Conard who has devoted much time to the study of this family.

With this book, we think anyone who has not before had any critical understanding of the family will be able to make selections of such varieties as will best suit his special needs and to make this selection intelligently. Further than this, cultural methods, raising from seed, planting out and wintering, are explained in detail. The making of artificial ponds and the conversion of natural water courses for water-lily gardens are also handled. The discussions of site and the treatment of the pond or pool in relation to its surroundings should also be helpful to many.

The tabular analyses at the ends of Chapters VII, VIII and IX will enable anyone to quickly identify any water-lily now in the trade, and form, we think, one of the most interesting features of the book.

"Water Lilies" is number five in the Garden Library series and is sold at the same price as its predecessors—\$1.21 post paid. We can supply it at publisher's price.

Bulletin No. 53, Bureau of Statistics, U. S. Dept. of Agriculture, compiled by George K. Holmes, Chief of Division of Foreign Markets, gives complete tables of the domestic exports of farm and forest products for the years 1904-1905-1906, with the countries to which product was consigned and the value of same. There is a vast amount of interesting information in this 68-page pamphlet relative to our export trade with foreign markets.

Proceedings of the Alabama State Horticultural Society, Fourth Annual Meeting.—A very interesting volume, its contents indicating that ornamental horticulture and forestry are receiving a due proportion of the society's attention, which is not the case with all State Horticultural Societies. A number of half-tones illustrate how the subject of horticulture is presented to the students at the Alabama Polytechnic Institute.

Fire in the building occupied by the seed distribution division of the Department of Agriculture, Washington, caused damage amounting to \$75,000, November 6. The loss included destruction of seeds, which will delay for several weeks the distribution of flower and vegetable seeds through Government sources.

TULIPS

FOR BEDDING AND FORCING

We offer below a few of the leading varieties for bedding and forcing of which we have the largest stocks
FOR COMPLETE LIST OF VARIETIES, SEND FOR SURPLUS LIST.

SINGLE EARLY TULIPS

Artus. An extra fine scarlet for bedding; also good forcer. \$1.25 per 100, \$11.00 per 1000.

THE VALUE OF ART AND SKILL IN INDUSTRY.

(Continued from page 600.)

bor, equitable distribution of profits, instruction in trades by which a man can earn his living outside of a penal institution, the practical application of the great moral law in all business relations, which is as much the result of skilled training as anything else—all these elements, with a more enlightened treatment of the criminal when apprehended, will lead to a reduction in the column of crime, but not probably to the millennium; for human experience from time immemorial tells us that the earth never was, nor is, nor ever will be a heaven, nor yet a hell, yet the endeavor of right-minded men and women, the endeavor of every government, the endeavor of every element of industrial training, should be to make the earth less a hell and more a heaven.

In the olden time the works of the great masters were enjoyed only by the few. Today industrial art, skill, and scientific training have resulted in the reproduction of all these things, so that now the common man is more familiar with the works of the great masters than were the few in the olden time. They have been reproduced in various forms, and they teach their lessons. The wage earner reaps the rewards of his work. He is enabled to cultivate the beautiful, to a small degree it may be, but in whatever degree, it is greater than of old. These reproductions are giving the people an opportunity to learn and to know and to enjoy more fully and more completely, and thus add to the delight of living.

If industry today had nothing more to do than the furnishing of the simple necessities of human life, it would have little field for expansion, and would offer meagre opportunities for employment. Life would be a burden, so dull and monotonous would it be. Trade, as we understand it, would cease, and commerce become a thing practically unknown. But industry flourishes because it is not limited to the production of things that are needed for food, raiment, and shelter. It is because art has come in to increase the wants of the race that trade and commerce flourish. Art carried industry beyond our actual wants, and calls upon it to supply those things which make for social progress. The future expansion of industry and commerce, the future elevation in the character of the employment of all classes, the increase of their earning capacity, the opportunity of increasing the standard of their environment—all depend in large measure upon the cultivation of the industrial arts, and the cultivation of these arts depends upon the adequacy of the training which institutions of learning shall furnish.

In what I have said you must not understand me as abrogating in the slightest degree the necessity for classical education. Every man is better for knowing something of the classics; every man is better for having read and studied the great thoughts of great men in different languages. He can bring to his own practical life the inspiration which comes from the experience of the past, but the man who is contented to live in the past

HENRY M. ROBINSON & CO., FLORISTS' SUPPLIES 15 Province St., and 9 Chapman Pl., BOSTON

retrogrades and cannot be considered as a factor in the great development of the present. Bring all these things into closer relation. Let the farmer know what occurred in ancient times; let him understand the industrial history of the world; let him understand how out of his ranks there have been drawn some of our greatest leaders; let the mechanic, let the man who simply lays bricks, understand the state of his art, the principles of his art. Men are better for knowing the art side of their crude and homely industry. It makes life more worth living; it makes education more valuable, and it brings to every community that which it most needs; all the elements to enhance its social well-being.

THE PINE TREE BLIGHT.

White pine in New England was quite generally attacked last summer with a peculiar blight which the Government has been investigating without so far solving the mystery. S. T. Dana, one of the officers concerned in the investigation by the Department of Agriculture, in a report states that the disease is very widely spread throughout New England, and it occurs practically everywhere south of the White Mountains. In most places only a few scattered trees are attacked by the blight, although in a few localities as many as 10 to 20 per cent. of the trees are affected by the disease. Brunswick, Me., appears to have suffered severely. Another badly affected locality is Eliot, Me. The report states that the disease has suddenly made its appearance in very widely separated localities all at once. The present situation, says the report, is not one that calls for alarm, but simple for further investigation.

You will find something worth reading on every page of HORTICULTURE.

DECISIONS OF THE U. S. BOARD OF APPRAISERS.

No. 17137.—Sea Moss.—Protest 269612 of M. Herman & Co. against the assessment of duty by the collector of customs at the port of New York. Before Board 1, October 22, 1907. Opinion by McClelland, G. A.

Protest sustained as to sea moss. G. A. 6464 (T. D. 27670) followed.

No. 17138.—Wreaths and Crosses of Moss.—Protest 269315 of J. J. Buchey & Co. against the assessment of duty by the collector of customs at the port of New York. Before Board 1, October 22, 1907. Opinion by McClelland, G. A.

Wreaths, crosses, etc., composed of rock moss, dyed and prepared, were held to have been properly classified as unenumerated manufacturing articles under section 6, tariff act of 1897. G. A. 3146 (T. D. 16317), G. A. 3384 (T. D. 16956), and Abstract 7775 (T. D. 26655) followed.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

Without a rival in knowledge of the requirements of the trade and the ability to supply them. Our New Illustrated Catalogue, recognized as a work of art unprecedented in its line for variety, novelty and completeness, tells the story fully, and if you have not yet sent for it, do so now.

'TIS FREE TO EVERYBODY IN THE TRADE

H. BAYERSDORFER & CO., 1129 Arch St., Philadelphia, Pa.

FLOWER MARKET REPORTS

BOSTON Market conditions are in bad shape this week. The demand has fallen off greatly within the past few days and prices have gone to pieces so far as large lots of flowers are concerned. The higher grades suffer the most, and after being held in wholesale hands for a day or two are often sold finally in bulk with the inferior grades to the curbstone fakir, and of course at a very low figure. The Beauty trade, in common with everything else, is very quiet and sales have to be forced at cut rates. Carnations, which up to last Friday were well in hand, have come since then in an avalanche and many market growers have had to carry their product home, morning after morning, the effort to sell having been futile. Of violets there is, fortunately, no surplus, and these usually clean up daily. A limited quantity of sweet peas, new crop, is being received and these sell readily at about \$1.00 a hundred. Chrysanthemums of the moderate priced grades—say from six to eight dollars a hundred—sell fairly well, especially Ivory and other good commercial whites. Lily of the valley very slow and irregular.

INDIANAPOLIS It is not always the unexpected that happens, and last week was but the repetition of conditions which pervade the market annually when chrysanthemums become plentiful enough to block the sale of other stock and of themselves. Prices have not suffered to any great extent up to the present time, all varieties moving off nicely. Beauties and teas are holding their own, some good stock being on the market. Carnations are very scarce, but enough are being secured to meet the demand. Violets are not plentiful. Lily of the valley and orchids in quantity are being used largely. The local men have made big use of Southern smilax lately, sometimes not being able to obtain enough to meet requirements. Smilax is about the only scarce article in greens.

NEW YORK The wholesale cut flower district is in a very uncomfortable state at present. The receipts of flowers are very heavy and the demand is comparatively light. Quality is excellent, as a rule, on all lines. The higher grades of roses are superb and carnations are fast approaching elegance of flower if still rather short of stem. Chrysanthemums are at their best. But, to sell this fine material, sacrifice offers must be made and the net returns are far below what they should be. The lower grade flowers are unloaded for what they will bring, and it requires lots of dicker and argument to turn them into cash. The conditions now prevailing are not greatly different from what they have been in the middle of the chrysanthemum season on some occasions in the past, but it is natural to ascribe some of the stagnation to the strained money market, which, added to the excitements of election week, could not have other than a demoralizing effect on flower buying. The exhibitions which are now under way will deplete the sources

of supply to some extent and will help the situation to some extent, but nobody looks for any great activity in business this side of Thanksgiving Day.

PHILADELPHIA Business last week was fairly good but lacking the snap that should prevail at this season of the year. Chrysanthemums are now at their height. Demand is good but prices rule low. The better varieties of pompons clean up the best of all. Roses are about normal with a little too many for the demand, if anything. Cattleyas have shortened up considerably. White orchids very scarce. Gardenias are now plentiful with excellent demand. Violets have been very good, particularly double Lady Campbells. Carnations are rather draggy but quality is excellent. Lily of the valley in good demand and excellent quality. Sweet peas are now coming in regularly but as yet are rather short-stemmed. Mignonette just commenced, also very fine snapdragon for so early. Greens draggy.

TWIN CITIES Business at present times is fairly good. Chrysanthemums are abundant enough to supply all demands. Stock in general is in a promising condition. The planting of bulbs is about done. Other outdoor planting still carried on and will be as long as the ground keeps open. October has been remarkably fine.

NEWS NOTES.

Raymond, the young son of C. H. Jacobs of Westfield, Mass., is reported to be quite ill at Noble hospital.

The greenhouse of F. L. Lainson, Council Bluffs, Iowa, was destroyed by fire on October 27. The loss was about \$2,500; insurance, \$300. Mr. Lainson will rebuild at once.

The extensive grounds around the Pearsall mansion at Black Rock, Conn., are being laid out and planted by F. E. Conine of Stratford, who has the contract for the landscape work.

The barn of Alfred Hunt, florist, of Norwich, Conn., was burned to the ground on October 21, destroying about two hundred and fifty dollars' worth of supplies on which there was no insurance. The greenhouses were saved.

The department of botany of Wellesley College, Mass., has received a gift of \$500, which will be applied to the systematic study of plants grown on the college grounds. Work will begin at once under the direction of Prof. Wiegand.

By the will of the late O. B. Hadwen of Worcester, Mass., his estate which comprises 24,684 square feet of land with buildings, and is valued at \$20,000, is left to Clark University and College to be forever kept for the purpose of educating students in agricultural, horticultural and arboreal knowledge, scientific and practical.

OBITUARY.

Peter Weissenberger.

Peter Weissenberger, a Swiss gardener in the employ of H. C. Walbeck, Louisville, Ky., died on October 30.

Richard Purdue.

Richard Purdue, father of George Purdue, florist of E. Orange, N. J., died on October 26, aged 81. Mr. Purdue came to America in 1849, and from 1852 to 1893 conducted a florist's establishment. A widow, two sons and three daughters survive him.

Hugh Chesney.

Hugh Chesney, who for fifteen years has carried on a florist's business in Farmington, Conn., died on October 13. Mr. Chesney was well known to the trade in Boston and New York and held an enviable reputation among his townspeople for reliability. A widow, three daughters and a son survive him.

Alexander Aikman.

Alexander Aikman, who has been connected with The Garden, London, Eng., since 1900, died on October 19 after an illness of but a few days. Mr. Aikman's wide experience in gardening was gained in the Royal Gardens, Kew, Cardiff Castle Gardens, and several famous nurseries. He was in his thirty-second year and leaves a widow and child. By his genial disposition he made many friends.

HORTICULTURE'S REPRESENTATIVES.

florist's use; almost new and in good order;
also a pair of good delivery horses; the
above can be bought at your own price.
Ed. Hignons, 146 West 28th st., New York.

WORCESTER COUNTY HORTICUL- TURAL SOCIETY.

The annual meeting of the Worces-
ter County Horticultural Society, Wor-
cester, Mass., was held November 6.
The result of the election was:
President, George Calvin Rice; vice-
presidents, Arthur J. Marble, Charles
Greenwood, Edward W. Breed; treas-
urer, Charles S. Bacon; secretary and
librarian, Adin A. Hixon, and numer-
ous trustees. Mr. Rice's election was
most unanimous, in spite of his re-
peated efforts to decline. He has long
been a vice-president, is a life-long
agriculturist and horticulturist, a
member of several kindred societies,
and a gentleman highly respected in
this vicinity.

Resolutions upon the death of
President O. B. Hadwen, who for so
many years served the society, were
passed. The reports given by the sec-
retary and treasurer showed that the
society was in a flourishing condition.

GREENHOUSES BUILDING OR CON- TEMPLATED.

Wausau, Wis.—Ch. Lund, one house.
Ottumwa, Ia.—O. P. M. Criley, one house.

Washington, D. C.—J. H. Davis, violet house

Philadelphia, Pa.—Charles Muller, house 20 x 80.

Woburn, Mass.—Charles Cummings, 300 ft. house.

Dorchester, Mass.—Samuel Neil, improvements.

Syracuse, N. Y.—Gustav Bartholme, range of houses.

Lake Odessa, Mich.—Lake Odessa Floral Co., addition 33x90.

Maspeth, N. Y.—S. Schmieg, three vegetable houses, 20 x 100.

Jamaica, N. Y.—Henry Butterwick, three carnation houses, 16 x 100.

Woodhaven, N. Y.—Henry Brockman, three vegetable houses, 16 x 100.

Chicago, Ill.—John Assa, two houses, 25x250; Carl Niemann, range of houses.

NEWS NOTES.

It is understood that the South Park Company, of New Castle, Ind., will build no more houses in the south part of the city, but as new houses are needed they will be built on land a mile or two distant from the city.

Peter Weiland, of the firm of Weiland & Olinger, New Castle, Ind., has purchased the Harvey farm of fifty-six acres, west of the city. As new houses are built they will be built on this location. The firm will in the spring erect ten additional houses on the newly acquired land.

LIST OF PATENTS.

Office and factory, 215 to 221 Randolph Ave.
JERSEY CITY, N. J.

H AND CO

About the First of December

we are going to move into that splendidly equipped, fine new factory of ours at Elizabeth, N. J. It has taken a year and a half to build it. Every point of economical arranging has received the careful attention of experts. Machines of the very latest pattern and highest speed have been installed. It is as near perfection as brains and money can make.

The very day we are ready to start up, we want your job to be ready to place in the factory Superintendent's hands. So write us and we will show you the advantages of placing spring orders now.

HITCHINGS AND CO.

GREENHOUSE DESIGNERS AND BUILDERS.

Manufacturers of Heating and Ventilating Apparatus.

1170 Broadway,

NEW YORK.

AN OBJECT LESSON

Some half dozen customers of ours did not have their houses completed until long after the Convention in August, just because they paid no attention to the advice given in our Ads. all through last November and December, to place their spring orders *then*.

We did our part, and even worked overtime, but with so many houses ahead and each being turned out of the factory in the order given, such delays are bound to happen in the rush season, even though we have the largest greenhouse factory in the world, and every modern facility to push work.

So take warning, for indications are, that next spring will be just like last. Get your order in the factory during the winter months. Write us—get our catalogs.

We make every part of a greenhouse but the glass. We sell any part.

LORD & BURNHAM CO.

Greenhouse Designers and Manufacturers

1133 BROADWAY, cor. 26th Street, N. Y.

BOSTON Branch: 819 Tremont Building

PHILADELPHIA Branch: 1215 Filbert St.

Here it is, end on—and that is the way to get the full beauty and value of that curved eave. No, we are wrong there, for the most convincing way is to go inside a gutter-eave house and then in a U-Bar House, with its clean sweep of glass from ridge to sill. The comparison is instructive. It's just the sunniest, best growing proposition in greenhouse construction, and we stand ready to show you we mean exactly what we say. Write, or let us send catalog. **Pierson U-Bar Company**, Designers and Builders U-Bar Greenhouses, Metropolitan Building, 4th Avenue and 23rd Street, New York.

"Imperial" and "Pink Imperial" Carnations

The Wonders of 1907

Have proven to be all that was claimed for them. They took prizes at the Great Show at Toronto, Canada, last year, besides prizes, Certificates of Merit and Diplomas at various other places.

The "Imperial" is a variegation of delicate pink similar to the shade in "Enchantress," a splendid keeper and fine shipper.

The "Pink Imperial" is a most pleasing shade of pink, one that has long been wanted in the market. The stems of both these varieties run from three to four feet in length, are extra strong and have no equal in the Carnations of to-day. The calyxes are good and strong and are practically non-bursters. The flowers are well-formed, from three to four inches in diameter and are very fragrant. They are early, free and continuous bloomers from October until late in July. Strong growers. Every shoot making a flower. No extra grass.

JOHN E. HAINES,

Bethlehem, Pa.

HORTICULTURE.

THE EXHIBITION SEASON

The Boston Show

TABLE DECORATED WITH FRUIT.

MAJOR BONNAFFON.

A Popular Institution.

The spacious halls of the Massachusetts Horticultural Society thronged with the flower lovers of the city and professional horticulturists from far and near for three days gave ample evidence of the place which the time-honored chrysanthemum show in Boston holds in the estimation of the people. Music, afternoon and evening, by a fine ladies' orchestra, gave the necessary touch of animation to the occasion, and the gorgeous masses of color and verdure which filled the brilliantly lighted halls compelled the admiration of professional and amateur alike.

Different from Its Predecessors.

For about a quarter of a century it has always been safe to say, "If you want to see trained specimen plants in perfection go to the Boston Show," but he who came to Boston on this occasion was doomed to disappointment, for not one specimen such as have excited the wonder of the beholder in past years was to be seen and the glory thereof has departed. These marvels of the growers' art were never adequately appreciated, for the toil and skill lavished upon them, not to mention the cost of transportation, have been a labor of love, invigorated with the zest of cultural rivalry, for which the premiums have been disproportionately small. Their absence was bemoaned by the visiting gardeners as was also the comparatively small representation of the enormous specimen cut blooms and plants grown to single stem and flower which have occupied

so prominent a place in recent shows and disparaging criticism was frequently heard, but the public, who take no interest in scales of points or deep cultural problems, had no complaint to make, and in their enthusiasm over other features unhesitatingly pronounced the exhibition "the best ever."

Some New Features.

There is a very evident tendency to broaden the scope of this exhibition and make it a comprehensive autumn show rather than a purely chrysanthemum affair. A striking innovation was the prizes offered for decorated tables of fruits with autumn foliage, berries, etc., which brought out some gorgeous arrangements of luscious native and foreign production which, although far too formal and architectural in conception, proved a most sensational attraction and will, no doubt, be improved upon in an artistic way next year. The first prize in this class was won by Edward MacMulkin. Tables arranged with chrysanthemum blooms, for decorative effect, were another new departure. Several entries were made but the one by Sidney Hoffman, which won first prize, was the only one displaying any special originality. It presented a beautiful study in arrangement of single white variety Garza. In the companion class admitting foliage or other material as accessories the two florists, Hoffman and MacMulkin competed, the former winning first with a combination of chrysanthemums, cork bark and autumn foliage. Another innovation was

the Farquhar silver cup and other prizes for special collections of vegetables, the winner of the cup being Edw. Jenkins, gardener to Giraud Foster, with a most remarkable display for this season of the year, including peas, Peep O'Day corn, string beans, asparagus, etc.

The Chrysanthemum Plants.

The plants were shown in the main hall. They did not constitute a very prominent feature and comprised nothing of striking value outside of the group of twenty-five low-grown commercial specimens from Wm. H. Elliott which were very fine, the groups of single-flowered varieties from Mrs. Frederick Ayer, gardener George Page, and one or two other exhibitors, and the plants grown to six stems with one bloom to each stem from Mrs. Lester Leland, gardener E. H. Wetterlow.

The Chrysanthemum Blooms.

As intimated above the groups of specimen blooms, while uniformly good, contained nothing sensational. There were, however, two enormous vases of one hundred blooms each of Major Bonnaffon and William Duckham, from Wm. W. Edgar, flowers of unexcelled perfection, towering far above the heads of the visitors and arranged with faultless taste.

A worthy companion to these was James Nicol's vase of Mrs. Jerome Jones which won the Gane Memorial prize.

First prize winners in the vase classes of separate colors were as fol-

WILLIAM DUCKHAM AT BOSTON

lows: pink, Dr. Enguehard by Wm. A. Riggs; red, John Shrimpton by Wm. Whitman, gardener Martin Sullivan; white, Merza by W. A. Riggs; yellow, Mrs. Wm. Duckham by W. A. Riggs; any other color, Wm. R. Church by A. F. Whitin. Among the finest specimen blooms in the various collections were Miss Miriam Hankey, pink, and Princess, white, by E. D. Jordan and Mrs. Swinburne, white, by Peter B. Robb. The prizes for six introductions of current year brought only one competitor, Mr. Whitman, who put up two sets among which nothing calls for special mention except Dakoma, orange reflexed, and Reginald Valis, crimson reflexed.

The Pompons and Singles.

These new-old classes were extensively shown, occupying a large section of the lecture hall and of the public interest. On pompons, R. Vincent & Sons, White Marsh, Md., were the premier exhibitors, and in addition to first prize received a first class certificate for their collection. Of singles there was a very extensive display from C. H. Totty. Mrs. Philip Dexter, gardener James Salter, was given honorable mention for seedling singles and anemone flowered; Mrs. J. M. Sears, gardener Wm. C. Ritchie, and G. H. Hale, received a similar award for collections. As the interest in the single and pompon varieties is on the increase a list of a few of the most distinct and attractive varieties may be acceptable here. No recommendation as to the hardiness of those mentioned is included, however, and for those

wishing to plant outside north of Baltimore special enquiry on this point from the large growers is advised. Pompons: James Boon and St. Almo white, Livan white flushed, Rose Trevenna bluish, Savannah and Sir Michael yellow, Dingula and Daybreak pink, Sheridan and Eynsford's Gem deep rose, Montclair salmon red, Jules Lagravere crimson, Mrs. Porter red, Elsie Walker tawney orange and Ruby Queen. Single flowered: Jessica deep rose fading to white at base of petals, Alice Crate carmine, Edith Owen and Kitty Bourne yellow, Ladysmith pink with lighter tips, Gertrude, Stella, Linton, Gladys and Miss T. Bird white, Edith Pagram pink semi-double, Hilda and Mary Richardson salmon, Ethel Beer bluish, Herbert Henderson light pink paler at tips, Annie Farrant crimson, Rev. W. E. Renfrey dark crimson, F. W. Smith deep pink.

The Decorative Plant Groups.

There were four gigantic groups each occupying 300 square feet of space against the walls of the large hall, from MacMulkin & Co., Wm. Whitman and S. Hoffman who won the prizes in order as named, and R. & J. Farquhar & Co., not in competition. These groups were composed of palms, ferns, bays, crotons, chrysanthemums, Lorraine begonias, etc., and served to screen the walls and make an appropriate setting for the lower exhibits. Joseph Breck & Sons contributed a nice group of conifers and box. Julius Roehrs Company sent a very choice collection of new plants and orchids, receiving honorable mention for Cy-

clanthus bipartitus and for Carludovica crenifolia. Lorraine begonias were well shown by A. M. Davenport and Sidney Hoffman and Turnford Hall by Robert Rust. F. R. Pierson Company were awarded a first class certificate of merit for two specimens of their striking novelty, Nephrolepis superbissima and W. A. Manda for Dracaena Mandaiana. The Gardeners' and Florists' Club prizes for table centre-piece of growing plants were awarded to Sidney Hoffman, F. Heeremans and Ed. MacMulkin, respectively.

The Orchids.

Ed. MacMulkin made a dazzling display of Cattleya labiata plants with Adiantum Farleyense. Lager & Hurrell put up their usual fine collection of orchids in variety and Julius Roehrs Co.'s group contained many interesting ones. Dr. C. G. Weld received a cultural certificate of merit for a record-breaking specimen of Odontoglossum grande with nine sturdy blooms on a single spike. The medals for orchid flowers brought out large displays from J. E. Rothwell who won the silver gilt medal with a collection of 125 named species and varieties, and Col. Charles Pfaff who won the silver medal with a fine collection.

The Carnations.

Carnation growers, with characteristic enterprise were out in force and the numerous exhibits of the divine flower practically filled the small hall. The prizes for six vases of fifty blooms each were won by Peter Fisher, S. J. Goddard, Backer & Co., and F. R. Pierson Co., the varieties represented

in the first prize set being Mrs. Tom Harvey, Mrs. C. W. Ward, White Perfection, Enchantress, Rose Pink Enchantress and Beacon. Leading standard varieties in the other collections were Victory, Winsor, Melody, Fair Maid, Rose Pink Enchantress, Firefly, Harry Fenn and White Enchantress. Among the novelties were Jahn's Crimson and Lloyd, a white seedling from H. A. Jahn; Bay State and seedlings No. 21 soft pink and No. 1000 bright pink, all three stunners from A. Roper; Britannia, Priscilla striped seedling and a white sport from Fair Maid—the latter a most beautiful flower—from S. J. Goddard; Afterglow and a pink seedling from Wm. Nicholson and Apple Blossom, a fine white, from Wa-No-Ka Greenhouses. The last named and Goddard's Priscilla were given honorable mention as were also seedlings No. 50-24 and 133 from M. A. Patten. Robert Rust, James Salter, Chas. S. Strout, M. A. Patten and D. J. Kerrigan were also represented by exhibits of high quality not entered for competition.

The Roses.

There were two notable novelties on exhibition in this department, White Killarney from Waban Rose Conservatories and Mrs. Jardine from Robert Scott & Son, Philadelphia. Both of these gems have been illustrated and described in previous numbers of HORTICULTURE. There seems no doubt that each will shortly take a position in the lead in commercial rose growing of this country. Mr. Scott was the proud recipient of a silver medal for Mrs. Jardine. The flowers maintained their freshness and marvellous symmetry throughout the show and their perfume attracted crowds of admirers. Two large vases of special American Beauties from Waban Rose Conservatories and Carl Jurgens were a centre of attraction. W. W. Elliott staged a vase of Kaiserins exceptionally fine and R. T. McGorum showed good Brides and Bridesmaids. Thomas Pegler and H. F. Calder were the only exhibitors of violets.

The Vegetables.

The vegetable display occupied the basement hall and had its full share of admirers. We have already referred to the Foster exhibit. E. L. Lewis got a silver medal for celery and won first prize with an invincible collection of remarkable extent arranged for effect, followed by Edw. Parker and Walter Warburton. Joseph Thorpe won a brone medal for celery. All the regular classes in the vegetable department were fully contested by a large number of exhibitors. Honorable mention was awarded to A. H. Wingett for onion Ailsa Craig and C. A. Stone for potatoes Breck's Pride and Delaware.

Zonal Geraniums.

A handsome display of zonal geranium trusses of more than usual merit was made by some unrecorded exhibitor. The name could not be obtained hence no award could be made by the committee. Among the most striking varieties were Mons. Poirier, deep pink; Mrs. Randall Barnes, white with pink centre; Miss Dorothy Borroughs, daybreak pink; Mons. Hamelin, salmon pink with light edge.

THE CHICAGO SHOW.

Chicago is always spectacular—or aims to be—in flower shows as in all things else. "Twenty carloads of flowers", we are informed, went into the great show which opened a week ago at the Coliseum. "Carloads" are a favorite standard of measurement in

AN INCIDENT OF THE CHICAGO SHOW.

"No such 'fend of the flowers' ever was known as will be waged tomorrow, when the beautiful Mrs. Marshall Field rose will vie with the Mrs. Potter Palmer rose for the supremacy of the floral world.

"Already \$50,000 has been offered and refused for the Mrs. Marshall Field rose.

"Bah!" says the owner of the Mrs. Potter Palmer rose; "it is a great price for a rose, but not nearly so much as my rose, the grandest in the world, is worth."—Chicago American.

Chicago, while Boston's ambition is appeased with crates or arms-full! Under these circumstances what could our friend, Alderman Peter Reinberg, do but to refuse the paltry \$50,000 offered for his Mrs. Marshall Field rose, and if Mr. Poehlmann said "Bah" it was simply the exuberance of the same expansive spirit. We do not blame Mr. Reinberg, for money is no object when one's children are concerned, and we hope he will make twice that amount on his pet rose and that HORTICULTURE will get a goodly share of the advertising when the time comes, although unwittingly left out in the cold in the matter of advertising the show.

This was the 16th annual exhibition of the Horticultural Society of Chicago and it was a worthy successor of a line of notable events characterized by enthusiasm, industry and novelty. The chrysanthemums—plants and flowers—were of the highest quality and the arrangement with sod and lawn effect was highly pleasing to the eye. The retail booths, which made such a feature of the last two exhibitions, were not so much in evidence this year, much to be regretted, as they were splendid attractions. There was a varied display of nursery stock in the department assigned to this material and the trade exhibits were enterprising as usual, among the best being the Foley and Moninger entries of sample greenhouses made from their building material. During the week covered by the show, special features such as roses, carnations, floral decorations, etc., were assigned to each day. In the present abundance of flowers among the commercial growers conditions were favor-

able to liberality, and the display of roses was particularly showy. Full report and comment on the exhibition as a whole should have reached us by this time, but our readers will find it no less interesting reading in next week's issue.

NASSAU COUNTY HORTICULTURAL SOCIETY.

Choice flowers, fruit and vegetables from many of the principal country places of the North Shore, filled Pembroke Hall, Glen Cove, N. Y., with their fragrance and beauty this week, when the third annual exhibition of the Nassau County Horticultural Society was held. John F. Johnson, gardener for Paul Dana, carried off the honors in the chrysanthemum classes. He took first in group of 50 square feet, 18 blooms, 6 varieties; 12 blooms, distinct varieties; Weber & Don special, 6 distinct varieties; Mrs. Paul Dana special 9 distinct varieties, and the F. L. Humbert special for largest bloom in the show. Other prize winners in the chrysanthemum classes were E. Bennett, gardener for R. L. Beeckman; H. F. Meyer, gardener for G. R. Sheldon; Valentine Cleres, gardener for F. S. Smithers; S. J. Trepess, gardener for J. Roger Maxwell and William Eccles, gardener for Mortimer Schiff.

Mr. Meyer, Mr. Cleres and Alexander Lothian divided honors in the rose classes. Mr. Meyer won Mrs. John Alvin Young's special for American Beauty roses, and Mrs. E. R. Ladew's cup for roses. The carnation prizes were well distributed. William Eccles led, winning among other prizes the Scott Bros.' cup for 50 carnations arranged for effect, the Boddington prize for orchids, the Pierson cup for 25 Winsor carnations, and the Schiff cup, valued at \$50, for 25 carnations, one variety. H. F. Meyer was one of the leading exhibitors and has eleven prizes to his credit, including the Ladew and Youngs special for roses. His exhibit of American Beauties was very fine. In the classes for commercial growers, C. F. Bertanzel made fine exhibits, taking firsts for 100 carnations, 25 white, 25 pink and 25 red, as well as silver medal for best collection.

Henry Matz, gardener for L. J. Busby, was awarded 1st for 25 chrysanthemums arranged for effect, showing a group that was exceedingly attractive. He also won the Mackenzie special for vase of cosmos: first for bridal bouquet, for foliage plant, for three ferns, for Asparagus Sprengeri and the Trepess special for single chrysanthemums. Frank Petrocia, gardener for John Alvin Young, took many prizes in violets and the Peter Henderson & Co. prizes for vegetables. James Holloway, gardener for the Pratt estate, led all exhibitors in the display of fruit, and outdoor chrysanthemums. Mr. Holloway was awarded the Titus & Bowne special for best collection of fruit, the Troy cup for collection of outdoor roses, second on Burnett Bros. special for 100 single violets and numerous firsts on apples, pears and grapes.

Mr. Johnston had as good success in vegetables as in chrysanthemums. He won the first for best twelve varieties, vegetables; first in Rickards Bros.

special for twelve varieties vegetables, and second in Henderson special for twelve varieties. He won other firsts for celery, onions and other vegetables. F. G. Mense won the first prize for group of palms, which occupied the center of the floor, the Stump & Walter prize for new introduction (salvia) and several other firsts in violets and carnations.

Among the plants used to decorate the hall were fine bay trees from George R. Sheldon's.

John Miller, gardener for L. C. Tiffany, was given certificate of merit for an exhibit of cyclamen not for competition. A certificate of merit was also awarded to Cosmos Lady Lenox.

James Ballantyne, Tarrytown, N. Y.; Anthony Schultheis, College Point, L. I., and Peter Duff, Orange, N. J., served as judges.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The premier show of this society, which always occurs when the chrysanthemum is at its height—opened on the evening of the 12th inst with a magnificent display of the reigning autumn favorite, augmented by some of the choicest of the other seasonable flowers and foliage plants, and garnished with a fine showing of vegetables and products of the farm and nursery. In addition, the display of tools, implements, insecticides and sundries was important and educational. Altogether the show was one of which any society established on broad lines might well be proud, and will surely bear good fruit in the future.

Comparing the display with those of the past few years, it is gratifying to report a distinct improvement. The big specimen chrysanthemums in 14-inch pots were fine this year, and there was competition. The three entries completely filled the main hall excepting the sides and centre. All the exhibits were better than usual and reflected great credit on their sponsors, Messrs. Hurley, Smith and McCleary. We mention these in the order of their merit as it appeared to our judgment—the prize list not having been announced as we write.

A great feature of the main hall display was the keen competition for the Ravenhill prizes for a wall display, ten feet long by six feet deep, of foliage and flowering plants. Six competitors entered and all put up fine displays, which added greatly to the show, and the pleasure of the public. We do not know how the prizes went, but there was one exhibit that caught the eye instantly as an expression of taste in artistic arrangement and in everything that goes to make up an ideal group of this kind. Mr. Dodds has carried off many prizes in this class before, but he never had an inspiration like the one under review, which in our opinion is the finest that has ever been done in artistic arrangement of foliage and flowering plants combined with perfection of everything used in the grouping.

The cut blooms this year were above the average in quality, although the quantity was not. Kleinheinz and Robertson ran a close race for premier honors here. Batchelor, Henderson and McCleary were also strong com-

petitors. A new white seedling of Kleinheinz's "Lynnwood Hall" attracted much attention. It is a glorious flower, glistening snow-white, large and perfectly incurved, and with stems that would hold up the universe without a quiver. No wonder it won the Nathan Smith cup at New York over all competitors last week. "Glenview" in Batchelor's exhibit was another cynosure of all eyes. A fine show of singles was staged by C. H. Totty.

In the rotunda the big Gleichenias of Thos. Long were an attractive feature; as were also the Ficus pandurata of the Robert Craig Co. Evergreens in many varieties were shown by Thomas Meehan & Sons, who also put up in the lower hall over 70 varieties of cut "hardy chrysanthemums."

The lower hall was devoted mainly to vegetables, and a very creditable display materialized. The competition for the Dreer, Michell, and Burpee prizes was quite keen. Tools, hose, and other sundries were exhibited here by the seed houses, chief among same being that of Dreer and Michell. A feature of the latter concern was an alcove surrounded by electric strings intercepted by fountains of electric light. Plants were worked into the design, the whole serving as a background to the frontal display of bulbs and fancy pots and tubs. A bee exhibit was a rather unusual feature. This came from Wm. Stringham, a specialist in Italians.

A feature of the show was the splendid group of hardy chrysanthemums from Overbrook Gardens (E. A. Stroud). Julia Lagavere, clarent; Golden Pheasant, yellow, and Lulu, white, were fine in this, as were also two new seedlings raised by the foreman (Mr. Prince), Marion, pale pink, and Gertrude, darker. Another noticeable feature of the show was the fine display of Beatrice May in the Robertson exhibit. Robertson also had a very swell twelve in the foliage plant class which would have made our old friend Thatcher take notice. We have no room for much on the foliage plants but cannot close without a reference to the Phoenix Roebelini of Kleinheinz, said to be the finest specimen in America.

Among the exhibitors whom lack of space prevents us giving extended notice, but whose important contributions to the show were much appreciated and won many prizes, were:

George Bustard, gardener to Curwen Stoddard; Isaac Kalp, gardener to S. S. Friedburger; Joseph Crowther, gardener to Saml. B. Brown; A. J. Moir, gardener to John Pitcairn; Jno. Hedland, gardener to Mrs. W. L. Elkins; Jno. F. Sibson, gardener to Mrs. Thos. McKean; Wm. Bell Wright, Jno. Hobson, Jno. Fowle, Thos. Rowe, gardener to E. P. Earl; Saml. Hammond, gardener to Rudolph B. Ellis; Jno. T. Whitaker, gardener to R. Le Boutilier; Jno. Little, gardener to Jno. Lawler Welsh; S. Nowland, farmer for C. B. Newbold; Wm. Morton, gardener for E. R. Johnson; Wm. Henderson, gardener to Mrs. W. M. Potts; Thos. Gaynor, gardener to Mrs. Jno. B. Stetson; R. T. Morrow, gardener to G. I. Bodine; Edward Smith, gardener to E. A. Benson.

The F. R. Pierson Co. exhibited Nephrolepis superbissima and Winsor

and other carnations. E. G. Hill & Co. brought Rhea Read and Princess, their new roses. R. Scott & Son were on hand with a fine display of rose Mrs. Jardine.

DUTCHESS COUNTY HORTICULTURAL SOCIETY.

The 13th annual flower show of this Society was held at Poughkeepsie, N. Y., on November 6 and 7. The old-time exhibitors were well represented and the drill shed never looked more beautiful than on this occasion. Chrysanthemums, ornamental plants, roses, carnations and Poughkeepsie's great staple—violets—were shown in great profusion, also vegetables and fruit.

A feature of the show was the central group of plants from Archibald Rogers; also the similar group from the Saltford Flower Shop. The list of winners in the various classes included the names of many of the widely known millionaires whose country seats overlook the Hudson River, all the way from Poughkeepsie down.

In the violet contest, the prize for the best 500 blooms was won by F. G. Vanderbilt, and Alexander Thomas of Rhinebeck was second. For the best hundred double violets, the Saltford Flower Shop won first prize and F. G. Vanderbilt second prize.

One of the features Thursday was the contest for the best decorated dinner table. There were four entries and the prize was won by the Saltford Flower Shop. The center piece was of violets, with tiny bunches of violets tied with violet satin cord, at each dinner plate. The second prize was won by Winthrop Sargent of Fishkill. The center piece was of red roses, with rose buds at each plate. Samuel Gregg of New Hamburg decorated with chrysanthemums and James Whitney of Newburg, with chrysanthemums and adiantums.

There was a splendid exhibit of evergreens from the Sunnyside Nursery under the supervision of Supt. Leonard Dorthius.

The local newspapers and others complained of insufficient attendance. Why not try giving a little wider publicity to the event next year?

CONNECTICUT HORTICULTURAL SOCIETY.

The annual chrysanthemum display of this society was held in County Building, Hartford, on Friday, Nov. 8. The exhibits were numerous and of unusual excellence and the public attendance was so large as to tax the capacity of the hall. The principal exhibitors were J. F. Huss, supt. to J. J. Goodwin, J. A. Heber, gardener to Walter Goodwin, E. F. McDermott, gardener to H. C. Judd, Carl Peterson, supt. Whiting Greenhouses and Peter Zuzer, head gardener, City Parks. The display was not entirely confined to chrysanthemums, the extra exhibits of special interest being a group of splendidly grown Begonia Lorraine, staged by J. A. Weber, which was awarded a diploma, a fine specimen Odontoglossum grande exhibited by E. F. McDermott and a notable group of Cattleya labiata, by J. F. Huss—the two latter exhibits receiving certificates of merit. Mr. Huss also exhibited a vase of the new cosmos, "Lady Lenox," which was awarded a diploma.

The judging committee were C. H.

Sierman, Alex. Cumming, Jr., and John Gerard and their chrysanthemum awards were as follows:—Large flowering, cut blooms: J. F. Huss, 31 varieties, diploma; Peter Zuger, 25 varieties, diploma; J. A. Weber, 20 varieties, certificate of merit; E. F. McDermott, honorable mention. Peter Zuger, pompons, 35 varieties, diploma. J. A. Weber, two large standards, diploma and certificate of merit; J. F. Huss, ditto. J. F. Huss, bush plants, two diplomas. J. A. Weber, bush plant, diploma. J. F. Huss, collection pompons in 6-inch pots, diploma. Carl Peterson, collection, diploma. Gustav Minge, collection, honorable mention.

ALEX. CUMMING.

NEW JERSEY FLORICULTURAL SOCIETY.

The thirteenth annual flower show of the New Jersey Floricultural Society was held in the new hall of the Woman's Club in East Orange on the 7th and 8th insts. and called forth the usual best efforts of the well-known growers of its section. The effective lighting of the hall both by day and night added much in setting off its intrinsic merit and the wealth of greenhouse products brought to it by its talented representatives of the gardener's profession.

Three large pyramidal groups occupied the centre of the floor space, consisting of palms, ferns and chrysanthemums rendered particularly effective by the skillful introduction of many finely colored crotons and edged with selaginella, peperomias and other plants. A bank of orchids backed by palms and edged with *Adiantum Farleyense* occupied the proscenium and screened the musicians. Tables around the hall served to hold cut flowers, fruit and vegetable contributions. At one side was an elaborate mantel design by Geo. Smith consisting of autumn leaves, palms and ferns with a centre of orchids occupying the shelf and side groups of chrysanthemums upon the floor. The attendance at times was crowded and consisted largely of the lady patronesses of the show and their friends representing the various social sets of the Oranges.

Besides the competitive portion of the show were displays made by Lager & Hurrell of orchids without accessories other than themselves, elucidating the principles of John E. Lager so often expressed, that the orchid requires no ornament to set it off and during the evening he demonstrated to an admiring crowd how the centre of cattleya was strengthened in effect by the immediate proximity of the cypripediums upon its border and the oncidiums and laelia background, while the paler Eldorado acted as a foil to its more florid labiate and Percivaliana neighbors.

Joseph A. Manda staged a group of his own hybrid specialties with some well-flowered epidendrums and oncidiums. His group of Phoenix Roebelini with a centre *Ficus pandurata* was much admired. W. A. Manda contributed a collection of conifers and box in pots and his variegated privet, also a specimen *Nephrolepis* "South Orange." Henry Hornecker staged some cut flowers among which were carnation *Enchantress*.

The awards in the competitive

EXHIBITION OF N. J. FLORICULTURAL SOCIETY.

classes for chrysanthemum plants and flowers in specimens and groups, orchids, foliage plants, were numerous—among the winners of first prizes being Peter Duff, D. Kindsgrab, A. T. Caparn, Max Schneider and George Von Qualen, Peter Duff having the majority of them, and among the winners of second premiums being Wm. Reid, Albert F. Larsen, Geo. Von Qualen and P. J. Dervan, all gardeners on the various private estates in the vicinity. The special prizes were awarded as follows: Peter Henderson & Co.'s for twelve roses to Peter J. Dervan, and for display of vegetables to A. T. Caparn; F. R. Pierson's for Winsor carnations to Wm. Reid; J. M. Thorburn & Co.'s for display of vegetables grown from Thorburn's seeds to Peter Duff; George Smith's for exhibitor winning most first prizes to Peter Duff. The judges were J. N. May, C. H. Atkins and A. J. Manda.

MARIN COUNTY HORTICULTURAL SOCIETY.

The first annual exhibition of the Marin County Horticultural Society fulfilled the most sanguine expectations and was without a doubt the best floral exhibit ever held in the state. The only drawback was that the hall—the largest in town—was not large enough, and the exhibits were necessarily crowded. Society turned out in full force, and there was a splendid attendance from all around the bay. The exhibitors were not confined to Marin County; San Mateo County was largely represented, as well as San Francisco and Alameda Counties. Entries were made in all classes, except for carnations grown outside of California, and competition was very keen especially in chrysanthemums, and dahlias in Class A.

In the open class in chrysanthemums H. L. Goertzhain of Redwood City carried off the honors in white and yellow with Domoto Brothers of Fruitvale a close second; while in pink, any other color, and 12 distinct varieties the first all went to Geo. Draycott of San Rafael. Domoto Brothers got first for best and largest single bloom and A. W. Foster (Richard Lohrman,

gardener) and Mrs. J. F. Boyd second in the last four-mentioned numbers. In the Marin County section white, yellow, pink and any other color, the firsts went to A. W. Foster, Geo. Draycott, F. B. Anderson (W. Buehl, gardener) and Geo. Draycott respectively. Mrs. W. H. Crocker (H. McLean, gardener) won the society's silver cup for the best display. In the dahlia section G. A. Pope of Burlingame (Wm. Kittlewell, gardener) took firsts on Cactus, Show and Pompon and the silver cup for best and largeset collection. The first in Decorative went to F. B. Anderson while S. E. Slade of Menlo (Chas. Ehrlick, gardener) got first on single. The prize for the best seedling went to J. A. Donahue of Menlo (W. W. Carter gardener).

J. A. Carbone of Berkeley took all the firsts in the carnation section, T. W. Breen of Glenwood Nursery second on white, red and variegated, Domoto Bros. second on pink. T. P. Redmayne of Hotel Rafael gardens took first on collection of roses, outdoor grown roses, exhibit of cut flowers and six flowering plants. Geo. Draycott carried the firsts respectively on chrysanthemums in 6-in. pot, collection of potted chrysanthemums and on collection of ferns won the silver cup. Mrs. Gerstle of San Rafael (F. Miller, gardener) took first on decorative plant and specimen fern. Jno. A. Martin of Ross secured the gold cup for display or orchids, and the Schluter cup for best display of the show.

In class C the honors went to the Forrest Floral Co. of San Francisco for the most artistic floral design. Very fine non-competitive decorative exhibits were made by Jno. A. Martin of Ross and H. Schluter of Laurel Grove Nursery, San Rafael.

T. P. REDMAYNE, Sec

The chrysanthemum exhibit at the Lyman House, Smith College, Northampton, Mass., Nov. 8-15, was larger and better than any previous show.

The greenhouses of H. H. Rogers, Fairhaven, Mass., were opened to the public from Nov. 7 to 11. Chrysanthemums filled two houses and were a magnificent tribute to the skill of James Garthley, the gardener.

cles in some quarters and it must be confessed that optimism in the face of the stagnated conditions at present existing is not an easy acquirement. Yet nothing is gained by persistent contemplation of the gloomy side and pessimism besides being profitless is also very uncomfortable. Far better for each individual to make of himself a "clearing house for the blues" keeping in mind for himself and impressing upon his associates the fact that our great country with its stupendous agricultural and commercial resources will soon resume its accustomed course. And hopeful confidence well distributed is the most effectual means of bringing this about.

The pompon's demands

Now that indisputable evidence is given of the growing public appreciation of the small-flowered chrysanthemums it will be well for the prize-schedule makers to give serious consideration to the pompon class from the standpoint of its proper place in decorative design. It can hardly be expected that these unpretentious flowers will appeal with any force to the average flower show visitor until exhibitors have learned to stage them more effectively than has been the case in a majority of instances. Crowded by handfuls into closely packed vases or bottles in an obscure location against the wall has usually been the fate of these sturdy little blossoms which in the hands of the artist and in association with Japs and singles may be placed so that they fairly sparkle. Mr. Duckham tells us that larger, nobler and more stately flowers is the key to continued popularity for the chrysanthemum. Mr. Duckham is only half way right. The stately flowers alone will not save the chrysanthemum's prestige unless the other classes are brought along in equal prominence as indispensable accessories. Monotony is what has been crippling the chrysanthemum as a drawing attraction.

An opening for improvement

Whatever may be said—and it cannot be overdrawn—as to the stately grandeur of the massive show chrysanthemums when grown to perfection and displayed with long stems and heavy foliage in large vases, yet nothing is more glaringly out of place than these big flowers on single-stem plants packed in at intervals among palms and crotons in the so-called "decorative" groups so frequently seen at the exhibitions. These groups, usually constructed in the form of a pyramid or a sloping bank against the wall, built up with the choicest products of the conservatory and displaying cultural attainments of a high order, become but travesties, from the standpoint of artistic propriety, when one sees the big globular chrysanthemum flowers peering out from between the leaves of ficuses and kentias, each securely fastened at the neck to a rattan stake. We always feel sorry for the chrysanthemums, sorry for the palms, sorry for the orchids which not infrequently are included—that they should be forced into such incongruous association. We predict that the time will soon come when this peculiar type of exhibit will be as obsolete as are now the ring streaked and spotted "bouquets" with which the florist of forty years ago delighted his customers.

The advertisement of a certain New York theatre starts with "Clearing House for the Blues" as a head line. The "blues" is a bad disease and an almost invariable symptom is that the victim resists any effort that his friends may be disposed to make for his relief. The malady is very prevalent in both wholesale and retail flower trade cir-

A QUESTION OF NOMENCLATURE.

Chapter II.

Editor HORTICULTURE:

Dear Sir:—I note in your issue of Nov. 2nd your reference to the nomenclature of *Hydrangea arborescens sterilis*. I cannot see anything in the explanation offered by Mr. Hill which validates the mistake. It appears that the above name was given in the regular approved form, by Torrey and Grey long before the appearance of the *Cyclopedia of American Horticulture*, and adopted or rather recognized by organizations which deal with the question of nomenclature. The fact that the secretary of the S. A. F. overlooked this earlier record is no argument that the original name given, properly published, and described, should be ignored. If this principle were followed, we might as well let rules of nomenclature "go by the board." I believe in correcting mistakes, and acting in consistent accord with the established rules. If this mistake had passed along without discovery for a number of years, it would be another question, but the correction is now being offered in abundant time to warrant its adoption without any serious confusion. The main point is that the *Cyclopedia of American Horticulture* is not the authority in this case, but merely recorded the name given many years ago by the leading botanists of this country.

Sincerely yours,

JOHN CRAIG.

We are glad these facts are coming out. Personally we have no prejudice in favor of either name. The point we wish to emphasise is that botanical authorities should keep better informed as to events in commercial horticulture. They cannot expect that men engaged in the hustle of business activity can keep posted as to obscure botanical records not to mention the perplexing changing and overturning of long-established botanical names which these same disagreeing authorities are ever engaged in. Having been secretary of the Society of American Florists and in charge of its registration department at the time Mr. Hill registered *Hydrangea arborescens grandiflora alba*, the present editor of HORTICULTURE is able to say that the widespread publication of the "submission" of a plant name for registration was made with a view to bring to light any prior name or other valid reason for discarding the name proposed and in accordance with the published rules of the Society, registration was not finally effected until after a sufficient time had elapsed for all protestants to be heard. The cooperation of its scientific friends would have been in the past and will now be very welcome to the Society of American Florists in its well-meant efforts to prevent confusion in plant nomenclature, and that this controversy over Mr. Hill's action may thus result is a "consummation devoutly to be wished."

NEW DAHLIAS AT CANNELL'S.

It would certainly have been a great treat for any member of the New England Dahlia Society to have been with me the other day when I spent a short time going over the immense collection of dahlias at Messrs. Henry Cannell & Sons, of Swanley. Under the energetic guidance of the head of the firm who although close on 70 years of age was as eager and as brisk as a young man of 25, I spent a most enjoyable time with this veteran florist whose recollections go back many years in all classes of florists' flowers and who has grown everything worth growing in that line.

One of the most interesting is Cannell's Pet, a capital little bedder, of the color of La France rose, with the advantage that the blooms stand up erect and do not droop as many of the others do. Large Decorative Singles of recent introduction are Hall Caine, which has very broad petals of pure golden yellow, shaded reddish chestnut; The Bondman, a fine substantial petal, very large flowers, white ground flushed crimson-magenta; Golden Glory, immense breadth of petal, color a lovely shade of pure greenish lemon yellow; White Cloud, a massive-petalled variety, pure white with the base shaded yellow.

Smaller in size but curious are the new anemone-centered dahlias. These are only 3 or 4 inches across but the disc is very pronounced. Swanley Anemone is deep rosy velvety crimson maroon with a golden center. Another of this type is Pink Gem and worthily named; the color is a lovely shade of bright rosy pink, disc golden buff.

Collerette dahlias are a French invention of a few years since and are beginning to be fairly well known; the number is still increasing and some interesting novelties are annually being raised. Maurice Rivoire, rich magenta and crimson with white collerette is one of the best. Prest. Viger, reddish carmine and Mme. Le Page Viger, reddish scarlet with yellow collerette is also a fine variety, although in neither instance are these to be considered novelties of the season.

The huge decorative peony-flowered varieties are immense in size and now comprise about a dozen well established sorts. Most of them have been exhibited at the dahlia shows this year. Baron de Grancy, Dr. K. W. Van Gorkum, Reine Wilhelmina, Gloire de Baarn, Germanica, Duc Henri, Reine Emma and several others being fully in flower at the time of writing these notes. Decorative garden dahlias, Mlle Helene Charvet, pure white; Souvenir de Gustave Douzon, rich red; Jeanne Charmet, Mme. Vauden Daele, M^{me}. a Lumiere and Source de Feu were all the subject of admiration on account of their value for massing in a color scheme where bold effects are required.

We noticed on our way across the dahlia ground a large collection of Decorative Singles with fine upstanding blooms that had been raised in Portugal and sent by the originator to Cannell's for trial. Nice bushy plants, vegetation not too rampant and large flat blossoms essentially single in form were mostly to be seen here. They will be tried and selections made before being finally announced for distribution.

HARRY H. THOMAS.

We extract the following from our English contemporary, "The Journal of Horticulture":

The New Editor of "The Gardener."

Mr. Walter P. Wright, who has edited "The Gardener" since its foundation nine years ago, has resigned his post. His successor is Mr. H. H. Thomas, son of Mr. Owen Thomas, V. M. H., late of The Gardens, Frogmore. Mr. H. H. Thomas has been sub-editor of "The Garden" for several years, and is the author of two books. One of these is upon the cultivation of the apple; and the other, just published, deals with suburban and town gardening. Mr. Thomas has had practical experience both in England and in France, and was for a short while foreman in the fruit department in the Royal Gardens, Frogmore. He also served for two years at Kew, and had general nursery experience in Messrs. Veitch's nurseries.

We also understand that Mr. Thomas, whose name is familiar to our readers as a contributor for some time past to HORTICULTURE, has been appointed to the secretaryship of the English National Dahlia Society. We wish him every success in his new undertakings.

PERSONAL.

Arthur Griffin, of Newport, R. I., has returned from an enjoyable visit to England.

Horticulture's popular representative in Philadelphia, George C. Watson, has been quite seriously ill and confined to his room during the past week.

Visitors in Boston this week: Winfried Rolker and H. F. Darrow, New York city; A. M. Rennie, Providence, R. I.; E. J. Harmon, Portland, Me.

On November 12, at the Cathedral Chapel, St. Louis, Robert F. Tesson and Miss Harriet Wilkinson were married. They will make their home at Sunny Point, West Forest Park.

Hjalmar Hartmann, of Copenhagen, the noted cauliflower seedsman, announced to his friends that his wedding would take place on November 15th at the Royal Shooting Club house in Copenhagen. His bride-elect is the daughter of Professor Godfred Christensen, the celebrated Scandinavian artist.

A LEADING HOLLAND NURSERY.

Van Meerbeek & Co., the nurserymen of Hillegom, Holland, whose advertisement appears in this issue, carry on an extensive bulb growing establishment where some of the finest Dutch bulbs are produced which find their way to the American market. This firm has been in existence for over half a century and its list of hardy border plants comprises an immense variety of the more elegant things which are now coming into wide demand.

NEWS OF THE CLUBS AND SOCIETIES.

MARYLAND HORTICULTURAL SOCIETY.

More than ordinary interest is being manifested in the tenth annual meeting of the Maryland Horticultural Society, which will be held in the Fifth Regiment Armory, in Baltimore, December 3rd and 4th. This organization is a very active one, embracing the fruit growers, florists and truckers and at the coming meeting every phase of horticulture will be discussed by prominent men from different parts of the country.

The large exhibits of fruit, flowers and vegetables which is planned to cover 50,000 sq. ft., or the whole Fifth Regiment Armory, will be a special feature, and it is hoped to be the largest show of its kind ever held in Maryland. A large sum of money has been offered as premiums for the special exhibits.

A floor plan of the exhibits will be sent to any prospective exhibitor. Space will be subject to reservation for exhibits of all kinds of spraying machinery, fruit packages, greenhouse appliances and other horticultural apparatus.

Following is the program of the meeting: 2:00 P. M., Invocation, Rev. William Paret, Bishop of Maryland. Organization and announcements. Address of welcome, His Honor, J. Barry Mahool, Mayor of Baltimore. Response, Hon. Henry Holtzapfel, Hagerstown, Md. Report of secretary and treasurer, Prof. T. B. Symons, College Park. Reports of standing committees—orchards, vineyards, stone fruits, small fruits, vegetables, flowers, ornamentals, entomology, ornithology, botany, plant pathology, nomenclature, new fruits, packing, storing and marketing fruits, transportation. President's annual address, Hon. Orlando Harrison, Berlin, Md. Appointment of committees on resolutions, obituary and auditing, treasurer's account.

Tuesday, December 3rd, 7:45 to 9:30 P. M.

Question box. Announcements and miscellaneous business. Report of State Forester, Prof. F. W. Besley, Baltimore, Md. Water gardening, Peter Bisset, President Washington Florists' Club, Washington, D. C. Sketches of the peach industry in the United States. Prof. John Craig, Cornell University, Ithaca, New York.

Wednesday, December 4th, 9:00 A. M. to 12:00 M.

Question box. Announcements and miscellaneous business. Report of the State Pathologist, Prof. J. B. S. Norton, College Park. Forty years in the apple orchard, Mr. U. T. Cox, Proctorville, Ohio. Maryland Agricultural College, Pres. R. W. Silvester, College Park. Marketing fruits and vegetables, Mr. Walter Snyder, ex-Pres. National Shippers' Ass'n, Baltimore, Maryland.

Wednesday, December 4th, 2:00 P. M. to 5:00 P. M.

Question box. Announcements and miscellaneous business. Report of State Horticulturist, Prof. C. P. Close,

College Park. Growing small fruits for market, Mr. C. F. Hale, Shelby, Michigan. Maryland Experiment Station. Director H. J. Patterson, College Park. Election of officers. Reports of select committees. General business.

Wednesday Evening, December 4th, 7:45 to 9:30 P. M.

Commercial floriculture, C. S. Ward, New York, N. Y. Report of State Entomologist, Prof. T. B. Symons, College Park. Miscellaneous business. Adjournment. Banquet.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Work of Committees.

Philadelphia, Nov. 4th. No. 1, cream white, Jap. Incurred; exhibited by Gordon Smirl, Rosemont, Pa.; scored 85 points commercial and 85 points exhibition scale.

Philadelphia, Nov. 4th. No. 2, magenta, light reverse, Jap. Incurred; exhibited by Gordon Smirl; scored 79 points commercial and 81 points exhibition scale.

Cincinnati, Nov. 2nd. (No name), redish bronze, Japanese; exhibited by Nathan Smith & Son, Adrian, Mich.; scored 79 points exhibition scale.

Cincinnati, Nov. 2nd. Mary Donellan, yellow; exhibited by Nathan Smith & Son; scored 83 points commercial and 87 points exhibition scale.

New York, Nov. 6th. N. Moir, Jap. Incurred; exhibited by C. H. Totty, Madison, N. J.; scored 92 points commercial and 94 points exhibition scale.

New York, Nov. 6th. Lynnwood Hall, Jap. Incurred; exhibited by Wm. Kleinheinz, Ogontz, Pa.; scored 86 points commercial scale.

Chicago, Nov. 9th. Sadie May Stremmer, yellow (sport of Queen); exhibited by Metcalf's Greenhouses, Hopkinsville, Ky.; scored 64 points commercial scale.

The variety No. 4, exhibited by Frank E. Wetney before the New York committee, has been named Grace Wetney. **DAVID FRASER, Sec'y.**

ELBERON HORTICULTURAL SOCIETY.

The Elberon Horticultural Society held its second annual meeting on November 4th, President W. D. Robertson in the chair. The various officers read their reports which showed the society to be in a flourishing condition.

In the competition for points at the meetings held during the last year, Peter Murray was awarded the gold medal with an average of 89; A. Bauer, silver medal, with an average of 88; J. Kennedy, third, with an average of 86. In the class for those without greenhouses A. Griel was first with an average of 81.

Rickards' Bros., of New York, were present at this meeting and offered a silver cup to be competed for at the meeting during the next year. A. Griel donated a silver cup also for a similar purpose. A. Rickards installed the newly elected officers into their respective positions.

GEORGE MASSON, Sec'y.

PITTSBURG AND ALLEGHENY FLORISTS' AND GARDENERS' CLUB.

The meeting November 5 was a record breaker in point of attendance and the high average quality of the blooms exhibited. It was chrysanthemum night. Of the blooms sent by The E. G. Hill Co., Mme. Delizy was well spoken of in a commercial way also Mary Mann and, for exhibition, Mme. Mouncey. The Pittsburgh Rose & Carnation Co. showed a good lot including Mme. A. Detroyat, Morton F. Plant, Golden Wedding, Appleton, Beatrice May, Wm. Duckham, Chadwick, Balfour and others. H. C. Frick, David Fraser, gardener, showed Miss Clay Frick and Mile. Ogizl. Phipps Conservatories, J. Jones, foreman, as usual staged a very fine collection. Their leaders were Mary Ann Pockett, May Seddon, Thos Carrington, Golden Age. The difference in color in Wm. Duckham blooms from early and late buds was very noticeable. Western Penitentiary, Walter James gardener, showed a good vase.

Godwin Bros., Bridgeville, Pa., H. S. Price, gardener for Mr. Laughlins, Thos. Jenkinson, gardener for A. R. Peacock, with Miriam Hankey the leader, Mr. Westhoff, with White Bonaffon and in particular a vase of Robt. Craig carnations that would have been prize winners in almost any company, Mrs. R. H. Rogers, G. & J. W. Ludwig with Perle, Mme. de Watteville, Ivory and Bride roses, were all prominent exhibitors. There was also shown by H. L. Blind & Bros. a galvanized iron hotbed sash, provided with little gutters for the delivery of the drip outside the hotbed.

The chrysanthemums displayed showed conclusively that Pittsburgh florists and gardeners can produce the highest grade of blooms despite their disadvantage of soot, smoke and fog.

Subject of next meeting is to be announced later.

H. P. JOSLIN, Sec'y.

NEW YORK FLORISTS' CLUB.

The regular meeting of the New York Florists' Club, on the evening of November 11, was attended by over one hundred, of whom a goodly number were ladies, a special invitation having been extended to them and preparations for their entertainment duly made. The main event of the evening was a talk, illustrated by photographic views, by Henry Saxton Adams of Wellesley, Mass., on the subject of school gardens. Mr. Adams talked very entertainingly and his address was received with much pleasure and approbation. He spoke of the children's garden movement from the point of view of the educator, the florist, the public, and touched upon all phases of the benefits to result from the training of the young in garden work. Favorable comment was made by Patrick O'Mara, who instanced the great boon that Peter Henderson's book on Gardening for Profit had been to the country—especially to the South after the war, and made a strong plea in behalf of popular education in the tilling of the soil, an employment which devel-

DAHLIAS WHOLE FIELD CLUMPS *Special Surplus Offer*

BELOW is a list of Dahlias of which we have a surplus over and above our regular requirements and offer you large whole field clumps or roots of the varieties named, except where noted, at \$4 per 100, \$35 per 1000. Mixed varieties \$3 per 100, \$25 per 1000 until sold. They are all true to name and in fine condition for shipping and consist of the best standard sorts for either private or commercial use. Terms net F.O.B. Sparkill, packing extra at cost.

PALISADES NURSERIES, Perennials Our Specialty SPARKILL, N. Y.

ops the bone and sinew and makes for the best citizenship.

E. G. Hill of Richmond, Ind., who was present, spoke in a similar strain, and also took occasion to advocate the coming national flower show, urging that the New York fraternity take hold earnestly and help to make it a great national success in its scope, character and influence. He confidently expected a good representation of foreign exhibitors. A hearty vote of thanks was tendered Mr. Adams.

There were some interesting exhibits on which the committee made report as follows:

Rose Rhea Reid, by E. G. Hill Co., 9 points and a preliminary certificate; Rose Princess, 85 points and a preliminary certificate. Charles Weber, Lynbrook, showed carnations Imperial, Pink Imperial and Aristocrat, which had previously been shown before the club.

Nominations of officers for 1908 were made as follows:

For president—C. H. Totty, C. B. Weathered, Wm. Duckham. Vice-president—H. Weston, W. Marshall, A. Jaennecke. Treasurer—W. F. Sheridan, J. K. Allen, A. L. Miller. Secretary—S. S. Butterfield, John Young, J. Austin Shaw, Trustees—E. V. Hallock, W. A. Du Rie, Peter Wagner, Chas. Lenker, A. J. Guttman, A. M. Henshaw, A. Rickards, Robt. Simpson.

Sumptuous entertainment was provided for ladies and everybody else by the official caterer, John B. Nugent, and the rest of the committee on good cheer, physical and mental. Rickards Bros., the whirlwind songsters, were in their best form; the youthful Burnett Bros., in violin and piano duets, made a decided hit; Mrs. Bevins, Miss Ruff and Mr. Woodell in vocal selections were very fine, and altogether the affair was most enjoyable in every detail.

WASHINGTON FLORISTS' CLUB.

The regular monthly meeting of the W. F. C. was held in Gude's Hall, November 5th, with President Bisset in the chair. The coming chrysanthemum show was the chief subject of interest. Chairman Cooke of the committee reported to the effect that all arrangements are about perfected and an unusually fine exhibit is expected. It was stated by Secretary McCauley that Mrs. Roosevelt has promised to attend the exhibition. Henry A. Dreer has signified his intention of sending

on a specially fine exhibit of plants which will afterward be sold and proceeds donated to the associated charities. The club has gotten up a striking "ad" in the form of a handsome card showing a showy chrysanthemum. These will be very freely distributed. It was moved and seconded that Baltimore be invited to send judges for the show, who will be entertained by the local awards committee. President Bisset was much complimented on several of his new seedling roses which he exhibited for the first time. All the tickets still remaining in the hands of the W. F. C. Bowling Team were quickly disposed of.

TARRYTOWN HORTICULTURAL SOCIETY.

The cup for table decoration at the second day of the fall exhibition was won by Edw. Jenkins with a centre piece of *Cattleya labiata*, *Oncidium varicosum*, *Bougainvillea glabra*, lily of the valley and *Adiantum Farleyense*, a committee of ladies serving as judges. W. H. Waite, in competition, put up a dainty arrangement of lily of the valley and sweet peas. Red chrysanthemums with autumn foliage and berries, red carnations and lily of the valley, red and yellow chrysanthemums and a Japanese arrangement of rustic summer house, etc., in miniature, were the other competing arrangements. Much popular interest was evinced.

CLUB AND SOCIETY NOTES.

The landscape class of the Gardeners' and Florists' Club of Boston will soon resume study. Arrangements are

nearly completed and announcement of date of opening lesson will be made in a few days.

The public meeting of the State Board of Agriculture will be held in Horticulture Hall, Boston, December 3, 4 and 5. On Tuesday at 10 A. M., Mayor Fitzgerald for the city and Gen. Stephen M. Weld for the Massachusetts Horticultural Society, will extend welcome. Gov. Curtis Guild, Jr., will respond. Among the speakers will be Prof. H. F. Hall, of Durham, N. H.; W. W. Tracy, of the Department of Agriculture, Washington, D. C., and Dr. H. T. Fernald, State Nursery Inspector. A business meeting of the Board will be held following adjournment on Tuesday P. M.

LILIAM WARDARAI.

This lily which R. M. Ward & Co.
expect to send out next season in
quantity is an improvement on longi-
florum giganteum, growing considera-

bly taller, with strong erect stems and
more flowers. The proposed name is
compounded of the names of Mr. Ward,
the introducer, and Mr. Arai, the
grower.

Seed Trade

Rumors which have been in circula-
tion for some time, to the effect that
the California seed growers would not
book orders for onion seed of the 1908
crop, prove to be correct, as to the
two principal growers, C. C. Morse Co.
and the Braslan Seed Growers' Com-
pany. Just what the other growers are
doing or are going to do has not been
learned, but they are likely to follow
the example of the two leading grow-
ers. A statement that C. C. Morse
Co. started in to book orders for the
1908 crop then suddenly shut off, is
doubtless true; their reason for so do-
ing has not been made clear.

The reason assigned for refusal to
make contracts for the 1908 crop, is
that a syndicate headed by Chinamen
has cornered the supply of onions and
is holding them at practically pro-
hibitive prices. This statement proves
to be mainly true, and unless there is
a loosening up by the syndicate vol-
untary or otherwise, the growers can-
not afford to pay the prices. Not only

would the price of the onions tend to
increase the price of seed, but in case
of even a partial failure of the crops,
the loss to the growers would be very
heavy. To insure themselves against
this, they would have to greatly in-
crease the price of seed to the seeds-
man, and rather than pay it the latter
would greatly prefer to take chances
on the open market next fall. There
has been much criticism of the grow-
ers for their attitude in this matter,

SEED TRADE.

(Continued from page 6.)

but with a full knowledge of the facts fair minded people will admit the justification of their position.

The recent fire at the Government Seed Shop seems to have made a clean sweep as usual when a fire occurs in a seed warehouse, as all not destroyed by fire is just as effectually put out of commission by water. The department of agriculture had in store most of its seeds for this season distribution, and all are wiped out, some items being an irreparable loss as they cannot be replaced this year. It is doubtful if this fact is appreciated at the department, as they apparently expect to replace their entire stock at about the prices paid last spring. They are doomed to disappointment, however, as there has been a general advance on practically the entire line of seeds, in many instances over 100 per cent. Among the items lost was 2,500 bushels of sugar corn, which every seedman knows cannot be replaced excepting at prices so high as would cause a general attack of heart failure among responsible officials of the department. The fact that this 2,500 bushels of corn was worth from \$12,000 to \$15,000 is a secret which has not yet been revealed to them, but they will soon be made wise. To meet their extra purchase of seeds and other supplies destroyed by the fire, a supplementary appropriation will have to be made by Congress, but this is not causing the department officials any anxiety. They feel certain that the appropriation will be made, and are in a state of cheerful optimism.

But suppose Congress should not make the appropriation? It would not be the first time by any means that appropriations have been refused after the Government has got the goods. In more than one emergency supplies have been furnished at the request of responsible heads of departments, with the expectation that Congress would appropriate funds to pay for them, which it has failed to do, and there are several unpaid claims before the Court of Claims which have been pending for years. Of course, "The Government never repudiated any just obligation," but when a just obligation runs through the lifetime of two generations and is still unpaid, it comes pretty close to being repudiation. It is hoped that in the present instance Congress will promptly make the appropriation, but the reverse is by no means an impossibility.

It is reported that a number of retail catalogues will not offer sugar corn in quantities greater than pecks, which shows good judgment, as the dealer can thus better protect his stocks for the benefit of his regular customers. Some retail seedmen appear to have been caught not only without any sugar corn seed on hand but also without contracts for any. It does not speak well for their business acumen, to be caught in such a fix in the matter of a leading item that they must have every year. It has been demonstrated repeatedly that an item may be selling below cost of production one year, and at famine prices the next, and particularly items like corn, peas or beans, which are seldom carried in sufficient quantities to

tide over a very short crop year without a very long advance in prices.

Recent information from Martial Bremond, Ollioules, France, is that the bulb district has been visited by excessive rains from the middle of October to November 1st continually, and the planting as a consequence, has been considerably delayed; and it is absolutely impossible to get any idea of the prospects and prices of 1908 crop.

George Young, for several years connected with the Holmes Seed Company, has left that firm and there is a good opening there for an intelligent, capable salesman who can "do business" with both merchants and market gardeners.

The Japanese government has bought the steamships Tartar and Athenian from the Canadian Pacific R. R. and the freight service between American ports and Japan is cramped on this account.

One peculiar result of the recent severe floods in Japan is a scarcity of box material, also of dry sand, etc., for bulb packing purposes.

There is much speculation as to the drift of prices on onion sets. It is pretty safe to say that the drift will be upward.

George Stumpp, of Stumpp & Walter Co., New York, has gone south for an extended trip, combining business and pleasure.

Neil Dunning, of the Stumpp & Walter Co. forces, has been critically ill with pneumonia during the past week.

The American Pure Seed Co., now located at Evansville, Ind., has advanced the par value of stock to \$25.

The Iowa Seed Co., at Des Moines, Ia., have recently added a new house to their range of thirty-one.

Lilium lancifolium album is again reported in short supply in Japan.

A HANDSOME TROPHY.

We picture in this issue the Henry F. Michell Co. vase for the best one hundred blooms of carnations—four varieties—to be exhibited at the exhibition of the American Carnation Society, Washington, D. C., in 1908. It is made of green glass and silver.

The silver is electrically deposited on the glass body of the vase, and has on the back and sides a series of conventional carnations and leaves, which make it thoroughly appropriate as a

prize for this exhibition. On the front is a silver shield, on which is engraved:

Presented
by
Henry F. Michell Co.
Seedsmen
Philadelphia
Penn.
to

On the base of the vase is the inscription.

"For best 100 blooms of Carnations, in four varieties. Exhibited at the National Carnation Exhibition in Washington, D. C., 1908."

The general style is L'Art Nouveau, and is so entirely original and so valuable a prize that it again attracts attention to the generosity of the donors, the Henry F. Michell Co., 1018 Market street, Philadelphia, who have presented several decidedly unusual prizes within the last few months.

EXTRA FINE BOXWOOD \$17.50 per CWT.

GALAX LEAVES GREEN \$1.00 per 1000.
BRONZE, new crop in a few days.

Headquarters for **HARDY FERNS, MOSS, LAUREL, PRINCESS PINE, FESTOONING, Etc.**

Best Ferns in Market \$1.25 per 1000.

See Our Cut Flower Ad.

HENRY M. ROBINSON & CO., FLORISTS' SUPPLIES 15 Province St., and 9 Chapman Pl., BOSTON

LOCAL AND FLORISTS' SHOWS.

The annual chrysanthemum show of the Livingston Seed Co., Columbus, O., was held November 5-9.

The Hingham (Mass.) Agricultural and Horticultural Society held a chrysanthemum show on Friday, November 1.

James A. Tefft's greenhouses at Peacedale, R. I., have presented an attractive variety of the popular chrysanthemums during the past week.

E. J. Finch, of Mishawaka, Ind., is making a display of the newer varieties of chrysanthemums at his greenhouses that is attracting much attention.

W. H. Buckbee, Rockford, Ill., invited the townspeople to enjoy his collection of chrysanthemums prior to their shipment to the St. Louis and Chicago shows.

Chrysanthemum day at the experiment farm, Burlington, Vt., was a revelation to many of the visitors and a gratifying evidence of the ability of the gardener, H. V. F. De Thestrup.

The exhibition at Lincoln Park, Chicago, opened on November 4 and will continue four weeks. Mr. Frey says that his collection of chrysanthemums this year surpasses any previous record.

E. P. Stannard, Westbrook, Conn., has opened his conservatories to the public and the visitors include many from a distance who find his handsome display of chrysanthemums well worth the trip.

The annual chrysanthemum show at the Missouri Botanical Garden, St. Louis, which opened on November 4, was held in a mammoth tent, and during the two weeks' exhibit the usual throngs have been present.

The Ernst Wienhoeber Co., of Chicago, who have taken the rooms over their store on Elm street for an exhibition of their large stock of florists' supplies, added a floral display on October 30 and invited the general public. The roses with which visitors to the Coliseum exhibition later became familiar were chiefly in evidence—Poehlmann Bros.' Mrs. Potter Palmer and Cardinal and Peter Reinberg's Mrs. Marshall Field. There was a large attendance, especially from the north shore.

Another one of the large willows in the Public Garden, Boston, was uprooted by the gale on November 6. An attempt is to be made to derrick it back into position, where it will be secured by steel guys.

NEWS NOTES.

D. G. Dagleash of Pittsburg will
hereafter be found with Geo. H. Cooke,
Washington, D. C.

A. P. Henderson, Centre Hanover,
Mass., has started in the hardy fern
business for the season.

The J. W. Lyon Company, Belvidere,
Ill., has changed its name to the Bel-
videre Plant and Floral Company.

F. L. Hotchkiss, florist and gardener
of Seymour, Conn., has purchased the
Stillson block at Ansonia as an invest-
ment.

C. B. Stow, Kingston, N. Y., not-
withstanding the recent fire, has kept
his place open during repairs which
are progressing as rapidly as possible.

Charles Greenwood, for many years
city forester, is prominently mentioned
for the vacancy on the parks commis-
sion of Worcester, Mass., caused by
the death of O. B. Hadwen.

Jas. J. Harty, for eight years a
clerk with Z. D. Blackstone, opened
a wholesale flower commission house
in Washington, D. C., on November
11th. Thus a long felt want will be
filled and we wish Mr. Harty every
success.

MAJOR BONNAFFONThe best all 'round Yellow Chrysanthemum. Strong stools,
\$5.00 per 100**W. W. EDGAR CO., Waverley, Mass.****To Make the Store Pay**

Every seasonable attraction to the stock of the retail florist has to be diligently sought for and attractively displayed.

WINDOW BOXES are in the minds of every householder at present.**Have You a Good Assortment of Suitable Plants to Show Customers?** If not, send at once to Samuel C. Moon, Morrisville, Bucks Co., Pa., for sample order. He furnishes**HARDY EVERGREENS** stocky little plants of Juniper, Thuja, Retinospora, etc., at \$15.00 per 100; \$2.00 per doz. **Send to-day.** You are losing business by every hour's delay.**SAMUEL C. MOON, MORRISVILLE, PENNA. BUCKS CO.,****FLOWER MARKET REPORTS**

BOSTON Conditions continue very unsatisfactory in this market, the receipts of flowers of all varieties and grades having increased rapidly and without any corresponding growth in the demand but rather a falling off, and the accumulation in wholesalers' hands is simply hopeless in its dimensions. There is one spark of life this week—the call for violets for the adornment of the Yale hosts in the football scrimmage on Saturday. Chrysanthemums are now in the zenith of their glory, but even the best of them realize only a humble price.

Nothing favorable can be reported for the past two weeks, as business throughout the city and surrounding country has practically been at a standstill. Stock of all kinds poured in on the wholesaler, with very little outlet. Reports from the trade claim that nothing is doing and therefore only what little is needed is taken and then at prices way below quotations. From Beauties down to lily of the valley the supply has been heavy. Chrysanthemums have not sold as rapidly as they should and select stock can be had at very low prices. The ordinary kinds block up considerably and are carried along from day to day. The same may be said of roses. Selects are not too plentiful but the coolers are overflowing with seconds and medium grades. Carnations are gaining in quantity daily and choice stock sells readily, but there are too many short stems. Violets have sold well. Lilies in heavy supply; demand light. The only article that is scarce is bronze galax.

Last week was not as flourishing as the one previous. Still we are far from having a glut even if the chrysanthemums do cause roses to accumulate somewhat. The retail price of violets has advanced; supply is more plentiful and quality is still improving. There is some great work in the decoration line in sight, one firm having already booked orders for large decorations. Among this week's florists' windows one display of a variety of orchids and another of wild smilax, cat-tleas and white cosmos were noticeable.

INDIANAPOLIS The volume of business is about up to the standard for the season, there being dull days and busy ones. Chrysanthemums fairly monopolize the market, bringing down the prices of other stock. The quality of all is excellent, the top grades being good enough to suit the most critical buyers. Fancy Easter lilies are arriving in good quantity. Carnations still remain a little scarce. Lily of the valley finds scarcely any demand and some elegant stock has found its way to the barrel. Some Roman hyacinths and narcissus are seen in small lots. Violets are selling well, but few coming in. Beauties and teas of excellent quality are in ample supply. The market for greens is in good condition. There is quite a trade in evergreens for window boxes as well as specimens in tubs.

NEW YORK Colder and more seasonable weather prevails and should reasonably bring about conditions more nearly normal in the cut flower market. Thus far, however, this much-to-be-desired condition has not put in an appearance. The unfortunate combination of chrysanthemum season, financial stringency and other drawbacks of minor importance has borne heavily on the wholesalers, who are at their wits' end to move the material which is poured in daily and at best they are unable to realize on the stock what the growers should reasonably count upon. The retail stores are finding things very dull, and their complaint is only less emphatic than that of the wholesalers. Many of the good buyers have not yet moved into town and others are practicing economy of the most rigid type.

PHILADELPHIA Far too many flowers arrived in this market last week for the demand. This was true not only of chrysanthemums but of roses, carnations and other staples. Stock had to be very fancy indeed to find a market at any price. Bonaffon, Eaton, Appleton, Chadwick and Golden Wedding were among the best selling chrysanthemums. Hudson River violets are plentiful. Mignonetti is improving and sells well. Evergreens for window boxes and vases, and cut boxwood find brisk markets. A hopeful tone prevails as the new week opens.

PACIFIC COAST NOTES.

Frank Mills of Palo Alto has opened a flower store in that town.

J. J. O'Connor, San Francisco, has removed to Fillmore street, near Hayes street.

The Las Palma Greenhouses, Flint & Flint, proprietors, D. W. Tuttle, manager, are also doing a retail business in Palo Alto.

The store recently opened by Miss Clack, of which HORTICULTURE gave early notice, was the first florist store in Palo Alto, but all report a fair trade.

E. W. McClellan & Co. have leased the Glenwood Nurseries at Burlingame for a term of years. They will run this place in connection with their nursery.

BUSINESS CHANGES.

M. Stauch has taken a position with Joy & Sons Co., Nashville, Tenn.

Frank Deery of Brockton is now with Julius A. Zinn, 2 Beacon street, Boston.

The Kroeber Greenhouses, New Bedford, Mass., are now carried on by Wm. Mosher.

L. Schroeder succeeds Schroeder & Myer, florists, dissolved, at South Holland, Ill.

John Melville and Frank Parkman, Jr., are starting in business at Green Bay, Wis.

E. A. Butler, florist, of Niagara Falls, N. J., fell from a tree recently and fractured his collar bone.

INCORPORATED.

Edlefsen-Leideger Co., Milwaukee, Wis.; Wm. Edlefsen, R. Leideger, A. R. Leideger; capital, \$15,000.

ROBERT J. DYSART,**Public Accountant and Auditor**

Simple methods of correct accounting especially adapted for florists' use.

OBITUARY.

August Loeber.

August Loeber, late traveling salesman for Arthur T. Boddington through the Southern and New England States, died Friday, November 8th, at the New York Hospital after a protracted illness of more than six months.

He caught cold last spring which developed into rheumatic fever, pneumonia, pleurisy and indocarditis of the heart from which last he never really recovered and which was the ultimate cause of his death.

Mr. Loeber was born in Holland twenty-six years ago and traveled in this country previous to serving Mr. Boddington for the Continental Bulb Company, Hillegom, and was most successful as a traveling representative. During the short time he traveled here he became thoroughly acquainted with American methods. He was a lovable man and was popular with all with whom he came in contact, bright, alert and a good friend, generous to a fault. He had no relations in this country, but many friends who will mourn his loss and sympathize with his parents in their sad bereavement. We laid him away in Kensico Cemetery.

H. A. B.

Dexter M. Ferry.

Dexter M. Ferry, founder and head of the world-renowned seed house of D. M. Ferry & Co., died suddenly on the morning of Nov. 11, of heart disease. He was born in Lowville, Lewis Co., N. Y., Aug. 8, 1833. When he was 16 years old he went to Detroit and worked as errand boy for a stationery house. In 1856 he was organizer and junior partner of the firm of M. T. Gardner & Co., seedsmen. This firm became D. M. Ferry & Co., in 1867. The original organizers were D. M. Ferry, H. W. White, C. C. Bowen, A. E. F. White. Mr. Ferry married Miss Addie E. Miller of Unadilla, Otsego Co., N. Y., Oct. 1, 1867. His wife died one year ago. He leaves a son, D. M. Ferry, Jr., and two daughters. He was president and director of several local banks and various manufacturing and charitable institutions. His untiring, straight-forward business manner and his unostentatious but ever-ready charity made him respected and beloved by all.

James H. Spencer.

James H. Spencer, of Warren, Mass., died on November 5 at the home of his daughter, Mrs. Fairbanks. He lived to the advanced age of 90, and until within three months was actively engaged in gardening.

James A. Danver.

James A. Danver, formerly a florist at Simsbury, Conn., died on November 1, aged 57.

Edwin S. Burnap.

Edwin S. Burnap, a well known market gardener of Fitchburg, Mass., died on November 7.

Adelia D. Ostertag.

Mrs. Adelia D., wife of Henry C. Ostertag, of St. Louis, Mo., died on November 3.

NEWS NOTES.

The Griswold Greenhouses, Ashtabula, O., have increased their capital stock from \$50,000 to \$100,000.

W. F. Ross, formerly with the F. R. Pierson Company, has been appointed superintendent for F. R. Chambers, Bronxville, N. Y.

Several owners of summer residences in Newport were heavy sufferers by reason of the recent panic in Wall street and elsewhere, with the result that gardeners' help is reduced in several instances.

Four plants of *Nephrolepis superbissima* were exhibited at Crystal Palace, London, on Tuesday of this week in charge of J. R. Fotheringham, who is now in England representing the F. R. Pierson Company.

The Lord & Burnham Company have put up two good houses, each 18x75 and a roomy potting shed for the Park Board of Minneapolis. The houses are now well stocked and will be of great help in raising the large amount of bedding plants annually required for the parks.

Orrigoni & Cavalluzzo have the contract for the planting of 2000 trees in eleven streets in the Bronx section of New York City, which must be completed by June 1, 1908. All their work is being done under the supervision of inspectors appointed by Samuel Parson, the city landscape gardener.

The trees will include American and English elms and lindens, ash, Norway maples, horse chestnuts and Oriental planes. Many of the elms and lindens, according to the contractors, will be imported, as trees which will meet the requirements of the contract are said to be hard to obtain in this country.

Extensive improvements are contemplated by Mr. Geo. Gordon King to his Newport estate, where Andrew Ramsay is gardener. E. L. Beard, formerly of Shady Hill Nurseries, is reported to have secured a contract to plant and otherwise improve the grounds of the Pembroke Jones estate on Bellevue avenue, Newport.

Park Supt Wirth of Minneapolis took the commissioners around last Saturday to inspect the new rose garden and the greenhouses. They expressed their appreciation of the thorough work that has been done and did not hesitate to appropriate money for grading around the greenhouses and for acquiring more machinery for the already pretty well equipped machine shop.

The plants in the Hodgson greenhouses at Newport, R. I., were sold at auction November 4th. There were some fairly good plants and a great many poor ones in the houses. The prices realized were low in the extreme, only about \$970 for everything—plants, pots, vases and fixtures. The greenhouses and cottage were sold to Mr. Spaulding for \$11,300, a very low price for such a property. Messrs. Spaulding & Hodgson intend to reopen the greenhouse in the spring.

?
Is Your Name In The Above List? If Not, Why Not?

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants. Yours very truly,
New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
GEO. A. SKENE.

Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons. Yours truly,
Florham Farms, Madison, N. J., December 8, 1906.
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

ANDREW WILSON, Dept. 8,

SUMMIT, N. J.

Selling Agents for New England, R. & J. FARQUHAR & CO., 6 and 7 South Market St., Boston, Mass.

GREENHOUSES BUILDING OR CON-TEMPLATED.

N. Abington, Mass.—A. S. Reed, one house.

Plum Run, O.—Workman Bros., one house.

E. Oceanic, N. J.—Wm. Mears, house 22 x 217.

Milwaukee, Wis.—G. N. Pohl, range of houses.

Washington, D. C.—Robt. Bowdler, one house.

Northampton, Mass.—G. A. Parsons, one house.

Des Moines, Ia.—Iowa Seed Co., 185 ft. addition.

Slingerlands, N. Y.—Fred Goldring, three houses.

Oberlin, O.—H. A. Cook, vegetable house, 32 x 60.

Bellows Falls, Vt.—G. A. Halliday, house 12 x 40.

N. Beverly, Mass.—A. Kidder, cucumber house.

Green Bay, Wis.—Melville & Parkman, one house.

Milton, Mass.—The Misses Brooks, range of houses.

Rockford, Ill.—W. C. Sadewater, range of houses.

Danielson, Conn.—Franklin & Crosby, house 72x168.

Rockland, Mass.—W. T. Wilson, house 100 ft. long.

Jefferson City, Mo.—Jefferson Floral Co., range of houses.

Utica, N. Y.—Frank McGowan, two houses; W. A. Rowlands, one house.

Bar Harbor, Me.—John I. Kane, conservatory; John J. Emery, conservatory.

R. Vincent, Jr., & Sons, White Marsh, Md. have completed an extensive range of houses, in which no paint has been used for outside or interior wood surface. The wood has all been dipped in creosote and is expected to last for many years without further attention. Twenty minutes' immersion was found to be sufficient time for the preservative to penetrate deep into the wood. The saving by this process over even the first cost of painting is considerable.

Standard Flower POTS

New Rose—MRS. JARDINE

Every florist who plants a rose for winter forcing wants at least six qualities.

1. A free strong growth, with good foliage.
2. A variety that can be easily grown.
3. Large flowers on long stems.
4. Delicious fragrance.
5. Distinct pleasing color that will sell at sight.
6. A Rose that will hold its color in the dull days of January.

MRS. JARDINE has all these characteristics, and in addition is of so perfect a form that it can be used either in the bud or half expanded flower. (See illustration, first page Cover "Horticulture" Nov. 2.) The color is bright rosy pink, shading in the outer petals to salmon pink, and even in January when Bridesmaid and Killarney lose their color, Mrs. Jardine is as bright as in October or March.

Mrs. Jardine is not a chance seedling, but was raised by Messrs. Alexander Dickson & Sons, Newtownards, Ireland. This firm has not only given us Liberty and Killarney, but has sent out more new Roses of merit than any other Rosarians in the world. Over two years ago we spent three weeks in their trial grounds, and from three thousand seedlings we selected thirty-five varieties that we thought would be successful in this country for winter

forcing. After testing these for two years, we have selected one — MRS. JARDINE — which has with us, and which we think will with all good rose growers, fulfil all the qualities as stated above.

We extend a cordial invitation to every one interested in this New Rose to visit our Nurseries, and see it growing. We have it in both own roots and grafted plants, and in all stages of growth. As the demand for this superb novelty will be very large, kindly place your orders early, as we fill in rotation in March, 1908.

Strong plants on own roots from 2 1-2 inch pots, \$6.00 per dozen; \$30 per 100; \$250 per 1000.

Crafted plants on Dicksons' Manetti Stocks \$5 per 100 additional.

Ornamental Berried Plants

At this season of the year when Nature's purposes are fully realized in the production of the various forms of fruits, we can appreciate in a measure the great possibilities in ornamental landscape work which many of these fruiting trees and shrubs afford. Among the groups of trees and shrubs valued for their ornamental fruits none is more rich in them than the rosaceous section, to which belong the crabs, thorns and roses, all of which families contain many beautiful fruiting species as *Pyrus baccata* and *P. Aucuparia* or "mountain ash" whose brightly colored fruits from August on are a well-known feature. Several of the "thorns" are at this date (Oct. 20th,) in the height of beauty, conspicuous among them being the American white thorn *Crataegus coccinea* and *C. crus-galli*, whose clusters of showy fruits are such an attraction for our feathered friends.

Of the genus *Rosa* none is more decorative I think than the exotic species *rugosa* whose large berries at this time show up to such good advantage among the still beautiful green foliage. Some of the native species, too, though not so fine as *rugosa* afford, however, a very pleasing fruit display.

Cotoneaster Simonsi and *C. horizontalis*, also kindred to the foregoing are most attractive little shrubs at the present time, both bearing small, red berries in quantity, while the dark green leaves lead one to think them evergreen, which is true of them in a milder climate. The latter species is especially attractive when seen trailing over the surface of a rock.

Many of the *viburnums* figure highly in their fruit display and come in for a fair share of attention from planters. With the various forms at our disposal, bold grouping is made easy and a prolonged effect procured. One species which has interested the writer more than any other this fall is *Viburnum Wrightii* whose beautiful corymbs of firm, red berries show up with much distinctness against the green leaves. This and the old-time favorite *V. opulus* make a worthy pair.

Another shrub which never fails to attract attention wherever planted is *Prinos verticillatus*, well named "deciduous holly"; one cannot but wish it was evergreen for then it would vie with the famous English holly, but nature has ordained otherwise and it is better so perhaps, for, were it clothed as the holly its berries which are clustered closely around the stem would be far less conspicuous than is now the case. *Photinia villosa* is another admirable plant for fall beauty, resembling somewhat the *prinos* but ripening its berries later in the season.

A plant rarely met with in this country, due probably to it being hard to propagate except by seed, or to the idea that it is not strictly hardy except around the coast, is *Hippophae rhamnoides* or "Lea Buckthorn." This plant (the female) produces orange-colored berries in great abundance; it is dioecious and requires the planting of both sexes in close proximity to produce the crop of berries. Native of Britain, it is often seen in

shrub collections there, and its fruit is so persistent as to make it invaluable for winter effects.

The European "Burning Bush," *Euonymus Europæus*, or "spindle tree," is a plant worthy of a wider use in shrubbery plantings. It is more showy than our native *E. atropurpureus*, the carpels as a rule being larger and when in due time these open exposing the orange-colored seeds the effect is extremely pretty.

The white and red-fruited forms of *symphoricarpus* are never slighted when it comes to large plantings which can also be said of the several kinds of *berberis* all of which are very decorative when massed for the sake of their berried display when the landscape is desolate of flowers. While the flowers of many of the berried plants are insignificant, yet to him who knows his plants those inconspicuous floral envelopes signify a harvest of color in due time and the result is never disappointing.

Edwin Matthews.

Dracaena Victoriae

This fine stove plant has stood the usual tests, and deservedly ranks as one of the best novelties introduced in recent years. It belongs to the *Fragrans* section, and closely resembles the well-known *Lindenii* in habit. It is quite distinct in color however; the dark green band is finely striped, and confined to the centre of the leaves, the ground color being a clear gold which turns milk white with age; it must be seen as a specimen to be rightly valued. There are several large plants at Kew some 10 to 12 ft. high, clothed down to the pot with foliage, a somewhat unusual sight with specimen *dracaenas* nowadays. Of course, it is not a table plant being too heavy as a small plant, but as a bold decorative plant it is hard to beat and a few specimens will give great distinction to any stove and greenhouse group of mixed plants.

All this section may be grown with advantage in the intermediate house, though *Victoriæ* must be kept warm in winter, as a damp cold will leave unsightly spots on the beautiful yellow ground which, lacking in green pigment, has little resisting power. A little shade may be given on very bright days, otherwise they enjoy as much light as possible. Keep water off the foliage as it runs down the centres. They should not be overpotted but like all *dracaenas* they abhor sour soil and should be shaken out carefully and repotted at least once annually. Propagate large tops by mossing; the large stem will continue to make quantities of suitable cuttings for many years to come. Unlike the *terminalis* section the varieties of *fragrans* do not form toe roots for propagating and as a result *Victoriæ* is by no means plentiful and small plants are still expensive but as a novelty it is worth securing. It always attracts attention and as a fine foliage plant has an assured future.

Art in flower and plant composition

Our observations in last week's issue, on the arrangement of decorative plant groups at exhibitions and elsewhere, have called forth some considerable comment, mainly in approval. Florists and gardeners who are nature-lovers are ready to acknowledge the unsatisfying artistic quality, the incongruity and lack of unity of expression in the plant compositions usually seen and would welcome examples or instructive suggestion on lines of

improvement and there is no doubt that intense public and professional interest would attach to any well directed effort to bring out competition on purely artistic and consistent lines at any of the larger shows. To accomplish fully their educational intent a statement of the effect sought and the rules followed should accompany each group, in such shape as to be available for use in the public press and the judges' report should plainly state the basis on which their awards were made. The Society of American Florists might wisely provide for such a class in the great national flower show to be held a year hence. As an incentive to genius nothing more inviting could possibly be presented and our florists as well as those who employ them would have the advantage of an impressive object lesson which would tend to a better discernment of what is really beautiful and fit.

A wise precaution

In periods of business uncertainty and apprehension such as the present he is a happy business man who, because of habits of close attention to accounts and conservative management, is able to say that he knows the actual condition of his affairs and feels secure against any possible adverse financial contingency. There are, in the florist and nursery trade, many concerns that are in a position to make such a statement but we have reason to know that there are also many who are not—many who have never in their mercantile career known what it was to have a properly balanced set of books, whose buying and selling and all other industrial operations are conducted in haphazard manner and who have no means of knowing to a certainty at any time whether their business is being carried on at a profit or at a loss. The present emergency points a moral for such and the time is opportune for making a complete inventory of resources and liabilities and an audit of every record bearing upon same so that the true trend of the business and actual condition of affairs may be known absolutely now and hereafter. Without these facts being available at any and all times, complete control of one's affairs is an impossibility and trouble may come at any time "as a thief in the night." If your business is good for anything it is worth this vigilant attention and, when you get down to a statement of actual conditions, possibly you may find some eye-openers.

The gardener's opportunity

The landscape class of the Gardeners' and Florists' Club of Boston is about to begin the course of study for the season with a somewhat smaller number of students than were in attendance last year. It is difficult to understand why the advantages of this movement are not more fully appreciated by those for whose direct benefit it has been inaugurated. Every gardener should read Loudon's arraignment of the gardeners of his day for their incapacity in landscape designing and if it does not stir him up to take full advantage of such opportunities as are now at his disposal for strengthening his weak points and developing his faculties he has nobody to blame but himself if he never gets beyond the wheelbarrow stage. Loudon wrote:

"It has often struck us with surprise that the proprietors of the finest residences in England, noblemen and gentlemen of high education and refined taste in other things, possessing collections of the finest pictures, and whose eyes must consequently be familiar with all that is noble and beautiful in landscape, should yet commit the laying out of their grounds to their gardeners;..... forgetting that the life of the gardener has been devoted to the study of the culture of plants and not to that of the

composition of forms, and their effect in landscape scenery. Hence it is that many of the most beautiful places in England are at this moment disfigured, etc."

There are plenty of writers today ready to voice the same sentiments. Is the gardener by his indifference going to tacitly subscribe to their truth? There are others who believe the true gardener to be better fitted for practical landscape work than either painter or architect. They have backed up their faith in the most philanthropic manner by establishing these landscape classes, and it is to be hoped that the response may be a hearty one.

British Horticulture

A NOTED ORCHIDIST.

An attractive feature at the fortnightly meeting this week of the Royal Horticultural Society was the magnificent collection of orchids staged by Major G. L. Holford, who was awarded the Society's gold medal, and the gold Lindley medal, the latter in recognition of the superb collection of the plants. For some years Major Holford has had an extensive and valuable collection of orchids at his country seat at Westonbirt, near Tetbury, in Gloucestershire. Here are to be seen a number of awards obtained in recent years, including the Veitchian cup at the Temple show in May this year and many other honors. The Westonbirt collection includes many exquisite specimens of the attractive *Odontoglossum crispum*, and of the best hybrid cattlevas, *laelias*, *laelio-cattleyas*, *sobralias*, and *cymbidiums*. The visitor is bound to admire a very fine *laelio-cattleya elegans*, with 232 blooms which received a silver-gilt Lindley medal from the Royal Horticultural Society for exceptional culture. Mr. H. Alexander, Major Holford's grower has good reason to be proud of it.

BLACK CURRANT MITE.

Some useful experiments have been carried out by Mr. Geo. Massee at The Royal Horticultural Society's gardens at Wisley, with a view to discovering some method of getting rid of the Black Currant Mite. It appears that strips of black paper, coated with a thin layer of vaseline were tied round the main stem and branches at various points of a badly infected bush. The experiment was repeated on a larger scale with cart-grease, palm oil, dripping, and thinned gas tar, as well as with the more expensive vaseline. Mr. Massee records that in every instance the method employed proved a success. A good crop was produced, and the greatest number of big buds found on any one bush after one year's treatment was seven, not a single diseased bud being met with after the second year's treatment. The branch to be treated is held by the tip and a brush, loaded with grease, is rubbed up one side, down the other, taking care to hit the big buds, which need not be removed. This should be done early in the season before the young buds begin to expand, and perhaps again at the end of April. Forty-eight bushes can be easily treated in ten hours. Mr. Massee estimates it to cost about 2d a bush.

NEW CHRYSANTHEMUMS.

The Floral Committee of the National Chrysanthemum Society have recently made a number of awards to new varieties. H. J. Jones, who has put a number of useful varieties on the market, has a new Japanese incurved variety, "H. J. Jones, 1908," which is described as a rich brass-yellow flower; the petals are long and broad. A first-class certificate has been awarded.

A similar award has been obtained by Mr. Jones for Mrs. Wakefield, a typical market bloom of a deep rose tint. Messrs. W. Wells & Co., received a first-class certificate for Mrs. L. Thorne, rich canary yellow with paler reverse; and commendations for Lilian Coppard, bright chestnut with golden reverse; Bouquet Rose, deep rose; Mrs. Earle, creamy white with a yellow disc; Ethel Blades, crimson. P. Ladds, received a first-class certificate for Esmes Reed, a white sport from Mrs. Wingfield, a pink market variety. The Royal Horticultural Society at their meeting this week, granted awards of merit to the following new varieties: Clara Vernum, a rich crimson and gold decorative variety, Clara Wells, an incurved bloom of a creamy tint (shown by Messrs. Wells & Co.); F. W. Lever, Jap. a good white with broad petals, (shown by H. J. Jones); Mrs. G. F. Coster, a golden bronze, similar to Bessie Godfrey; Splendour, a large Japanese incurved, the reverse old-gold, the front side crimson (shown by Martin Silsbury); Romance, bright yellow incurved, (shown by W. J. Godfrey).

W. J. H. Adsett.

Campanulas

(See Frontispiece.)

The campanula although an old-timer, is one of the most useful and decorative of hardy plants. A genus of over three hundred species, it contains annuals, biennials and perennials.

The most popular of these plants is *Campanula Medium*, better known as Canterbury Bell. We all know the beautiful display which can be made with a bed of blue, white, pink or mixed Canterbury Bells out of doors in spring; an equal display can be had for conservatory decoration and the flowers are much better for cutting than many of the annuals we now see grown under glass.

Many of the trailing varieties can be used to advantage for baskets and in the front row of the benches with pleasing effect. The varieties suited for this work are *Campanula isophylla*, *C. i. alba*, *C. i. Mayii*,—the last named of recent introduction, with large blue flowers and woolly foliage,—*C. garganica*, *C. g. alba*, *C. g. hirsuta* and *C. g. h. alba*. These are all rather scarce but can be secured.

Most of the campanulas are admirably adapted for the herbaceous border and with so many species varying in habit they are among the most important of hardy border plants. The most serviceable for cutting, in the perennial section, are *Campanula Moerhemii*, *C. Backhousiana*, *C. latifolia*, *C. laciniata*, *C. glomerata* and *C. rhomboidea*.

Many of the dwarf kinds are particularly attractive and interesting and are suited for the front of the border and the rockery. *Campanula Hendersoni* is the largest of the turbine-flowered. If cultivation is thoroughly attended to these plants will grow vigorously in any ordinary garden soil. Many of them are recommended to be increased only by cuttings or division, unless particular care is taken with the hybridizing.

David Miller

NEWS OF THE CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The annual meeting for election of officers was held on Tuesday evening, November 19, over two hundred members being in attendance. The balloting resulted in the re-election of President Thos. H. Westwood, Secretary W. N. Craig and Treasurer Edward Hatch. Wm. Downs was elected vice-president and Messrs. J. K. M. L. Farquhar, Robert Cameron, Peter Miller and E. Johansson, executive committee.

Chairman F. E. Palmer reported for the special committee on boiler legislation, that in accordance with the committee's recommendation, boilers used for horticultural purposes exclusively had been exempted from the provisions of the boiler inspection and licensed fireman law passed by the Massachusetts legislature. Mr. Farquhar announced that the landscape study classes would start on Tuesday evening, December 3rd, at Horticultural Hall, and would meet twice a week for about thirty evenings. Mr. Howard, the instructor, stated that several field days for outdoor practice in the operations taught in the class room would be included. It was announced that the club would hold a field day at Framingham, on December 14, on invitation of S. J. Goddard, Wm. Nicholson and J. T. Butterfield to visit their greenhouses. F. E. Palmer gave notice of a proposed amendment to the by-laws, providing for the nomination of officers from the floor at the November meeting and election to take place at the December meeting.

On the exhibition table were the following: Four vases of carnations from M. A. Patten, to two of which—No 133 and No. 50-24, both crimsons—honorable mention was given; Boston violet from Wm. Sim, which received a report of superior merit, and *Oncidium ornithorhyncum* from James Cartwright.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual meeting of the society was held at Horticultural Hall, Boston, on Nov. 16. President Weld announced that the trustees had allotted \$6,700 in prizes and premiums next year, an increase of \$1,200 over the previous year. William H. Spooner, Horticultural Society representative on the Board of Agriculture, called attention to the annual meeting of the board, which will be held in Horticultural Hall, Dec. 3, 4 and 5. Dr. Augustus Henry, a famous botanist and Chinese traveller and professor of forestry in the University of Cambridge, who is also connected with the Arnold Arboretum, was elected a corresponding member. The following officers were elected unanimously:

President, Stephen M. Weld; vice-president (for two years), Walter Hunnewell; trustees (for three years), Walter C. Baylies, Charles W. Parker, John A. Pettigrew, William Whitman; nominating committee, William H. Bowker, John W. Duncan, J. Henry Fletcher, David F. Roy, Wilfrid Wheeler.

NATIONAL FLOWER SHOW.

The S. A. F. committee of fifty under chairmanship of W. F. Kasting met in Chicago on November 8. Subcommittees were appointed as follows: "American Exhibits," chairman, Philip Breitmeyer, Detroit, Mich.; "Foreign Exhibits," E. G. Hill, Richmond, Ind.; "Premium List," W. N. Rudd, Mt. Greenwood, Ill.; "Advertising and Publicity," P. J. Hauswirth, Chicago; "Local Management Privileges and Concessions," J. C. Vaughan, Chicago; "Special Features," Otto Koenig, St. Louis, Mo.; "Reception," August Poehlmann, Chicago; "Auditing," J. A. Valentine, Denver, Col. I. C. Bertermann, Indianapolis, Ind., was chosen treasurer.

The national rose, carnation and chrysanthemum societies will be invited to co-operate and suggest judges for their respective departments. Horticultural societies at home and abroad will be invited to participate. The date of the exhibition was fixed for November 6-15, inclusive. Guarantors will be requested to meet a 20 per cent. assessment on or before December 10.

NEW ORLEANS HORTICULTURAL SOCIETY.

At the meeting of the above named society on Nov. 14, it was decided that at the next regular meeting the question of a chrysanthemum show for 1938 would be special order of business. This meeting was called a week earlier than usual for chrysanthemum reasons and exhibitors were requested to discuss their individual exhibits. C. R. Panter presented a sport of V. H. Hallock which had been grown for the past five years by its originator, Fred Dormoy for whom it is named. It has all the characteristics of the parent plant with the exception of color which is a combination of buff, straw, and salmon.

Metairie Ridge Nursery Co. exhibited some fine chrysanthemums, American Beauty roses, etc.. C. W. Eichling, B. M. Wichers, J. St. Ward and M. M. Laponyade also contributed.

SCRANTON (PA.) FLORISTS' CLUB.

At the monthly meeting of the S. F. C. on Nov. 7 there were noteworthy exhibits by John E. Haines, Nathan Smith & Son and J. D. Cockroft, all of whom received special commendation. Among other displays T. B. McClintock had attractive design work; Wm. McDonald, chrysanthemums; I. G. Mawr, carnations; J. L. Dillon, floral basket.

New officers were elected as follows: President, Edgar McConnell; vice-president, William Clark; secretary, T. B. McClintock; assistant-secretary, Mrs. T. B. McClintock; treasurer, William McDonald; trustees, D. D. Schultheis, J. Rodham, J. L. Hill, W. McDonald and B. E. Cokely.

A set of silver knives and forks was presented to Mrs. McClintock, who has for three years served as assistant secretary.

ST. LOUIS HORTICULTURAL SOCIETY.

On Wednesday night, Nov. 13th, the Horticultural Society entertained the visitors at a banquet in one of the large rooms in the show building. All the visitors responded and the executive committee of the society. F. W. Brockman was chosen toastmaster. He called for speeches from Harry Young chairman of the executive committee, P. J. Hauswirth, Leonard Kill, J. S. Wilson, E. H. Mann, W. A. Manda, H. W. Buckbee, August Poehlmann, A. G. Koenig, F. H. Meinhardt and others.

ST. LOUIS FLORIST CLUB.

On Thursday afternoon, November 14th, the St. Louis Florist Club extended an invitation to all visiting florists to meet with them at their regular monthly meeting. President W. C. Young presided. 35 members and ten visitors were present and took great interest in the proceedings, especially the questions that came up for answers. After the meeting adjourned the entire party were taken in hand by the trustees to a cafe in the building for supper, after which President Young called on the visitors for a few remarks. The speakers were Phil. J. Hauswirth, W. W. Coles, George Asmus, S. S. Skidelsky, J. J. Karins, Emil Schray, J. F. Ammann, F. H. Weber, A. J. Bentzen.

BLOOMINGTON FLORIST CLUB.

The Bloomington, Ill., Florist Club held their November meeting at A. Washburn & Son's store on the evening of Nov. 14. There was a good attendance. There were several good talks about chrysanthemums. F. L. Washburn read a paper on varieties, also some notes of the Chicago flower show.

Prof. Beal of the University of Illinois talked about insects and the various diseases of the chrysanthemum. Prof. Beal will be in Bloomington a part of the season experimenting with insects and diseases that trouble the florist, and we expect to have him in our midst at most of our meetings.

V. RAY SMOCK, Sec'y.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Work of Committees.

Cincinnati, Nov. 16th, Miss Sadie Stremmer, light yellow, sport of Queen, exhibited by T. L. Metcalf, Hopkinsville, Ky., scored 72 points, commercial scale.

Philadelphia, Pa., Nov. 16th, Lynwood Hall, white, Jap. Incurved, exhibited by Wm. Klienheinz, Ogontz, Pa., scored 89 points commercial and 86 points exhibition scale.

DAVID FRASER, Sec'y.

A CORRECTION.

Frank E. Witney calls our attention to the fact that the first prize for table decoration at the Poughkeepsie exhibition was won by Winthrop Sargent, and not by the Salford Flower Shop as given in our issue of last week and that the latter won second prize.

THE EXHIBITION SEASON

EXHIBITION OF THE WASHINGTON FLORISTS' CLUB.

Nov. 12 will always remain a red-letter day in the calendar of the flower-loving Washington public. At 2 P. M. on that day the doors of the National Rifles Armory opened upon a three-days' exhibit of plants and cut flowers, the annual exhibit of the W. F. C. Both floors of the Armory showed a scene of great beauty.

On the first floor everywhere were immense palms, dracaenas, crotons, ferns, orchids, etc., while dozens of sweet-toned canaries mingled their notes with those of a seven-piece orchestra. One entire length of the room was given to the exhibits of the Agriculture Department and Botanical Gardens. A plant of Venus Flytrap and a group of single flowered chrysanthemums furnished by the latter attracted much attention. The Agriculture Department received special certificate for group of pompon chrysanthemums and special mention for group of decorative plants.

Among the most beautiful attractions on the floor were the three tables and mantels decorated by Blackistone, Cooke and Shaffer. The napery and silver were furnished by the courtesy of Chas. Rauscher, and the decorations were changed each day. These were not in competition. In addition, Blackistone showed an exquisite bride's shower bouquet of Bride roses and white bouvardia, also a beautiful autumn basket of single stem chrysanthemums in autumn shades, ribbon streamers and autumn leaves, the handle topped by an immense hornet's nest (nothing in it). Geo. Shaffer also showed two lovely shower bouquets, one for the bride, of lily of the valley and orchids, the other for the bridesmaid, of Bridesmaid roses. He also exhibited large vases of Eaton chrysanthemums and Richmond roses. Geo. Cooke showed a magnificent vase of American Beauty roses, banked by decorative plants. None of the above mentioned were in competition.

The table of new seedling roses was also a special centre of attraction. John Cook of Baltimore received 1st (no scoring) on 6 blooms of new rose never exhibited in this country before. For best 25 blooms not in commerce he scored 86 points. Robt. Scott & Son scored 81 points on Mrs. Jardine, and E. G. Hill & Co. 79 points on Princess. Peter Bisset also displayed several of his new seedling roses, including "Rosalie."

David Geillboetzer took 1st on 25 Bride, ditto Bridesmaid, ditto Golden Gate, also special prize on 100 Killarney. C. A. Shaffer & Co. 1st on 25 Richmond and 2d on Bride. A. B. Garden took 2nd prize on 25 Ivory. C. A. Shaffer & Co. also took 1st on 50 Enchantress carnations. John E. Haines 1st on 50 Imperial and 1st on 50 Pink Imperial. On violets, David Bisset took 1st on Farquhar, and Theo. Diedrich 2nd on Dorsett.

On the second floor the orchestra was ensconced behind the magnificent display by Mrs. Gardiner G. Hubbard, which occupied the entire stage. The

room at the head of the stairs was given up to F. H. Kramer's display of Queen Beatrice rose banked in maidenhair ferns. A handsome mirror was similarly decorated. Another corner was filled with chrysanthemum pot plants, while southern smilax was gracefully festooned around the entire room. A large Chinese pagoda occupied the entire centre of the main upper hall. This was the Gude exhibit; it was banked from floor to ceiling with large single stem chrysanthemums and maidenhair ferns, and lighted by two hundred electric lights. Thanks are due to Edw. Schmid for twenty-one handsomely caged canaries, which added greatly to the scenic effect. One was suspended from each post of the pagoda, and they gave abundant evidence of thoroughly enjoying the situation. Mrs. Gardiner Hubbard's display was magnificent. Towering palms, bananas and ficus furnished the background, while cut flowers and adiantum banked the front. Mrs. Hubbard, for whom Peter Bisset is gardener, took 1st on 25 Killarney roses, 1st on 25 Enchantress, 1st on 25 Lawson, Harlowarden, Rob't Craig, specimen palm, specimen decorative plant (*Alsophila Australis*), group of palms and special mention on collection of single chrysanthemums. Other handsome exhibits of decorative plants occupying the four corners of the exhibit space were furnished by Messrs. Freeman, Cooke, Blackistone and Shaffer. Facing the stage was Geo. Field's exhibit of orchids, said by a competent judge to be the best display ever offered to the Washington public. The beautiful exhibit of Mrs. Leiter, Sam'l Simmonds, gardener, included a fine display of Lorraine begonias, and Begonia Rex. She received first prize on these, and on collection of ferns.

There were large displays of show chrysanthemums from Nathan Smith & Son, E. G. Hill Company, and R. Vincent, Jr., & Sons of White Marsh, Md., the latter showing pompons, their specialty. Ley & Bickings showed *Adiantum hybridum* and chrysanthemums. Wm. Kleinheinz of Ogontz, Pa., sent twelve flowers of his new chrysanthemum, Lynwood Hall.

The out-of-town members of awards committee were F. C. Bauer, Chas. Siebold and Isaac Moss, all of Baltimore. On the local awards committee were Geo. Field, chairman; Jos. Freeman, Jr., Wm. Clarke, Chas. McCauley and John Robertson.

There was a special meeting of the club on Saturday night, Nov. 16th, to wind up unfinished show business. A suggestion from a member that another exhibit be given in the fall of 1908 was enthusiastically received.

ST. LOUIS FLOWER SHOW.

The St. Louis flower show opened last Tuesday noon. This exhibition was given by the St. Louis Horticultural Society and their efforts were crowned with success as far as the exhibition was concerned. The hall in which the show was held is spacious and fine, but the location unfavorable for a large attendance.

The entries in all classes were extensive and really fine. The made-up work in mantels, tables, baskets and special designs attracted a great deal of attention; also the grand display of cut blooms in carnations, roses and chrysanthemums. The management deserves great credit for the manner of arranging the hall for the displays.

The society entertained all the visiting florists at a banquet on Wednesday night at the hall, and on the same evening the ladies of the society entertained the visiting ladies with a theatre party. Then on Thursday afternoon the St. Louis Florists' Club entertained all the visitors with a Dutch lunch in their meeting hall. So the first fall flower show of the society will go down as a great social success. The weather was exceedingly fine throughout the week, clear and cold.

The judges placed the prizes for the first day as follows:

Cut chrysanthemums: Forty-eight blooms, eight varieties, six blooms in each vase. 1st, E. G. Hill Co.; 2d, H. W. Buckbee; 3d, Poehlmann Bros. Co. Fifty blooms arranged for effect. 1st, H. W. Buckbee with Guy Hamilton; 2d, Poehlmann Bros. Co. with Yellow Eaton; 3d, Himmer Bros. with Major Bonaffon.

Carnations: One hundred blooms of any variety. 1st, E. G. Hill Co. with Afterglow; 2d, Poehlmann Bros. Co. with Perfection; 3d, Chicago Carnation Co. with Aristocrat. Ten vases, ten varieties, twenty-five blooms in each vase. 1st, Chicago Carnation Co. with Winsor, Enchantress, Aristocrat, Daybreak Lawson, White Perfection, Red Chief, Rose Pink Enchantress, Beacon, Welcome and White Enchantress; 2d, H. W. Buckbee; 3d, Poehlmann Bros. Co.

Roses: Six vases, six varieties, twenty-five blooms in each vase, American Beauty excluded. Poehlmann Bros., 1st; Peter Reinberg, 2d. Fifty American Beauties; Poehlmann Bros., 1st; Peter Reinberg, 2d; F. H. Weber, 3d.

Henry Shaw premiums for decorative plants. Palms, etc., Wm. Schray & Sons, 1st; Sanders' Nursery, 2d; C. Young & Sons Co., 3d. Begonias, J. A. Peterson 1st, Bentzen Floral Co. 2d. Berried Plants, Koenig Floral Co. 1st, Vaughan's Seed Store 2d, Wm. Schray & Sons 3d. Cacti, A. G. Greiner 1st. Twenty-five blooming plants, eight or more varieties, chrysanthemums excluded, Wm. Schray & Son 1st, Bentzen Floral Co. 2d. Geraniums in bloom, Wm. Brucker 1st, Koenig Floral Co. 2d, Bentzen Floral Co. 3d. Specimen palm, fern or decorative plant, Sanders' Nursery 1st, Koenig Floral Co. 2d, C. Young & Sons Co. 3d. Blooming plants, chrysanthemums excluded, J. A. Peterson 1st, Koenig Floral Co. 2d. Group of variegated foliage plants, Wm. Schray & Sons 1st, Sanders' Nursery 2d.

Group of chrysanthemum plants occupying 50 square feet. Koenig Floral Co. 1st, Wm. Brucker 2d, Sanders' Nursery 3d.

Chrysanthemum plants grown to single stem and flower. Vaughan's Seed

Store 1st, C. Young & Sons Co. 2nd. Messrs. Vaughan, Sanders, Koenig and Buckbee were variously awarded the premiums in the remaining chrysanthemum plant classes.

The Henry Shaw medal went to W. A. Manda for *Dracaena Mandaiana*, the S. A. F. medal went to the E. G. Hill Co. for rose *Rhea Reid*.

The Second Day's Awards.

Cut chrysanthemums. Twenty-five white, one variety, E. G. Hill Co., 1st, with T. Eaton, Poehlmann Bros., 2d, T. Eaton, H. W. Buckbee, 3d, Mrs. Jerome Jones. Yellow, E. G. Hill Co. 1st, with Yellow Eaton, Nathan Smith & Sons 2d, and H. W. Buckbee 3d, both Col. Appleton. Twenty-five pink, H. W. Buckbee 1st, with Dr. Enguehard, E. G. Hill Co. 2d, A. J. Balfour. Twenty-five any other color, E. G. Hill Co. 1st, with Amateur Conseil, N. Smith & Sons 2d, with T. Carrington, H. W. Buckbee 3d, with W. R. Church. Fifty not less than 20 varieties, moss banks, E. G. Hill Co. 1st, H. W. Buckbee, 2d, N. Smith & Sons 3d. Pompons, E. G. Hill Co. 1st, Koenig Floral Co. 2d.

Carnations. Fifty white, Poehlmann Bros. 1st, with White Perfection, E. G. Hill Co. 2d, with White Enchantress. Fifty light pink, H. W. Buckbee 1st, Enchantress, E. G. Hill 2d, and Poehlmann Bros. 3d, both with Rose Pink Enchantress. Fifty dark pink, E. G. Hill Co. 1st, Afterglow, Chicago Carnation Co. 2d, Aristocrat, H. W. Buckbee 3d, Mrs. T. W. Lawson. Fifty red, Poehlmann Bros. 1st, with Beacon, H. W. Buckbee 2d, Red Lawson. Fifty variegated, Peter Weiland 1st, with Mrs. M. A. Patten.

Cut Roses. One hundred Richmond arranged for effect, F. C. Weber 1st, Poehlmann Bros. 2d, F. H. Weber 3d.

Handle Basket. F. C. Weber 1st, made with good effect of Chateau roses, C. Young & Sons Co. 2d, made of Killarney roses, Theo Miller 3d, with Bride roses.

The table decorations were all of extra quality of cut stock, all yellow chrysanthemums and were hard to judge. The judges finally decided on F. C. Weber 1st, F. H. Weber 2d, C. C. Sanders 3d. These were the great attraction and the visiting ladies surrounded them the entire day.

Bassett & Washburn exhibited their fine new red carnation, Orland P. Bassett.

Third Day Awards.

Cut roses. Fifty Richmond, Peter Reinberg 1st. Fifty Brides, Weiland & Olinger 1st, Peter Reinberg 2d. Fifty Bridesmaids the same. Fifty any other variety, American Beauty excluded. P. Reinberg 1st, with Mrs. Marshall Field, Weiland & Olinger 2d, with Chateau. Fifty American Beauty arranged for effect, accessories admissible, F. C. Weber 1st, F. H. Meinhardt 2d. Violets, C. Young & Sons Co. 1st, F. C. Weber 2d. Bridal bouquets, Fred C. Weber 1st Young's 2d.

On Friday, the last day, no prizes were offered and previous exhibits held over. Special exhibits on Friday were carnation Sarah A. Hill, Lawson and Enchantress by B. K. & B. Floral Co., Afterglow and Snowdrift by R. Witterstaetter, American Beauty, Bride, Killarney and the sensational new rose, W. R. Smith, by Heller Bros.

The judges were Phil. J. Hauswirth, W. W. Coles and Andrew Meyer, Sr.

SOCIETY OF INDIANA FLORISTS.

The annual state competitive exhibition under the auspices of the Society of Indiana Florists, was held Nov. 13 and 14 at A. Wiegand & Sons' Conservatories. The many entries from all parts of the state, as well as the adjoining states, brought out many new varieties in chrysanthemums, roses and carnations. Awards were pretty evenly divided between the concerns mentioned under the respective classes: Chrysanthemums.—E. G. Hill & Co., Baur & Smith, W. A. Bitler, P. O. Tauer, B. K. & B. Floral Co., Vaughan's Seed Store, Weiland & Olinger, Stewart & Haugh, and C. H. Totty. Roses.—Heller Bros., Weiland & Olinger, E. G. Hill & Co., and Smith and Young. Carnations.—B. K. & B. Floral Co., Baur & Smith, R. Witterstaetter, Stewart & Haugh, E. G. Hill & Co. Violets.—Smith & Young, A. Wiegand & Sons. Plants.—

judge of all plants and cut chrysanthemums, S. A. Anderson, Buffalo, of carnations, and C. Tidy, Toronto, of roses, violets and design work.

A special feature of the design work was a standing wreath of dark oak leaves and *Cattleya labiata* and *Harrisonii*, with a square base of oak leaves, ferns, lily of the valley and cypripediums, the whole forming a most exquisite combination of color, which was deservedly awarded first prize. The design put up by F. Brown, manager of the Dunlop store, was very fine, also the presentation basket of chrysanthemums by Mr. Brown.

A new pink seedling chrysanthemum exhibited by the Steele-Briggs Seed Co. scored 91 points. George Hollis also exhibited a vase of nice seedling chrysanthemums of commercial promise. Vaughan's Seed Store sent a chrysanthemum plant grafted to 25 varieties.

VIEW OF EXHIBITION, SOCIETY OF INDIANA FLORISTS

Begonia Gloire de Lorraine, J. A. Peterson, A. Wiegand & Sons. Cyclamen and pot chrysanthemums.—A. Wiegand & Sons.

Certificate of merit was awarded to E. G. Hill & Co., for new rose *Rhea Reid*.

Display tables of roses in variety and orchids were shown by A. Wiegand & Sons, not for competition.

ONTARIO HORTICULTURAL EXHIBITION.

The Ontario Horticultural Exhibition held in Massey Hall, Toronto, last week was, as a whole, well up to the standard, especially so in the orchid groups of Thos. Manton and the Dale Estate of Brampton, as well as all the chrysanthemums exhibited by the Dale Estate and T. McHugh of Montreal. The chrysanthemum groups were about as usual, and pot plants a little better. Lorraine begonias were very fine.

A splendid exhibit of cut chrysanthemums arrived from Nathan Smith & Son, Adrian, Mich., just 24 hours too late for competition, as the judge had completed his work. W. Wilshire was

The carnation classes were well filled and the competition keen between the Dale Estate, R. Jennings, Toronto Floral Co. and W. Houston. On roses the Dale Estate, Bedford Park Floral Co. and Toronto Floral Co. made things lively for one another. On the various floral designs, baskets, bouquets, etc., J. H. Dunlop, T. Manton and S. A. Frost were the principal competitors.

MONTREAL GARDENERS' AND FLORISTS' CLUB.

The 16th annual chrysanthemum show of the Montreal Gardeners and Florists received only a very limited number of visitors, but the trade was well represented in the exhibits. The display, while not large, was up to the standard of other shows as far as the quality went, but it was a pity to find the gardeners and florists lukewarm and uninterested in their own chrysanthemum show.

The band of the Victoria Rifles played a fine program of classical and popular music, adding greatly to the attractiveness of the affair.

Messrs. A. Pinoteau Park Lafor-

taine, W. G. Pascoe gardener to Mr. R. Kelord, J. C. Eddy gardener to Mr. A. Haig Sims, Hall & Robinson, Oudermont, J. Pidduck, Mt. Royal Park, F. C. Smith gardener to Sir Wm. Van Horne, Wilshire Bros. and C. A. Smith gardener to T. O. Dawes, were the winners in the various plant competitions. On cut blooms of chrysanthemums, Messrs. W. G. Pascoe, W. G. Pewters, gardener to M. Hugh A. Allen, J. C. Eddy, Hall & Robinson, E. J. Hayward gardener to Mr. J. Bresky, C. A. Smith and J. Bennett were the leaders. Hall & Robinson won three firsts on roses, and all the carnation prizes. Wilshire Bros. cleaned up about everything in the floral design department and fern pans. There were some good fruit and vegetables from J. Petty gardener at Royal Victoria Hospital and C. A. Smith, Lorraine begonias from F. C. Smith and trade exhibits from P. McKenna & Son.

WORCESTER COUNTY HORTICULTURAL SOCIETY.

The Worcester County Horticultural Society's annual chrysanthemum show was held on November 14 at Worcester, Mass. It was an excellent display and well attended.

A large collection of palms in the center of the hall was exhibited by H. F. A. Lange, who also showed a corner table of decorative plants, a collection of choice roses, a table of Glorie de Lorraine begonias, ferns, etc. Charles D. Mackie had a very good display of chrysanthemums, ferns and palms for exhibition only.

Fred B. Madaus covered the platform with palms, and a fine display of carnations was made by H. A. Cook of Shrewsbury. Mrs. J. C. Whittin, George W. Knowlton and Leonard Midgley each showed chrysanthemums. One corner table contained a collection of decorative plants by E. W. Breed, another of roses and carnations by Leonard C. Midgley.

Of the single varieties good displays were made by H. F. A. Lange, M. J. Whittall, E. W. Breed and L. C. Midgley.

COLUMBUS (O.) FLORISTS' CLUB.

The Florists' Club held their annual chrysanthemum show on Nov. 12th. The exhibits were very fine, in fact the best that were ever seen in Columbus and competition was very keen.

Winners in the classes for cut blooms were as follows: C. P. Torrey 1st, Munk Floral Co., 2d, and Fifth Ave. Floral Co., 3d on 6 blooms, 6 varieties, C. P. Torrey 1st, J. H. Williams 2d on 3 blooms, 3 varieties. Sherman Stephens 1st, Williams 2d on 6 blooms 6 varieties, commercial. Munk Floral Co. won 1st on 3 blooms, 3 varieties, 9 blooms, 3 varieties, Torrey special for 6 blooms and Fifth Ave. Floral special for 12 blooms. Other winners were E. Metzmaier and Fifth Ave. Floral Co. Franklin Park exhibited two fine vases of cut blooms, not entered for competition.

The show this year was far ahead of expectations and shows what can be done. No doubt, next year the time will be ripe here for a big show and there is no reason why we can not have it.

The judges were Fred Windmiller, A. Hills and Fred Hohenstine.

THE CHICAGO SHOW.

Notes by Uncle John.

Of new plants, there were but few; there must be some worth showing. *Ficus pandurata* is so large and so good that it fiddles for itself—and it's welcome. *Dracaena Mandaiana* is the best red *dracaena* I have yet seen (and from *ferrea* to *stricta* and *terminalis* to *Youngii* I know something). *Phoenix Roebelinii* has passed beyond the new plant stage, but it is a plant of so much merit that more attention should be called to it.

The many available species of ferns not generally known would make a good and profitable display at any exhibition. They necessarily need not be commercial kinds. Gentlemen and their gardeners are looking for collections of ferns and other groups. Plant dealers O. K. this and take notice.

Of the newest and best things the roses were in the lead for the first time. This needs qualification—it's difficult to place them. Many said Mrs. Marshall Field, Mrs. Potter Palmer and Mrs. Jardine were the best three; then the glorious Cardinal and Rhea Reid, and the Princess and Hills No. 83—a lovely pure carmine rose—the upper and lower surfaces of the petals being of the same shade which is unusual even in yellow and white shades. I predict this will be seen in the first rank. The Hill Co. have never yet shown the capabilities of their seedlings before letting them out. Princess is a fine addition; Rhea Reid improves; the Cardinal is beautiful and will stay. Mrs. Jardine is entirely distinct; it neither fades nor changes; it is an everlasting keeper and its perfume is like the old damask.

Mrs. Potter Palmer is a valuable addition to that class of roses which are so necessary where quantity is required. It will be seen much better later on—and will become popular. Mrs. Marshall Field has improved greatly and is one of the most sparkling and beautiful new roses—its distinctness is unique.

Of new carnations, in quantity very short, in quality never better. Raisers of seedlings are getting wise. "It's not how many, but how few." Let this prevail because the few have the best chance.

Two glorious scarlets—Orland P. Bassett and Rudd's Defiance—are beyond question of the greatest merit. The "pros and cons" for these two would fill a page of HORTICULTURE.

Afterglow will hew out a place equal to Aristocrat, and it's a keeper. Sarah Hill is a splendid white and I trust it will be worthy of the name it bears. Sincerity is sure to be a popular white and may displace some of the very foremost ones.

The "Cabalistic Class"—those under number—contained some that surely will be named. Among carnations, Rudd's 23-10-3A, is a magnificent large flower, perfectly formed; the color is that of a salmon steak lined with hair-like currant-red lines; a glow pervades this like a November sunset.

Dorner had two good ones not yet named—one a splendid crimson—and Rudd had another without name, which won the sweepstakes and it's time it had a good name.

Of chrysanthemums, never so few—nearly all good. E. G. Hill Co. and Dorner, Nathan Smith & Sons and

Poehlmann were exhibitors. There were several good ones—better than ordinary; the following are the best, however: Hill's John Lemon, a magnificent deeply built flower of crimson and gold, the crimson brightest and the gold the purest, won the sweepstakes for the best. Hill's "best six white," Leon Truelle, were A1, as were also Dorner's "best six yellow," 24-03, and Smith's "best six darker than Bonnaffon," 95-3-06. These cabalistic signs are mysterious. If any flower is good enough to win a prize it's good enough to have a name or we shall have to study Arabic. Some others were fair but they never looked behind 'em.

JOHN THORPE.

SOUTHERN CALIFORNIA HORTICULTURAL ASSOCIATION.

The fifth semi-annual exhibit of the Southern California Horticultural Society opened in Blanchard Hall, Los Angeles, Thursday evening, November 7, at 7.30 o'clock and continued until 10.30 P. M., Saturday. This was considered the best and most successful autumn show ever held in southern California. The placing of the prizes was a difficult task as many of the exhibitors refused to accept any awards, claiming they had not entered in competition but simply wished to assist in making the show a success.

The first prizes in chrysanthemums were divided between B. Whitehead of Pasadena and Dr. W. Jarvis Barlow of Los Angeles. The first prize for twelve blooms, yellow, was awarded to Mr. Whitehead for a remarkable collection. All others in the class, red, white, pink, bronze and assorted colors went to Dr. Barlow. The first prize for chrysanthemum novelties 1906-7 was awarded to Dr. Barlow. All Dr. Barlow's entries were grown by W. W. Felgate, head gardener.

Awards of merit for specimen plants and single blooms from specimen plants, were awarded to Howard & Smith. Though not grown for exhibition purposes these were exceptionally good.

The Whittlesay Floral Co. carried off first prizes for carnations in several classes, as did also The Ocean-side Floral Co. The first prize for carnation novelties was awarded to Louis G. Horner. An unnamed white variety was the star of the collection and was one of the most notable blooms in the entire show.

Miss Sara C. Reese was awarded first prize for a collection of roses. The California Rose Co. won first awards in thirteen classes of roses. Honorable mention for novelty roses was awarded Howard & Smith.

First prize for best display of dahlias was awarded to Miss Reese. First prize was awarded to C. B. Boothe for collection of chrysanthemums and honorable mention for ornamental palms to Howard & Smith. First for collection of ornamental plants in same class was awarded to E. H. Rust. Howard & Smith received the award for best collection of flowering plants.

Mr. Coclidge's collection of tropical plants created much interest among local fruit growers as some plants were new and proved to be of great commercial value.

The first prize for the best plant

novelty was awarded to J. Dietrich for *Alocasia Standnerifolia*; second prize to D. W. Coolidge for *Ficus pandurata*. A special award of merit in the novelty class was made to Miss Sara Reese for a collection of Burbank's Lemon ball marigold. The aquatic exhibitions of E. D. Sturtevant and W. Hertrich, though not for competition, were noteworthy. P. D. Barnhard had a very interesting botanical exhibit which caused much comment and was one of the prime attractions.

LAKE GENEVA GARDENERS' AND FOREMEN'S ASSOCIATION.

The Lake Geneva Gardeners' and Foremen's Association held their third annual exhibition Friday and Saturday, Nov. 15th and 16th. This show far surpassed either of the previous exhibitions in point of beauty and management, as well as quality of blooms and plants shown. Another feature of this year's show was the large exhibitions of vegetables. A. J. Smith and H. W. Illenberger were managers of the show. Emil Buettner was judge.

Among the winners of awards were: J. J. Mitchell, gardener A. J. Smith; George Sturges, gardener Wm. Wahlstedt, R. T. Crane, gardener Axel Johnson; Kellogg Fairbanks, gardener Ed. Sandgren; C. L. Hutchinson, gardener Wm. G. Longland; N. W. Harris, Nathan Dickenson in the chrysanthemum, carnation and violet classes; Mrs. R. N. Isham, gardener Robert Sampson, E. L. Jones, M. A. Ryerson, gardener Miles Barratt, Mrs. McCrea, C. C. Bayles were prominent in the vegetable classes. Poehlmann Bros. showed some grand roses including their new Mrs. Potter Palmer and Julius Roehrs Co., were represented by a fine display of orchids.

After the close of the show Saturday evening, the members of the association entertained the visitors at a banquet of the old-fashioned fraternal type.

RHODE ISLAND HORTICULTURAL SOCIETY.

The annual fall exhibition of this society was held in the Churchill House, Providence, on Nov. 14 and 15. The show was under the management of William Appleton and was said to be the best fall display ever made by the society. Seth A. Borden of Fall River was an extensive exhibitor of chrysanthemums, orchids, carnations and violets; John Macrae of chrysanthemums and carnations; William Hill, decorative plants; J. H. Cushing, Quiddick, a large line of carnations, T. T. Dodge, Howard, violets; F. Macrae & Son, roses; E. E. King, Attleboro, carnations in variety; Charles Faust, Cranston, chrysanthemums; Albert Holscher, Johnston, Princess violets; John Gerrard, Bristol, violets and carnations; L. A. Bloomer, Pawtucket, chrysanthemums; William Appleton, large collection of palms and ferns, extending the length of the south side of the hall; N. D. Pierce, Norwood, a variety of plants; F. A. Luther, an extensive group of ferns; L. R. Peck of West Barrington, orchid blooms, and there were many fine fruit exhibits. A. A. Hixon of Worcester, Mass., was judge.

NATIONAL CHRYSANTHEMUM SOCIETY OF ENGLAND.

Grand Autumn Exhibition.

Favored by a fine day for the opening and also with a large number of visitors, the grand autumn show of this old established society opened on the 6th of November under the most auspicious circumstances. In every way the organizing committee must have felt great encouragement, for the variety, quality and number of the exhibits were decidedly far in advance of the past year or two. As we wandered around the show many and frequent were the expressions of high appreciation that we heard fall from the lips of visitors, and indeed they were well justified.

The huge massive trade and other miscellaneous exhibits must claim our first attention, and in this section of a peculiarly high order of merit was the vast floral artistic composition set up with great skill and remarkable aesthetic effect by H. J. Jones, who deservedly received a large gold medal for his wonderful display. It consisted of an immense circular group 95 feet in circumference, arranged on a green cloth floor covering with a dark green silk edging crumpled in wavy, irregular folds. The flowers, many of them gigantic cut blooms of the finest Japanese varieties, were set up in tall bamboo stands, in large Japanese porcelain vases, while those in front were arranged in small vases a few inches to a foot in height. Autumn foliage, palms, and many varieties of decorative chrysanthemums were interspersed throughout the group at intervals, and the whole arrangement formed an object lesson in the art of floral decoration worthy of imitation.

Norman Davis also had a large gold medal for a fine group which, if smaller in area, was at least equally interesting as an artistic composition. In large bamboo stands, each holding a great number of monster Japanese in vases and baskets similarly furnished, we noted some grand flowers, mostly novelties of recent introduction, which we may probably describe at a later date.

A gold medal was awarded to J. Peed and Sons for a very prettily arranged circular group edged with *Isolepis gracilis*. Ornamental foliage plants, ferns and smilax were well mingled with the chrysanthemums, which were of a high order of merit. Decoratives and singles were used for the purpose of lightening the effect of the bolder and more massive Japs.

William Wells & Co. staged a collection on a long table, and here, too, singles and ornamental foliage plants were freely and judiciously used. A silver gilt medal was awarded for this group. Phillip Ladds had a fine decorative mixed group edged with small ferns in pots and a border of small pelargoniums, palms, heaths, aspidistras and other subjects making a most effective display, for which he also received a gold medal. J. W. Cole showed another decorative group, mostly of *Calvat*'s novelties for 1937, some of which are evidently suitable to our less favored climate.

Hobbies Limited had a show of their own in three main divisions, and a gold medal was deservedly awarded for it. One side portion was formed en-

tirely of roses most daintily arranged and greatly admired by numerous lady visitors. The chrysanthemums which formed the middle section of the group were mostly singles. On the extreme left were dahlias in grand form and mostly of the giant decorative sorts. A lovely exhibit came from T. S. Ware & Co., consisting of decorative dahlias in the rear with fine bunches of carnations in front. Henry Cannell & Son had also a good miscellaneous group. Zonal pelargoniums were in the highest possible form and among the chrysanthemums we noted the grand new *Incurved Romance*, several of *Calvat*'s new seedlings, etc., the whole group, which was ornamented with autumn foliage, etc., receiving a large gold medal. Some fine singles were also noted in this exhibit. W. J. Godfrey had a very large table exhibit of chrysanthemums, and a gold medal was awarded to his lot. Big blooms and new singles were the leading features here. Another trade exhibit of carnations was staged by J. Peed & Sons.

In the great competitive classes there were some noble exhibits both in vases and on the old show boards. Competition was keen in most cases, and the 48 Japanese and the 36 *Incurved* were well filled. So, too, were the various vase classes. Quality in each division was a leading feature, and we noticed in the Japanese classes generally and the *Incurved* section some grand flowers.

The anemone flowered varieties although not shown in any great numbers were well represented, and in these days of great size it is interesting to see them when nicely developed and the centers well filled. There is in this section nothing very new or novel, most of the leading show sorts being of old introduction. Market varieties were also provided for. There was an interesting class for 18 Japanese novelties. Two well-known English raisers, viz., Norman Davis and George Mileham, competed with neatly set up stands.

William Dane showed a nice little lot of conifers and hardy shrubs. John Laing & Sons staged a fine group of foliage plants on a table. W. Sandford & Co. had another table of single chrysanthemums in vases.

The Floral Committee held a meeting. The varieties, George Mileham and *Romance* both received first class certificates. The same award was made to Freda Bedford, a decorative market variety, and to the following singles: E. Nottell, Crown Jewel Improved, Elsie Matthews, C. Robfant; also to Felton's Favorite, a market decorative.

Vegetables were also shown, and there were many dinner table decorations, vases, bouquets, and other floral compositions where artistic talent is required. Most of these were much admired by the visitors. Some very choice tables of fruit were staged by several exhibitors. The British Columbia Government also staged fruit packed in boxes and baskets.

C. HARMAN PAYNE.

Porter Bros., vegetable forcers, of Danversport, Mass., have lost a large crop of cucumbers through having painted the heating pipes in two of their greenhouses.

DREER'S DAHLIAS

WE have just harvested an immense crop of Dahlias of all types, in all the leading standard, and many new varieties, the roots are strong and heavy and will be supplied in un-divided field grown stock. If you have not yet made up your catalogue list, or are short of any varieties which you have listed, consult us, and we shall be pleased to quote interesting prices on stock that is absolutely true to name.

We also call special attention to our immense stock of Hardy Phlox, we have over a quarter million one year old field grown plants in stock, which we can supply at prices lower than y u can grow them for.

We have also a complete line of Hardy Perennials in excellent condition and at correct prices; send us a list of your requirements.

HENRY A. DREER

714 Chestnut St., PHILADELPHIA.

DAHLIA-ROOTS

We have about 200,000 clumps in A No. 1 condition; our collection contains 200 of the best varieties. We offer for fall or spring delivery whole field clumps at prices ranging from \$5.00 per 100 for good standard sorts up to \$25.00 per 100 for some of the newer sorts. Send for list. If you buy in large quantities write us with list and we will make you special prices for immediate acceptance, and hold for future shipment, if desired.

Seed Trade

It was told in last week's issue that the fire at the government seed warehouse at Washington had made a clean sweep of everything in the building, and particular attention was directed to the item of sugar corn of which about 2500 bushels were supposed to have been destroyed. It develops, however, that with the exception of about twenty bushels all was saved, but in a condition that augurs ill for its being available for seed. Much of it is wet and instead of being spread out, it is left in the bags with the expectation that it will dry in that way, which of course shows what practical seedsmen are our genial "Professors" who run things at the government seed shop. Much trouble has been encountered in securing a building fully available in which to continue the interrupted distribution when a fresh lot of seeds are at hand, and as a ready-made building could not be found to satisfy all requirements a new temporary frame structure is being erected, within the grounds of the department, and to make room for which, a fine old hedge was removed. It was begun only last week, but an optimistic "Professor" confidently expects to begin putting the seed into packets in the new building by Dec. 1st. Here is another beautiful illustration of the simple and childlike faith of our government seedsmen. Up to Saturday of the past week no orders for any considerable quantity of seeds had been given, and while there seems to be an honest effort to dispense with as much unnecessary red tape as possible in this emergency, it will be the middle of the present week before final action will be taken on the various bids and if the goods are rushed off without an hour's needless delay after the orders are received, it will be from ten days to two weeks before they will reach Washington.

It is of course quite generally known that Mr. B. F. Brown did not secure the contract for putting up the seeds for the coming distribution, and that his machines are not in use by the present contractor. A smaller machine which only fills the packet, but does not paste the end, has been used. Each of these machines is said to be capable of filling 28,000 packets in 8 hours, which constitutes a day's work in all departments under government control and keeps five to six girls busy pasting. Several of these machines were destroyed and not enough are available to make more than a respectable beginning. It will require time to complete them, however, and it really looks as if it might be the middle of December or first of January before everything will again be in full swing.

Advices just to hand by mail from California confirm reports of serious damage to the lima bean crop. This letter, which comes from Carpinteria, says that rain commenced falling October 16th and up to Nov. 1st nearly six inches had fallen. The beans were turned every day in the effort to keep from spoiling, but in spite of this were badly damaged, a good percent-

age being swollen, and no inconsiderable quantity having sprouted. Those beans that had been threshed were sacked and piled up in the fields, and of course were soaked. It is estimated that from 40 to 60 per cent. of the crop was still in the field Nov. 1st, either in sacks or not yet threshed. Of course this means that lima beans will now take their place in line with peas and corn. Just what percentage will be unmarketable, cannot now be stated, but that it will be considerable is certain, and it behooves every jobber to go slow in selling lima beans until his stock is actually in store, and has been examined. Samples will no doubt be unsatisfactory in many instances, but seedsmen should be reasonable, and understand that conditions are such as to make it impossible to supply samples up to the usual standard.

A letter from one of the largest growers of sugar corn in the country, under date of Nov. 5th, says that in 1904-5 when corn sold up to \$15.00 per bu., it was 60 per cent. drier on Nov. 1st than it was this year. Since Oct. 1st it had not dried out a particle, but in effect had been in practical cold storage. Here is the key to the real situation, but no use repeating old arguments which ought to be self-evident truths.

There are rumors of some changes in the firm of D. M. Ferry & Co., but these are likely to be more in matters of detail than in business policy, as for many years Mr. Ferry has given very little attention to the seed business, although no seedman's name was more widely known in this or any other country and few men were better loved or fully trusted by their business associates. His loss is most sincerely mourned by those who knew him best.

The wholesale price list of grass and clover seeds just issued by Henry Nungesser & Co., New York, indicates that all grass and clover seeds are higher than usual this season and really high grade qualities on most lines are scarce.

PHILADELPHIA NOTES.

"Lynwood Hall," the new white chrysanthemum so much admired at the Philadelphia and New York exhibitions, has been purchased by E. G. Hill & Co. from William Kleinheinz.

The financial stringency is blamed by the Wm. Graham Co. as the cause of their embarrassment. The concern operated the retail store at 104 South 13th street. The same firm also conducted the Hugh Graham Co. greenhouses at Logan. The assets are stated ahead of liabilities in both concerns. David Rust was appointed receiver.

Scott's Mrs. Jardine and Hill's Princess roses—both debutantes—were each thought worthy of being decorated with the Pennsylvania Horticultural Society's silver medal by a special jury at the fall show.

Jno. E. Haines was at the same show with samples of his new seedling carnations, and was tireless in explaining their merits to all. Some of them looked promising. Across the aisle in the Kleinheinz exhibit, the Haines' Pink Imperial shone like a beacon light, and was undoubtedly the finest exhibition vase in the show with flowers over four inches across and three-foot stems.

Jno. Cook of Baltimore put up a fine vase of his new pink seedling rose, which was much admired. It was entered for exhibition only. This rose is said to be a great producer and will doubtless be heard from later.

PLANT IMPORTS.

There were entered at the port of New York during the week November 13 to 19, inclusive, the following plants, etc.:

Via Rotterdam: C. C. Abel & Co., 7 cs. bulbs; H. F. Darrow, 71 cs. plants; Wm. Elliott & Sons, 24 cs. do., 8 cs. trees, 11 cs. roots; J. W. Hampton, Jr., & Co., 28 cs. roots; Peter Henderson & Co., 21 cs. plants; 22 cs. roots; R. F. Lang, 17 cs. flower roots, 14 cs. plants; McHutchison & Co., 59 cs. plants; Ch. F. Meyer, 20 cs. roots, 10 cs. plants; O'Leary's Hort. Co., 12 cs. plants; P. Ouwerkerk, 68 cs. trees; Julius Roehrs, 17 cs. do., and shrubs; Stumpp & Walter Co., 4 cs. plants, 72 cs. roots, 12 cs. bulbs; J. Ter Kuile, 1 basket flower roots; J. M. Thorburn & Co., 1 cs. bulbs; Vaughn's Seed Store, 14 cs. plants, 38 cs. trees and shrubs; Weeber & Don, 18 cs. plants.

Via Antwerp: W. Elliott & Sons, 2 cs. plants; McHutchison & Co., 350 tubs laurel trees, 79 cs. plants; C. B. Richard & Co., 150 tubs laurel trees; Maltus & Ware, 9 cs. plants.

Via England: McHutchison & Co., 9 cs. trees; Maltus & Ware, 20 cs. plants.

From Germany: H. F. Darrow, 73 cs. lily of the valley, 4 cs. plants; McHutchison & Co., 66 cs. lily of the valley; Ch. F. Meyer, 533 cs. do.; 5 cs. plants; R. M. Ward & Co., 18 cs. lily of the valley; Forwarders, 15 cs. do., 2 bales plants; to order, 351 cs. lily of the valley.

From France: H. F. Darrow, 538 pgs. seed; Peter Henderson & Co., 52 pgs. do.; August Rolker & Sons, 12 cs. plants; Vaughn's Seed Store, 135 pgs. seed; sundry forwarders, 567 pgs. do.; 6 pgs. trees, 14 pgs. plants.

TWIN CITY FLORISTS ORGANIZE.

Last week about forty florists, seedsmen and nurserymen in the Twin Cities visited the new park greenhouses on invitation of Superintendent Wirth. The greenhouses, potting shed, boiler room and root cellar were thoroughly inspected. The root cellar served as refreshment room and was highly appreciated. All were glad to see the progress the park department is making. There are at present only two propagating houses; three more of them and a large show house are to follow as the demand for floral display increases.

After some informal discussions the party settled down to business. Mr. John Munson, acting as chairman, called upon Mr. Wirth, who stated briefly his object in getting the florists together; to show them what the park board intends to do for the promotion of floriculture. He expressed surprise that there was no florist club in the Twin Cities and thought the time opportune to get one started. In case his suggestion should be taken up

PARK GREENHOUSES, MINNEAPOLIS.

favorably he would be glad to have them make use of the potting shed as a meeting room. Messrs. E. Nagel, the veteran florist, O. A. Will, the junior florist, and A. W. Hobert, superintendent of Lakewood Cemetery, supported Mr. Wirth's proposition. The motion was made by Mr. Hobert and carried to extend to Mr. Wirth a hearty vote of thanks for the interest he is taking in the promotion of floriculture and for the entertainment furnished. Twenty-six signatures were obtained for membership in the proposed club, and Messrs. Theo. Wirth, E. P. Holm of St. Paul and A. S. Smith of Lakewood Cemetery were appointed a committee to draft by-laws and report at a later meeting for organization.

Mr. Ed. Levin, from the Twin City Pottery, reported that his firm is looking for financial aid to carry on the business. As he expects to find a ready market for his products in the Twin Cities he wants the florists to help him by securing shares and forming a stock company. On motion Messrs. Hans Rosacker and R. Westling of Minneapolis, Frank Gustavson N. C. Hansen and C. Lawritson of St. Paul were appointed a committee to investigate fully and report at next meeting.

HENRY M. ROBINSON & CO., FLORISTS' SUPPLIES 15 Province St., and 9 Chapman Pl., BOSTON

LOCAL AND FLORISTS' SHOWS.

The annual exhibition at Washington Park, Albany, N. Y., opened on the 9th inst.

November 3 was chrysanthemum day with the Lake Newell Floral Co., E. Liverpool, O., Edwin Simpson, manager.

Henry Rieman, Indianapolis, opened his greenhouses to the public last week with a display of cut flowers and plants.

A band concert added to the attractiveness of the flower show at the store of M. S. Hall, Osage, Ia., November 12-14.

The attendance during the first week of the chrysanthemum show at the

mum show. Saturday was a great day for yellow chrysanthemums, the annual football game in Ann Arbor being played there. Some florists' windows were prettily decorated for this occasion in pale blue and yellow.

BUSINESS CHANGES.

J. J. Martin succeeds H. White at No. Manchester, Ind.

Ordonez Bros. have taken the store of K. E. Kaulbach, Madison, N. J.

Whittle & Riggs have leased the greenhouses of John Vogel, Albany, N. Y.

Harry Hoffman has purchased his partner's share of the business at Jacksonville, Ill.

A. L. Wheeler of Mason City, Ia., has disposed of his business to I. O. Kemble of Marshalltown.

Charles E. Morton, Chicago, has disposed of his flower store, 3626 Cottage Grove avenue, to Philipp & Opitz.

F. Burfitt and Walter Mott have given up their business in Sharon, Pa., and returned to Springfield, Mass.

The "Japana" Cut Flower Holder

A handy article for florists. Sells to the trade on sight. Made of glass in three sizes. The "Anglais" Table Decoration, something entirely new, long needed. The florist and housewife will appreciate this article, as it simplifies the art of table decorating.

Ask for catalog.

M. V. CARNSEY, Dept. N,
130 Waiola Ave., La Grange, Ill.

Missouri Botanical Gardens, St. Louis, averaged 5,000 daily.

The chrysanthemum display at Eden Park, Cincinnati, O., has been a feature of the past week and brought out an attendance that must certainly be gratifying to Superintendent Rodgers and his assistants.

November 13 and 14 at the greenhouses of Irwin Bertermann, Indianapolis, Ind., there was an attractive display of chrysanthemums, etc. The new rose, Mrs. Jardine, was also included in the exhibit.

Wm. L. Rock Flower Co., Kansas City, Mo., gave their eleventh annual exhibition for three days last week. The chrysanthemum predominated and gorgeous blooms were displayed rivaling anything heretofore brought out by this up-to-date establishment.

The exhibit of the Baur Floral Co., Erie, Pa., during the past week has been pronounced the best of the year in that city, and the interested public have been eager attendants thereon. Orchids were used for the window decoration, and the chrysanthemums and general stock were in superb condition.

John Breitmeyer's Sons beautiful Detroit store was the mecca of society last Thursday, Friday and Saturday, this being their annual chrysanthemum

MAJOR BONNAFFONThe best all 'round Yellow Chrysanthemum. Strong stools,
\$5.00 per 100**W. W. EDGAR CO., Waverley, Mass.****To Make the Store Pay**

Every seasonable attraction to the stock of the retail florist has to be diligently sought for and attractively displayed.

WINDOW BOXES are in the minds of every householder at present.**Have You a Good Assortment of Suitable Plants to Show Customers?** If not, send at once to Samuel C. Moon, Morrisville, Bucks Co., Pa., for sample order. He furnishes**HARDY EVERGREENS** stocky little plants of Juniper, Thuja, Retinospora, etc., at \$15.00 per 100; \$2.00 per doz. **Send to-day.** You are losing business by every hour's delay.**SAMUEL C. MOON, MORRISVILLE, PENNA. BUCKS CO.,****FLOWER MARKET REPORTS**

BOSTON The extreme dullness in the cut flower market continues, as noted in previous reports. Not for many years has this been so pronounced and as yet there is little on which to base hopes for improvement. Colder weather and the wane of the chrysanthemum should help a little.

BUFFALO The wholesaler has much to complain of, as the previous week was one of the duller on record. Sales were few, and those few were not large, though a good line of all flowers could be had and at low prices. The buyers had their own way, but nothing moved until Saturday, when a fair cleaning up was had. Violets, lilies of the valley, Roman hyacinths, etc., are plentiful and have been carried along in stock. Chrysanthemums are at a standstill, also carnations, the latter being mostly in shorter grade. As for roses, there is very little outlet for the abundance of stock received, and the wholesaler is praying for some way to keep the stock for the holidays. The money stringency is no doubt the cause, as the retailers claim that nothing can be moved even at a price lower than the wholesale reports. It is hoped that this week will end more satisfactorily to the grower, wholesaler and retailer.

DETROIT Business conditions are well up to the standard, and special impetus was given to the flower demand through the death of Dexter M. Ferry. This occasion called for many high grade designs and orchids played a great figure therein. American Beauties also were very prominent.

INDIANAPOLIS The market was quiet the past week. The stringency in the money market might be to blame to some extent. Chrysanthemums still dominate. Receipts fair, quality improved, for the good late sorts are now being cut; however, prices are not high; in fact the growers called them low and there is little prospect of anything much better being realized this season. There are superb roses to be had. Long Beauties are in good quantity but medium lengths are scarce and command a premium. Fancy Richmond, Killarney, Bridesmaids, Kaiserin, Chateau

and the specialty roses are equal to market requirements. Carnations are in good quality but don't move as fast as usual at this time of the year. Easter lilies, lily of the valley, etc., are abundant. Violets are beginning to be called for and they sell out at a fair price. Orchids have sold well and all the leading stores carry a good stock to meet the growing demand.

PHILADELPHIA There was a slight improvement in market conditions here last week, but the supply of flowers is still ahead of demand. Chrysanthemums are still in very heavy supply, although the high tide has now been reached and the cut will diminish very materially during the next ten days. Roses were not quite so plentiful and the demand improved a little—if anything. Beauties were among the best sellers. Richmonds are good and go fairly well. Fancy carnations cleaned up well and the lower grades also showed some improvement. There have been few big football games here this season which has been bad for the violet market, which rules one-third lower than last year. In orchids there are enough catleyas to go around and a sprinkling of other varieties. Gardenias are good and meet ready sale.

NEW YORK The conditions reported last week continue unabated, and there is much disquietude both in retail and wholesale quarters concerning the heavy crops and the utter lack of adequate demand. The prospects are quite discouraging at present and nobody can say how long it is going to continue. All are hoping for a clearing up.

TWIN CITIES Business is good. One wholesale house reported a shortage in carnations, but they are having everything in plenty now. The first sweet peas are appearing. Roses, carnations, poinsettias are coming on good in this clear, sunny weather and are very promising for the holidays. Quite a good percentage of cut flowers used in the Twin Cities are shipped in from Chicago.

Fire at Nos. 110-112 West 26th St., New York, on November 13, did a slight damage to the stock of the Geller Florist Supply Co. Insured.

NEWS NOTES.

B. M. Goday, florist, Peabody, Mass., has filed a petition in bankruptcy. Liabilities, \$2,452; assets, \$258.

John C. Hatcher of Amsterdam, N.Y., will open a branch store in the station of the N. Y. Central R. R., Schenectady, about Jan. 1.

A meeting of the stockholders of Parsons & Sons Co., Ltd., Flushing, N. Y., has been called for Dec. 6, for the purpose of dissolving the corporation and such other business as may come up.

Edwin Oyster has been appointed receiver for the Templin Co. of Calla, O. Assets are said to be \$90,000, with liabilities about the same, not including the capital stock. The business will be continued.

A fire started in the coal bin at Appledorn's greenhouse, E. Bridgewater, Mass., on Saturday last, but was discovered before it had gained much headway. It was thought the coal was stored too near the furnace.

On the completion of the improvements recently made by G. Fleischer of Pueblo, Colo., to his range of houses the public were invited to inspect them, and some 2,000 people were in attendance on opening day. The recent additions now make a total of sixteen houses.

THANKSGIVING DAY

Coming on Thursday of next week, correspondents and advertisers are requested to send matter one day earlier than usual, as we shall go to press on

- THE BUFFALO SITUATION.**

"Dear Mr. Kasting:
"This little fellow, 65 years of age, has done all the manure business on chrysanthemums. He hopes that you will get all for them you can, because he likes a full dinner pail."

The above expressive drawing and accompanying note received by W. F. Kasting, in a shipment of chrysanthemums, indicates that the growers around Buffalo are not only artists but humorists. The subject of the sketch certainly deserves better than to be compelled to

"Line himself with hope,
Eating the air on promise of supply"
and we have no doubt he will fare all right with the hustling proprietor of the Ellicott street chamber of commerce and politics.

Mr. John T. Allan, gardener for Mr. J. R. Drexel, is a candidate for alderman to represent the fourth ward of the City of Newport, R. I. There are many others of the fraternity candidates for the council. Mr. Oscar Schultz is also a candidate for a seat in the aldermanic chamber as a representative from the fifth ward.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

WANTED—Hustling store manager to take stock in a small company doing good business in small Pennsylvania town; owner's time devoted to greenhouses, need man to take charge of store. Splendid opportunity to right party. Money not needed to run business, but only to insure business being taken care of. Give references. Address Pansy, care Horticulture.

SITUATIONS WANTED

SITUATION WANTED by married Scotchman as Foreman in commercial greenhouse; long experience with first-class references. Reply to "Foreman," 6 South Market Street, Boston, care of R. & J. Farquhar & Co.

SITUATION WANTED by gardener, age 30, single, full knowledge of fruits inside, stove and greenhouse collection. State wages. Address English, care HORTICULTURE.

SITUATION WANTED by good grower of roses, chrysanthemums and carnations; also good design maker; can furnish good reference. Address P. O. Box 325, Dover, N. H.

SITUATION WANTED by gardener with good record, private place preferred. Married, two children. Address N., care HORTICULTURE.

FOR SALE

FOR SALE—A well equipped new greenhouse, 80 feet long, 21 feet wide; new boiler house, new boiler and pipes and four other greenhouses, 60 feet long, attached. A large house, 12 rooms; also stable. A most desirable place in city of 15,000, and the oldest greenhouse plant in this section, and doing the largest business; or to rent to a man of energy and push. Chas. Z. Taylor, Middletown, N. Y.

GREENHOUSES FOR SALE—About 25,000 feet of glass; well stocked, 5000 roses, 2000 pinks, 2000 violets, 400 callas and 300 feet Asparagus Sprenger. One new house this year 160 x 53 feet. Reason for selling, other business takes all of owner's time. Well located for large retail trade. Also handy to the Boston market. Address R. A. B., care HORTICULTURE.

FOR SALE—4 Greenhouses, most desirable location in the Newtons; large lot land fronting on two streets, dwelling house of 8 rooms; all flowers sold at door for fancy prices; excellent business, best reasons for selling; price will be made reasonable. Pelkey-Wallace Co., 101 Tremont St., R. 717, Boston.

FOR SALE—One top delivery wagon and one open delivery wagon, suitable for a florist's use; almost new and in good order; also a pair of good delivery horses; the above can be bought at your own price. Ed. Higons, 146 West 28th st., New York.

MISCELLANEOUS WANTS

WANTED right away, 150 to 200 ft. of used 4-inch drainage pipe (cast iron standard light), 5 ft. lengths. Must be cheap for cash. Write E. F. Oliver, P. O. Box 143, Avon, Mass.

TWO IN ONE WEEK?

Joseph Fenrich, wholesale florist at 110 West Twenty-eighth street, is again handing cigars to his friends. His wife presented him another boy (the second) last week.—Florists' Exchange.

At the November meeting of the Yale corporation, held at New Haven on Nov. 18, announcement was made of the receipt of a gift of \$50,000 for the chair of applied forestry and practical lumbering in the Yale forestry school.

Is Your Name In The Above List? If Not, Why Not?

Obituary

Prof. Lucien M. Underwood.

Professor Lucien M. Underwood of Columbia University died by his own hand at his home in Redding, Conn., on Saturday, 16th inst., after attempting to first kill his wife and daughter. His wife was seriously cut, but will recover. Temporary insanity, due to recent money losses, is believed to have been the cause of the tragedy. Prof. Underwood was a botanist of high standing and had occupied the Chair of Botany at Columbia for the past eight years. He was born at Woodstock, Vt., 54 years ago. From 1883 to 1891 he was professor of biology in Syracuse University. He then accepted the chair of botany at De Pauw University, Indiana, and left in 1895 to take charge of the biology department of the Alabama Polytechnic, Auburn, Ala., going to Columbia the following year. He was the author of many text books and treatises on botany, especially on native ferns. Among his best known books is *Our Native Ferns and Their Allies*, first published in 1891 and followed by a number of later editions.

James C. Luitweiler.

James C. Luitweiler of York, Pa., aged 77, died on November 4. A widow and five children survive him.

Mrs. I. T. Roadhouse.

Mrs. I. T. Roadhouse, vice-president of the J. M. Kimberlin Co., Inc., died at Berkeley, Calif., October 17.

Mrs. C. Held.

Mrs. C. Held, for the past twenty years actively engaged in the florist business in Baltimore, died suddenly on Nov. 11.

Frank Lichtefeld.

Frank Lichtefeld, a native of Germany, but since 1848 a resident of Louisville, Ky., died on November 7, at the age of 85.

Prof. E. Gale.

Prof. E. Gale, for many years professor of horticulture of the Kansas State Agricultural College, died on November 6 at West Palm Beach, Fla.

Mrs. Catherine Waltz.

Mrs. Catherine, widow of Frederick Waltz, one of the early florists of Detroit, died at the age of 74, on November 11. Among her surviving children are Mrs. G. H. Taepke and Mrs. M. A. Flammer.

CLUB AND SOCIETY NOTES.

The Florists' Club of Albany, N. Y., will hold their meetings in future at 67 South Pearl street.

The Maine Pomological Society met in the Opera House, at Gardiner, Me.,

on Wednesday and Thursday, November 13 and 14. The sessions were largely attended by fruit growers from all parts of the state. Among the many interesting speakers were Prof. E. F. Hitchings, State Entomologist on Insect Depredations; Wilfrid Wheeler, of Concord, Mass.; A. A. Hixon, of Worcester; President T. L. Kinney, of the Vermont Horticultural Society; E. H. Burlingame, of Providence, R. I., and John W. Clark, North Hadley, Mass., on various fruit topics.

Officers were elected as follows: Pres., Wm. Craig; vice-pres., E. L. White, F. H. Morse; secy., W. J. Ricker; treas., E. L. Lincoln; trustees to represent each county.

CARMAN'S ANTIPEST

For the Garden, Orchard and Greenhouse.

Non-poisonous and harmless to vegetation.

Kills Green Fly, Aphides, Bark Lice, Thrip, Mealy Bug, Red Spider, Scale, Wire Worms, Ants and Slugs.

This is the Grower's Friend, handy to use cheap and effective mixes readily in water. Destroys all insect pests and keeps down filth. Circulars on application. \$1.50 per gallon. Also in quarts, half gallons and in bulk.

PERFECTION CHEMICAL CO.,
FLUSHING, N. Y.

Eastern Agents:

W. W. RAWSON & CO., 5 Union St. Boston, Mass.

The Pulverized Manure Co., of Chicago, have received a very convincing testimonial from Bassett & Washburn as to the efficacy and economy of the "shredded manure," backed up by an order for 300 tons. They say "in making manure water it is fully three to four times as strong as the rough manure. The advantages of its even quality and the easy and unobjectionable way of handling the manure, not a pound being wasted, makes it cheaper in our opinion than the rough manure which we can get for simply the cost of freight and loading."

You will find something worth reading on every page of HORTICULTURE.

Our Proposition For the Winter During the months of December, January and February, the factory frequently wants more work to keep it going at the full capacity, so it is to our interest to get a goodly number of you growers to place your spring work with us *now*. It is of special benefit to you, because we will not be so rushed—we can give your order the many special attentions we like to. Then you can rest easy on the assurance that every item will be ready for shipment the very day you say. Sometimes the price of a house made ready in these winter months is considerably in your favor. It is not only good sense but a good investment, to *get started now*. So do it!

HITCHINGS AND CO.

GREENHOUSE DESIGNERS AND BUILDERS.

Manufacturers of Heating and Ventilating Apparatus.

1170 Broadway,

NEW YORK.

SETTING FOOT PIECES NOW

The ground is solid now and in good condition to work to advantage. While in early spring it is sticky—costs more to dig and you cannot pack it solid; so *set your L. & B. foot pieces now*, and you can get busy putting up your house the very first pleasant day in the spring. During the winter we can get your materials out and have everything ready for shipment the very day we get word from you.

Send for prices on foot pieces, and get the Semi-Iron House and Iron Frame House Circulars.

We make every part of a greenhouse but the glass. We sell any part.

Sedum spectabile

Situated far away from the large manufacturing and business centers, the month of September, for the northern part of the New England States, brings those days of marvellous atmospheric clarity, which indicate the near approach of autumn. The light, graceful leafage of the birches begins to turn yellow and with the white bark of their smooth, slender trunks stands out in vivid contrast against the dark, sombre green of massive clumps of arbor vitae. Now and then one of the early easterly and northeasterly rainstorms sweeps along our spruce and pine girdled coast, playing havoc on the panicles of late phloxes and the host of summer annuals, which up to this time, uninterruptedly constituted the keynotes for the jubilant color-symphony of our gardens. To the most resistable perennials at this advanced season belongs, alongside the tritomas and montbretias, doubtless, *Sedum spectabile*, the best known representative of a plant genus, comprising over one hundred different species. Its usefulness as a border plant and its high value for the planting of rockgardens is unquestioned. Under cover *Sedum spectabile* has proven perfectly hardy as far north as Canada. It prefers an open sunny space and seems to thrive best in a light sandy loam. In Mount Desert Island gardens, amid huge granite ledges, its flat topped, large cymes frequently continue for several weeks to form a perfect sheet of bright pinkish-carmine hues.

I admit we have at present a host of pretty things well adapted for rockeries, especially among small shrubs and vines. Of flowering herbaceous plants for sunny, dry positions, however, few have proven equally resistable during heavy rainfalls and few are equally hardy and in a floral respect nearly, as, or more effective than *Sedum spectabile*.

Richard Rothe

Throw Away the Mole Traps

We talk much about our bird friends and wish them protected, but we often neglect or kill our animal friends. Among these, by far the best, is the mole.

The white grub or "cut worm" is one of the most expensive and destructive pests we have and unless their number can be reduced, they threaten to take the earth. They are the progeny of the June-bug which comes thumping against your windows on summer evenings. They will take possession of a piece of ground and destroy everything on it. Sometimes large patches of corn, in the richest grounds, will be destroyed. They

often infest sod grounds and lawns. You have seen grass lands where the hogs were turned in and they ripped up the sod like torn blankets, to get the grubs which they destroyed by the thousand. Sometimes they get into the nurseries and they never stop to count the cost, but destroy plants by the thousand. One year they killed a thousand dollars' worth of evergreens for me and every year they inflict more or less damage.

THE AVENGER HAS COME

Now, I am ambitious to have one of the finest collections of perennials in the country. I raise thousands of phloxes and am engaged in raising new varieties which are the joy of my life. I noticed that some of my choicest ones were being killed by the grubs. It is next to impossible to dig them out. They would take a row of the best, where the plants were fifty cents apiece; when they killed one, a sort of blind instinct told them to keep right on in the same row, and so plant after plant was destroyed. It would often cost a dollar or two to keep one of these pests. Presently, I noticed those little ridges thrown up which indicated the presence of moles and I said, "Now the avenger has come." You could see how they zigzagged around and caught the destroyers. It is supposed that moles eat the roots of plants. No, they are after grubs and worms. They do not eat the roots at all, but are after the rascals that do and they do love the white grubs. When I came to dig the phloxes, I found grubs in the rows unmolested by moles. The most diligent search failed to find one in the rows where they had made their blind furrows. A friend called on me while I was digging. He saw a mole at work. "Here, quick, dig him out and kill him!" He had the prevailing spirit which says, "Kill him, kill him!"—the spirit which invents mole traps. I said, "No, that little fellow is one of my best friends. He is worth a five dollar bill." Complaint is made against him that he ridges up the lawns and destroys young plants, but he never goes where there are no worms or grubs. First, he prefers white grubs and next, he takes the angle worms.

THE ANGLE WORM A PEST

Now, naturalists may say what they will regarding the angle worm and how much good he does in passing great volumes of earth through his maw, but in the Nebraska prairies, he is one of our worst pests. Our soil is generally light and friable and after he has worked in it a while it becomes like tough and heavy adobe. When dry, your hoe will ring on it as if you were striking a brick-bat. Such land dries out very rapidly and its value is reduced one-half. Whatever good he may do to other soils, please keep him out of ours and when we see the moles after him I say, "sic-em!" Sometimes moles will damage young plants by lifting them up so they dry out, but it does not take long to follow the ridges and tread them down.

In digging the phloxes, I could not see that they had injured the roots any. I noticed several places where the grubs had begun to work and I was fearful of their depredations next year, but lately I have seen ridges which show that their enemy is on their track and they will clear the ground so that it will be safe to plant in the spring. What birds are above ground, the mole is to the hidden enemies in the earth.

The flower market

The unsatisfactory state of the flower markets which we have been called upon to report for several weeks back seems to have been confined principally to eastern centers, no very serious reports having thus far been received from points west of Buffalo. There may be one or several causes for this, but the eastern florists with practical unanimity hold the late financial slump wholly responsible and with apparently some good foundations for the belief. We hope that the more hopeful tone which seems to be coming into general

business circles will quickly start a resumption of activity in the flower market. The season is already well along and it is full time that something was doing. As we go to press, on the eve of the first of the season's holidays, it is pleasant to note the stir made by the Thanksgiving Day demand in the local flower market, which seems to be normal in volume although prices are low on many things as compared with last year.

The violet situation

The back of the fancy violet price seems to be effectually broken at last. Year after year as violet houses have multiplied predictions have been freely made that over-supply would soon put an end to the annual inflation of values in the early part of each season, but, somehow, the violet always got the mastery and soared at will during the horse-show and foot-ball period, holding its own, as a rule, until after the holidays. This year the long-expected has come to pass. Horse show and foot-ball days have come and gone without any appreciable inflation of violet values and in all probability we have seen the last of the big prices. It has been contended by many that the aggregate of the violet business for the entire season has been adversely affected by the annual fall boost in prices which, it was claimed, excited wide-spread hostility to the otherwise popular little flower, and that with a more moderate beginning, a steadier demand and better average returns for the season would ensue. We shall have a chance this season to learn just what there is in this theory.

The National Flower Show

The organization of the various sub-committees of the S. A. F. general committee of fifty for the work connected with the National Flower Show to be held in Chicago next November, reads well and gives evidence that the magnitude of the undertaking and its possibilities are realized by those upon whom the responsibilities rest. Active work cannot begin too soon for eleven months is not an over-long time in which to perfect the details of such a project. We call attention with much pleasure to the following editorial note in the Los Angeles, Cal., Times:

"The Society of American Florists have under way the making of a national flower show, to be held in Chicago, in the autumn of 1908. If such an event proves a certainty our State should make a small appropriation for aiding the movement to the end that California may have on hand a creditable exhibit of native plants and flowers, with cones, barks, woods, etc., showing all the horticultural wealth of California so far as native ornamental plant life is concerned. Should the State fail to make the necessary appropriation, the Southern California Horticultural Society should endeavor to raise sufficient funds so that our southland should be well represented. After the dates are permanently determined it would not be a difficult matter to cause some of our showiest natives to flower out of season in case such treatment became necessary."

No doubt the committee will be glad to take advantage of the spirit of cordiality here shown and possibly follow the line of action suggested by adopting some systematic plan for enlisting the co-operation of the various States in making this a truly national affair and altogether the greatest event up to date in American horticulture. Exhibits of sensational interest from our Pacific possessions can probably be secured through the Department of Agriculture at Washington which has on more than one occasion given evidence of its willingness to assist the S. A. F. in work of an educational character.

The Value of Swampy Land

Some years ago the late H. H. Hunnewell sold an out-of-the-way lot of land. It was swampy and considered useless. Probably the main reason for selling was that it was not likely to become part of any land scheme. The family have all bought on the westerly side of the town, and this is on the east. I often felt surprised that he let it slip out of his hands for he had long appreciated the value of peat and was quick to see bargains of this kind. Though wet, it was high enough to be easily drained. There was a small stream which wriggled its way through, blocked here and there with leaves and branches—worse than useless for drainage purposes.

The time came when the new owner wanted to make an ice pond, and was anxious to dispose of his "mud." It was sold to the Hunnewells, and brought almost as much as the price paid for the land. The estate bought over a thousand loads, and it was a good investment.

Nothing is so valuable on dry land as a mixture of this black mud, or peat. What we bought was a very good brand. This swamp was a depression surrounded on all sides except the south by dense woods, and for generations leaves had been deposited here. The "mud" was mainly leafsoil, and this could be plainly seen when breaking it up. It is much better than the tough, leathery stuff that comes from stratified sphagnum moss, which we are familiar with in what stablemen use for box stalls. We had given it a thorough trial—for almost all kinds of planting. It has been used for pot plants—azaleas, acacias, heaths, cytises, chorizemas, and boronias, with excellent results. Tender rhododendrons which are stored in plant cellars and put out in the summer, never made better roots. My seedlings made—most of them—two growths last season, and some set buds, so that the prospects of living to see them bloom—which Mr. Hunnewell doubted—seem brighter. Rhododendrons planted last spring and some of them very large plants—a load for a pair of horses—have all done well. Sometimes as much as two cart loads were used to a plant. They look better this autumn than the plants not moved, which suggests some idea of renewing the soil about the old plants in the beds with "mud." Some large plants, standing in the way of improvements, and moved late last autumn, showed not a sign last spring, of the shift. This peat was used in the planting of evergreens—large and small—last spring, and all have done well. I think it was fortunate we had it on hand; in my opinion it was "mud" which carried all our new planting successfully through the late very dry summer.

The drainage of swamp lands is beginning to have the attention of the Federal Government. It is work for the States and should not be left to the time-wasting methods of the national government. The States fuss about highways; the drainage of swamps is a

larger question, and affects the whole nation materially and physically. It is a question of health as well as national prosperity. We all know it has got to come as population increases, but it is none too soon to commence now. The lands to be reclaimed are among the best, and when drained would become lastingly fertile. Almost all of them are high enough to be drained, and when very low ditching and throwing them into sections or "lands," will still further render them cultivatable. Land so treated is generally dry enough for most, if not all farm crops. In the fen district of Lincolnshire, England, lands of similar composition are treated to a covering of clay marl from nearby pits, and will then grow grass and other grain crops. For asparagus, onions, turnips, and all crops of the cabbage family, there is no better land. Draining and ditching a large area on the Sprague place at Brookline has made good pasture and hay land of land that was only fit for meadow hay, and was unsightly, and unhealthy at best. Nearer home, on the Wellesley College estate areas of low wet land have been improved, and some is now used for growing celery. The Fenway part of the Metropolitan Park System—the most beautiful of all—shows what has been accomplished in the reclamation of unsightly swamp land. The Wellesley Town Park, now in the making, is a strip of land about a mile long. A brook divides it, and low land borders both sides all the way. Surveys have been made and grades given for deepening and widening the brook. It is wonderful what has been accomplished. Boggy land is now good pasture land, and yields no inconsiderable amount of good hay.

It may be excusable that people clear wood land, and cultivate dry easily worked slopes, and leave low lands that need draining. It is easier. The cost of surveys and draining is considerable, but such lands when drained are more reliable than uplands. There is hardly a summer in the east without a dry spell of weather, and every gardener knows he cannot depend on getting crops without a lay of water pipes. A section of this land properly drained, ditched and "landed," could always be depended upon.

Whenever I have crossed the big swamp that lies between Hoboken Heights and Rutherford, New Jersey, I cannot help thinking what an oversight it is and a disgrace to the State that such a valuable piece of land so near a great city should be unused. If the "big guns" at Washington are really in earnest, let them get to work on this, and show to all the States what can be done; there could be no better object lesson, and no better place to show it. If the Hollanders had it in Holland they would not waste much time about it.

J. D. Hatfield

Wellesley, Mass.

A PATENT ON GRAFTING.

Under date of October 29, 1907, the U. S. Patent Office granted to Peter Keiser, of Grafton, Mass., patent No. 869,493, for method of grafting trees, on the following claim:

"The herein described method of grafting consisting of providing a scion, having buds thereon, then tapering one end of the scion longitudinally and laterally, one face of the tapered portion intersecting one of the buds on the scion, then entering the tapered end of the scion in an incision in the end of the stock, the severed face of the bud being in line with the severed bark at one edge of the incision."

Being somewhat skeptical as to the newness of this "invention" we asked Jackson Dawson for his views thereon, which we herewith append:

Editor HORTICULTURE:

Dear Sir:—The gentleman who has applied for this patent undoubtedly thinks he has found out something new. I do not think that it is new to commerce or practical men who have grafted trees and shrubs for years both in this country and abroad. In this country most of the grafting, except in a few cases, has been done to increase our fruit trees and a few ornamentals, but the grafting of evergreens, rhododendrons and ornamentals has been mostly done abroad for many years; in fact, it is only within thirty years that the grafting of evergreens or evergreen shrubs has been done even in a small way in this country, and this only by a few firms, as it was not considered to be a success financially and few firms were willing to risk the time and labor on a subject they knew so little about and which required so much attention.

All grafting, to be successful, is dependent upon the close connection of the two cambium layers and the finer and closer the cuts the more successful the operation, and if one eye can be brought down near the base of the scion to a similar eye on the stock so much the better as there is so much more chance of active growth. Some grafts, of course, need to be kept in close frames and others do equally well in the open if properly covered with wax to keep out air and moisture, but with all there must be a union of the two cambium layers to be successful. Woods themselves never unite; the cambium layers are what do the work. Plants that have been grafted for years, when split downwards, show that although the cambiums unite and grow around them and form a perfect outside appearance the small part of the woody tissue inside is never changed.

Charles Baltet, an eminent French horticulturist, who gave a great part of his life to the study of this subject, mentions thirty or more ways of grafting but all are dependent for their success on the fine connection of the cambium layers. While so many ways of grafting are possible only a few are used in practice, namely the saddle-graft used chiefly for rhododendrons, the side or veneer graft sometimes with a shoulder to hold the graft in place for evergreens, the whip or splice graft together with the tongue graft for small stock such as small apples, pears and others which are used almost entirely by our larger nursery growers who grow hundreds of thousands of fruit trees for the market and generally do all their grafting during

THE FASTIGIATE GINKGO.

Mr. Lonsdale's notes, accompanied with the four illustrations, in HORTICULTURE of Nov. 9th were very interesting to me. The trees near Horticultural Hall are old friends of mine and have been the subject of many debates when viewing them with others. That they are decidedly pyramidal cannot be denied, and this habit is more pronounced than in the more common form.

In considering what is the type, I think we might reasonably decide on that form which is most largely present among seedlings. The illustrations appearing herewith represent specimens the writer is familiar with, and their history is as follows:

They are from 10 to 12 years old, grown from seeds, and only ordinary plants, not having been specially selected. They have not been pruned and I doubt if they were given a trimming at the time of transplanting.

They represent the same form I have seen in thousands of trees in the nursery rows—trees, too, that were originally from the seed beds. Today I know of a row of young trees that will some day be of the same form as these illustrated, as their present appearance predicts this same style.

If this form I speak of is the type, it can readily be seen that as a shade tree it could not be considered especially desirable.

There is one way of treating this tree, however, that makes it very desirable as a shade tree, and that is to prune its leader when young. By this method the tree is forced into a spreading habit.

I am convinced that often the tree is injured when young or pruned, and through this means we come across more of the spreading kinds which, however, I contend are not the type.

WARREN J. CHANDLER.

the winter, storing them in boxes or beds of sand or earth in cool cellars until the spring planting when they are planted in nursery rows deep enough to cover the graft, and at the end of the season the plants are fit for sale, and the cleft graft for all coarse grafting over a large tree such as apples, cherries, plums or other old trees that need renewing, or if needed to try new seedlings to ascertain their value commercially.

For my part I see no sense in a patent on grafting, except in municipal affairs. To patent anything else is only throwing money away.

JACKSON DAWSON,

Supt. Arnold Arboretum.

Jamaica Plain, Mass.

RUST ON CARNATIONS.

Editor of HORTICULTURE:

I have been troubled with rust on my carnations and it seems to be still spreading. Would you kindly tell me the best cure for it and how to use it?

MACK.

It has been our experience with carnation rust that it will run a certain course, and then seem to disap-

pear. The treatment for rust which we use is plenty of fresh air, holding the temperature as evenly as possible, and keeping the plants free from moisture. I should advise picking off only such foliage as is dead, keeping the plants perfectly straightened up and removing all rubbish or litter from the bench which may have been applied as a mulch. By securing good root action and plenty of growth we believe the rust will be, in a short time, overcome.

C. W. Ward's remarks on carnation rust in his book, "The American Carnation," and the treatment of plants affected by rust, is substantiated by our experience, and we believe these remarks cover the situation thoroughly.

MOVEMENTS OF GARDENERS.

E. E. Grotling of San Francisco has taken up his residence in Berkeley, Calif.

Alfred Reidenbach of New Britain, Ct., has accepted a position as manager of the Hugh Chesney greenhouses, Farmington, Ct.

EXHIBITION CHRYSANTHEMUMS.

A Paper Read Before the Chrysanthemum Society of America by William Duckham.

The chrysanthemum continues its prosperous and undisturbed march down the wide avenue of popularity. We are a year older; the chrysanthemum also has added another year to its career, but it is not a year older, it is more youthful, and full of vitality, and capable of new and fresher development than it was a year ago. We are distinctly older, and may have some passing twinges in the bones to remind us of that very disturbing fact. The chrysanthemum is fresher and more beautiful and more varied and even a little larger than ever.

The Reason for Popularity.

Wherever flowers are grown the chrysanthemum now has its place and its honor. Its forms seem almost endless and its varieties are bewildering. I am, however, inclined to think that some excellent people entirely miss the real explanation of the great popularity which the flower now enjoys. Permit me to say, with all conviction and earnestness, that the popularity is entirely due to the growing of exhibition varieties. I am convinced that if you were to secure all the flower shop windows on Broadway and fill them with pompons, and with every other variety that grows and flowers at this season, and omit entirely the exhibition varieties, I am convinced, I say, that they would attract no popular attention whatever. I grant that flower lovers of the old-fashioned variety, who worship constantly at Flora's shrine, no matter what she has to display, would view them with pleasure; but the greater public, the press, society, and even "the man in the street" would pass them unnoticed. The splendid position in popular and social esteem now held by the flower is due to that wonderful development from the tiny little parent flower to these massive blooms that now entrance every beholder. If we had here before us the blooms that were exhibited even ten or twelve years ago, even we who know the history of the flower would be dumbfounded at the progress, and, I make bold to say, the end is not yet. The flowers which only the few could produce when the shows first began are now produced by the many and the leaders are more closely pushed by their followers year by year. And, as the blooms increase in size, in finish, in brilliance of color, in decorative quality, so also does the popularity of the chrysanthemum increase. The growing of larger, nobler, more stately flowers, and in greater abundance, this is one sure way of holding the popular favor.

About Cultural Methods.

How shall we do this? We are all learners? If by any fortunate chance you could learn something from my methods, I have no doubt that I could learn from yours. But as you are not speaking at this moment, and I am, I must venture to assume the role of adviser and tell you quite frankly and simply just how I grow my flowers. I do not assert that these methods are the best, I simply say that they have come out of my experience and they seem to serve me well.

And now we come down to the point

of cultivation, which perhaps is the one all important thing in maintaining the interest in the exhibition of chrysanthemums, for without good cultivation no good or large flowers would be seen. Each of us has no doubt his own ideas and ways of doing this, but the following is what I have practiced for some considerable time. I do not say it is the best way—far from it, perhaps—for I realize there are a number of you here who could do all this much better than is possible for me.

I have tried early, medium and late propagating and am frank to say generally the medium early propagation toward the end of February or early in March has given me the best results. It is needless for me to go into detail of the method employed; you all know. But I do claim that as soon as plants are rooted and potted no neglect can be made up. The plants require all the attention it is possible to bestow.

Time to Propagate.

Some of you may say and can produce the very finest flowers from much later propagation. This I am free to admit; so have I produced good flowers from late struck cuttings. In fact some of the best flowers not only in finish, color, etc., but the largest, were from plants propagated in April, but for general acceptance I would prefer the first week of March. I shall omit the general cultivation. Suffice it to say it is impossible to give the young plants too much care and attention in the growing season.

I have grown plants in boxes, in benches and pots; all with about the same result. The best flowers perhaps were grown in the bench divided with strips between each plant confining the roots to a small space, and I found the stronger the growth the better the flowers, especially when the roots were confined to the smallest area. I have always been opposed to large pots or spaces; after all I have observed, I am convinced more than ever, for when feeding time comes you have all live and growing roots where on the other hand if too much space and soil is given, a lot of roots die and the plants consequently suffer.

Taking the Bud.

Now to flowers; first, we must have the bud and to me the bud is quite as important as to have a strong, vigorous plant. This has surprised me more the past year or two and particularly this year—brought about somewhat in my mind by the Australian varieties. I will refer only to crown buds, for I don't know of five varieties, which terminal or even late crowns would win in fast company. The introduction of so many Australian varieties perhaps accounts for this, my experience with varieties of Australian origin being that the buds can be taken much earlier and will develop perfectly, especially if the weather should be warm; if not put the house a few degrees warmer by fire heat and you will find buds that would seem impossible to open will develop perfectly, and what appears at one time a hard core without the slightest semblance of a flower develops finally into a beautiful and well finished bloom.

I have in mind a batch of Nellie Pockett, which showed buds August 1st. It appeared a little early to take them, but if allowed to go on, would in my mind, have been a little late. A part was taken and the result was that no finer Pockett have I ever seen; the other half that was allowed to go on made only medium or second class flowers, although taken August 21st to 24th. This applies to a number of varieties, and I say do not be timid of taking an early bud, especially of varieties of Australian origin, and as I said before it is not always the strongest and most vigorous plant that produces the best and largest flowers, but just as important is the bud taken at the right time.

I would wish it to be distinctly understood I am speaking of exhibition varieties; but at the same time do not think I despise the different types, such as decorative, or commercial, or the beautiful singles, for all are very beautiful and all have their usefulness and are fully as beautiful as the large Japanese, but as I was asked to say or confine my remarks to exhibition varieties, I have for that reason done so. Feeding chrysanthemums is too well understood for me to dwell on; you all have your own way, and it varies but little; I find the chrysanthemum is not very particular what it is fed on, provided it is not fed on the same diet too long; a change is always appreciated and the plant responds and will return many times over, the best care and feed one can bestow upon it.

LOCAL AND FLORISTS' SHOWS.

At the Edgefield, Ga., chrysanthemum show, Robert Berckmans of Augusta officiated as judge.

Tong & Weeks, Ashtabula, Ohio, on November 15 and 16, showed chrysanthemums in great variety.

At Hewitt's Flower Store, Monmouth, Ill., Nov. 4-11, the chrysanthemums attracted many visitors.

Central Park greenhouses, Davenport, Iowa, have been open to the public during the chrysanthemum season.

Park street greenhouses, B. T. Genter, Foxcroft, Me., made an unusually attractive display this season.

A splendid display of chrysanthemums was made by F. E. Blake & Son, Marion, O., on November 8th and 9th.

At Highland Park, Rochester, N. Y., upwards of 100 varieties of chrysanthemums have attracted visitors in throngs.

An attendance of upwards of 4,000 was the gratifying result of the annual show at Jos. Heintz & Sons, Jacksonville, Ill.

At Undercliff, St. Johnsbury, Vt., on Nov. 16, after the flowers had been admired by the public they were all cut and sent among the sick.

H. P. Potter, Wilmington, Del., has opened his greenhouses to the public, with a noteworthy stock in which chrysanthemums lead. Among his carnations is an unnamed variety, a cross between Mrs. Thos. W. Lawson and Queen.

The Horn Bros. at Rittersville, Pa., displayed the products of their 13 houses the past week to hundreds of delighted admirers. Ernest Ashley is another successful grower at Rittersville for whose display the people wait.

PARIS AUTUMN SHOW

On Friday, November 8th, the National Horticultural Society of France opened its great autumn show of chrysanthemums, fruit and vegetables in the two large greenhouses on the Cours la Reine, near the Champs Elysees, Paris. The opening day was as balmy and gentle as early September and thousands of visitors pressed their way towards the show, the crowd at times being so dense that movement round the show, notwithstanding the great space, was slow and tedious.

After the judging was over M. Fallieres, president of the French Republic, paid an official visit. He was escorted round the show by M. Viger, president of the society, M. Abel Chatenay, the secretary, M. A. Truffaut, M. Philippe de Vilmorin and quite a suite of officials and members connected with the society. The jury were entertained to lunch at the Restaurant Levoien at which M. Viger presided there being altogether about 150 guests, and the whole proceedings were of the most cordial and hospitable character. After the show was declared open the band of the 119th Infantry Regiment gave a concert during the afternoon.

The promenade alongside of the Seine leading to the entrance of the first large greenhouse contained numerous beds of chrysanthemums at intervals and many displays of hardy trees, conifers and shrubs, Messrs. Brochet, Lecointe, and Moser and Sons being the principal contributors. Garden accessories in the way of pottery, statuary, greenhouses, etc., were numerous, and in addition there were right and left many exhibits of trained fruit trees in great variety.

The chrysanthemums claim our chief attention and of all the exhibitors Messrs. Vilmorin, Andrieux & Co. must be awarded the palm for their

The Paris Show. General View of One of the Greenhouses.

display was most remarkable and unquestionably the grandest in the show. Immense specimen plants were arranged in a series of geometrical beds each with a grass edging and small pompons in pots as a border. In the middle of the whole was a grass lawn with corner beds filled with dwarf, large-flowered plants and a path around it. In the middle of this lawn was an immense trained specimen of Tokio 8 or 9 feet in diameter.

Another worthy exponent of the art is M. Nonin who has for many years past been noted as a raiser and as a grower of fine exhibition plants. This exhibitor placed his plants in quite an original form. It was in the shape of

a hollow square with entrances near the corners; in the middle was a long rectangular bed with a pathway round it thus enabling visitors to see either from the inside or outside every bloom in the collection. Ami Nonin, Ch. Bacque, Duchesse d'Orleans, Sapho, W. Duckham, Naples, W. R. Church, Roi d'Italie, Embleme Poitevin, Alexis Dessarps, Mr. T. Carrington and Triumphe de Montbrun were only a few of the numerous varieties staged. In the middle bed M. Nonin had some large flowered early Japanese for which certificates were granted.

Somewhat nearer the entrance were several large exhibits of plants in pots from eminent cultivators, who are not content to stage them in one group but often place their collection in two or three different places in the show.

M. Cayron had two immense lots of grafted standards and specimen plants for which he was awarded the Grand Prix d'honneur. Many of the varieties were quite unknown to us being purely French. Facing the entrance was a large group of pot plants from M. G. Magne. Some good flowers were found here including many of the Marquis de Pins' seedlings of the past few years and others.

We wander onward and now for a moment pass into the second large greenhouse, passing several things which we must see again, for anxious friends have directed us to a most conspicuous object which towers above everything in the show. It is a unique floral artistic composition principally of chrysanthemums by M. G. Truffaut, a well known authority on horticultural chemistry. We have seen some artistic groups set up by big trade growers in England but for striking originality never anything to equal this. Let the reader imagine a rectangular grass lawn, in the middle a perfect monument of colossal blooms of chrysanthemum F. S. Valis mingled

The Paris Show. Part of the Vilmorin Exhibit

with autumn foliage, standing from 12 to 15 feet high; at the corners of the lawn four large glass vases filled with H. P. roses; between these at intervals other vases filled with monster chrysanthemums Mrs. Barkley, W. R. Church and others of that type.

The exhibit by M. Dubuisson-Foubert, was another instance of great decorative and artistic ingenuity. A very bold effect was created by the way in which large blooms of F. S. Vallis were set up in a huge central vase. Other vases were filled with big blooms, one of white varieties, another of yellow, another of pink, another of crimson and so on. This exhibit was awarded the prize for the biggest bloom in the show. F. S. Vallis was the variety honored. The prize for the second biggest bloom was awarded to a small exhibitor of only 12 blooms who had a grand Mme. Paolo Radaelli.

Groups of chrysanthemums also came from many other exhibitors which we can only briefly mention by name. Asile de Ville Evrard, Messrs. Cordonnier et fils, M. M. Seveane, Avarre, Ecole d'horticulture St. Nicholas, Rene Oberthur, Alfred Chantrier, M. M. Bezy, L. Leclerc, Bardac, Dolbois, Paul l'Abbe, Doleans, all sent collections of more or less merit.

One of the chief points of interest in a French show is always the classes open to the new seedling raisers. The greatest of these is still a well known man the wide world over, Ernest Calvat. We find his lot arranged on the ground level; the flowers are cut with long stems and are thus directly under the eye of the visitor. About 30 new varieties, five blooms of each in a vase, were staged by this exhibitor who was awarded a Prix d'honneur. The group only narrowly escaped winning the Grand Prix d'honneur, Calvat losing by one vote only. All the blooms were big, solid, massive Japanese of the usual Calvat type, every flower an undistributed novelty. Notes of these must be reserved for a future occasion.

Next to Calvat's lot was a collection from Messrs. Cordonnier et fils. This firm has distributed many good things and in their lot we noticed fine flowerers of many popular varieties. The Marquis de Pins had a pretty display of cut blooms of his new seedlings—they were staged in glass vases effectively arranged on a square green turf lawn, a style much in vogue with exhibitors at this show. There were some fine novelties among them which may form the subject of a few notes later on.

Many of the artistic floral decorations were largely composed of orchids some fine things being set up by La Chaume, the eminent florist of the Rue Royale, and M. Ed Debrie. The collections of orchids were exhibited in two side rooms for the purpose of protection from the outside atmosphere. In passing through we particularly noted the lots staged by M. A. Regnier, M. M. Maron et fils, M. Geo. Magne, M. Beranck who had a grand lot of cattleya, vanda, cypripedium, etc., arranged with palms, ferns and other decorative subjects, M. Le Sueur. The Ecole horticole de Plessis staged some fine crotons fronted with ferns, etc. and there were in both rooms allotted to the orchid display a group of choice foliage and ornamental plants from Messrs. Truffaut in which were Croton Reedii, C. B. Comte, C. Maurice Rivoiro, C. Pres' Demole, Nephrolepis Whitmanii, Anthurium Andreanum, Dracaena Versaillesense, D. Godseffiana, Ixora Dixiana and many more.

In dahlias there were several large exhibits, the leading exhibitors being M. M. Cayeux et Leclerc, who staged three or four big lots of dahlias chiefly of the Cactus kinds although here and there one found decoratives and the old type of show flower. A few noteworthy varieties were, Rene Cayeux, Thuringia, Lucifer, Mirifique Ada, Cinnamon, etc. Another good lot was from M. Brochet, Cactus varieties Firebrand, Radiance, Ruby, Cornucopia, Robt. Sallier and Baden Powell were among the most attractive.

Begonias at the Paris show are usually staged in large numbers. Among the principal exhibitors were Messrs. Vailander Freres. They had a lovely lot arranged in separate colors, both double and single. The blooms were all of large size and consisted of extensive sheets of orange, white, crimson, pink, red, yellow and bluish in striking style. Another exhibitor, M. Billard, staged a daintily arranged group. Cyclamens and primulas were also well represented and in the clematis class M. G. Boucher staged a fine group. Of carnations there were many large groups, M. M. Liveque et fils and M. Beranek and the Ecole Horticole du Blesis having two or three well filled with beautiful flowers. A fine lot of Hydrangea Hortense came from M. Desire Ramelet.

Most visitors to the Paris Show have noticed the fruit and vegetables which are uniformly of a high order of merit. This year's show was no exception to the rule and at the bottom of the flight of steps in the corridor leading to the walk by the Seine Messrs. Vilmorin Andrieux Co.'s exhibition of vegetables was one of the grandest features. It consisted of a border 41 yards long and about 7 or 8 feet in width filled with every conceivable vegetable in a high state of cultivation. Enumeration of the contents would necessitate a catalogue by itself. The pears and apples were staged in the most important exhibits in huge semi-circular pyramids and were a sight not easily forgotten. Grapes when shown by such eminent cultivators as Messrs. Salomon and Messrs. Cordonnier and Sons are fine products of French cultural skill, and besides them M. Whir, Chevillot, David, Masle, Sandron, Pigoche and others entered the lists.

The show remained open for a week and our friends of the National Horticultural Society of France are to be congratulated on the very great success that attended their efforts.

C. HARMAN PAYNE.

PERSONAL.

John Graham, of Ottawa, Ont., is seriously ill with pneumonia.

Mr. and Mrs. Farmer of Patoka, Ill., have returned from their extended wedding tour to Portland, Oregon, and Seattle. Mrs. Farmer was formerly Miss Jennie Spencer of Salem, Ill.

HORTICULTURE'S REPRESENTATIVES.

The following named gentlemen represent this paper in their various local districts, and are authorized to accept subscriptions, advertisements and news items:

The Paris Show. Decorative Exhibit by Ed. Debrie

NEWS OF THE CLUBS AND SOCIETIES.

AMERICAN CIVIC ASSOCIATION.

In support of the merger of the American League for Civic Improvement and the American Park and Outdoor Art Association, as the American Civic Association, President J. Horace McFarland said recently:

"As merged, the American Civic Association has made for itself a position in the forefront of advanced civic improvement effort and has attained a national prominence never possessed or approached by either of the constituent societies.

"For instance, the campaign for Niagara's preservation, conducted by the American Civic Association, under which the power developments representing \$40,000,000 of capital at Niagara have been halted and national legislation controlling the Falls enacted and put in force, required large expenditures, for which the officers of the association pledged themselves personally.

"If ever an end justified an effort, this might be cited as such a case. If the association had done nothing else during the year it would have justified its existence and maintenance. The Niagara campaign has been one of many carried on with increasing success and public support.

"The American Civic Association, since June, 1904, has reached its membership fifty-four times with definite and encouraging literature, mainly the production of experts at the head of its fifteen departments, all serving to unify, foster and advance the widespread movement for civic betterment. Hundreds of newspapers have been glad to receive the clipping-sheet service, and the officers have written thousands of letters to inquiring men, women and communities, thereby fostering the spirit of civic advance."

DETROIT FLORISTS' CLUB.

The members of this club arranged a most creditable exhibit at Harmonie Hall but the attendance outside of the club's membership was small. The most noticeable displays were Robt. Craig & Co., Lula and Garza chrysanthemums; Chicago Carnation Co., Aristocrat; Stevenson Bros., Baltimore, carnation Splendor; E. G. Hill & Co., new roses, Rhea Reid and Mrs. Jardine, and chrysanthemums.

Among local products mention should be made of Thos. Browne's chrysanthemums, Mrs. Swinburne, Timothy Eaton, Golden Chadwick, Maud Dean, Mrs. Weeks, Golden Wedding; John Breitmeyer's Sons, chrysanthemums, Cocos Weddeliana, catleyas, dendrobiums, poinsettias, Lorraine begonias, cypripediums, Farleyense and Whitmanii ferns; Robt. Klage's La Detroit and Kaiserin roses, also double and single violets. Carnations were exhibited by many and comprised good flowers of all the popular varieties. Miesel & Sons displayed cyclamens, baby primroses and Whitmanii ferns. After this truly great exhibit had been thoroughly but amicably criticized the social part was attended to and dancing finished the evening and assisted to start the new day well.

FR. DANZER.

TOLEDO FLORISTS' CLUB.

The chrysanthemum show which was held on November 16 was very successful. It was held for the interest of the public but the craft reaps the benefit. The receipts covered the expenses, which means a good deal for the first attempt.

First honor belongs to the E. G. Hill Co. who sent a fine collection of chrysanthemums of which Joseph Roacher and Sunshine received the most attention. A vase of their new rose, Rhea Reid, was also shown. Ch. Winterich, of Defiance, O., proved that he can grow chrysanthemums as well as cyclamens by a vase of Jeanne Nonin and President Roosevelt arranged with Whitmanii ferns and Mahonia aquifolia. The Chicago Carnation Co. had a choice exhibit of carnations, and the Fostoria Floral Co. displayed some magnificent Golden Gate roses. Among the local growers Mr. Halbich exhibited the best flowers, George Bayer the greatest number, including fine hardy varieties, Henry Miller, Chas. Koelker & Sons, Krueger Bros., Emil Kuhuke, Harry Heini, S. N. Peck and Davis & Magee had plant and flower displays of great merit, the latter showing crotons, dracaenas, Lorraine begonias, etc., in addition to chrysanthemums. John Barrow cared for the outside decoration with his bay and box trees, and the Schoen Floral Co. arranged the handsome window display and an artistic table decoration. Zenobia Floral Co. contributed a wreath and basket and Mrs. C. F. Imoberstag a huge basket about six feet high, the bottom of Latania borbonica and the handle of pink and white chrysanthemums and ribbons.

AMERICAN ROSE SOCIETY.

The American Rose Society has issued certificates of life membership which are very handsome documents worthy of being framed and preserved, and certificates for new roses exhibited as novelties not receiving the society's gold medal but worthy of special notice. To make these certificates more interesting a new seal has been prepared which in design is distinct and original.

The society has now begun its efforts to make ready for the exhibition to be held in Chicago. The show of Ramblers from the west is expected to outshine in quantity anything which has been given to the public. New roses from two or three growers in the east are expected to be of interest to all who are working along this interesting line.

The list of life membership is increasing as one and another drops into line. The society is not very rich, but it is likely to become the head and front of the special associations of cultivated flowers in America.

The executive committee held a meeting to perfect details for the spring exhibition at Chicago, at the Hotel Martinique, New York, on Monday, November 25. There were present Messrs. Robert Simpson, Benj. Hammond, Harry May, F. R. Pierson and Robert Craig.

BENJAMIN HAMMOND, Sec.

THE LANDSCAPE GARDENING CLASSES.

The landscape gardening classes of the Gardeners' and Florists' Club will have their first session at Horticultural Hall, Boston, on Tuesday evening, December 3. We are glad to learn that the interest manifested and the number of students enrolled warrant the formation of two classes—beginners and advanced—and that the class-room study will be reinforced by frequent opportunities for practical field work. The lively interest manifested is very encouraging to the committee, who have labored assiduously on this work.

CLUB AND SOCIETY NOTES.

In the plans to be presented to the legislature for the improvement of the ground and buildings of the New York State Fair Commission, a horticultural building to cover 75,000 square feet is included.

In the Maryland space at the Jamestown Exposition last week notable exhibits of chrysanthemums were made by H. Weber Sons Co., R. Vincent, Jr., & Sons Co., C. W. Rose, Henry Traill, and I. Moss.

The Vermont Horticultural Society will hold its annual meeting in Burlington, December 3, 4. J. Otto Thilow of Drear's, Philadelphia, and Prof. F. A. Waugh of Amherst, Mass., are among the speakers. The Central Vermont, Rutland and Boston and Maine railroads will allow excursion rates.

At the annual meeting of the Huntington (N. Y.) H. and A. Society on November 14, new officers were chosen as follows: President, H. Paulding, Jr.; vice-pres., Chas. Wicks; sec'y, A. H. Funnell, treas., D. Conklin. The death of President Wm. O' Hara occurred during the year. The society has run four years without a debt.

The Utica (N. Y.) Florists' Club held its annual banquet and exhibition on November 12. In carnations Dr. W. A. Rowlands, Wanoka Greenhouses, G. H. Benedict, E. J. Byam, C. F. Seitzer, F. McGowan and C. F. Baker had fine displays. Roses were shown by L. E. Marquisee, L. F. Goodwin, M. Lowery; and there was a generous display of the popular chrysanthemum.

The first flower show given by the Arkansas State Floral Society opened on November 14 in the banquet hall of Hotel Marion, Little Rock. In point of attendance and financially it was a gratifying success.

Poehlmann Bros. Co., H. W. Buckhee and Vestal & Son were the largest exhibitors and prizes in the various chrysanthemum, rose and carnation classes went chiefly to them, being about evenly divided. E. G. Hill Co. were first with 30 white chrysanthemums and N. Smith & Son first with 15 yellow, two varieties.

Special awards were made to Peter Reinberg for vase of rose Mrs. Marshall Field, E. G. Hill Co. for rose Rhea Reid, Poehlmann Bros. Co. for roses Cardinal and Mrs. Potter Palmer, C. W. McKellar for orchids, S. Burns and Ed. Marquandt for double violets, Zeck & Mann for collection of chrysanthemums.

Floral Colors

Primitive Colors.

The various colors of flowers are not, as might be supposed, the result of chance, for their existence and further production appear to be the result of, and to follow, certain laws.

There still appears to be some difference of opinion as to what was the primitive color of flowers, supposing that there was only one color in the first flowers. Some maintain that the first color was green, others that it was yellow. There is, however, little doubt that primitive vegetation being composed of flowerless plants was entirely green, the coloring matter of which was, as it is today, chlorophyll. This chlorophyll green is divisible into two other colors, a strongly yellowish green and a distinctly bluish green. To these two pigments the names of Xanthophyll and Cyanophyll have been given, and are generally considered the primary sources of all the various colors exhibited by flowers today, and which may be divided into two classes in the order of their appearance in time:—

Flowers are therefore Cyanthic—that is, capable of varying from blue to red and white, but never yellow or orange; or they may be Xanthic, being able to vary from yellow to red and white, but never blue or violet. This seems to point to the futility of expecting to produce a blue tulip, rose or dahlia; nor, on the other hand, is it likely that we shall ever see a yellow geranium.

Some botanists, however, consider that white was the primary color (leaving out green, as in botany green is not, strictly speaking, a color), but there appears to be little evidence to warrant such a conclusion, at least so far as plants are concerned, although in this connection we must not forget that the combination of all the colors of the spectrum produces white.

That variation in flower-color follows one of the above series is, I think, obvious not only by what has been produced in the way of color by artificial selection and hybridisation, but also—and more so—by what has not been accomplished.

Vegetable Pigments.

Apart from its origin and relation to flowers, color is a subject which is a large and difficult one, comprising as it does its physical, physiological, chemical, and biological sides. The chemistry of the vegetable pigments is especially difficult, and is confronted with the initial difficulty of isolating most of them from other plant-products so that they may be obtained in a state of purity. The biological side is chiefly connected with the question of the inheritance of pigment and the losses and gains of pigment in individual plants which constitute color-variation; and it is here that great con-

fusion exists, for both Mendelists and anti-Mendelists concern themselves very little about the inheritance of pigment, but much about the inheritance of color, which is quite another matter.

Breeding for Color.

All those who have been engaged in hybridising plants, and especially in producing new color varieties, know full well the difficulties and uncertainties which are attached to attempts to breed varieties pure from seed. In spite of present uncertainties, more evidence is being obtained year by year which points to the fact that whatever the color which may be produced it is the result of fixed law, known as the law of heredity, and which is based upon the theory of the continuity of the germ-plasm. At present this law is incapable of being demonstrated in terms on similar lines to that of a chemical formula, that is to say, that point has not yet been reached when by the crossing of two varieties of plants, whether of the same or of different colors, we can be sure of the color or colors which will be exhibited by the offspring.

At the International Conference on Plant Breeding in 1902, Professor William Bateson, M. A., of the University of Cambridge, England, stated, "We have now a clear notion of the meaning of purity or fixity of type and of the consequences of dominance—phenomena which go to make up the daily experience of those who are practically engaged in plant-breeding. Apart from the profounder mysteries, the unravelling of the problems of heredity has now become a matter for statistical research, and we may confidently look forward to the time when the laws of heredity will, in their outward presentations at least, be as the laws of chemistry now are, a matter of everyday knowledge."

An Interesting Lecture.

Professor Bateson is now in this country, and on October 30th, last gave an extremely interesting lecture on *The Inheritance of Color in Animals and Plants*, which may be taken as embodying as far as it went the latest discoveries on Mendelian lines of the laws connected with the subject. The lecture was naturally of a technical character, but, being copiously illustrated by diagrams and lantern slides the latter splendidly reproduced from photographs, was easily followed by a large audience. Practically the lecture was confined to plants, and the photographs from which the slides had been produced were taken, with one or two exceptions, from plants grown by Professor Bateson himself.

Mendel's Discoveries.

He commenced by stating that "The discoveries of Mendel in the middle of the 19th century, when applied to biology in general, prove the inheritance of color to be the most complicated of transmitted characters. Mendel discovered that plants are not simply plants with all their diverse attributes, but that they are composed of elementary factors, which when combined make up their different complicated characters; and also that when the germ cells are formed those complications are analyzed, as it were, by the germ-cells so that the elements are divided among those germ-cells.

Further, that the germ-cells due to the different parent-plants remain separate, and each germ-cell from each parent produced similar cells and no others, in equal numbers. The truth of this rule has received striking confirmation by the discoveries of Mr. Hearst in England when applied to the color of the eyes in man. Blue eyes have the coloring pigment at the back only of the iris; but brown, hazel, or grey have pigment in front as well as behind. Therefore the human eye can as regards color be divided into two classes, those having coloring pigment behind only and those having it both behind and in front of the iris. It is considered that those having no pigment in front are recessive. Broadly speaking, parents with no pigment in front will have children like them."

Experiments with Sweet Peas.

The lecturer then illustrated some experiments with sweet peas. A tall one five feet high had been crossed with a dwarf of only nine inches in height; the resulting progeny were all tall. These tall ones produced in the next generation three of tall to one of short, and, he said, "if these latter are kept pure the tall will always produce tall, and the short will always produce short."

"Albinoism," the Professor said, "is recessive, but albinos on being crossed with colored always gave colored offspring, but if when these colored offspring bred, white ones were produced, these latter if kept pure would breed white indefinitely." The results of a very striking experiment illustrating this point were then shown. Two white sweet peas were crossed, and the result was a purple identical in character with the wild sweet pea of Sicily from which all our garden sweet peas originated. "This," said Professor Bateson, "proves that in one or both of the whites some of the germ-cells of the original wild type continued to exist. On carrying this experiment further I found that breeding from the resulting purple produced nine of all colors, purples and reds, to seven of white."

Some Facts for the Hybridist.

"Thus you cannot tell the composition of a plant by merely looking at it, and experiments on Mendelian lines prove that the surest method of analysis was to conduct a series of breeding experiments, and by this means anyone thinking of hybridising with a view of producing a plant of a special color, should first find out the composition of the color or colors of the proposed parents because, as shown, two or more white sweet peas may have each a different color composition, and the same applies to all colors. In the course of my experiments with sweet peas I have frequently had purely female plants which, as they produced no seed-pods, were continuous bloomers."

Illustrations of breeding from a white *Primula Chinensis* showed practically the same results as those of the sweet peas.

An instance of natural hybridisation was described and illustrated. A hybrid *viola* was discovered which was undoubtedly the result of a cross between a species with a papilionaceous leaf and one with a pedate leaf. The seeds of this hybrid were sown and

BETWEEN YOU AND ME, What do you think of the Buyers' Directory and Ready Reference Guide of HORTICULTURE? I always look it over before I do any buying

gave rise to plants having leaves which varied in character, but which in the third generation produced only plants having the distinct types of the two original parents. This being another proof of the general rule in Mendelism, that the crossing of two types produce hybrids, these hybrids produce further hybrids, but the latter give a generation which goes back again to the original species. This seems to point to the practical fixity of species and apparently goes to prove the truth of Weismann's theory of the continuity of the germ-plasm.

Professor Bateson concluded his lecture by saying: "I believe we are nearing further and very striking discoveries in these directions, and which will have a very important influence on methods of plant hybridisation, and which will also, I think, throw very considerable—how much it is at present impossible to say—light upon the question of the origin of species."

ARTHUR SMITH.

ORNAMENTAL LEAVES AND GRASSES.

Decision by U. S. General Appraisers.
(T. D. 28481.)

No. 17234.—Ornamental Leaves—Grasses—Protests 269602, etc., of Decorative Plant Company against the assessment of Duty by the collector of customs at the port of New York. Before Board 1, October 31, 1907.

The merchandise, which was classified under paragraph 425, tariff act of 1897, relating to ornamental leaves and grasses, is claimed to be dutiable under paragraph 449 as manufactures of grass or palm leaf, or under section 6 as an unenumerated manufactured article.

McClelland, General Appraiser: The special reports of the appraiser on these protests state:

The merchandise in question marked A on the invoice consists of natural grasses, dyed and prepared, suitable and used for ornamental and decorative purposes.

* * * The only witness called on behalf of the importing company was its manager. It appears from its testimony that the merchandise in question consists of "agrostis," a natural grass dyed (Ex. 1); palm leaves split and dyed to imitate "isolepis grass" (Ex. 2), and "papyrus flowers," a name applied by the shipper to designate this particular article (Ex. 3). It appears from the record that the articles under consideration are subject to no further treatment after importation to make them more ornamental, but are assembled with other materials and used in the condition imported for decorative or ornamental purposes. From the evidence presented we can see no reason for departing from the former rulings of the Board covering merchandise imported by the same company similar in character and use to that here involved. Abstract 15504 (T. D. 28205) and Abstract 16859 (T. D. 28438).

We therefore overrule the protests and affirm the decision of the collector in each case. Note G. A. 5800 (T. D. 25630); Kreshover v. United States (152 Fed. Rep., 485; T. D. 27826), and Herman v. United States (128 Fed. Rep., 420; T. D. 25091).

THE BROAD OUTLOOK OF THE AGRICULTURAL EXPERIMENT STATIONS.

▲ Paper by Dr. A. C. Truac, Director, U. S. Office of Experiment Stations.

The First Agricultural Experiment Station.

Little more than half a century has passed since "a company of farmers joined themselves together in the little German village of Moeckern, near the city and under the influence of the University of Leipsic, called a chemist to their aid and with later help from government, organized the first agricultural experiment station." Thus was created a special and distinct institution in which scientific research is organized under governmental auspices "as a necessary and permanent branch of agricultural business." For it is the object of the experiment station "to make a regular business of discovery for the use of farming," "to promote agriculture by scientific investigation and experiment," and to diffuse as well as to increase knowledge which improves farm practice and elevates farm life.

The way for such an organization had been made by the earlier researches of such men as Liebig in Germany, Boussingault in France, and Lawes and Gilbert in England, mainly in the domain of what is now termed agricultural chemistry, and with special reference to the preparation and use of commercial fertilizers. By 1851 the time was ripe for a more definite and permanent organization of agricultural research. This was shown by the rapid multiplication of agricultural experiment stations in Europe. By 1866, or within 15 years, 30 stations had been established in several countries.

American Agricultural Research.

In the United States the movement on behalf of agricultural research has a history similar to that of the same movement in Europe. Almost as soon as agricultural teaching was introduced in American colleges, researches in agriculture were begun. This was true at Yale College, where Prof. Norton began to teach agricultural chemistry in 1846, and was followed by Prof. S. W. Johnson in 1856, whose studies and investigation led to the publication of that great textbook, "How Crops Grow," in 1868.

The early agricultural colleges in Michigan, Maryland, Pennsylvania and elsewhere included experimental work in their plans. Thus the early investigations of such men as Johnson, Brenner, Manly, Miles and Hilgard, though carried on as incidental to their main business of teaching, laid the foundation for the American experiment stations. When Congress in 1862 passed the first Morrill, or land grant act, endowing the State agricultural colleges, their experimental work was recognized in the provisions for the purchase of "experimental farms" and annual reports recording any experiments made.

By 1871 the experimental work of these colleges had assumed sufficient importance to warrant extended discussion of it, in a convention of representatives from these institutions, the formulation of plans for conducting experiments in the different States in

accordance with a general scheme, and the appointment of a committee to urge Congress to grant National funds for agricultural experiment stations.

The First American Agricultural Experiment Station.

In 1875, Prof. W. O. Atwater of Wesleyan University, whose death occurred only last week, with the aid of money furnished by Orange Judd, established at Middletown, Conn., the first American agricultural experiment station organized on the German plan. State aid was obtained for this station, and a precedent was thus established for the maintenance of such stations under governmental authority in this country. About the same time, Prof. Hilgard organized a station at the University of California. North Carolina, New Jersey, Wisconsin, Massachusetts, New York, Ohio, Kentucky, Louisiana, Alabama and other States fell in line with this movement, and by 1887 there were 17 stations in 14 States. That year Congress made the enterprise national by the passage of the Hatch Act, and by 1889, 46 stations had been organized in the United States.

Among the men whose work as station directors made possible the nationalization of this movement were Atwater and Johnson in Connecticut, Goessmann in Massachusetts, Stubbs in Louisiana, Cook in New Jersey, Sturtevant in New York, Henry in Wisconsin, Jordan in Maine, and Dabney in North Carolina. These men had scientific training and the scientific spirit. They laid the foundations of the American experiment stations in scientific research and made possible the broad and strong organization of these stations as scientific institutions in close touch with practical workers in agriculture.

The Early Work.

In Massachusetts, the early work of Prof. Goessmann was a very important factor in demonstrating the success of the experiment station as an agency for the promotion of agriculture. Among other things, he organized the first State service for the inspection of fertilizers, and made a practical demonstration of the feasibility of beet-sugar production in the United States. At the outset the work of the stations related chiefly to the composition and use of fertilizers, with some comparatively simple field tests of different crops and feeding experiments with animals. Gradually, however, the scope of their work was enlarged to cover many other agricultural problems.

In the Hatch Act a broad basis was laid for the operations of the American stations by the provision "that it shall be the object and duty of said experiment stations to conduct original researches or verify experiments on the physiology of plants and animals, the diseases to which they are severally subject, with the remedies of the same; the chemical composition of useful plants at their different stages of growth; the comparative advantages of rotative cropping as pursued under the varying series of crops; the capacity of new plants and trees for acclimation; the analysis of soils and water; the chemical com-

position of manures, natural or artificial, with experiments designed to test their comparative effects on crops of different kinds; the adaptation and value of grasses and forage plants; the composition and digestibility of the different kinds of food for domestic animals; the scientific and economic questions involved in the production of butter and cheese; and such other researches or experiments bearing directly on the agricultural industry of the United States as may in each case be deemed advisable, having due regard to the varying conditions and needs of the respective States and Territories." Practically, then, the work of our stations may properly cover the entire field of agriculture in the comprehensive modern sense of that term, and with the growth of their resources they are taking in more and more of this territory.

The Broad Outlook.

In considering the broad outlook of the agricultural experiment stations, I therefore invite your attention, first, to the range of their work involved in the term agriculture as the science and art of tilling the soil, and in the minds of very many people agriculture is synonymous with farming. But this is altogether too narrow a view of agriculture.

Comprehensively, agriculture includes whatever relates to the production of plants and animals, which are closely connected with their production. Technically, agriculture may be divided into Plant Production, Animal Production, Agricultural Technology, Rural Engineering, and Rural Economics.

Under Plant Production is included whatever relates to the natural or artificial environments (e. g., climate, soil, water, fertilizers) of useful plants, their structure, composition, culture, harvesting, preservation and uses, and the obstructions to their growth, preservation or use. Plant Production may be subdivided into Agronomy, which deals with what are commonly called field or farm crops; Horticulture, which deals with vegetables, fruits and ornamental plants, especially as grown in gardens, small plantations or parks; and Forestry, which deals with trees and shrubs grown in large tracts.

Animal Production includes whatever relates to the anatomy, physiology, zoological relations, domestication, types and breeds, breeding, feeding, hygiene, management and uses of useful plants. It may also include diseases and other impediments to the production of animals, i. e., Veterinary Medicine, though this is in itself a large and distinct body of knowledge.

Agrotechny includes whatever relates to the conversion of raw materials produced in agriculture into manufactured articles for use in commerce and the arts. It may also include the processes of handling these raw materials in connection with their commercial uses, as in the case of milk and cream sold for consumption. It also involves whatever relates to departure from standards set for manufactured articles, i. e., adulterations and sophistications, in somewhat the same way that the diseases of plants and animals are related to Agronomy and Zootechny. Agrotechny is nat-

urally divided into specialties according to the kinds of materials, e. g., foods and feeding stuffs, liquors, oils, textiles and leather.

Rural Engineering includes those branches of civil and mechanical engineering which relate to the locating, arranging and equipment of farms, and the construction and operation of farm implements and machinery. It embraces the surveying of farms, the location of farm buildings and works, the construction of buildings, water, irrigation, drainage and sewage systems and roads. It also involves the principles of mechanics as applied to farm machinery and the use of different kinds of power for agricultural purposes.

Rural Economics may be more or less broadly defined according to the point of view. It at least includes whatever is related to agriculture considered as a means for the production, preservation and distribution of wealth by the use of land for the growing of plants and animals. It may include the development of agriculture as a business (history of agriculture), as well as the facts and principles of farm management under present conditions.

Thus far the stations have made few investigations in rural economics, and it is doubtful whether they are authorized to do so, but in all the other divisions of agriculture they have done more or less work.

Stations Are Not for Farmers Alone.

Obviously this broad definition of agriculture takes in much more than relates to the occupations and interests of people on what are ordinarily called farms. It includes the forests as well as the gardens, parks, and even the house plants and domestic animals in villages and cities, and thus brings within the purview of the stations interests pertaining to practically all our people. It is in fact a great mistake to suppose that the stations are established solely for the benefit of farmers. Their national support is only to be justified under the general welfare clause of the constitution and on the theory that agriculture, broadly considered, is a fundamental and well-high universal industry.

That the people in a measure realize this is seen in the fact that when the stations or the Department of Agriculture issue publications on subjects relating to poultry or the horse, there seems to be no limit to the demand for them. If an insect attacks the shade trees on your city lot, or a disease blights the carnations in your greenhouse, the begonias in your window box, or the asparagus in your garden, you have just as much right to appeal to the experiment station or the Department of Agriculture for advice and assistance as has the farmer with his 100 acres of potatoes or corn, or the ranchman with his thousands of sheep or cattle.

With their existing financial limitations the stations have very properly given their attention thus far principally to the needs of our large agricultural industries, but they have also done much which is of use to village and city people growing a few plants, and they will undoubtedly enlarge their work in this direction as time goes on and funds increase. The farm-

ers need have no fear that the stations will forget them or neglect their interests, but should rather rejoice that in the stations they have a powerful agency for bringing city people into closer sympathy with rural people.

Wide Distribution of the Stations.

In the second place, the broad outlook of the agricultural experiment stations is found in their wide geographic distribution. Beginning in Europe and America, they have spread to every continent and many islands. There are now more than 1000 stations and kindred institutions in more than 50 countries. The United States has 60 regular stations and many sub-stations, Germany has 98 stations, France 94, Russia 115, Great Britain 41, Italy 49, Austria 42, Hungary 29, Sweden 37, Belgium 17, Denmark 10, Australia 36, Japan 58, and India 38.

Since 1904, stations or experimental farms have been established in China, Korea, Mexico, Peru, Greece, Servia, French West Africa, Orange River Free State, and the Fiji Islands. Before that time stations were in operation in Algeria, Bulgaria, British West Indies, Cuba, Egypt, Java, Portugal, Spain, Roumania, the Philippines, and many other minor countries and dependencies. In the Eastern Hemisphere there are stations all the way from the 60th parallel of north latitude in Russia, Norway and Sweden, to the Cape of Good Hope and far off New Zealand, and from Ireland to Japan. In the Western Hemisphere they stretch from Rampart, Alaska, on the 66th parallel of north latitude (where barley, rye, oats and wheat have been matured several years in succession) to Santiago, in South America, 34 degrees south of the equator. The north temperate zone is peppered with sta-

tions, the south temperate zone well dotted with them, and they are here and there in the torrid zone.

The Wide Range of Subjects Dealt With.

These statements are perhaps sufficient to indicate the wide range of subjects with which the stations have to deal. In our own country the work ranges all the way from attempts to grow grain under Arctic conditions, raise grain hay to sell at \$200 a ton in the Copper River Valley, improve the native crab apple and the wild strawberry of Alaska, and aid an enthusiastic horticulturist at Coldfoot, 67 degrees north latitude, grow cucumbers, radishes and other vegetables, to experiments with mangoes, bread fruit, cherimoya, litchi, longan, wi, rubber trees, cacao, coffee, and many other tropical plants in Hawaii, Porto Rico and the Philippines. While many of the stations are organized to work in a general way for the promotion of agriculture in their respective localities, others confine their work to special subjects, the range of which may be indicated by the names given to some of these institutions. Thus we have agronomic stations, animal chemistry stations, bacteriological stations, brewing and distillery stations, cryptogamic laboratories, entomological stations, farm mechanics' stations, fish culture stations, marine zoological stations, moor experiment stations, sericultural stations, and stations exclusively for experiments in the culture of cinchona, cotton, flax, indigol, sugar, tea, or tobacco. If one desires to get a more comprehensive view of the broad outlook of the experiment stations, geographically and topically, he can do so by examining the volumes of the Experiment Station Record, where is reported from month to month the work of the stations throughout the world.

Organization and Functions Are Comprehensive.

Another aspect of the broad outlook of the experiment stations may be seen in the comprehensiveness of their organization and functions. This is especially true of the American stations. Organized primarily as State institutions they have been brought together to form a great national system of agricultural promotion, partly by Federal legislation on their behalf and their consequent relations with the U. S. Department of Agriculture and partly by voluntary union in the Association of American Agricultural Colleges and Experiment Stations.

The Federal legislation gave them a broad and elastic charter, made them strong and permanent institutions, while at the same time it enabled them to undertake a great variety of operations suited to their respective environments, and supplied the funds necessary to make their investigations substantial and far-reaching. This legislation left the responsibility for their management and equipment so largely in the States that their local constituencies have felt the stations belong to them and have exerted themselves more and more strenuously to secure from the State legislatures liberal appropriations for their development. Thus the Federal grants stimulated, rather than repressed,

State pride in the stations and State generosity toward them. The Federal legislation provided for the establishment of the Office of Experiment Stations in the Department of Agriculture as a central agency for the promotion of the interests of the stations. This Office has acted as the guardian of the Federal funds granted to the stations, has contributed largely to the formulation and general adoption of standards of station work, has collected and brought to our stations regular information regarding the progress of agricultural research in other countries, has summarized the results of the work of all our stations and disseminated them throughout the world to investigators, teachers, students and farmers, and has given the stations advice and assistance in very many ways.

The Association of American Agricultural Colleges and Experiment Stations has been the forum for the discussion of numerous questions relating to the management and work of the stations, has represented their interests before Congress and the Executive Departments at Washington, and has united them in many bonds of mutual sympathy and helpfulness.

(To be Continued)

The berry vines, that running thick, told blithesome Summer's story
Lie a tangled maze of brown in heaps of faded glory.
The frosts have tinted forest glade and painted forest dell
And bob-o-link has sung good-bye and robin chirped farewell.
Drags out the old. Wafts in the new. No more the bees are humming,
The earth so gay today is gray, for Winter is a-coming.
—W. CARLETON SMITH.

SAMUEL C. MOON, MORRISVILLE, PENNA. BUCKS CO.,

FLOWER MARKET REPORTS

Business has started in **BOSTON** first-rate this week, and is satisfactory on all lines. Prices have stiffened up on some of the choicest lines. The improvement came quite suddenly for last week was exceedingly dull. Chrysanthemums are shortening up considerably. Indications are that the Thanksgiving Day demand will be fully up to last year's good record.

Business brightened up **BUFFALO** somewhat, although the past week was not as good as was expected. Stock was not quite so plentiful as week previous, but nevertheless a good portion had to be moved. Very low prices prevailed. Chrysanthemums of first quality sold fairly well, but the poorer quality seemed to hang on with no takers. Roses are of good quality, especially Richmonds, which have never been better, but no high prices ruled. Beauties have not been too plentiful and prices have held steady. Violets in good supply and quality. There is too much lily of the valley to feel comfortable. A good Thanksgiving week's business is looked for.

There is little of special interest to tell concerning the **INDIANAPOLIS** business of the past week. Some have been rather busy decorating for weddings, dinners and teas, while the majority report trade as extremely quiet. Many of the florists are complaining of trouble in making collections. Counter trade is reported considerably below the average for this time of the year. Stock of every kind is coming in sufficient quantity and of good quality. Chrysanthemums are yet to be seen in large numbers but by the end of the coming week the quantities will have considerably diminished. Lilies, orchids, lily of the valley and violets are plentiful and more than equal to demand. Tomlinson Hall market florists report trade as only fair. Of greens the market has a good supply at the usual prices.

The present week **NEW YORK** opened out with a moderate but very gratifying spurt in the wholesale district, but Tuesday's storm interfered with its continuance. It is expected, however, that the week will show a substantial increase over the record of

any previous week in this month, and to this end the Thanksgiving holiday demand will, of course, contribute. All flower stock is of excellent quality. Chrysanthemums are beginning to show the ravages of time and will not, after this week, exert any great influence on the market for other material. Among the signs of the advancing season are stevia, paper-white narcissi, poinsettias and Cypripedium insigne, all of which are abundantly in evidence.

PHILADELPHIA and exceedingly heavy shipments of flowers were the prevailing features of last week's market. Prices were about one half of what they were at this time last year.

Compared with New York and some other centres the writer visited last week, Philadelphia is fortunate. At this writing (Monday) there is quite some activity, and the prospects for the week are cheerful. The football game on Thursday is the star event of the season and there is another affair of the same kind on Saturday which will help violets and red roses, and tone up all the staples. Chrysanthemums are still plentiful, but their heyday is past. Jeanne Nonin and Bonnaffon are very fine just now. Beauty roses are too plentiful, but the quality is extra fine. Teas such as Bridesmaids, Brides and Killarney are away beyond market requirements, strange to say, and notwithstanding these bad conditions, we hear of several instances of salting for Thanksgiving. There are some very smart people in this world. Richmonds have shortened up a little. Carnations cleaned up pretty well and are in a more healthy condition than most lines, although prices rule low like everything else. Beacon, Winsor and Enchantress are the leaders, Winsor especially. Violets sold well last of the week, and prospects are good for the next ten days. Lily of the valley is quite sluggish, but the quality never better.

Detroit reports supply increasing perceptibly but it is bought up as fast as it comes; a most desirable condition indeed, and quite a contrast to conditions in eastern markets as reported.

PHILADELPHIA NOTES.

W. K. Harris, we are glad to report, is again about after a severe spell of pleurisy.

W. J. Moore, of the Pennock forces, is on jury duty, being foreman in the celebrated Bridget Cary case.

Charles H. Grakelow will speak on "The Retailer's position towards the Wholesaler" at the next meeting of the Florists' Club, December 3.

A sale is announced by Freeman & Sons, auctioneers of the Colflesh & Note place at Yeaton, consisting of the greenhouses, contents and 41-2 acres of ground on December 9.

A. B. Cartledge, of Pennock Bros., reports business very encouraging. Although not as brisk this year as last fall he points out that 1906 was one of the most phenomenal seasons ever known in the flower business and it would be unreasonable to expect such another for a long time.

FIRE RECORD.

The greenhouses of W. J. Olds at Union City, Pa. Loss \$2,500, partially insured.

The barn of George Mellen, Springfield, O., was set on fire by tramps who used it for a night's rest. Loss about \$2,000.

Fire was discovered about one o'clock on the morning of November 18 in the heating plant of the St. John greenhouses, Darien, Conn. The front of the house was destroyed.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commissions paid on advertising and subscriptions. If you are ambitious, write for terms.

WANTED—Hustling store manager to take stock in a small company doing good business in small Pennsylvania town; owner's time devoted to greenhouses, need man to take charge of store. Splendid opportunity to right party. Money not needed to run business, but only to insure business being taken care of. Give references. Address Pency, care Horticulture.

SITUATIONS WANTED

SITUATION WANTED by a reliable gardener, good grower of flowers, fruit and vegetables under glass and outside, fully experienced in all branches of work on a well kept private place; single, age 29. Address R., care Horticulture.

SITUATION WANTED by good grower of roses, chrysanthemums and carnations; also good design maker; can furnish good reference. Address P. O. Box 325, Dover, N. H.

SITUATION WANTED by gardener with good record, private place preferred. Married, two children. Address N., care HORTICULTURE.

FOR SALE

FOR SALE—4 Greenhouses, most desirable location in the Newtons; large lot land fronting on two streets, dwelling house of 8 rooms; all flowers sold at door for fancy prices; excellent business, best reasons for selling; price will be made reasonable. Pelkey-Wallace Co., 101 Tremont St., R. 717, Boston.

FOR SALE—One top delivery wagon and one open delivery wagon, suitable for a florist's use; almost new and in good order; also a pair of good delivery horses; the above can be bought at your own price. Ed. Hlgons, 146 West 28th st., New York.

MISCELLANEOUS WANTS

WANTED right away, 150 to 200 ft. of used 4-inch drainage pipe (cast iron standard light), with bell and flange. Must be cheap for cash. Write E. F. Oliver, P. O. Box 143, Avon, Mass.

NEWS NOTES.

G. O. Morey & Co., florists, Haverhill, Mass., have moved to 23 Main street.

The Joy Floral Company, Nashville, Tenn., has applied for a charter of incorporation.

Peter Crowe has accepted the position to serve as one of three commissioners of parks at Utica, N. Y.

J. Marcel Dickinson has secured fifty acres of land and will start in the nursery business at Spencerport, Monroe County, N. Y.

A. E. Kunderd of Kendallville Ind., in looking for a new location for his increasing gladioli and bulb business, and will probably locate in South Bend.

William Lidtko, an employe of Thomas Young at Bound Brook, N. J., 66 years of age, committed suicide by drowning on Monday, November 25.

Work is under way for moving the flower store of Mt. Desert Nurseries, Bar Harbor, Me., across the street, where additions and improvements will be made.

M. E. Ryan, florist, of Middletown, N. Y., while repairing his building, stepped beyond the limits of the roof and fell on a stone wall, badly injuring his shoulder.

One of the humors of the Lenox, Mass., exhibition was the capturing by Mr. Proctor of the Lord & Burnham Co.'s special prize with the product grown in U-Bar houses.

Prizes aggregating more than \$2500 will be offered by the Pasadena Tournament of Roses Association for the most attractive floral displays at Pasadena, Calif., on January 1, 1908.

Nephrolepis superbissima, the new fern of The F. R. Pierson Co., Tarrytown-on-Hudson, N. Y., was awarded a first-class certificate at the Royal Horticultural Society's exhibition, London, November 5.

INCORPORATED.

The Binghamton Seed Co., Binghamton, N. Y., W. B. Cleves, H. H. Evans, N. L. Boyce; capital, \$25,000.

BETWEEN YOU AND ME, What do you think of the Buyers' Directory and Ready Reference Guide of HORTICULTURE? I always look it over before I do any buying.

?

Is Your Name In The Above List? If Not, Why Not?

WHO IS TO BLAME Last week we called on a customer in Hartford, to look over a 40 foot, iron frame, H. & Co. house completed for him in October. The carnations, of course, were a bit backward, being so late in planting. We asked Mr. B. who was to blame for getting the house finished so late. "Well, when Hitchings & Co. were ready to go ahead, we were not. When we were, they were too busy and couldn't, so it hung fire until along in October. No, I am not blaming the builders, but we have learned our lesson. Next time we will start doing things in the fall." This is but a sample of what growers all over the country are bound to be up against if they don't get busy before it is busy time. This advice is specially for you. Write us.

HITCHINGS AND CO.
GREENHOUSE DESIGNERS AND BUILDERS.
 Manufacturers of Heating and Ventilating Apparatus.

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants. New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
Yours very truly, GEO. A. SKENE.

Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons. Florham Farms, Madison, N. J., December 8, 1906.
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

The Electric Circulator

Manufactured and Installed by us is the only machine of its kind in use today for greenhouse hot water heating. Its strong points are

SIMPLICITY AND PRACTICABILITY

It is NOT A THEORY. Its value has been FULLY PROVEN.

DON'T BE MISLED

by so-called "improvements" which exist on PAPER ONLY.

This cut illustrates one and

THE ONLY ONE

which has ever had a trial thus far. It has been on the market since 1905. It is in use in many of the largest greenhouse establishments, commercial and private, and is

GIVING FULL SATISFACTION

All references and testimonials regarding forced circulation by electric circulator REFER TO THIS MACHINE ONLY.

THE CASTLE COMPANY, 170 Summer Street, Boston

HEATING ENGINEERS

Then there is another highly interesting feature of the U-Bar construction. When you are on the inside you think the house is much wider than it really is. The extreme lightness, the unobstructed freedom is what does it. Mr. Pierson says: "It's just like a bubble of glass" — "a regular Sunshine Shop," and that comes the nearest to describing it. Just make a mental comparison between this interior, with its curved eaves and total absence of heavy members, and any construction used by other builders. Send for the catalog, then send for us. **Pierson U-Bar Company, Designers and Builders U-Bar Greenhouses, Metropolitan Building, 4th Avenue and 23rd Street, New York.**

What Happened AND ITS MORAL

WAY along last spring before firing was over, we kept pounding you to order then, that "Burnham" boiler you were sure to need the first thing in the fall. There must have been a lot of you chaps who didn't take our advice seriously, for although we just about doubled the number of boilers that were cast last year, when September opened up, we were anywhere from two to three hundred shipments behind, and actual orders coming in about twice as fast as we could ship out. Some of you got kind of hot about it, thought we were "dead slow," or "didn't have any system." Others declared "they would wait until the first of December, and make their old tea-kettles do until then, for they wanted a 'Burnham.'" Now here it is the last of November and we are still shipping at the rate of over 300 per month. Next year will see us with twice the facilities for casting, but we shall do twice the business if former years' experience counts for anything. But instead of waiting until spring to pound you about ordering timely, we are going to begin it now, and keep at it every week or so until you wake up and get in line.

It is the same way with your house. If you want it when you want it, order it long before you want it. Spring will be here before you know it. Send for circulars and catalogs after you have finished your supper to-night. **Lord & Burnham Company**, Greenhouse Designers and Manufacturers, 1133 Broadway, cor. 26th Street, New York. Boston Branch: 819 Tremont Building.

SCOTT BROS., Elmsford, N. Y.

The Chrysanthemum in Decorative Use

Our frontispiece shows how attractively a greenhouse and its promiscuous contents may be used for the setting of a chrysanthemum show. An equally pleasing general effect in the ordinary exhibition hall, with its various individual groups bearing no relationship in contents or contour, one to another, is almost impossible. The illustrations on this page from photographs taken in the greenhouses at Central

CHRYSANTHEMUMS AT CENTRAL PARK, NEW YORK.

Park, New York, during the recent chrysanthemum display there, are equally suggestive of the characteristics in which most of our exhibitions are conspicuously lacking. These pictures will not particularly interest the grower of chrysanthemums for cut flower purposes nor would they serve any purpose in a "scale of points" committee's rambles, but for the artistic eye of the decorator who tries for broad effects

and seeks fitness and balance in form and color they will be found full of suggestiveness. We have taken occasion in preceding issues to suggest to our readers where we believe they may find the missing key to a better public appreciation of our exhibitions, by making appeal through harmonious decorative use of the material at command rather than exclusively through "scale of points" rivalry with indi-

vidual blooms. This is only possible through a free use of naturally-grown masses, singles, and pompons. Tables of specimen blooms are all right and indispensable as a feature, but as the whole show they carry less and less weight with the public each year. We have shown the people the way of *producing* flowers; let us now show them how we can *use* them.

CHRYSANTHEMUMS AT CENTRAL PARK, NEW YORK.

Dahlias In France

I was going to head my few notes "French Dahlias," but remembered that many of those I saw in France were not purely of French origin but were raised in other countries. In spite of our long autumn without frost it is only fair to say that early November is not the period at which the dahlia may be expected to be seen in its highest state of development and yet whenever it has been my privilege to visit that country it has always struck me that as a show flower the culture of the dahlia is far behind that generally practiced in Great Britain.

Some day perhaps France will have its "Dahlia Society," but it is not the country of special societies and it was many years before the French ever thought of starting a Chrysanthemum Society. Since they have done so the popular autumn flower has advanced by leaps and bounds and the blooms now shown there are as fine or nearly so as the very best in a first-class English show. Nowhere in Europe can such a show be found as that held every year in Paris, which was described and illustrated in last week's HORTICULTURE, and in spite of having the charge levelled at me of a want of patriotism I do not hesitate to make the assertion.

But it is the dahlia that occupies attention for the present. In the point of view of setting up the flowers our English raisers adopt a much more effective and to my mind artistic method of staging their blooms. They are usually set up on long tables with the bunches of flowers in flat kind of pyramids or else in tasteful groups on the ground in branched bamboo supports and vases. The French, on the other hand, generally place them on the ground level in beds. The blooms are placed in bottles with a base of light powdery material resembling soil or else of moss. They are sometimes set up in big banks of bloom but the colors are all intermingled and no great decorative effect is obtained.

Individually the blooms are poor, denoting no special intensive culture and are often staged with huge undeveloped green eyes that would of a certainty ensure their banishment from any leading English dahlia show. I have seen this season at Cannell's and at our autumn show fine examples of the big decorative and peony-flowered varieties in grand form; without exaggeration I should think Souvenir de Gustave Dawson measured close on a foot across at Cannell's and yet a fortnight later I saw some blooms in an exhibit at the Paris show not five inches across. So, too, with the cactus dahlia. Of the old show and fancy type not many are seen for they, like the old incurved chrysanthemum, are too stiff and formal in appearance to please the French taste. Pompons—perhaps for the same reason, although smaller—are less frequent than cactus.

Taking large decorative varieties my notes include among the best, Jeanne Charmet, Reine Emma, Beatrice, Prest, Vermoell and Mme. Van den Daele, while the cactus although extremely numerous only find mention of the following kinds as noteworthy examples: Rene Cayeux, Thuringia, Lucifer, Cinnamon, Mirifique Ada, Robt. Sallier, Firebrand, Radiance, Cornucopia, Ruby, Baden Powell, Florence, Prince of Yellows, Rev'd Williamson, Butterfly, Norfolk Hero, Eva, Dainty, Coronation, Loyalty, Winsome, Mrs. Rooney, Sweet Nell and Osprey.

Chasman Payne

San Jose Scale

Although the San Jose Scale is well known to many horticulturists, it is a subject of so much universal importance that I feel justified in writing a few lines regarding it.

The San Jose Scale was imported to America about 1879. It is a native of northern China, although its origin was somewhat of a speculation until 1901-2. The scale was introduced into California and first found in a town which bears the same name. It was not until 1893 that it was thought to be a very serious pest; at this time, it was found in Virginia. These infested trees were bought from a nursery whose stock came from California. Investigations were now begun in earnest and in less than four years, its presence was noted in twenty States east of the Mississippi River.

The San Jose Scale (*Aspidiotus perniciosus*) has been called by several different names. (1) The Chinese scale; probably because it is a native of China. (2) The Pernicious Scale; Professor J. H. Comstock, the discoverer of the scale said, "it was the most pernicious scale" known to him. (3) The San Jose Scale; because it was first discovered in the vicinity of the City of San Jose. This latter is the common name it generally goes by.

THE LIFE HISTORY

The life history of the scale is particularly interesting. The young insects which are born alive are provided with legs, thus enabling them to crawl out from beneath the scale under which they were born and search for a place to settle. This takes a very short time. At this stage they are so small that it is difficult to see them without the aid of a strong glass or microscope. They are yellow in color while in this stage of development.

When they have selected a suitable place, they begin to work their sucking tubes (which are remarkably long for the size of the scale) into the bark, leaf or fruit wherever they have situated and begin to suck the sap from the tree. The insect now loses all power of locomotion and the scale is slowly formed over its back. At first, this scale is composed merely of a waxy secretion which exudes from the back of the young insect. As the insect beneath the scale grows, it molts or sheds its skin and this forms another layer to the scale itself. As this becomes older, it turns to a distinctly darker color, due to the weather and the addition of the molted skin from the insect beneath it.

It is very easy to distinguish between the male and female insect. The former makes a scale which is oval or elongated in form, while the latter makes a circular one. Although the female loses her legs, wings and eyes, she retains her sucking tube and still continues to suck the sap from the tree and all her vitality is given up to producing young. The male insect is not so hopelessly fastened beneath its scale, but soon develops very small lace-like wings, legs, two pair of eyes and feelers or antennae. The male insect lives but a short time and takes no food.

To show how rapidly the female multiplies, I will give the following quotation from Dr. H. T. Fernald's bulletin on the "San Jose Scale." Dr. Fernald states "that estimates on this point show that an average of 1,608,040,200 females would be produced from a single female in one season, with probably at least an equal number of males, a total starting from a single female of 3,216,080,400 individuals!" It is very fortunate that all of these do not reach maturity, for a great many are

killed by the winter and accidents, etc. The young and immature insects are generally killed by the winter so that only the half to two-thirds of the insects grown are to be found in the spring.

THE APPEARANCE OF THE SCALE

One of the most important requisites in combating the scale successfully, is the ability to recognize its appearance before it is too late to save the infested trees. This can only be done by a careful and thorough inspection; looking especially at the two to four-year-old wood. Another favorite habitat of the scale is at the base of the buds. At the rings, caused by the growth of the trees, they are also very apt to be found. On the smooth bark their existence causes reddish spots. If the tree is very badly infested, it will look as if ashes had been thrown upon the branches, giving them a grayish color. Many times the scales are so numerous that they are found piled up on top of each other. If the scales are lifted carefully with the point of a knife, the insects will be seen beneath them. Upon pressing them, a yellowish fluid oozes out, providing the insect is alive.

TREATMENT

After discovering that the San Jose Scale is present, the question of how to get rid of it, comes up. This in itself is a good subject for a long discourse, but I shall only attempt to give the results of others, who have devoted much, if not all their time to this important subject. The universal remedy is the application of the lime and sulphur spray. Dr. H. T. Fernald of the Massachusetts Experiment Station advocates the following:

Lime, 22 pounds; sulphur, 20 pounds; water, 50 gallons.

Mr. Franklin Sherman of the North Carolina Experiment Station considers the following formula very satisfactory:

Stone lime, 15 pounds; sulphur (flowers), 15 pounds; water (to make), 50 gallons.

These sprays should be put on just before the buds swell in the spring. This spray is not only destructive to this particular scale, but is a tonic to the tree and will kill the other scales, oyster shell, scurvy, etc.

There is a commercial spray called "Scaleside" put up by B. G. Pratt Company, 11 Broadway, New York, which seems to do good work. This is recommended more for small orchards as its cost is greater than the regular Lime-Sulphur spray, but does away with the boiling process, which is always a source of inconvenience. This mixture should be applied in the late fall.

There are several parasites which prey upon this scale and also a "Two Stabbed Lady Bug." This latter has done good work in California, but it is not wholly successful in Massachusetts. The orchardist must bear in mind that spraying his orchard simply once, will not free it from this national pest, but if he does good conscientious work each year, the San Jose Scale, while it will never probably be a thing of the past, will cause him no serious loss.

Roses Under Glass

LIQUID FERTILIZERS

Plants which are being carried over a second year should now be in a condition to thoroughly enjoy a stimulant either in liquid form, or as a top dressing of good mulch. Of all the kinds of liquid feeding, there is, perhaps, none safer or more effective than that made from fresh cow manure; certainly none is in more general use. It contains all the elements necessary for the purpose, and in safe proportions, being practically free from the caustic properties so prevalent in most of the prepared chemical foods.

It is advisable to have two tanks for the preparation of this liquid. The use of one is frequently attended by choking of the pipes and faucets, a condition, which is, to say the least, a nuisance, and productive of exceeding bad temper among the men. The manure should be placed in one of the tanks with water sufficiently heated to cause speedy fermentation when the liquid should be drained into the other tank and diluted to the strength required. By the addition of sheep or hen manure, results may be more quickly obtained, but the nature of these results will be governed entirely by the knowledge and judgment displayed in the admixture of these powerful stimulants.

For the first applications the liquid should be rather weak, until the plants have become accustomed to this class of food when the strength may be increased in proportion as results warrant. Indiscriminate use of liquid food sours the soil and eventually leads to disaster, whereas, if properly handled, it will materially aid in producing a good cut of high-grade flowers.

Ammonia and nitrate of soda can, during certain stages of growth, be employed with benefit to the stock, especially in hastening the development of a tardy crop, but, as these stimulants are very powerful and immediate in their effects, the solution for a first application should be very weak, one pound of either to 100 gallons of water being quite strong enough. The time when roses can use liquid manure to best advantage is when the young growths for a succeeding crop have attained a length of two or three inches. An application should be given at least once a week until the buds are well developed and begin to show color, when feeding should be discontinued.

During the short days of winter, when the hours of sunshine are comparatively few, root action becomes sluggish, vitality low, and the plants generally seem inclined to obey nature's call for rest. Any check to the growth at this period will inevitably result in trouble, and while much may be gained by the use of strong stimulants a weak solution applied more frequently is less risky than strong doses. Careful watching to ascertain the wants of the plants, and to supply these at the proper time is one of the principal duties of the grower, and the ability which he displays in this connection will be reflected in the quantity and quality of the flowers throughout the season. Unhealthy, weak, or mistreated stock is unable to use food in this form, and if applied, it will augment rather than diminish any troubles the plants may be suffering from.

among the horticultural trades a very different and more sanguine sentiment than was in existence two weeks ago. Should the tightness of money induce the hitherto lavish spenders for holiday gifts to turn from diamonds and costly furs to plants and flowers as a more economical expenditure, as has been suggested by one or two New York florists, it will be an illustration of the truth that it is "an ill winde that bloweth no man to good." However, the prospects are sufficiently encouraging in every respect to warrant every florist in making preparation for a holiday trade equal to if not greater than that which he enjoyed last year.

Give the birds a chance

The notes appearing in this issue regarding the recent investigation of the relation of the birds to the fruit industry of California and the conclusions reached will be read with delight by our friends who have been convinced all along that reckless and uncontrolled bird slaughter is one of the chief causes of the enormous losses suffered every year through insect ravages and the overwhelming spread of weed pests. De Montaigne, over three hundred years ago said, "Let us a little permit Nature to take her own way; she better understands her own affairs than we." In the wanton destruction of birds and small wild animals, the laying waste of forests and other interferences that modify and obstruct the operations of Nature, thoughtful observers have long discerned the presage of evil days to come. That these apprehensions are no longer limited to a few but are becoming wide-spread is one of the most cheering signs of the times. We are glad the awakening has come.

Preparing for the holiday trade

The coming weeks belong essentially to the florist. The nurseryman and others interested in outdoor material have come to the close of their operations, garden bulb trade is over and the seedsman's principal employment for a while will be the preparation of the catalogues for the coming season but the florist now faces his busiest time, his largest responsibility in the course of the whole year. What to do in the way of preparation, how far to go in the line of investment in holiday material and what are the best sources of supply are questions that call for careful thought. No better means of enlightenment on these problems can be found than is provided in the advertising columns of a journal such as HORTICULTURE. However useful and instructive the reading columns may be it is yet true that the quality and trend of advancement are most distinctly reflected in the business advertisements of the progressive houses thus represented. Read the advertisements carefully. By so doing you will benefit the man behind the advertisement, you will benefit HORTICULTURE and, last but not least, you will materially enlighten and benefit yourself.

An incurable case

Our contentions but nevertheless esteemed friend, the editor of the Florists' Exchange, seizes upon the controversy over the alleged renaming of *Hydrangea arborescens* var. *sterilis* as "Hydrangea

Business conditions are encouraging According to reports in trans-atlantic journals a quite general business depression is prevalent in Great Britain, so we are not alone in our recent experiences. It is to be hoped that the trouble will be as short-lived with our English cousins as the "bankers' panic" promises to be in our case. Every indication at the present time is favorable for uninterrupted industrial progress and we find

arborescens alba grandiflora" by the E. G. Hill Company, as a pretext for one of his periodic scolds at the "ex-secretary of the national society who is also editor of our Boston contemporary" (accent on the last five words). In his eagerness as a critic he amuses us by falling, as often before, into the very pit which he had dug for the other fellow. In this instance, in the course of a half page discourse, in his issue of Nov. 30, 1907, he says:

"The Messrs. Hill, as well as the Secretary of the S. A. F. O. H., would, too, have found the hydrangea in question fully described by William Falconer in The Florists' Exchange of August 14, 1904, and also would there have learned that it was then being propagated by James Semple, florist, Avalon, Pa."

He repeats further along:

"The evidence proves conclusively that the plant in question had already been named and described in Bailey's cyclopedia, as well as subsequently in this journal."

Unfortunately our friend overlooks the issue of the Florists' Exchange of July 21, 1906—two years later than Mr. Falconer's alleged full description—where on page 70 may be found a picture of the shrub in question with this inscription under it "*Hydrangea Arborescens Alba Grandiflora*—The Snowball Hydrangea"! We have on a previous occasion, felt it to be our duty to remind our contemporary of the risk incurred by people who live in glass houses and persist in throwing stones but "what's the use"? It begins to look like an incurable case.

British Horticulture

THE PREMIER HORTICULTURAL SOCIETY.

An attractive list of fixtures has been arranged for next year by the Royal Horticultural Society, which continues to make steady progress, and to enlarge the number of its supporters. The first important show is the spring exhibition at the Temple Gardens, on May 26, 27 and 28. The great summer show takes place on July 7 and 8, in the grounds of Holland House, Kensington, that charming oasis amongst London's crowded acres. The National Carnation Society has secured the large hall for their exhibition on July 22, whilst two days later the National Sweet Pea Society will hold its show there. The National Rose show has again decided to use the hall for its autumn show in September. The Winter Flowering Carnation Society is migrating from the Royal Botanic Society's gardens at Regent Park to the hall which is certainly more accessible than the first named place. There is to be a show of British fruit on October 15 and 16, whilst displays of colonial fruit and vegetables, will be seen on March 5 and 6, June 11, 12, and November 26 and 27. Bottled British fruits, home-dried fruits and preserved British vegetables will be exhibited on November 26 and 27. With this list of fixtures it will be seen that the society fills a very important place in British horticulture, and is doing its utmost to foster every phase of gardening. This work is being supplemented by the recent operations at the society's gardens at Wisley in Surrey, where trials and researches are con-

ducted of illimitable value. One interesting characteristic is the generous help which is afforded the society in its extensive operations by the nursery trade, as well as to leading amateurs. This united effort has been one of the factors of the gratifying success achieved.

THE MASTERS MEMORIAL.

A representative committee of Fellows of the Royal Horticultural Society has been appointed in connection with a proposal made to found a suitable memorial to the late Dr. Masters, for many years the editor of the "Gardeners' Chronicle." It is suggested that "Masters Memorial Lectures," on the application of science to horticulture should be founded by public subscription. The sum of £1,000 (pounds) is required to carry out the scheme, and a satisfactory start has already been made, several of the leading horticulturalists having forwarded subscriptions to the Rev. W. Wilks, secretary of the Royal Horticultural Society.

COMMERCIAL FLOWER CULTURE.

The mildness of the early winter has caused the flower market to be well supplied with bloom. Chrysanthemums, of course, have been seen in tremendous quantities and large consignments have been marketed which must have proved unremunerative to the growers. Amongst the varieties in the cut bloom section seen at Covent garden, the well known Market Red and Wm. Holmes are in favor in the dark flowered section. Moneymaker is found to be one of the most profitable whites, and it is being well grown by a number of florists. The yellow and bronze-flowered varieties of Soleil d'Octobre are generally in demand. Other favorites are Mansfield Pink, Souvée d'Or, La Triumphants, and Lizzie Adcock. Amongst the pot plants the following chrysanthemums have lately made a good show on the trade stands at Covent garden market: Caprice du Printemps, Kathleen Thompson, Boule de Neige, White Ivory, Mrs. Wingfield, Ryecroft Glory, and Soleil d'Octobre. Ericas have been seen in variety from the leading growers and these are well flowered, contrary to expectations after the unfavorable weather this summer. Cyclamens make a bright display, as well as Begonia Gloire de Lorraine. As a proof of the popularity of this variety it may be mentioned that one grower has 10,000 plants, all of which, it is expected, will be cleared by Christmas. There is a good sale for small plants in pots, which are found very useful for decorative work. Amongst other subjects which are being handled in the pot plant section are poinsettias, lilliums, bouvardias, veronicas, spiraeas,—including japonica, multiflora, compacta and astilboides,—solanums, etc. Market salesmen complain that trade is somewhat slack, and up to the present the season has not been as good as some former ones, there being a general depression prevalent.

W. H. Adsett.

NEWS OF THE CLUBS AND SOCIETIES.

AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society met pursuant to call at the Hotel Martinique, New York City, on Monday, November 25th, President Robert Simpson in the chair.

Ex-President F. R. Newbold, of Poughkeepsie, N. Y., brought to the Society an invitation to hold a June show in connection with the Horticultural Society of New York at Broux Park, New York city, in June, 1908. There will be various prizes offered at this show, of considerable value. This is a popular show, which it is estimated that thousands of people will visit daily and is a part of the usefulness of the Society planned from the beginning. The invitation was formally accepted and there will be offered medals of the Society to exhibitors.

Mr. August Poehlmann, of Chicago, stated that the secretary of the Florists' Club would report in full to the American Rose Society concerning the action of the Chicago Florists' Club and that Chicago would certainly be glad to have the American Rose Society make the best show both in size and quality that had as yet been made; that Chicago was the Hub of a big wheel, the spokes of which ran in all directions and that the people in the west meant to do their part to make the annual exhibition one which would leave a name behind it as to what Chicago can do.

It was resolved to issue the schedule of prizes of the American Rose Society without delay, so that all contributors to the show may know what is required, at a date early enough for them to make full preparation. The cash premiums for exhibitors at the present time reach the sum of \$700. There are two prizes amounting to \$300 in cash from Philip Breitmeyer and A. T. Boddington for out-door roses; \$25 in cash for the best twenty-five blooms of La Detroit; \$25 from W. A. Manda for the largest and most varied collection of cut roses of all classes, only one bloom in a vase, the variety to count 65 points; The E. G. Hill Co., of Richmond, Ind., offers a prize of \$50 in cash; Alexander Montgomery, of Natick, Mass., a silver cup valued at \$25 for the best fifty blooms of any variety of American origin now in commerce and four other cups were also promised.

The new life membership certificates were authorized to be issued and signed, also certificates of merit for the roses exhibited in Washington, which were as follows: F. H. Kramer, Washington, D. C., for Queen Beatrice; Myers & Samtman, Wyndmoor, Pa., for Wyndmoor; The E. G. Hill Co., Richmond, Ind., for Rhea Reid; M. H. Walsh, Wood's Hole, Mass., four certificates for Paradise, La Flamma, Delight and Juniata.

The following topics have been named to be presented to the convention: "Practical Rose Growing in the Middle West," "The Raising of New

Roses," "What is the Proper Size of a Greenhouse to Grow Roses for Commercial Purposes," "Twelve Best Garden Roses," "Roses in the Far West," "Forcing Roses in Pots for Easter," "Roses from the Retailer's Standpoint." Yours respectfully,

BENJAMIN HAMMOND, Sec'y.

TARRYTOWN HORTICULTURAL SOCIETY.

The regular monthly meeting of the T. H. S. was held on Friday evening, Nov. 29, President Howard Nichols presiding. The monthly prize was won by Howard Nichols with a fine vase of Golden Gate roses. The very able essay on out-door vegetables by President Nichols, winning the Peter Henderson prize at the November exhibition, was read. Mr. James Ballantyne will open a discussion on greenhouse roses at the December meeting. The secretary reported that upwards of \$600 in prize money was won at the November exhibition besides five silver cups, one silver pitcher, and a silver medal. Nomination of officers for the coming year was made, election to be at the December meeting.

D. McFARLANE.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Work of Committees.

Cincinnati, Nov. 23rd, No. 74-5-06. Pink, Jap. incurved, exhibited by Nathan Smith & Son, scored 83 points commercial and 86 points exhibition scale.

The variety exhibited by C. H. Totty before the New York Committee Oct. 12th, as No. 20, has been named A. McKendry.

The variety exhibited by Gordon Smirl before the Philadelphia Committee as No. 1 has been named Mrs. Giraud Foster.

DAVID FRASER, Sec.

SOUTHAMPTON HORTICULTURAL SOCIETY.

The second bi-monthly meeting of the Society was held Nov. 25, President Clark in the chair. There were several very interesting discussions, the principal one being the best method of growing dahlias from cuttings. As the Society has outgrown its present meeting room, it was decided to secure Odd Fellows' Hall, in which future meetings will be held. The Society has at present 75 active members.

U. G. AGER.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Chairman Kasting of the National Flower Show Committee has appointed Mr. S. S. Skidelsky as chairman of the travelling representatives of the National Flower Show.

P. J. HAUSWIRTH, Sec.

W. N. Rudd, of Mt. Greenwood, Ill., has been appointed secretary pro tem. WM. J. STEWART, President.

FLORISTS' CLUB OF PHILADELPHIA.

This club has had the wholesalers' point of view before it in the Meehan-McKissick talks recently, and the monthly meeting on the 2nd inst. proved a fitting opportunity for the retailer to have his innings. C. H. Grakelow was the leader of the discussion. The wholesale men came back with good logic, upholding their customers (especially in regard to the fakir trade), and made this hardy perennial subject blossom anew for the benefit of the younger generation. Leo Niessen, Edward Reid, W. H. McKissick, Robert Kift, and many others took part in the discussion.

CLUB AND SOCIETY NOTES.

The program for the annual meeting of the Illinois State Horticultural Society, to be held in Agricultural group, University of Illinois, December 11-13, has been issued, and shows an attractive list of speakers.

At the November meeting of the Omaha Florists' Club, Nebraska, officers for the year were elected as follows: President, J. J. Hess; vice-president, S. Faulkner; secretary, L. Henderson; treasurer, G. Swoboda.

The landscape gardening classes of the Gardeners' and Florists' Club of Boston began work on Tuesday evening, December 3, with a goodly number of pupils. J. K. M. L. Farquhar, on behalf of the committee, made a few introductory remarks, which were received with appreciative applause, and a number of club officials and members were on hand to see the start. The advanced class will be under the instruction of Mr. B. K. Howard and the beginners will be in charge of Mr. D. A. Clarke.

PERSONAL.

We are glad to chronicle the return to health of George Waldbart, Jr., son of Alex. Waldbart of St. Louis.

Peter Bisset, president of the Florists' Club of Washington, who has been seriously sick as result of a nervous breakdown, is up and recuperating. We extend to him our best wishes for an entire recovery.

Louis Boeglin, florist in the Park Department of Minneapolis, will leave New York on the 10th of this month for a two-months' trip to his home in Alsace, where his father still lives. He will also visit some of the important florists in Germany and France, and will probably bring back a nice collection of novelties. At the World's Fair in Paris Mr. Boeglin was in charge of the floral display for the German Government, and was afterwards engaged to do the work at the exhibition in St. Louis, but, after getting there, did not care for it for various reasons, and switched over to the French Government, where he took charge of their bedding.

ORLEANS CHRYSANTHEMUM SHOW.

This interesting old French town, with which the name of the heroic Joan of Arc is inseparably connected, has a horticultural society that was founded as far back as 1839. It has held many exhibitions, the one we visited on November 9 being the eighty-first and was confined to chrysanthemums, flowers, fruit and vegetables. The president, M. Maxime de la Rocheterie, is a well known French lover of horticulture and he also occupies the post of president of the French National Chrysanthemum Society.

These provincial shows of course do not compare with those in the gay capital, either for extent or beauty of arrangement. There are not many places even in France that can boast of so fine a site as Paris for a flower show, but the provincial towns do their best and many of the shows are really attractive. The Orleans show was no exception; it was held in the Salle des Fetes, a commodious building close to the Cathedral, and the townspeople were busy wending their way to the show all the afternoon in that pleasant, happy way in which French people usually conduct themselves when on pleasure bent.

On entering the hall the visitor was struck with the artistic ground plan of the show. The floor space was cut up and divided into a series of shaped beds in which the plants were staged. Spacious paths permitted free circulation of the visitors and every flower was easily visible. M. Maxime de la Rocheterie sent a nice group; M. Montigny—a large exhibitor of novelties—sent another, while M. Ligor-Signeau, who carried off the American gold medal for the best chrysanthemums in the Paris show of 1900, also staged an interesting collection. The other exhibitors were of only local repute.

The names of a few of the best flowers in the show may be of interest to readers of HORTICULTURE. They were Ch. Schwarz, M. Loisseau Rousseau, Marie Liger, Madagascar, Electra, Tokio, Mme. Ed. Roger, W. Tricker, Rouge Poitevin, Souvenir de Petite Amie, Soleil d'Octobre, Embleme Poitevin, LaGracieuse, W. R. Church, Mrs. Coombes, Henri Second, Wm. Falconer, C. Weeks and many others.

Dahlias were also shown, but to an English eye they were poor. There was also an interesting collection of roses. There was a varied and interesting display of ornamental hardy shrubs, conifers and other plants, vegetables and floral decorations.

C. HARMAN PAYNE.

THE DENISON EXHIBITION.

The annual flower show held under the auspices of the Denison (Texas) Civic Improvement League, proved one of the prettiest events ever held in that section. Nathan Smith & Son, Adrian, Mich.; J. W. Vestal & Son, Little Rock, Ark., and J. W. Furrow & Co., Guthrie, Okla., were extensive exhibitors of chrysanthemums of which there was a fine collection. B. A. Donald and Mrs. Joe Fritz, of Denison, and Mrs. C. J. Ralls, of Atoka, Okla., won a very liberal share of the prizes in the amateur class on chrysanthemums. A most interesting fea-

ture of the show was the exhibits of flowers and plants by the public schools of the city, showing a wonderful awakening of interest in the juvenile population of the city. The show, which was held November 20-23, was a thorough success from every point of view and a considerable sum was distributed in prizes.

FLOWER SHOW NEWS.

Los Angeles (Cal.) is planning for a show that shall eclipse anything before attempted. Large prize lists to tempt exhibitors from all sections of the country, and lectures by noted floriculturists are included in their scheme.

The directors of the Arkansas State Floral Society met in Little Rock on November 23. The treasurer's report showed a margin of profit, and it was decided to hold a show next year. New officers were chosen as follows: President, J. J. Mandelbaum; vice-presidents, J. F. Letton and F. Rossner; secretary, G. R. Brown; corresponding secretary, Chas. Vestal; manager, P. M. Palez.

LOCAL AND FLORISTS' SHOWS.

L. B. Lewis, Pontiac, Mich., had what was considered the best flower show in the city on November 21, 22 and 23.

The chrysanthemum show at Waco, Texas, attracted thousands of visitors. Prominent among the commercial exhibitors was Charles H. Meyer.

The exhibit at the greenhouses of John E. Haines, Bethlehem, Pa., has drawn a constantly increasing throng of admirers during its continuance.

The greenhouses of the Niagara Falls Queen Victoria Park, Roderick Cameron, gardener, were opened to the citizens of St. Catherine's on November 26.

An orchid display at South Park Conservatories has been a feature of Thanksgiving week at Buffalo, N. Y. Supt. Cowell's collection includes many rare specimens.

Supt. M. L. Moore, of Walbridge Park, Toledo, O., had only to announce that the chrysanthemums were in condition to be displayed to have the houses overflowing with visitors.

The Bayhouse Floral Co., Boise City, Idaho, under the management of Joseph Pfoser, opened their houses to the public for a view of their 10,000 chrysanthemum blooms on November 20.

The annual flower show at the Woman's Club, Savannah, Ga., on November 19, was the most brilliant affair ever held by them. The local florists made generous displays, A. C. Oelschig & Son, John Wolf, The Savannah Floral Co. and A. W. Richardson being represented.

At a meeting of the board of directors of the Standard Life and Accident Insurance Company of Detroit, L. W. Bowen, general manager of the D. M. Ferry Seed Co., was elected president and D. M. Ferry, Jr., vice-president.

OUR NATIONAL FORESTS.

The area of forest land reserved by the Government was increased during 1907 by 43,000,000 acres, making the total area of the National Forests more than 160,000,000 acres. In fact nearly all the timber land of the unappropriated public domain has now been brought under the administration of the Department of Agriculture. This means that these forests are now being guarded against fire, theft, and wasteful exploitation; and that their power to grow wood and store water will be safeguarded for all time. At the same time their present supply of useful material is open to immediate use wherever needed. Timber is given away in small quantities through free-use permits to actual home makers, and in larger quantities to communities for public purposes. Beyond this is it sold to the highest bidder, but under restrictions which will maintain a lasting supply.

While the primary object of setting aside and protecting these great forests is not to derive Government income but to preserve these great sources of prosperity for the use of this and future generations, it is certainly a source of satisfaction that the income from the National Forests was greater during the past fiscal year than the entire cost of administration. This income amounted to \$1,530,000—twice as much as the income for 1906 and more than twenty times that for 1905.

The National Forests are not only yielding fuel and lumber, but they are grazed under Government regulations and supervision by vast herds of cattle and horses, and flocks of sheep and goats; and under proper management their grazing capacity is rapidly increasing.

That the setting aside of these National Forests is not in the nature of a doubtful experiment is shown by the experience of European nations and proven by the vast expenditures these nations make for the preservation of their forests. Forest lands can be made to grow successive crops of trees just as surely as fields can be made to grow successive crops of wheat, and at the same time they conserve the water supply.

During the years and ages past fires have stripped great areas of Western mountain land of all forest growth. The reforestation of these is a matter of urgent necessity for the conservation of rain and snowfall. Tree planting on a large scale must be resorted to. Millions of seedling trees must be raised. Nurseries have been established, and this work is being pushed with energy. Broadcast sowings of tree seeds on burned-over land have been tried, with prospects for excellent results.—From Report of Secretary of Agriculture, 1907.

PUBLICATIONS RECEIVED.

"Modern Training in Horticulture; A Practical Education Practically Free," is the title of an illustrated pamphlet issued by the Massachusetts Agricultural College, Division of Horticulture. Full particulars are given regarding the various courses of study and practice in fruit growing, flower growing, market gardening, arboriculture and forestry.

Obituary

P. J. Hauswirth.

The sad news comes to us that P. J. Hauswirth of Chicago, secretary of the Society of American Florists and Ornamental Horticulturists, is dead. We

P. J. HAUSWIRTH

know nothing as yet of the circumstances of this blow, which will be a shock to thousands of acquaintances and friends. Our deepest sympathy is extended to the bereaved family.

George E. Davenport.

Strolling with his grandchildren on the afternoon of November 29th through the Middlesex Fells reserva-

GEORGE E. DAVENPORT

tion, which he loved so well, George Edward Davenport, of Medford, Mass., a botanist and scholar who had won a national reputation as a specialist in

the ferns of North America, and who prepared and some years ago presented to the Massachusetts Horticultural Society what is probably the second best herbarium of ferns in this country, was seized with an attack of vertigo, and before help could be summoned dropped to the ground dead. His little grandson, Davenport Jackson, remained beside the body while the other children ran for help.

Mr. Davenport was born in Boston Aug. 3, 1833, and had always lived near his birthplace, residing in several of the suburbs at different times. As a young man he was a great friend of Wendell Phillips and William Lloyd Garrison.

After marriage he began to confine himself to his botanical work, and for years classified new and rare specimens of ferns for Harvard and Yale universities and the Smithsonian Institution at Washington. He was a member of the Medford School Board for eighteen years and was in office at the time of his death. He was a member of the Massachusetts Horticultural Society, the New England Botanical Club, was founder of the Middlesex Field Club and was the author of many botanical and scientific works. In 1898 he was made a fellow of the Academy of Arts and Sciences.

Mr. Davenport was a leading spirit in the agitation for the preservation of the beautiful tract of forest land and expanse of water known as the Middlesex Fells reservation.

His scientific analysis of ferns won for him his greatest distinction, notably in his contributions to the National Herbarium, "The Fern Bulletin," and in a series of monographs on the principal species of ferns in North America. At the time of his death he was at work on what he regarded the great task of his life, a manual of the ferns of North America as well as a less technical work for use in the schools.

James H. Veitch.

The death of James H. Veitch, chronicled by our English contemporaries, is a great loss to the horticultural world. Mr. Veitch died on November 20 after a long illness. His age was but 39 years. Few men have been able to accomplish so much in research and literary work as Mr. Veitch crowded into his short, busy life.

J. M. Gower.

J. M. Gower, employed by O. K. Gerrish's nurseries, Westbrook, Me., died on November 21, aged 66.

Victor Thompson.

Victor Thompson, Austin, Ill., 60 years old, was found dead in his bed on November 24.

BUSINESS CHANGES.

S. J. Turner has purchased the greenhouses of A. Broman, Independence, Mo.

Samuel Stone, of Bangor, Pa., is about to move his greenhouses to South First street.

F. E. Bouton, of Bridgeport, Conn., has removed his entire business to the greenhouses at 408 Warren street.

NEW CHRYSANTHEMUMS.

Nonin's New Earlies.

"I reckon that's the best lot of earlies that ever Nonin sent out," said Mr. W. Wells, the famous English chrysanthemum grower, as he led me towards a large expanse of bright colored early flowering "Mums" in the open ground at his nursery at Merstham. Coming from such an authority it must be considered as being an opinion of no little value for Wells himself is a large raiser of earlies and devotes a considerable area to their culture in the open. He has therefore no object in puffing up another man's goods.

The earliest at Merstham are grown in long rows; not one or two plants of a sort but large numbers of each so that a fair trial can be made. Of Nonin's novelties for 1907 a few notes may be interesting to American growers of this popular section and we may observe that they are mostly free flowering, neat little dwarf plants, a foot or 1-2 ft. high and most suitable for beds and the border. The flowers themselves practically belong to one class, viz, a small reflexing Japanese, a perfect miniature of the larger show type. We notice in some cases a great variation in the color and our excellent guide explains that if the greatest degree of satisfaction is to be obtained from these plants disbudding must, in a measure more or less severe, be practiced. It was curious to notice the difference in the colors of those disbudded and those not disbudded. Some of the crimson grown naturally were dull and pale while those that had had the buds slightly thinned and were allowed to produce their blooms from terminals were several shades brighter and richer. Bronzes and mauves in a like manner are much improved although whites and yellows do not appear to undergo much difference in the intensity of their tones by the treatment mentioned.

Tonkin is a nice neat little flower of a rich golden orange, shaded crimson. Mignon, delicate rosy mauve; nice stiff stems. Hermine, purest white, very robust. Tapis d'Or, a perfect mass of pure golden yellow; so floriferous that disbudding is an absolute necessity. Ernest Daudet, bright orange shaded crimson, large blooms; a very charming variety. Mireille, rather taller than the preceding, it runs to nearly 2 feet in height; good sized flowers, bright rosy mauve. Lumineux, a pretty, neat little Jap; color fiery red, reverse golden. Roi des Jaunes, nearly 3 ft. high, remarkably full, fine shade of pure yellow and blooms of good size. Eden; this grows about 2-2 ft. high; bright rose. Vesuve, chestnut crimson; nice bushy plants. Chatillon, dwarf, salmon on golden ground. Diane, about 3 ft. high, creamy white. Ideal, about 3-1-2 ft. high; October blooms, color rosy white. Venise, 1-2 ft. in height, golden salmon shaded gold on the reverse. Carmen, very pretty, a neat flower, rich reddish carmine; take terminal bud for color. Bouquet Rose, very free, bright rose, centre golden.

Calvat's Novelties.

Calvat's chrysanthemums are always early bloomers and that is the secret

GREENS, BERRIED PLANTS AND OTHER HOLIDAY STOCK

BOXWOOD (Cut Sprays) Indispensable for wreath making and decorative work. Clean, dark green sprays, put up in 50 lb. cases, 15c per lb. **CASE HOLLY**, extra choice, glossy, dark green and well berried, per case \$4 50, in 10 case lots at \$4.00 per case. **HOLLY WREATHS**, made full with plenty of berries and of selected foliage, (packed in cases of about 100) \$15.00 per 100. **LYCOPodium**, from the deep woods, extra color and quality this season, per lb. 8½c.

Also Mistletoe, California Pepper Sprays, Galax, Magnolia, Clump Moss, etc., etc.

S. S. PENNOCK-MEEHAN COMPANY "THE" Wholesale Florists of
1608-1620 Ludlow Street - - - - - PHILADELPHIA

of his success for, in the days when he first began, the American seedlings imported into England were invariably late in flowering and while the interest of the growers was keenest Calvat's novelties were well out before the shows. He has had a pretty good run since 1892 and must look out for rivals for in the chrysanthemum world no man has ever remained at the top of the tree without his position being challenged sooner or later. I have just paid a visit to a grower who has the Calvat collection for 1907 in good form. They were described by me last season in my notes of the French shows. Those that are the most promising here are Algerias, Ami Bergeret, Excelda, La Marseillaise, Paul Randet, Leon Truelle, Mme. Vellay Desmesiretz, Roi d'Yvetot.

New Australian Chrysanthemums.

From what I can gather Australian seedlings do far better in America than European-raised varieties, and as I have just visited the new Wells-Pockett collection it may be useful to give a few advance notes:—

Clara Wells.—This is a monster incurved variety of the old florists' show type. The florets are deeply grooved and most regularly incurving, building up a flower of the deepest and most compact form. The color is quite golden yellow, passing to a creamy golden buff towards the base of the flower; a grand acquisition.

Merstham Blush.—A huge Japanese with very long outer florets, twisted and intermingling in the center; color, delicate shade of pale blush.

Pockett's Surprise.—This ought to be one of the best. The blooms are of colossal dimensions, the florets of great breadth and very long, curly at tips, purplish rose; reverse, golden bronze.

C. H. Totty.—A Japanese, deep in build; a compact flower with florets reflexing; golden reddish chestnut, reverse golden; florets of medium width. A rich, warm shade of color that is pleasing to the eye.

W. Luxford.—A large Jap., medium grooved florets; pale, pure canary yellow, somewhat lighter on the reverse, which has a glistening surface.

Mrs. W. Wells.—Another big bloom, medium-sized flat florets; color, golden orange, shaded carmine, golden reverse.

Dorothy Gouldsmith.—A Jap.; very long florets, making a deeply built flower. Florets curly at the top, canary yellow, outer florets shaded bronze.

Messrs. Brumming of Australia have raised some very good kinds and, among their newest, *Romance* is worthy of a note. This is an old style incurve, perfect in build and of great size; a deep rich shade of golden yellow.

Richard Seddon.—Jap.; a beautiful color, a warm golden shade of terra cotta with a fine golden reverse; the florets are of medium width.

Lottie.—Jap.; this has twisted and intermingling florets of great length; the flower as seen was of medium size but very promising; pure golden yellow.

Mrs. Henry Hughes.—A large Jap.; medium sized florets, twisted and curly; color, old rosy amaranth, with reverse of silvery pink; a full double flower of great size and substance.

Golden City.—Incurved; most perfect in form; a deep pure rich yellow.

New Continental Seedling Chrysanthemums.

After a careful comparison of the many new flowers submitted for adjudication at the Paris show, I have come to the conclusion to discard any attempt to rely upon the decisions of the Floral Committee and to judge for myself as to the possible merits of the new French seedlings for 1908. Climate and cultural conditions vary and that English and American growers have had in their testing of novelties.

Mme. Nathalie Langle (Calvat).—A Japanese of great size and substance, very full and double, good floret, pretty shade of maiden's blush.

Marthe Randet (Calvat).—A very big Japanese incurving flower with medium-sized florets, which are deeply grooved, color creamy white.

Barton Pacha (Calvat).—A very deep globular flower, of the Japanese type. Bronzy gold, deeper on the outer side.

Mme. St. Romme (Calvat) This

too, is a very large, deeply-built globular Japanese, with rather broad florets, color very pale blush passing to white towards the centre.

Le Capitole (Calvat).—Japanese Incurved, very narrow grooved florets, but a compactly built flower, very deep in form, yellow, outside shaded bronze.

Vice-Consul Lervin (Calvat).—Japanese not unlike a pale Mrs. W. Wells, in color being of a rather paler shade of warm golden terra cotta.

Comte Grandence Torrielli (Calvat).—A very large Japanese having narrow florets that build up into a big, compact flower; deep golden yellow, shaded outside with purple.

Francois Marchand (Calvat).—A reflexing Japanese of excellent form, rather narrow florets, color old rosy crimson shaded golden.

Souvenir de Vindras (de Pins).—Japanese Incurved with broad grooved florets, a big solid flower, color rosy crimson, reverse golden straw.

Vicomtesse de Chanterac (de Pins).—Another big Japanese with grooved incurving florets, very solid and deep in build. A full and double flower, deep golden orange tinted bronze.

Gene Drude (de Pins).—Large Japanese of the Japanese type, color very fine and effective, deep rich shade of reddish crimson, the florets rather broad, reverse golden yellow.

Pic de Pajolle (de Pins).—A noble, solid-looking flower incurving in form, the florets deeply grooved, close and compact in build, color old rosy crimson, with straw reverse.

Lieut. Cochet (Calvat).—A huge Japanese, having long flat florets pure golden yellow, a bloom of noble dimensions and of fine form.

Victoire (de Pins).—A very large Japanese after the style of *Le Colosse* Grenoblois, very full and double, lilac mauve shaded pink, reverse silvery.

M. J. Barat (de Pins).—Japanese, a very full and double flower, of deep build, color rich rosy purple, rather broad florets, reverse silvery.

Le tour d'Argent (de Pins).—A very globular Japanese, compact and close in build, color pure white.

C. HARMAN PAYNE.

Seed Trade

Having placed his order for a fresh supply of garden seeds, your Uncle Samuel is awaiting their arrival, and the completion of the new building he is having built in the grounds of the Department of Agriculture. It looks as if the distribution is bound to be late this year, but the later it is the less mischief it will do.

Onion sets have made a remarkable spurt during the past two weeks, and holders seem reluctant to name prices. It is stated that yellow sets which could have been bought at \$1.75 four weeks ago, are quoted timidly at \$3.00 by holders who seem to be afraid lest their quotations be accepted. Now, if the advance in the price of sets is followed by the expected rise in the price of large onions, there will be created a demand for seed that will carry prices considerably above present levels, which is a consummation devoutly to be wished for.

The recent heavy, wet snow will go hard with any corn still in the field; in fact it will destroy the last faint hope of making seed of it.

While tomato seed is not a factor to be compared with peas, beans or corn in importance, it has scored a marked advance over last year's prices, and has proved, as has been several times predicted in these columns, a decidedly short crop. Such varieties as Stowe, Favorite and Paragon, which have been sold in considerable quantities to seedsmen and canners at from 80 to 90c. per lb., are now in active demand at \$1.50 and \$1.75.

Not for many years have catalogue houses been so at sea over the question of prices. Conditions have changed with kaleidoscopic speed and frequency, and while there has been some easing up on one or two leaders such as onion seed, the general tendency has been towards decidedly higher prices. A greater number of items have been noted as failures than in many years before, and while these failures have in the main been of specialties and varieties not used in large quantities, they have caused no inconsiderable worry to retailers, and particularly to catalogue houses who have their items listed, and, as their catalogues are in most cases made up, the inability to secure such items is likely to result in more or less embarrassment.

The financial stringency is affecting all lines of business, but seedsmen are feeling it less severely than many other lines, excepting the large wholesalers and growers who are having some trouble in getting ready cash with which to pay their farmers and the large force of employes which they carry on their payrolls at this season of the year. Indications are that the tightness is loosening a little, and it is hoped that matters will soon become normal again.

PLANT IMPORTS.

There were entered at the port of New York during the week November 20 to November 26th, inclusive, the following plants, etc.:

Via Antwerp: H. F. Darrow, 3 cs. plants; Hussa & Co., 4 tubs laurel trees.

From Germany: E. L. Boas, 1 cs. plants; H. F. Darrow, 253 cs. lily of the valley pips; Wm. Elliott & Son, 54 cs. do.; McHutchison & Co., 150 cs. do.; Maltus & Ware, 320 cs. do., 6 cs. plants, 40 cs. bulbs; Metropolitan S. S. Co., 23 cs. plants; C. F. Meyer, 152 cs. lily of the valley pips; F. R. Pier-son Co., 10 cs. bulbs; Aug. Rolker & Sons 146 cs. lily of the valley pips, 85 cs. plants; Anton Schultheis, 42 cs. lily of the valley pips; Ter Kuile, 21 cs. do.; Vaughan's Seed Store, 20 cs. roots; Weeber & Don 34 cs. lily of the valley pips; To Order, 280 cs. do., 20 cs. bulbs; Sundry forwarders, 831 cs. lily of the valley pips, 5 cs. plants, 2 cs. lilacs.

Via Southampton: Dearbergh Bros., 8 bls. plants; Dupuy, 5 cs. seedlings; Maltus & Ware, 12 cs. plants; McHutchison & Co., 31 cs. do.; A. Murphy & Co., 1 cs. trees; Aug. Rolker & Sons, 13 cs. plants; C. B. Richard & Co., 3 cs. do.; F. B. Vandergrift & Co., 2 cs. do.

Via Glasgow: J. H. Dunlop, 2 cs. trees; Forwarders, 9 pgs. plants.

From London: American Exp. Co., 2 cs. rose trees; Vaughan's Seed Store, 30 pgs. seed.

From Bermuda: Forwarders: 6 cs. palm leaves.

There were entered at the port of New York during the week of November 27 to December 3, inclusive, the following plants, etc.:

From Germany: A. T. Boddington, 100 cs. lily of the valley; W. W. Barnard & Co., 4 cs. do.; H. F. Darrow, 54 cs. do.; McHutchison & Co., 509 cs. do.; 10 cs. plants; C. F. Meyer, 458 cs. lily of the valley; John Scheepers & Co., 139 cs. do.; August Rolker & Sons, 98 cs. do.; W. W. Palmer & Son, 4 cs. do.; Anton Schultheis, 170 cs. do.; Vaughan's Seed Store, 2 cs. seed; Ralph M. Ward Co., 40 cs. lily of the valley; To order, 2 cs. do.; 100 pgs. seed; Sundry Forwarders, 626 cs. lily of the valley, 14 cs. roots; Total, 2,202 cs. lily of the valley.

Via Havre: H. Frank Darrow, 2 cs. plants, 255 pgs. seeds; Peter Henderson & Co., 128 pgs. seed; McHutchison & Co., 4 pgs. plants.

Via Antwerp: Hussa & Co., 20 cs. shrubs; Kraemer & Foster, 1 cs. plants, 12 tubs laurel trees; Ter Kuile, 1 cs. plants; Sundry Forwarders, 5 cs. bulbs, 1 cs. plants.

Via Rotterdam: H. F. Darrow, 28 cs. plants; Cleary's Horticultural Hall, 3 cs. do.; Wm. Elliott & Sons, 20 cs. do.; McHutchison & Co., 37 cs. do., 1 cs. trees; C. B. Richard & Co., 85 cs. plants; P. Ouwerkerk, 30 cs. trees; Vaughan's Seed Store, 11 cs. plants; Sundry Forwarders, 162 cs. do., 20 cs. trees, 41 cs. trees and plants, 3 cs. bulbs, 19 cs. flower roots.

Via Southampton: N. Bogue, 6 cs. plants; A. T. Boddington, 2 cs. trees; McHutchison & Co., 18 cs. plants, 8 cs. trees, 13 pgs. seed; C. B. Richard & Co., 4 cs. trees; August Rolker & Sons, 7 cs. plants; Vaughan's Seed Store, 4 cs. do.; Sundry Forwarders, 21 cs. do., 6 cs. trees.

CATALOGUES RECEIVED.

E. S. Miller, Wading River, N. Y.—Trade Price-list of Bulbs and Hardy Plants for Spring of 1908.

J. M. Thorburn & Co., New York.—Preliminary Trade Price List of High Class Vegetable Seeds.

John H. Sievers & Co., San Francisco, Cal.—Catalogue of florists' greenhouse plants, including fancy pelargoniums, carnations and begonias as specialties. An illustration of carnation Hannah Hobart adorns the title page.

porium, Washington, D. C. An interesting illustrated catalogue of pet animals, birds, cages, goldfish, etc., many of which are useful accessories to the stock of an attractive florist store, particularly at holiday time.

The Edward H. Rust Palm Nurseries, South Pasadena, Cal.—A most interesting catalogue of the tropical garden and porch plants available in that sunny land. A front cover illustration showing Cocos plumosa used as an avenue tree and a number of the garden pictures interspersed through the pages are calculated to make one envious these cold December days.

MUSHROOMS.

The accompanying picture shows a bench in a north greenhouse partly filled with these delicious fungi. The spawn was put in September 30th and we started picking October 28th. I would say that the bed was made and planted in the regular way with the exception of the manure which is only

4 inches deep. The result reflects credit on the grower, John Brock, whose picture was taken at the same time. The spawn used was English Milltrack and Pure Culture. The only difference I could see was that the mushrooms of the Milltrack came browner than those from Pure Culture.

THE GINKGO AS A STREET TREE.

Read what the highly respected and learned superintendent of the Botanic Gardens, Washington, D. C., Mr. William R. Smith, had to say on the above subject in Meehan's Monthly, November, 1898:

"I think for a curbstone tree among the best is Ginkgo of the Japanese, *Salisburia adiantifolia*, or Maidenhair Tree of the botanists. Two of these interesting trees have flourished in Washington, D. C., for sixty years or more, apart, however, and being unisexual, no seed was produced. We were two years rooting a hard wood cutting and have a good tree thus propagated. Mr. Jardine, a Frenchman, an importer of trees and shrubs, sold to the British legation two Ginkgos to plant each side of the portecochere. He charged \$7.50 apiece for them. The bill was disputed, and we were made referee. The matter was compromised at \$5 each. Shortly after, when searching for street trees, we visited Hoopes Brothers and Thomas, West Chester, Pa. Walking through the nursery with my friend Josiah Hoopes we came to a large lot of Ginkgos. 'There,' he says, 'you know that's a good thing, but our agents won't touch it. It won't sell.' 'What will you take for it?' I asked. 'I'll take forty (40) cents apiece, just to get rid of them,' was his reply. We bargained for three hundred.

"Pierce St., Washington, D. C., is now planted with them and another short street, 17-12 St., just west of Lafayette Square, where they are not so fine as in Pierce Street, owing to their being robbed by adjoining elms in the square, and the soil is not so good. Here may be seen the effects of planting too close; nevertheless, they are very fine and fruit freely. I have never seen an insect near them.

"This tree has a very interesting Boston history which we find in Hooker's Kew Gardens Miscellany, Vol 2, 1850, under the heading 'The Ginkgo in Boston Commons.' A Ginkgo tree formerly stood in a garden belonging to Mr. Green, which garden was in the centre of Boston. After his death (1832) the house and grounds were sold. This tree was removed at the partial cost of the city (each of Mr. Green's children paying \$100 toward the expense) to the walk encircling the Common, and planted before the windows of Mrs. Green's house, in which she resided since her husband's death. The tree is a native of China, and was of full size when Mr. Green, Sr., purchased the garden in 1798. It is now in fine leaf and beauty. The accompanying lines appeared in the public papers some months after the tree's removal. Dr. Bigelow is the author. This poem consists of fifteen stanzas. We quote the last:

"And so thou hast survived thy fall
And fairly disappointed all
Who thought to see thee down;
And better days are stored for thee,
Long shalt thou live, triumphant tree,
And spread thy foliage broad and free
A credit to the town."

"Is this individual tree still triumphant? If not, how long did it live? Mr. Downing, three years afterward, wrote with approval of the operation of transplanting it. He gave its

height as forty (40) feet and its circumference as three feet. How is it now? A full history would be interesting."

W. R. SMITH.

WHOLESOME CHESTNUTS.

Lilies are worth money at Christmas, and plants to be in bloom then should now be in such an advanced state as to put the question of whether they will or will not be ready beyond the realm of doubt. Buds of increasing size are the only sure sign of their timely arrival in proper condition. A temperature bordering on 60 degrees is agreeable to plants coming along easily, but if there is cause to suspect that in such a temperature all or any will not be on time, a few degrees higher may without any danger be given them, beginning with a slight increase. Besides the necessity of the proper temperature to bring lilies in on time there is the ever present need of constant watchfulness in keeping the plants clear of green fly. Careful watering is also very important; allowing the roots to get dry is ruinous and spasmodic watering, resulting often in a soggy condition of the soil, is none the less so.

Now is the time most propitious for the satisfactory and rapid propagation of many kinds of indispensable stock. No time should be lost in making a start, in order that when the time approaches for a forced discontinuance there may be a breathing spell instead of a confused rush and a frenzied effort to catch up. Keep the propagating bench comfortably filled right along with cuttings that require bottom heat to root.

Mignonette, to do well, must be grown cool and the soil kept in a sweet mellow condition. The same with

stocks and antirrhinums, all of which are satisfactory and remunerative when well grown.

It is very injurious to plants of Boston fern and its improved varieties to have them growing jammed together. Allow as much air and light in among and upon them now as possible.

Poinsettias sufficiently advanced to insure their fitness for disposal at Christmas are very likely to be much benefitted by moderate application of liquid manure; that made from cow manure is the best and safest to use.

Keep stevias at a temperature above the freezing point, but as near thereto as the reliability of resources safely warrants.

Begin at once on a thorough reckoning of what is available for utility throughout the holidays, and if the result indicates a shortage take measures for getting on the right side in good season.

Dahlias and cannas put away for the winter with some dry soil adhering to them and kept dry where frost will not penetrate, may confidently be expected to turn out in good condition in spring. If there is any fear of their not keeping, put them in barrels or boxes filled afterwards with very dry soil or sawdust.

Many evergreens, especially choice sorts, are killed every winter or left in debilitated condition through lack of moisture at the roots. This can be remedied considerably by putting a good coat of manure on the ground over the roots. Newly planted trees, shrubs and hardy plants of various kinds are much benefited by an application of manure in winter. With roses, either Hybrid Perpetual or others, some such covering is likewise needful.

Beds of rhododendrons may be

helped through the erratic winter weather by some shade in the shape of evergreen branches.

Lilium longiflorum should not be taken indoors until they have made abundance of roots, but they require sufficient protection to prevent frost injuring them outdoors.

The lack of interest apparent in specimen chrysanthemum plants is in line with the well-known fact that anything produced of abnormal dimensions unless it carries along with it increased utility before long ceases to be regarded with anything more than mere curiosity. It may not be over-hazardous to predict that before many years the striving for the production of huge monstrosities of chrysanthemum blooms solely for the exhibition table as is done almost exclusively now, will be a by-gone practice.

USEFUL BOOKS.

NEWS NOTES.

A nursery is about to be started at Gridley, Ill., by C. A. Rowley.

Sven E. Hanson, of Worcester, Mass., has been appointed park commissioner.

The Scranton Florist Supply Co., Scranton, Pa., have purchased the Bishop property at 201 Seventh street, for \$4,500.

J. H. Connelly, landscape gardener, was thrown from his wagon December 3 at Hyannis, Mass., and had his right arm broken.

Louis A. Crosby has purchased the greenhouses on the Homestead property at Lenox, Mass., and will move them to Hawthorn street.

Napoleon Lemay, florist of New Bedford, Mass., was badly scalded by the bursting of a hot-water pipe in his greenhouse on November 26. The pipe had been giving trouble and he was at work on it.

Edwin Lonsdale, who is a great admirer of the Ginkgo as a street tree, proposes to set out quite a number around the pavement of Girard College next year. He has cut down some fifty or sixty poplars this fall and they will be replaced with Ginkgos.

EXTRA FINE BOXWOOD \$17.50 per CWT.

GALAX LEAVES GREEN \$1.00 per 1000.

BUCKS CO.,

FLOWER MARKET REPORTS

BOSTON This week opens up somewhat quieter than the last but is fairly satisfactory, everything considered. Demand seems to be stronger with the wholesale shipping houses than with the flower markets, which is possibly explained by the fact that the retail business in the city proper is less active at the present time than it is in the outside towns and rural communities. Throughout New England Tea roses are strong where quality is good but low grade roses are hard to dispose of. Beauties find a somewhat lighter call. Carnations of best quality are selling well and the effect of the lessened chrysanthemum product is very evident. Violets hold their own fairly well but lily of the valley drags in a most unexplainable manner. Should conditions hold as they are now until holiday week there will be no reason for grumbling.

BUFFALO The tone of the market was much better the past week though nothing flourishing. It was hardly noticeable that a holiday was mixed in, but all must give thanks for the little extra business. Chrysanthemums sold very satisfactorily, but the prices were not up to the year previous; the same may be said about carnations, roses and other stock. Carnation demand grew stronger each day from Monday. Beauties were in good supply and of fine quality; on these the prices held firm, also on teas. A fairly good demand was had on lilies, narcissi, hyacinths, etc., but lily of the valley moved with difficulty, and there was enough to go around two or three times. Violets were in good supply and the quality fine; there being no snow to delay trains they for one time arrived when they were wanted, and a fairly good cleaning-up was the result, but prices advanced very little.

DETROIT. The passing of Thanksgiving Day closes the chrysanthemum season. All growers have reason to be gratified at the monetary returns brought by the chrysanthemums. At no time was there a stagnation or glut but rather a shortage of white varieties and if growers bear this in mind when the time for planting chrysanthemums reappears, next season can be made still more remunerative. Thanksgiv-

ing day brought a general increase in the counter trade but probably not as large as at other seasons. Most of us were kept hustling for the debutantes some of whom made quite strenuous demands on the florists. All in all satisfaction reigns.

INDIANAPOLIS The past week has been an exceptionally dull one. Leading retailers report Thanksgiving trade 10 to 25 per cent behind that of last year, lily of the valley, violets, Beauties and tea roses finding slow sale. The demand was mostly for carnations and the medium grades of chrysanthemums. Quantities of good stock of all kinds was to be had, with a slight advance in price of the better grades. The outlook at the present time is not encouraging, and should the present condition continue prices will not advance on anything. The larger blooms in chrysanthemums are still in fair supply. Fine lily of the valley, Paper Whites and Roman hyacinths are to be had, but do not sell in large lots. Greens are available in any quantity.

NEW YORK Lower values all around tell the story of the reaction after the little spurt of Thanksgiving week. The supplies coming to this market are so heavy that a constantly moving outlet is indispensable to anything like stable values, and the slightest lull in general demand is bound to be reflected in accumulated surpluses which, while they usually find some sort of an outlet, do so only at "bargain counter" figures. Any effort to hold stock for a price under such conditions only results in its final debasement to a still lower bargain counter. Carnations are rallying nicely now that the domination of the chrysanthemum is at an end. Between asters at first and chrysanthemums afterwards, the carnation finds a rough road nowadays from midsummer until middle of December. After that "it's different."

PHILADELPHIA Two big foot ball games Wednesday and Saturday, together with Thanksgiving Day made the past week unusually good in Philadelphia; but not as good as it should have been, judging from last year's standards. Immense quantities of stock found a market,

but the market was so overloaded that notwithstanding the good demand there was no chance for the prices to jump. Beauties were of fine quality and plentiful and the same may be said of all other roses. Chrysanthemums such as Nonin, Chadwick and Jones are still a strong factor. Carnations shortened up considerably and there was a corresponding stiffening of prices. Lily of the valley continued fine but plentiful and the demand was only normal. Cattleyas were scarce and the supply of white orchids was practically exhausted. Cypripediums are now commencing to come in quantity. Paper Whites are plentiful and go but middling. Easter lilies sluggish. Boxwood in cut sprays in case lots meets with good sale. Bookings for evergreens, Christmas plants, and decorative material are very brisk.

TWIN CITIES Business in the Twin Cities was rushing the past week. There was and still is a shortage of carnations, roses and chrysanthemums. There were enough but not too many, and prices kept up good. The shortage on carnations is mostly due to the cloudy weather which prevailed for a week or ten days.

WASHINGTON Thanksgiving was indeed a day of thanksgiving to the Washington florists. Everything, even to small flowers and plants, sold readily. The day dawned very unfavorably, to all appearances, but before noon the clouds broke and a beautiful afternoon favored the city. Azaleas are beginning to come in but are by no means up to the standard. Carnations and violets are responding most satisfactorily, although the continued cloudy weather has cut down the amount of bloom.

In the multiplicity of special societies in America the orchid seems to have been kept in the background. Why should not the devotees of the orchid organize? We believe that a movement on this line would meet with enthusiastic support from the orchid lovers in America whose number is legion.

TO LEASE

For a term of years. Four Greenhouses containing about 40,000 ft. of glass. Low rent and a good market. For particulars address

N. F. MCCARTHY & CO.
84 Hawley Street Boston, Mass.

WANTS, FOR SALE, ETC.

HELP WANTED

MUNICIPAL CIVIL SERVICE COMMISSION,
299 Broadway.

AMENDED NOTICE.

New York, November 29, 1907.
PUBLIC NOTICE IS HEREBY GIVEN that the time for receiving applications for the position of GARDENER has been extended until 4 P. M., MONDAY, DECEMBER 30, 1907. The examination will be held on WEDNESDAY, JANUARY 22, 1908, at 10 A. M. The subjects and weights are Special, 6; Experience, 4.

The provisions of clause 12 of Rule VII, to the effect that "no person who has entered any examination for appointment to a competitive position and failed therein or who has withdrawn therefrom, shall be admitted within nine months from the date of such examination to a new examination for the same position," is waived so far as it applies to this examination.

For further information apply to the Secretary.

F. A. SPENCER, Secretary.

HORTICULTURE needs a wide-awake representative in every town in the land. Good commissions paid on advertising and subscriptions. If you are ambitious, write for terms.

FOR SALE

FOR SALE—4 Greenhouses, most desirable location in the Newtons; large lot land fronting on two streets, dwelling house of 8 rooms; all flowers sold at door for fancy prices; excellent business, best reasons for selling; price will be made reasonable. Peakey-Wallace Co., 101 Tremont St., R. 717, Boston.

FOR SALE—One top delivery wagon and one open delivery wagon, suitable for a florist's use; almost new and in good order; also a pair of good delivery horses; the above can be bought at your own price. Ed. Higon, 146 West 28th st., New York.

MISCELLANEOUS WANTS

WANTED right away, 150 to 200 ft. of used 4-inch drainage pipe (cast iron standard light), with bell and flange. Must be cheap for cash. Write E. F. Oliver, P. O. Box 143, Avon, Mass.

HORTICULTURE'S REPRESENTATIVES.

PHILADELPHIA, PA.—George C. Watson, Dobson Bldg., 9th and Market Sts.

PITTSBURG, PA.—James Hutchinson, corner Dunmoyle and S. Negley Aves.

TOLEDO, OHIO—J. L. Schiller, 929 Prout Ave.

FRUIT GROWERS' FEATHERED FRIENDS.

It is gratifying to note that after an exhaustive research the Department of Agriculture has declared that the birds of California are not injurious to the fruit industry of that State. According to the report the strictly insectivorous birds prove to be almost wholly beneficial, by far the greater percentage of the insects eaten by them being injurious kinds. They are hence allies of the orchardist and their presence in and near orchards should be encouraged in every way. Of the species addicted to fruit eating, not one was found to make its diet wholly or even chiefly, of fruit; and the fruit eaters with possibly the exception of the house finch, are found to feed upon weed seeds and noxious insects to such an extent as to fully offset their destructive propensities. One reason why birds attack fruit in California more than in regions further east, is given as the dryness of the summers, the birds finding juicy fruits an acceptable substitute for water, to secure which, in some instances, necessitates a flight of several miles. Much of the injury done to small juicy fruits in California, such as grapes and cherries, consists of simple punctures in the skin, through which apparently nothing but juice has been drawn. It is therefore recommended that drinking places be maintained for the birds in orchards where water is not otherwise accessible. Among the birds studied were the house finch, or linnet, Western tanager, swallows, California shrike, vireos, warblers, thrashers, wrens, nuthatches and titmice, kinglets, gnat-catchers, robins, etc. The author, F. E. L. Beal, notes "a healthy state of feeling on the part of the great majority of the California fruit growers toward the bird population. While many stated they suffered loss none advocated measures for the extermination, or even the material decrease of the birds. 'We can't get along without the birds' was the sentiment voiced by many and really endorsed by all."

NEWS NOTES.

The Report of the Secretary of Agriculture shows that the common rat probably does more damage on farms than all wild animals combined. Owing to injury of orchard trees by rabbits, experiments have been carried on to discover a protective wash, and such a wash has been found in the lime-sulphur-salt wash so extensively used against the San Jose scale.

There are in the Western States eight government nurseries for the growing of forest trees, located in the national forests of San Gabriel, Santa Barbara, Gila, Dismal River, Pike's Peak, Salt Lake, Pecos, and Lincoln. The combined area of seed beds at the eight stations is eleven acres, which contain 5,000,000 trees from one to three years old. About 700,000 trees were planted during the winter and spring of 1907.

FIRE RECORD.

The boiler shed and palm house at the Industrial Gardens, Mobile, Ala., were destroyed on November 12.

RHODES DOUBLE CUT PRUNING SHEAR

Pat'd June 2, 1903.

RHODES MFG. CO.,
GRAND RAPIDS, MICH.

THE only pruner made that cuts from both sides of the limb and does not bruise the bark. Made in all styles and sizes. We pay Express charges on all orders. Write for circular and prices.

WE CAN'T SHOW YOU

satisfactorily from a cut, how extremely light yet solid as a rock our Iron Frame Houses are. Here is a 40 foot interior, with only two lines of columns spaced on each rafter, 8 feet 4 inches apart, and the effect in this illustration as you look down the center walk, gives somewhat the impression of a "house full of columns." You have to see one of our houses to know what their lightness means, and to appreciate the care and strength given to every structural detail. What we want to do, is visit one of our 1907 model houses with you, and point out the many points of superiority. There is nothing quite so convincing as seeing the thing itself. Make an appointment with us. Write us.

HITCHINGS AND CO.

GREENHOUSE DESIGNERS AND BUILDERS.

Manufacturers of Heating and Ventilating Apparatus.

1170 Broadway,

NEW YORK.

WE HAVE TOLD YOU

About the cast iron foot piece and angle iron post — now once more on the galvanized angle iron eave plate and what it does.

First, the sash bar clasp is secured directly to it, causing a dry, non-rotting joint.

Second, it gives tremendous strength to the house at just the point strength is needed.

Third, it keeps itself ice free.

Fourth, it won't rust.

It's easy enough to know a house's weak points, but it's another thing to make the weak points strong—that's our strong point.

We make every part of a greenhouse but the glass. We sell any part.

AS A MATTER OF CONVENIENCE AND CONVINCEMENT FOR YOU

"SEEING is believing" is an old time saying, but nothing newer or truer could be said of the U-Bar greenhouse. We don't know of a single instance where we have been able to show a man a U-Bar house—get him on the outside and look in, and then from the inside and look out—that he has not become convinced that it is the *only* greenhouse construction. Not only convinced but downright enthusiastic. So that is our reason for wanting you to see one of these houses. The following list selected from our customers in various places here and there over the country, will be a guide to the one most conveniently reached. We will gladly tell you how to reach any of these houses. But before you go, give a half hour to our catalog, to better know exactly what points of superiority to look for—and to get completely out of your mind the impression that it is only the ordinary construction you are going to see. It is as absolutely different and far in advance of any others. Send for the catalog while you have our address right handy.

DAHLIA CHARLES LANIER

BEST NOVELTY OF THE YEAR

We shall not describe it ourselves—the Press has already done so.

... WHAT THE PRESS SAYS ...

From the New York Tribune, Sept. 26, 1907.
At the Dahlia Show at the American Institute Exhibit.

Probably the most striking of the new Dahlia specimens is a brilliant yellow, its round blossom as large as the head of a baby, from the Charles Lanier Estate at Lenox.

Standing high and proud on their long stems in a huge yellow vase in the centre of a table these magnificent blossoms caused audible exclamations as they caught the eyes of the visitors. This is their debut in New York, although they were recently shown in Boston.

From the New York Times, Sept. 27, 1907.
Newest Specimens at the Dahlia Show.

A large number of men and women visited the big dahlia show at the American Institute, 19 West Twenty-fourth St., yesterday afternoon. There were at least

200 varieties of the finest and newest specimens of this beautiful Fall flower, and it would be impossible to tell how many colors and shades.

The most noticeable blossom was a big Charles Lanier which is known as the "show" dahlia. It is the old-fashioned quilled flower but of a mammoth size and beautiful yellow color. This was raised by A. H. Wingett, on the estate of Charles Lanier, Lenox, Mass., and named for the proprietor. Mr. Wingett has been at work developing the plant for the last three or four years, and it has now been awarded first prize and a certificate, which is a scientific sanction of it as a new flower.

The Charles Lanier dahlia probably will be sold before the exhibition closes and should bring a good price, for it stands alone in its class.

From Horticulture, Sept. 7, 1907.
Dahlia Show at Boston.

The dahlia show at Horticultural Hall.

Boston, this week is unquestionably the finest exhibition of dahlias ever given in America.

The sensation of the show is A. H. Wingett's Charles Lanier, a four-year-old, deep yellow in color, which may be appropriately described the Col. Appleton of the dahlias. The flowers, which came in excellent condition all the way from Lenox, are shown in one of the large vases occupying the centre of the stage in the lecture hall.

From "Dahlia News", September, 1907.
New Seedling Show Dahlia "Charles Lanier."

Twenty-four enormous perfect blooms of a bright yellow were exhibited in a large Japanese vase, and in effect it equalled the best vase of Chrysanthemum. The special merit of this variety is the extreme length of stem, three feet or over, which makes it a most desirable variety for cutting. In size it equals any exhibition variety of show.

Plants to be delivered in May. Special prices to the trade only, as follows: Per dozen plants, \$3.50; 25 plants \$6; 50 plants \$11; 100 plants \$20. Orders to be filled in rotation as received.

THE BEST STOCK FROM THE BEST GROWERS

SAMUEL A. WOODROW

Wholesale Plantsman

Telephone
2083 Madison

53 West 30th St., NEW YORK

We desire to call attention to our large and fine stock of

Nephrolepis Piersoni Elegantissima

WHITMANII, etc. These are splendid selling plants for the Holidays. We offer exceptionally good value in the 6 in. and 8 in. sizes. Plants are in perfect condition and are exceedingly good value at the prices quoted. You will find no better selling plants than these beautiful ferns, and we offer them at lower prices than ever before.

2 1/4 in. pots, \$6.00 per 100; 3 1/2 in. pots, fine perfect little plants, \$15.00 per 100; 6 in. pans, 50c and 75c. each; 8 in. \$1.00 and \$1.50 each; 10 in. \$2.00 each; larger specimens, \$3.00 to \$5.00 each, according to size.

NEPHROLEPIS SCOTTII. Fine plants, 6 in. pots, 50c. each.

NEPHROLEPIS BOSTONIENSIS (The Boston Fern). 6 in. pots, 50c. each; 8 in., \$1.50 each.

SMALL FERNS FOR FERN PANS

There is nothing that sells better during the entire winter than small ferns for fern pans. We have a splendid stock of extra strong plants in 2 1/4 in. pots in the hardiest and most useful varieties for this purpose. Our stock will be found very strong and very nice.

\$4.00 per 100, \$30.00 per 1,000.

SURPLUS BULB STOCK

We offer what remaining bulbs we have at bargain prices. The only cheap thing about them is the price. The bulbs are of first-class quality and in perfect condition. Bulbs planted in December, and even as late as January, can be had in fine shape for Easter; and as Easter is late this spring (April 19th), they can be planted later than usual. If you have not all the bulbs you want, this is the last opportunity to get them. We offer an exceptionally fine lot of hyacinths, tulips and the choice varieties of narcissus at bargain prices.

Send for our surplus list.

WINSOR CARNATIONS

We have a splendid stock of strong rooted cuttings ready for immediate delivery. In order to get the best results from Winsor, it should be planted early. Now is the time to get gilt-edged stock. We have a splendid lot of cuttings ready for immediate delivery, and can also furnish strong established plants from 2 1/4 in. pots, fall propagation. **Strong rooted cuttings, \$6.00 per 100, \$50.00 per 1,000.**

CHRISTMAS 1907

The financial flurry is over, and trade will be good for those who properly prepare for it. We offer the following, all in first class condition :

- NEPHROLEPIS AMERICOHLII**, The Philadelphia Lace Fern. This, we believe will be the best selling plant we have for Christmas; everybody is fascinated by its exquisite grace.
4 inch pots at \$.50 each.
6 inch pans at \$12 per doz.; this size is very desirable.
8 inch pans at \$2 each.
10 inch pans at \$3 to \$4 each.
Large oval pans, very fine, at \$5 and \$6 each.
2 inch pots (for growing on), \$25 per 100; \$200 per 1000.
A purchase of these young plants will be a good investment for next year; it multiplies rapidly.
- NEPHROLEPIS TODEAOIDES**, The London Fern.
2 inch pots at \$25 per 100; \$200 per 1000.
6 inch pots at \$9 per doz.
- NEPHROLEPIS SCOTTII**, exceptionally well grown.
8 inch pots at \$1.50 each.
6 inch pots at \$6 and \$9 per doz.
5 inch pots at \$4 and \$5 per doz.
- ADIANTUM HYBRIDUM**, 2 inch pots at \$5 per 100.
- ASPARAGUS PLUMOSA**
2 inch pots at \$4 per 100; \$35 per 1000.
3 inch pots at \$7 per 100; \$65 per 1000.
- ORANGES**, with from 4 to 10 fruit at \$.25 per fruit. The small ones in 4 inch and 5 inch pots are particularly attractive.
- FICUS PANDURATA**, The famous decorative plant; nothing more satisfactory for the house.
Good plants in 6 inch pots, single stems at \$3 each.
7 inch pots, single stems, 4 feet high at \$4 each.
5 feet high at \$5 each.
Larger plants, both single and branched stems, at \$6, \$7.50 and \$10 each.
The plants from \$4 up are extra fine; good value for the price.
- PANDANUS VEITCHII**, well colored.
4 inch pots at \$.40 each; fine for basket work.
5 inch pots at \$.50 each.
6 inch pots at \$.75 and \$1 each.
- BEGONIA GLOIRE DE LORRAINE**, without doubt the finest we have ever grown.
3 inch and 3½ inch pots at \$20 and \$25 per 100.
5 inch pots at \$9 per doz.
6 inch pots at \$12 and \$15 per doz.
8 inch pots at \$2, \$2.50 and \$3 each.
- BEGONIA TURNFORD HALL**, 6 inch pots at \$1 each.
- HOLLIES**, well berried, at \$4, \$5 and \$6 each.
- POINSETTIAS**
3 inch pots, short for pans, \$12 per 100.
7 and 8 inch pots, 3 plants with fern at \$.75, \$1, \$1.25 and \$1.50 each.
8 inch pans, short with fern, at \$1.25 each.
10 inch pans, short with fern, at \$1.50 each.
6 inch pots, with fern, at \$.75 and \$1 each.
- CYCLAMEN**
5 inch pots at \$.35 and \$.50 each.
6 inch pots at \$9 and \$12 per doz.
- AZALEAS**. We have the finest lot of Azaleas we have ever grown for Christmas, including Mardner, Vervaeneana, Thiers, Petrick and Pauline Mardner, at \$1, \$1.25, \$1.50, \$2 and \$2.50 each.
Larger plants of Vervaeneana and Mardner from \$8 to \$7.50 each.
Pyramid Vervaeneana at \$3.50 and \$4 each.
Pyramid Petrick at \$1.25 each.
- CROTONS**, well colored plants.
4 inch pots at \$25 per 100; \$3 per doz.
4 inch pots, new highly colored varieties, at \$.50 and \$.75 each.
5 inch pots, general collection bright colors, at \$.50 each.
Larger plants at from \$1 to \$5 each.
- DRACAENA TERMINALIS**, the highest colored and best grown we have ever had.
3½ inch pots at \$3 per doz.; \$25 per 100.
5 inch pots at \$6 and \$9 per doz.
6 inch pots at \$12 per doz.
2½ inch pots, well colored, at \$15 per 100.
The latter are fine for baskets, hampers, etc.
- DRACAENA AMABILIS**, an excellent keeper, well colored.
5 inch pots at \$9 per doz.
6 inch and 7 inch pots at \$1 and \$1.25 each.
- DRACAENA MASSANGIANA**, fine, perfect plants of this excellent variety.
6 inch pots at \$1.25 and \$1.50 each.
5 inch pots at \$1 each.
- DRACAENA FRAGRANS**, perfect plants, 6 inch pots at \$6 per doz.
- DRACAENA SANDERIANA**, 2½ inch pots at \$12 per 100.
- SOLANUM CAP.**, well berried, 6 inch pots at \$4 per doz.
- BOXWOOD**, exceptionally fine value at \$1.50, \$2, \$5, \$6 and \$9 per doz.
- AUCUBAS**, heavily berried, in 6 to 8 inch pots at \$9, \$12 and \$15 per doz.

Kindly let us have your order early so that we can reserve fine stock for you

Chrysanthemums in Pittsburg

Our frontispiece illustrates the central palm house of what is said to be the largest range of conservatories in Pittsburg—that of Mr. A. R. Peacock, under the efficient management of T. P. Jenkinson. Here are about 25,000 sq. feet of glass devoted to palms, ferns, stove plants, orchids, cyclamens, chrysanthemums, begonias, roses, carnations, etc. This conservatory was erected by Lord & Burnham Company. We are indebted to the staff photographer of the Gazette Times for the photograph.

Mr. Jenkinson seems to have solved the problem of growing carnations in a city such as Pittsburg. The solution is early propagating.

He propagates in November and winters his plants in cold frames, having nicely-rooted plants to plant out, or pot on in spring. The stems on Enchantress, Lawson and Winsor are now 20 to 24 in. The large photograph at the bottom of this page gives an excellent idea of one of the greenhouses at Shenley Park during the recent Chrysanthemum Show there when Superintendent J. Jones regaled a Pittsburg multitude with a display of nearly ten thousand plants. The view in the conserv-

CHRYSANTHEMUMS AT THE FRICK CONSERVATORIES, PITTSBURG, PA.

atories of H. C. Frick gives good evidence that Superintendent David Fraser is the peer of any of his fellows in chrysanthemum culture and a worthy representative of the Chrysanthemum Society of America as its secretary. As our Pittsburg correspondent intimated in a recent issue of *HORTICULTURE*, success in cut flower production in the smoky, gassy atmosphere of Pittsburg is no mean accomplishment. We are glad to be able to show, however, that it is not an impossibility.

CHRYSANTHEMUMS AT SCHENLEY PARK, PITTSBURG.

Roses Under Glass.

GRAFTING

That grafted roses are steadily gaining in favor is beyond a doubt and the increase in the number of growers who are devoting space to this kind of stock would seem to indicate that the results have been satisfactory.

All soils, however, are not favorable to grafted stock, and before planting extensively the grower should ascertain whether grafted stock would be more remunerative than own-root stock in his own particular class of soil. In many of the heavy soils, the product of own-root stock exceeds in quality, and often in quantity, that of grafted stock. Also we must consider the varieties we intend to grow. Killarney and Bride will do well on Manetti in rather light sandy soil, while Beauty and Chatenay succeed best on their own roots. Those who contemplate doing their own grafting should soon get in their supply of Manetti. These should be potted and placed in a cool house, the temperature of which may vary from 38 degrees to 50 degrees, according to the length of time allowed them to make roots. Low temperature is necessary to keep the buds from starting before the stock has made a sufficient number of roots to give an immediate supply of sap to the newly attached scion.

The season when grafting can most successfully be performed is in the months of January, February and March as, during this period, conditions of temperature, moisture, etc., are more easily controlled than when the season is further advanced.

One of the chief essentials in this method of propagation is to have a suitable bench or frame to contain the plants when grafted. The style of the frame matters little providing it meets the requirements in other ways. The bottom should be about eighteen inches above the heating pipes, and the same distance below the sash covering or top of frame. The sides and ends should be boarded up, leaving spaces a few yards apart with doors attached, to serve as ventilators and to regulate the heat contained in the interior. There should also be a sufficient number of pipes under the frame to insure a minimum temperature of 80 degrees during the severest weather. When completed the frame should be practically air-tight. Material, upon which to set the plants may be obtained by sifting the ashes from the boiler room. This also serves to retain the requisite amount of moisture in the frame.

The selection of wood for grafting should be made by one who thoroughly understands the work, else there will be trouble later on. It is not advisable to experiment with soft, pithy shoots. The wood for the scions should be of about the same quality as that recommended for cuttings.

The most common style of graft employed on commercial places is the whip graft, and as expediency and speed are objects to be attained, this style of graft is, perhaps, best suited to the purpose. The mechanical part of this method of propagating is quite simple. With a sharp knife a cut about three-quarters of an inch in length is made in the stock. A corresponding cut is then made in the wood or scion, and the two parts placed together. The scion should be tied firmly in place with some soft material but not so tight as to cause an abrasion of the bark, at the same time taking care that there is direct communication between the layers of bark in all the parts to be united. The woody

parts of stock and scion never unite, but are so covered over by outer growths that the fact is not apparent unless the part is dissected.

When the first batch of plants have been grafted they should be thoroughly watered and placed in the frame, which should be kept closed as much as possible during the first few days until the union has taken place. When this occurs a little air may be given for a short time during the day, gradually lengthening the exposure as the plants become hardened.

When sufficiently hard to withstand the full effects of the outer temperature the plants may be treated similarly to own-root stock, excepting when syringing, which operation should be performed with exceeding care and small force of water, until they receive the support of stakes, which should not be withheld very long after the plants are taken from the frame.

J. E. Simpson

A New Rose Stock

It is singular how generally the Manetti and the Dog Rose have been relied upon as stocks, on which to work the hardy varieties of roses for open culture. These stocks have the merit of vigorous growth, which they impart, in a good degree to the graft. But this vigor often proves an evil in producing suckers which overpower and ruin the graft. Still they have held the field surprisingly and I am inclined to think without sufficient competition with other stocks, to determine their comparative merit.

At the recent convention of the American Pomological Society, at Jamestown, I met a nurseryman, who informed me that he was using the Madam Plantier for all classes of roses and with uniform success. His location is in Florida, where he can make his cuttings in the fall, in the open ground and find them well-rooted in the early spring. These are ready for budding by the 1st of May and the bud will make a growth of from one to three feet by the end of the season, the growth varying with the vigor of the variety.

It is apparent that this is a product at a minimum cost. The question now is as to its value. The following points may be stated in regard to Madam Plantier. It is a higher type and texture of wood than the Manetti and Dog; it is equally vigorous and hardy; it roots as readily as a willow and most important of all and unlike the others, it does not throw up suckers. This last quality, if it proves persistent, will insure its popularity. It remains to be proved whether all classes of roses will take kindly to it and will yield products which will compare with the blooms from the Manetti. A single season, a single trial is not sufficient. Time alone will decide as to the compatibility of the union. This however is certain, that plants will be turned out by this process by the million and at a cost which should distance foreign competition.

Waban, Mass.

British Horticulture

A FAMOUS GARDEN

Prominence has lately been given to the magnificent gardens of the Earl of Pembroke at Wilton House, Salisbury, owing to the fact that the German Emperor during his recent sojourn in Hants had planted a tree there. The grounds are adorned with a fine collection of cedars of Lebanon, some dating from 1640, besides evergreen oaks, *Thuja gigantea*, rare specimens of abies, and several memorial trees planted by illustrious persons. Some of the rose houses have been standing 120 years. Roses cultivated for cutting all through the winter, the varieties being chiefly *Niphetos*, *Souvenir d'un Ami*, *L'Idéal*, and *Marechal Niel*. Carnations are grown in variety, those in the rose section including *Winter Cheer*, *Enchantress*, *Harlowarden*, and *Lieut. Peary*. Fruit culture also receives considerable attention from Mr. T. Challis, the head gardener. Fruit trees are grown in the goblet form, the chief object of this method being to get the maximum of light and air. There are twelve branches to each tree; each tree is about seven feet high, and the branches are 18 inches from the ground. Most of the apples grown in this manner are for late use. As regards grape culture, Mr. Challis states: "I am rather fond of growing the varieties separately—in fact there are some which should always be cultivated alone. *Hamburgh* and *Madresfield Court* should never be grown in the same house. The conditions which suit *Hamburghs* cause *Madresfield Court* to crack. I have seen them growing together, and the *Madresfield Court* were splitting because the variety would not stand the same amount of moisture which is necessary to the growth of *Hamburgh*. I crop *Madresfield Court* heavily every year, and I never have any split grapes."

NEW ROSES

This year has brought to the front a number of new roses, seven of which have been awarded the National Rose Society's Gold medal. These are *Dorothy Page Roberts*, *Harry Kirk*, *Lady Helen Vincent*, *Mrs. Harold Brocklebank*, *Souvenir of Stella Gray*, *Mrs. Stewart Clark*, and *Queen of Spain*. Six of these were raised by Irish nurserymen, and the seventh emanated from Surrey. It is certainly highly creditable to the trade in Ireland in being able to raise so many meritorious novelties. The Irish rosarians are also usually to the fore as prize winners at the National Show, attesting to the high standard being reached in cultural skill, as well as success in hybridising. Referring to the new roses a "Garden Life" contributor states: "It is significant that there is not a hybrid perpetual among them; they are all teas or hybrid teas—chiefly the latter. *Harry Kirk* will probably prove to be one of the finest outdoor yellow roses in existence. *Dorothy Page Roberts* is described as coppery-pink suffused with apricot yellow, but this does not give much idea of the real color. *Souvenir of Stella Gray* has rather smaller flowers than the others, but they are very charming, orange and yellow mixed. I am glad to see so many of the newer roses described not only as continuous bloomers, but also as deliciously fragrant. At one time it seemed as if hybridists attached no importance to scent—probably because no points are assigned to it at exhibitions. This is a mistake which should be rectified."

W. H. Adsett.

Plants Worthy of More General Cultivation

Plumbago rosea coccinea is a plant that ought to make a valuable addition to our Christmas flowering subjects. It is easy to handle and comes into bloom at the right time if treated properly. Its habit is good, making a nice compact plant from one and a half to two feet in height. The flowers, which are of a reddish color are produced in long panicles at the ends of the branches and last in good condition for several weeks.

When the old plants have done blooming they are cut back and induced to make young growth. This new growth makes good material for cuttings which are inserted into clean, sharp sand in the propagating bed where they soon make roots. When the cuttings are rooted they are put into three-inch pots and are shifted along regularly as they require it until they are large enough for six-inch pots. They require frequent syringing and when the plants are growing freely the points of the shoots are pinched out to make the plants more bushy. The soil that suits this plant is one composed of rough loam with a little well-rotted cow manure and enough sand to make it porous. In September the plants are placed in a greenhouse where the temperature ranges from 55 to 60 degrees and where they can get plenty of light; in such a position the flowers are of a much brighter color.

The *Reinwardtias* are old-fashioned East Indian plants belonging to the flax family. They are certainly the best yellow flowered plants we have at this season. *Reinwardtia trigyna* is the best of the species. It makes low bushy plants which are completely covered with good-sized flowers of brightest yellow. They are easily and quickly grown from cuttings and make good plants in one season. The flowers are rather fugacious but are produced in such abundance and in succession that they make a capital show for several weeks. A house with the temperature given to roses seems to give the best results.

In blue flowers the finest thing we have is *Browallia speciosa major*. It lasts a very long time in bloom. Seeds sown in early spring give fine plants in five inch pots for Christmas. During the winter they are given the same treatment as the *Reinwardtias*. In summer while they are growing freely the points of the branches are pinched out so as to make them more compact and bushy.

Robert L. Linn

A Choice White Orchid

We have received by express from George McWilliam of Whitinsville, Mass., a spike of *Dendrobium formosum* bearing thirteen open flowers, each of which measures from 3 and 3-4 to 4 inches across. Mr. McWilliam says that the plant from which the spike was cut has flowered for nine years consecutively and is likely to do so for many years to come. It is not to be expected that every gardener can entice a plant to do what George McWilliam seems to draw from it in his easy, unassuming way but we do not hesitate to say that at the prices that this sweetest of white orchids always commands in the most select cut flower markets no orchid grower would make any mistake in investing liberally in this plant.

Our
 thanks to
 our friends

Again, at the close of another year of progress on the lines which we believe go to make a paper worthy to bear the honored name of HORTICULTURE, we extend greeting to those friends and supporters who have stood by us and with us from the start and the many besides who have been pleased to add their name from time to time to our rapidly lengthening list of appreciative patrons. During the three delightful years that have passed since our entry into the journalistic field many changes have taken place—some pleasant, some sad—but the progress of American horticulture has been uninterruptedly upward and it is with rare satisfaction that we listen to the frequent assurances which come to us from friends at home and abroad that in the advancement which has been made HORTICULTURE is recognized as having borne an honorable part. To the host of friends and well-wishers whose generosity and loyalty have made possible the success which has thus far crowned our labors we extend our appreciative and grateful thanks.

Poor
 outlook for
 low grade material

Judging from reports as received from widely separated localities and from what we have had opportunity to see in various markets it seems likely that the public will be afforded the opportunity this season of buying the best flowers, the best plants and the best material altogether that have ever been provided for their holiday demands. The only apparent exception is the native holly which seems to be inferior, generally. The quality of all the staples grown for the cut flower markets of the great cities, especially, has been advancing steadily from year to year and material which would have found appreciative buyers a few years ago is today contemptuously spurned even by the street fakirs. Nothing is more noticeable in the wholesale flower markets than the widening divergence between the prices realized on first-class stock and the returns from that of lower grade. In fact, the grower whose abilities or whose equipment do not admit of his producing a fair proportion of high-grade stock must before long, it would seem, be forced to abandon the metropolitan wholesale markets and find what consolation he can in the disposal of his product through local channels where competition on quality is less keen and buyers are less critical.

The
 advantage
 of modern houses

The prices of cut flowers are much below the record for corresponding dates for past years. Whether they will remain so no one can predict for flowers are very susceptible to influences of a transient nature and the "why and wherefore" are not always apparent even to those who should be best judges of the market's tendencies. While it is difficult to set a cost figure, even approximate, on the cut flower product of an establishment yet it does seem as though the limit of safety had been about reached in the prices realized in the wholesale markets this season and that, unless a change for the better takes place very soon, the prospects for the small, antiquated greenhouse establishment which hitherto has furnished its owner with a livelihood and something more, are not at all encouraging. Some observant people look upon the shrinkage of flower values and

growers' profits as likely to exercise a deterrent influence on greenhouse building. It does not follow that this is so. Many take the opposite view and have little difficulty in figuring out the increased efficiency of structures of modern type and concluding that if the flower grower must face lower prices for his goods the man with a modern equipment is the one best able to stand it.

Possibilities in flower shipping

The wholesale florists and plantsmen are once more to the front with their offers of tempting goods for the suburban and country florists' holiday stock.

For various reasons the flower shipping trade has in many centres dwindled to very small proportions as compared with its extent a dozen years ago. It should not be a hopeless task to revive it. There can be no argument now as to the superiority of much of the stock seen in the wholesale market districts to the average stock carried by dealers in localities well removed from these centres. The present would be a good season for the out-of-town florist to make a trial and see how far his local buyers may be coaxed along in the direction of an extra price for a grade of stock superior to what he has been providing for them. We think he will find the wholesale dealer more than ready to meet him and help demonstrate the feasibility of regular flower shipments under the favorable inducements which present conditions admit of. The firms that advertise holiday goods in this issue are all well-prepared for any such business which may be entrusted to them. We bespeak for them the generous support of those of our readers who are interested in the class of material they offer, because we are convinced that the resultant benefits will be mutual.

Cold Storage Lilies

For the past few weeks the New York cut flower market has been amply supplied with fine lily flowers grown from cold storage bulbs of the *L. longiflorum* and its giganteum variety. The *Lilium multiflorum* variety is less adapted for keeping over, as the bulbs seem to be less durable and they do not give as satisfactory results as the other varieties.

Cold storage lilies have been used for quite a number of years in Europe—in England in particular—and have proved to be a well-paying proposition. One of the first to grow them in large quantities in preference to *Lilium Harrisii* was Thos. Rochford at Turnford Hall near London. The main difficulty lies in starting them in the right way. It must be remembered that the bulbs are kept in a temperature near the freezing point in the cold store and when taken out in the summer months they should be placed in as cool a temperature as possible after being potted. A cool cellar perhaps would be the best place to start them. We have seen them covered with burlap and blocks of ice put close to them to keep the temperature down until the bulbs were thoroughly rooted and started to sprout. This having taken place they should then be taken out and placed in the coolest house.

Growers who have their own cold storage connected with their greenhouses have an easy task to start cold storage lilies but those who are not so fortunate may easily overcome this difficulty by making a trial as mentioned above and we have no doubt they will be successful.

Primula stellata

A USEFUL LITTLE CHRISTMAS PLANT.

A Choice Decorative Group

We often see what are called artistic and decorative groups at our English shows but there is an indescribable charm about some of the French floral compositions that defy words. M. Lachaume, the eminent florist of the Rue Royale, Paris, is one of the greatest experts in the floral art we know of but there are others who put up at the Paris shows some compositions that might well be studied by our floral decorators and exhibitors at English shows. Here lumpiness often takes the place of that light and dainty arrangement joined with a judicious blending of color we so often see in France. It is as the brick-layer said to the Bishop who complained of the use of bad language, "You can't learn it, governor, it is a gift." It is an outcome of the natural temperament, and this is seen in many other ways.

In the orchid room at the Paris Show Messrs. Truffaut & Son of Versailles put up a delightful group of decorative plants, etc. Graceful, ornamental foliage plants, etc., were grouped together in a way that at once arrested the visitors' attention. No crowding, everything light, tasteful and in the most perfect harmony. Among the subjects employed we noticed *Nephrolepis Whitmanii*, *Croton Pres' Demole*, *C. Maurice Rouvier*, *Anthurium Andreanum*, *Dracæna Versailleuse*, *Areca Verschaffeltii*, *Dracæna Godseffiana*, *Ixora Dixiana*, *Croton Reedi*, *C. B. Comte*, *Alpinia Sanderæ*, *Pandanus Veitchii*, *Maranta insignis* and others.

Chasman Payne

NEWS OF THE CLUBS AND SOCIETIES.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The meeting on the 3rd had for its subject "Late Chrysanthemums and Xmas Plants." Nathan Smith & Son, Adrian, Mich., showed three vases of pinks, yellows and whites. Season after season has this firm favored our club with large displays of high-class flowers and none of our chrysanthemum shows are complete until the Michigan consignment arrives.

The suggestion of Mr. Falconer at the last meeting that prizes be offered for flowers grown by private gardeners, members of the club, was discussed with approval by several of the members with the proviso that it be broadened to include the commercial growers as well, and it was finally carried that the meeting in February—Carnation Night—should be a competitive one. The galvanized iron hot-bed sash shown at the last two meetings was again on exhibition in an improved form.

H. L. Blind & Bros. showed a fine collection of Christmas plants including begonia Gloire de Lorraine. Phipps Conservatories showed poinsettias, ardisias and euphorbias.

Mr. Falconer stated that he had been given by Mr. Smith of the Botanic Gardens, Washington, three young oaks, offspring of the famous Crittenden oak, and he would present one to the Club which President Jones accepted for planting in Schenley Park. Discussion on Thanksgiving sales showed there was a falling off.

As Pittsburgh and Allegheny are now one city, Pittsburgh, it was the sense of the club that the word "Allegheny" should be dropped from the club name.

Subject for next meeting, "Roses."

H. P. JOSLIN, Secretary.

WASHINGTON FLORISTS' CLUB.

There was a meeting of Washington Florists' Club at Gude's Hall on Dec. 6. The chair was occupied by Vice President Z. D. Blackistone. Pres. Bisset has been seriously sick for some weeks past, due to a nervous breakdown, and according to his physician's orders he left the morning of Dec. 6 for New York, whence he will sail for Porto Rico for a stay of several weeks.

The sympathies of all were aroused over the sad death of P. J. Hauswirth, who was so well known in this city. A meeting of the executive committee was called by W. F. Gude, and it was voted that an order be given a Chicago house for a handsome wreath to be sent by the Florists' Club of Washington. Vice-Pres. Blackistone then appointed W. F. Gude, Jas. L. Carbery and J. J. Harty as a committee to prepare and bring in suitable resolutions on the death of Mr. Hauswirth.

It was announced that the exhibition of the American Carnation Society will be held in this city the third week in January. A letter from Mrs. Florence Harding was read, in which she thanked the W. F. C. for the flowers sent to the hospitals after the close of the chrysanthemum show.

NEW BEDFORD HORTICULTURAL SOCIETY.

At the monthly meeting of the New Bedford Horticultural Society on Monday evening, David McIntosh, secretary of the Newport Horticultural Society, gave an address upon plants for Christmas decorations, and in the course of his remarks said the supply of plants for Christmas decorations was created by the demand, foliage plants being for the most part the most appropriate. But as there is some demand for flowering plants, the florist must be prepared to meet the situation.

For foliage plants the speaker recommended araucarias, cocos, dracaenas and crotons in varieties, and the Whitmanii form of the Boston fern, which he considered to be far superior to any of its relatives for elegance and staying properties. For church decorations he considered palms to be the most suitable. Some of the above-named plants, he thought, might be improved by the addition of a bow of ribbon. He also gave some very useful hints as to the use of inferior plants in grouping.

Among flowering plants Mr. McIntosh gave the first place to Begonia Gloire de Lorraine, which he considered, if accorded proper treatment, invaluable for Christmas decorations, but owing to the diversity of treatment it received at the hands of the wholesaler and the customer it was generally an unprofitable plant to purchase.

In the subsequent discussion the troubles of the florists were pretty well aired and the sympathizing audience was inclined to conclude that in the effort to supply a plant that would bear transmission from the torrid greenhouse of the wholesaler to the parlors of the customers, with the alternate roasting and freezing condition to which it is often subjected, the poor florist finds himself "between the devil and the deep sea."

THOS. WHITE.

SOUTHAMPTON HORTICULTURAL SOCIETY.

The regular meeting of this society was held in our new meeting room in Odd Fellows' Hall on Thursday, December 5th, President Clark in the chair, with the largest attendance since the society was organized. There was a fine exhibit of bougainvillea by President Clark. There were several very interesting discussions, among them being spring or fall planting for deciduous trees and shrubs. Messrs. Clark, Gray, Halsey, Palmer and Frankenbock argued in favor of spring planting. Mr. Crook contended that fall planting was the best. The subject of tree pruning was also taken up. At the next meeting on Thursday, December 19, there will be several exhibits of potatoes and discussions as to the best methods of growing them, after which a banquet will be held.

U. G. AGER.

VERMONT HORTICULTURAL SOCIETY.

The 13th annual meeting of this Society was held in Masonic Temple, Burlington, Vt., on December 4th. Very interesting discussions were had on the culture of apples, stone fruits, potatoes and other rural topics.

The following officers were elected: President, T. L. Kinney of South Hero; secretary, William Stuart of Burlington; treasurer, A. M. Vaughan of Randolph; auditor, L. H. Sheldon of Fair Haven; executive committee, the president and secretary of the society, and E. S. Brigham of St. Albans, F. E. Foote of Middlebury and G. H. Terrill of Morrisville.

President Kinney expressed himself in favor of a national fruit inspection law. He was in favor of a law which would protect every grower and injure none and which would likewise protect the buyer, and the society ought to keep the idea of such a law constantly in mind. We ought to have passed at the next Legislature a law calling for fruit inspection. Later, if a national measure for fruit inspection is adopted, the State law can be readily made to conform to it. Such reputation of Vermont apples, which has suffered in consequence of the dishonest practices of unscrupulous growers.

The following resolutions were adopted:

Whereas, the Vermont State Horticultural Society in its 13th annual meeting in Burlington experienced one of the most valuable meetings in its history;

Therefore, be it resolved that the society go on record as expressing its appreciation, first, to the city of Burlington and the University of Vermont for the hearty welcome extended; second, to the assistance visiting horticulturists have rendered our program and discussions; third, we continue to recommend a standard packing box, 10x11x20 inches for fancy fruit; fourth, we again express a desire that our State executive committee take measures to stamp out the San Jose scale; fifth, that we cordially invite all florists to join with us and thus make our display more attractive, also realizing that friendly competition aids all in fortifying their weak points.

There was an excellent display of fruits on exhibition.

H. M. Totman of Randolph was represented by a nice collection of flowers and plants.

DETROIT FLORISTS' CLUB.

The Detroit Florists' Club had an interesting session, discussing the probability of holding a flower show next February. Last year's practice of reading papers gotten up by members of the club was also discussed and will soon be revived. During the meeting it became known that P. J. Hauswirth met an untimely death and it cast a gloom over the whole assembly. Resolutions on his death were passed and telegraphed to the widow.

NEW YORK FLORISTS' CLUB.

The principal business for the December meeting of the New York Florists' Club, which took place on Monday evening, 9th inst., was the election of officers for 1908. Previous to this duty several committee reports were listened to, the most important being that of the committee on closer relations with other organizations, presented by Mr. O'Mara, which recommended an alliance with the Horticultural Society of New York on the basis of the payment of one dollar per member to make the Florists' Club in a body members of the Horticultural Society, but without the privilege of voting. Messrs. Young, Wallace, Barron, Lenker, Nash, Butterfield and Stewart participated in the debate and the subject was assigned to the next meeting of the Club. Joseph A. Manda reported on behalf of the judges, having visited the establishment of Robert Scott & Son at Sharon Hills, Pa., for the purpose of examining the new rose Mrs. Jardine. They had awarded it 92 points, which carries with it the awarding of a first-class certificate. The report was accepted.

When the time came for election of officers it transpired that every nominee for the position of president had declined. Nominations were called for and C. B. Weathered's name was again presented by Messrs. Stewart and O'Mara as the logical candidate. Mr. Robert Simpson, who was nominated from the floor gracefully withdrew and, on his motion Mr. Weathered was given the honor of unanimous election as president. Balloting for the other officers was then proceeded with, the result being as follows: vice-president, W. E. Marshall; secretary, re-elected without opposition, John Young; treasurer, J. K. Allen; trustees, E. V. Hallock, Al. Rickards and W. B. DuRie for two years, A. J. Guttman for one year. The successful candidates were severally called upon for speeches and President-elect Weathered was received with especial enthusiasm.

Notice was given of the death of the wife of A. M. Henshaw and of the Secretary of the S. A. F., P. J. Hauswirth, and Secretary Young was instructed to send a letter of sympathy on behalf of the Club.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

National Flower Show Premiums.

The premium list for the national flower show in the fall of 1908 is now undergoing final revision. Suggestions regarding the same, as to premiums to be offered, rules and regulations to be adopted, and other matters of the kind, are requested. Such suggestions, however, should reach the undersigned within ten days from this date in order to be considered.

W. N. RUDD.

Chairman Premium Committee,
Morgan Park, Ill.

NEW PRESIDENT AND VICE PRESIDENT OF THE NEW YORK FLORISTS' CLUB.

CHARLES B. WEATHERED

President-elect, New York Florists' Club.

We present herewith portraits of the first and second officers selected to command this influential organization for the year 1908. The president-elect needs no introduction for his name and his genial personality are known all over the country wherever a florist is to be found or a greenhouse heating apparatus is installed. Again, he has been an unselfish worker in the New York Florists' Club from its inception, and for nearly twenty years held the responsible position of

W. E. MARSHALL

Vice-President-elect, New York Florists' Club.

treasurer of that body. No man could possibly have been selected as more worthy to receive the highest gift in the power of the club or better deserving the compliment of a unanimous vote which was accorded him.

Vice-President Marshall was born in Edinboro town in 1872. He is a seedsmen of twenty years' experience, young, progressive and popular with seedsmen, florists and gardeners, and will make an excellent official.

NEW JERSEY FLORICULTURAL SOCIETY.

The annual election of officers was held on the 6th inst., when Malcolm MacRorie, who has served in nearly every official capacity since the organization in 1894, was again made president; Henry Halbig, who has served as secretary during the current year, vice-president; Orson A. Miller, an enthusiastic orchid collector, secretary; and William Read, re-elected treasurer. Three members of the Arbitration Committee were voted for, Philip Cox, Albert Larson and W. M. Gray.

The new rose, Mrs. Jardine, from Robert Scott & Son, Sharon Hill, Pa., was staged by Joseph A. Manda, in their behalf. Exhibits of cut orchid blooms by Julius Roehrs Co., of Ruthersford, and Thomas Jones, of Short Hills; carnations from the Colgate estate, grown by William Read; jonquils from Chas. Hathaway, grown by Max Schneider; chrysanthemums from Stewart Dickson, grown by A. Larson, and a collection of vegetables from Stewart Hartshorn, grown by A. T. Caparn. The February meeting was voted for a special smoker, and invitations to officers of neighboring societies ordered. Presentation of the minutes of the first floricultural society of the Oranges 1856-1859 was made through John Collins and placed in the archives of the society.

JOSEPH B. DAVIS.

WASHINGTON STATE HORTICULTURAL SOCIETY.

Five hundred fruit growers from various parts of the "Inland Empire" are expected to attend the annual convention of the Washington State Horticultural Society which will meet at Walla Walla, January 29 to 31. Three silver cups will be offered as prizes: for the best ten boxes of apples on exhibition; for the best fruit display regardless of quantity or variety; and for the best plate display of winter apples.

Fruit growers of the Walla Walla district are making preparations to display some of the finest fruit that can be grown in Washington. Growers who were a few years ago earning from \$100 to \$300 an acre from their fruit made this season from \$800 to \$1200 an acre and the reason is, not in better seasons and other similar conditions, but in the manner in which the trees and vines are tended. The fruit growing industry is attaining mammoth proportions in Washington, and in fact throughout the Northwest.

There will be in attendance at the coming meeting men from the famous Hood River fruit district in Oregon who will read papers on the methods used in that district, and delegates from Wenatchee, Chelan, Kennewick, Spokane valley and the Snake River country to explain the methods used in their localities.

GREENS, BERRIED PLANTS AND OTHER HOLIDAY STOCK

BOXWOOD (Cut Sprays) Indispensable for wreath making and decorative work. Clean, dark green sprays, put up in 50 lb. cases, 15c per lb. **CASE HOLLY**, extra choice, glossy, dark green and well berried, per case \$4.50, in 10 case lots at \$4.00 per case. **HOLLY WREATHS**, made full with plenty of berries and of selected foliage, (packed in cases of about 100) \$15.00 per 100. **LYCOPodium**, from the deep woods, extra color and quality this season, per lb. 10c. Prices of Greens subject to market fluctuations.

Also **Mistletoe**, **California Pepper Sprays**, **Galax**, **Magnolia**, **Clump Moss**, etc., etc.

CHRISTMAS PLANTS

HOLLY TREES: Extra well berried, beautiful stock in pots and tubs, from 4 ft. to 8 ft. high. \$3, \$5, \$7, \$10, \$12 and \$15 each.

BERRIED AUCUBAS: Unusually well fruited and nicely shaped—a very satisfactory house plant. 7, 8, and 10 inch pots. \$1.50, \$2, \$2.50, \$3, \$4 and \$5 each.

AZALEAS: Very choice and nicely set with flowers. Colors: Dark pink, red, variegated and white. \$1, \$1.50, \$2, \$3, \$3.50 and \$5 each.

COMBINATION PLANTS: Made up of Crotons, Dracaena Terminalis, Ferns, etc. These are well established, having been made up in September. 12 inch pans. \$3 and \$3.50 each.

BOUVARDIA: New scarlet variety, most appropriate color for Christmas, large bushy specimens, well covered with blooms. 10 and 12 inch pans. \$2.50 and \$3.50 each.

FARLEYENSE FERNS: Exceptionally fine, very bushy. 5 and 6 inch. \$1, \$1.50 and \$2 each.

"THE" Wholesale Florists of
PHILADELPHIA

MARYLAND HORTICULTURAL SOCIETY.

On Wednesday, December 10, opened the great event for which earnest workers have been making preparations for many months—the tenth annual exhibition of the Maryland State Horticultural Society, at the Fifth Regiment Armory in Baltimore. With 60,000 square feet of floor space at their disposal the exhibitors had a grand opportunity and they made full use of it, putting up a show extremely creditable in every respect, fruit growers and florists pulling together in a manner that promises much for the future of this organization. The horticultural section of the Maryland Agricultural Society, under the enthusiastic management of Prof. T. B. Symonds, secretary of the society, contributed largely to the interest and success of the undertaking.

President Orlando Harrison, who has worked energetically for the society's welfare, made an interesting address at the opening. Mr. Harrison spoke approvingly of the prominence of Maryland's products at the Jamestown Exposition and advised a more general interest in fruit growing as a commercial enterprise. He recommended the teaching of horticulture in the public schools and advocated well-built State roads and parcels post. He said:

"We should study the laws of horticulture. It will be done more by specialists in the future, so you must not be an ignorant man for success; with the exercise of good judgment in the selection of soil and proper cultivation, it is a safe business. See what Maryland offers to the horticulturists—thousands of acres of land that will grow fruits, flowers or vegetables at a nominal cost and in a well-governed State. Brains and attention are as great dollar producers in an orchard as in a financial institution. Maryland ranks first for her enterprising men, and with the larger farms

divided into small ones our State has a great future."

Among the winners of first awards in the floral department of the exhibition were the following: J. P. King, Mt. Airy, for geraniums and Lawson carnations; Ed. Bishop, Roslyn, chrysanthemums; F. C. Bauer, Govanstown, carnation Beacon; John Cook, Baltimore, four firsts for roses and begonias, and silver medal for best American seedling rose, also Baltimore News prize for group of decorative plants; Pimlico Greenhouses, Park Heights, chrysanthemums; R. Vincent, Jr., & Sons, White Marsh, chrysanthemums and special mention for canna, dahlia and caladium bulbs; A. J. Tourney, Baltimore, mignonette; Andrew Anderson, Govanstown, American Beauty; Stephenson Bros., Govanstown, roses and certificate of merit for carnation Splendor; George Morrison, ten firsts for seedling foliage plant, begonias, orchids, chrysanthemums, palms, crotons, ferns, etc.; W. J. Hannigan, Catonsville, chrysanthemums and violets; Henry Fischer, Baltimore, American seedling chrysanthemum, special on group of ferns and flowering plants; F. H. Kramer, Washington, silver medal and diploma for rose Queen Beatrice; H. Weber & Son, Oakland, American seedling carnation; I. H. Moss, Govanstown, five firsts for roses, carnations, coniferous trees and shrubs, etc., and the Gardeners' Club prize for general display of flowers; Cottage Gardens Co., Queens, N. Y., special certificate of merit for carnations Mrs. Harvey, Mrs. Ward, Snowflake and Alma Ward; Park Department, special mention for exquisite group of ornamental foliage plants and pot chrysanthemums.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Committee on Prizes and Exhibitions for the year 1908 has been appointed as follows: J. K. M. L. Farquhar, chairman; Prof. C. S. Sargent, W. N. Craig, Edw. MacMulkin, Wm. J. Stewart.

MINNESOTA STATE HORTICULTURAL SOCIETY.

The society opened its 41st annual meeting at the First Unitarian Church on December 3d, with about 200 members in attendance. Despite the announcement of an "off year" there was an almost unequaled fruit exhibit in the basement.

Among prominent horticulturists present were G. B. Brackett, pomologist of the U. S. Dept. of Agriculture; C. G. Patton, Charles City, Iowa, one of the most noted growers of seedlings in this country; Prof. N. E. Hanson of North Dakota, who has been sent to Europe by the U. S. Government several times to study horticultural conditions there; W. H. Guilford, Dubuque, Iowa; Rev. C. S. Harrison, York, Neb.; G. A. Tracy, president of the South Dakota State Horticultural Society; Prof. C. E. Waldron, Fargo; Elmer Reeves of Iowa; A. J. Phillips, an apple expert from West Salem, Wis.; George S. Kellog, Lake Mills, Wis., the oldest strawberry grower in that State.

In his annual address, the president of the society, Prof. Samuel B. Green of the State Agricultural College, laid especial emphasis in reforestation. Many interesting papers concerning fruit raising and other branches of horticulture were read. Among them were those of A. P. Pierce, mayor of Red Wing, on "Civic Improvement"; "Rose Culture for the Minnesotan," Chas. Nordine, Lake City; "Border Planting," Theodore Wirth, Minneapolis; "Winter Protection of Flowering Plants," John Hawkins, Minneapolis; "Propagation and Early Cultivation of Perennials," C. S. Harrison, York, Neb.; "Breeding 'New Roses,'" John Monson, Minneapolis Floral Co.; "Breeding of Apples," C. G. Patton. "Treatment of Ground in Adult Orchard," "Harvesting and Marketing Apples," and "Spraying the Orchard and Garden" were short papers which brought on a lively discussion. One of the most interesting addresses was on "Nut Culture," given by H. S. Fair-

WILLIAM HAGEMANN & CO.

... Wholesale Importers of ...

BULBS

55 Dey Street,

NEW YORK

child of St. Paul. Another interesting paper, "Shrubs and Trees for Lawns and Parks," was read by W. H. Guilford, delegate from the Iowa Horticultural Society. Messrs. Le Roy Cady and A. R. Kohler of the State Experiment Station, gave practical demonstrations in cross-fertilization, grafting, budding, etc.

In connection with the Horticultural Society, the Woman's Auxiliary, with Miss Emma White, president, in the chair, met on December 4 and had various important discussions pertaining mostly to improvement work.

In the afternoon of December 5 the Minnesota State Forestry Association (affiliated with the horticulturists) met with S. M. Owen, president, in the chair. Several papers showing the importance of reforestation, etc., were read.

The morning of December 6 was given over to the Plant Breeders' Auxiliary, T. M. Underwood, president, in the chair.

A. J. Phillips and S. D. Richardson spoke in memory of the members who have died during the past year.

The annual report of the seedling committee was read by T. M. Underwood, Lake City. The opening address of the Minnesota Rose Society was given by the president, Mrs. H. B. Tillotson. Mr. A. W. Latham, secretary of the State Horticultural Society for the last 16 years, gave a very interesting report.

Treasurer George W. Strand read the financial report, showing the society to be in a flourishing condition. The reports of the vice-presidents of the various congressional districts gave some ideas of what should be done to further the interests of the society.

All the officers, with the exception of the nine vice-presidents, were re-elected.

A resolution was passed inviting the National Peony Society to meet with the Horticultural Society in a two days' session in 1909.

C. N. RUEDLINGER.

This is without doubt the best society in the United States, if not in the world. The attendance was the largest known, notwithstanding the financial flurry.

We mention some reasons why the society has reached such a high degree of efficiency.

1st. It had unusual difficulties to

overcome which tested their courage and persistence. The first orchards were of Eastern fruits and they were wiped out of existence. After infinite pains, hardier fruits like the Duchess and Wealthy were introduced. A terrible winter knocked out the foundation, for the stocks were not hardy. Then old Boreas with frozen mercury in one hand and his terrible scourge of the north wind in the other, told them in plain language never to invade his domains again. Then the blood of heroes tingled in their veins. They took up the challenge. They had charged by rushes before, but now with siege-like patience slowly and surely they built up the hardy iron-clad—hardy from lowest root to highest branch, they originated a new horticulture, creating a new race. As the result, the apple crop this unfavorable year was simply enormous, and they had on exhibition probably a finer collection than any state in the Union.

2nd. Another cause of their success is their intelligent and heroic leadership, backed by over 2,000 loyal members—all thrilled with enthusiasm and assured of victory; probably a more determined and devoted band never lived. Many of the early heroes, with Peter Gideon have passed away, but the inspiration of their lives yet remains. Others took up their work as soldiers grasped the flag from a fallen comrade and rushed to the front.

We mention some of the present leaders:

The President, S. B. Green, is Professor of Horticulture in the State University, a man of large experience and acknowledged authority in planting, all over the northwest. He is an author whose instructions are received without questioning. In manner he is prompt, genial and forceful and is in great demand as a speaker in other States. He has a fine voice and clear-cut expression, having the ability to tell what he knows in a convincing manner. In Nebraska where he addressed the United Societies, he had about a thousand hearers who went away delighted as from an intellectual feast. His promptness and enthusiasm thrilled the whole assemblage, keeping them in the best of humor, and at the highest working tension.

The Secretary, A. W. Latham, is without a peer. He is a practical horticulturist—an educated man, and one of the best organizers we ever

knew. He took hold of the society in its half-formed state and brought order out of discord, and in some way infused confidence, enthusiasm and hope among the members, so he has the largest society in the United States, if not in all the earth. He is always at it, keeping his office well-stored with books and periodicals open all the year around, and the influence of the society reaches out beyond the State and is the center of influence through all the great Northwest.

Prof. N. E. Hansen, of South Dakota, the Wizard of the North, is a member and is always here. He is one of the busiest men on the list, pulled this way and that by one and another, who are anxious to draw all the information possible out of him. He has gone into the very holy of holies of good old Mother Nature, and is helping her to work miracles. By careful selection and crossing, he has produced wonderful results. He is doing for the bleak Northwest, what Burbank is for the Pacific Coast. We have seen some of his new creations and they are marvels. By crossing prunus Pisardi with the improved Besseyi, he has secured the finest ornamental shrub which will endure the cold of forty below. He is breeding plums, strawberries and raspberries which need no covering out on the bleak prairies of the Dakotas. He displayed a giant growing tree, his hybrid of wild plum and Chinese apricot; and told of his successful search for a hardy alfalfa in Siberia in a trip around the world last year for the U. S. Dept. of Agriculture.

C. G. Patton, of Charles City, Iowa, is the King of pomology. For forty years he has been engaged in developing hardy apples for the Northwest. He had on exhibition fifty-five varieties—seedlings evolved by the most patient and persistent efforts. Thirty-five years ago he produced "Patton's Greening," a cross between the R. I. Greening and the Duchess, giving the excellence of one and the hardiness of the other. This is one of the most prolific of the race and has or will add millions to the wealth of the Northwest. The pity of it all is that his efforts receive but little compensation. He seems to be going the same way good old Ephraim Bull went, who died in the Old Man's Home, a carefully disguised name for the poor-house. Mr. Patton has put his very life in the work, and is now

seventy-five years old, and says he pathetically. "I have got where I can't keep on and can't let go." His grand work has reached a climax, where he must have help.

Wyman Elliot's more than three score and ten years seem to sit lightly on his shoulders. He has produced several hardy apples and also a gooseberry which for size and prolificness seems to fill a vacant space.

Clarence Wedge, for many years president of the society, always brings encouragement and the treasures of new experience.

Take it all in all there is probably no Society on earth which equals this in the ability and devotion of its leaders and in the fidelity of the rank and file, scores of whom are engaged in the work of building up iron-clad fruits, which will resist the trying climate of the great Northwest.

The brilliant and thoughtful papers; the sharp discussion; the flashes of wit and now and then a short stirring speech, made the meeting a true one to the last.

C. S. HARRISON.

York, Neb.

ROYAL HORTICULTURAL SOCIETY'S COLONIAL FRUIT EXHIBITION.

The great colonial fruit exhibition, on Nov. 28 and 29, was alike astonishing in quantity, variety and quality, but if we take into account the extent and climatic range of these colonies it ceases to surprise. The great hall and one of the annexes was crowded with the display, apples being in great abundance from British Columbia and Nova Scotia, those from the first named country again taking the first place.

Not only were such old and well-known sorts as Blenheim Orange, Ribstone and Cox's Orange Pippins among the display, with some American sorts now naturalized and common in English gardens, as Northern Spy, Baldwin, King Tompkins and Newton Pippin, but there were numbers, totally unfamiliar in appearance and name to English growers, yet exceedingly fine, and which we shall soon know more of no doubt. Fallwater and Golden Russet, Red Cheek and others must come to be popular with us in the near future. Most of the best were staged in piles and singly in flat trays, but a great many were simply exhibited as they came to hand in boxes and barrels. Those first named, being of the very best grade, were wrapped singly in soft paper, and it was a marvel how well they had traveled the three thousand and odd miles by rail and steam packet with so little injury. The tropical fruits most in evidence were bananas and the varied kinds of citrus, from the small lime to the grape fruit and the shaddock.

A lecture was given in the afternoon on the proper way of bottling fruits, and how effectually to sterilize the syrup so as to insure their keeping.

THOMAS BUNYARD.

London.

MONTREAL GARDENERS' AND FLORISTS' CLUB.

Important was the annual meeting of the club last week. The report of the year 1907 was fully satisfactory. The attendance was large. Mr. Karins, of Henry A. Dreer's, Philadelphia, said that although he had attended many meetings in large cities in the United States, he had never had the pleasure of seeing such a numerous and interesting one.

Officers were elected as follows:

President, J. Pidduck; first vice president, J. C. Eddy; second vice president, J. Luck; secretary-treasurer, W. H. Horobin; assistant secretary, H. J. Eddy. Committee, P. West, Alf. Pinoteau, W. Hall, Geo. Robinson, G. Vreugde, Geo. Trussell.

The "game committee" was then called to report, and Messrs. J. Luck, G. Vreugde, J. Walsh, J. Eddy and W. H. Horobin were happy to learn

tate into complete harmony and restfulness to the senses. Road or drive making, lawns, gardens, rockeries, etc., were all touched upon instructively. In the discussion which followed Mr. Manning deplored the needless friction which too often occurred between the landscape architect and the gardener. The ultimate success of the architect's efforts rests with the gardener. He felt that after the engineering problems had been overcome and the final plans accepted they should be turned over to the gardener who should complete the work, or at least be consulted on all matters, especially the selection of shrubs and flowering plants.

A vote of thanks was extended to Mr. Manning by a large and appreciative audience after which the refreshment committee took charge.

At the next meeting, December 20. A. W. Parsons will speak on carnations.

MASSACHUSETTS STATE BOARD OF AGRICULTURE.

The public winter meeting of the State Board of Agriculture for lectures and discussions was held at Horticultural Hall, Boston, on December 3, 4 and 5.

In the absence of Mayor Fitzgerald the meeting dispensed with some of the scheduled formalities and gave its attention first to brief remarks by General Stephen M. Weld, president of the Massachusetts Horticultural Society and Governor Curtis Guild, Jr., president of the State Board of Agriculture.

William H. Spooner then took charge of the meeting as chairman and some very interesting papers were presented by well-known agricultural experts. About 200 farmers and fruit growers were in attendance.

At the afternoon session a lecture was delivered by W. W. Tracy of the bureau of plant industry of the U. S. department of agriculture on "The Breeding and Raising of Garden Seeds." The discussion which followed took a wide range. A good part of it was upon the advisability of endeavoring to secure legislation which will bring about the inspection of seeds by state or national officials, who will guarantee their vitality at the time they are sold by the seedsman.

On Thursday, the second day, much of the time was spent in visiting places of agricultural interest in the neighborhood of Boston.

CLUB AND SOCIETY NOTES.

The centenary of the Royal Society of Agriculture and Botany of Ghent, Belgium, will be celebrated with an interesting international exposition, April 26 to May 31, 1908. Programs can be obtained from the secretary of the society, Compure 140, Ghent.

The following are the new officers of the Florists' Club of Seattle, Wash.: President, J. W. Thompson; vice-president, C. W. Malmo; secretary, Frank Bathurst; treasurer, J. J. Bonnell.

The annual meeting of the Virginia Horticultural Society was held at Staunton, December 4 and 5.

J. PIDDUCK,

Head Gardener of Mt. Royal Park, President-elect of Montreal Gardeners' and Florists' Club.

that they had won the prizes for the aggregate points of the games of the past year. The donors of the prizes were Messrs. W. Ewing & Co., Dupuy & Fergusson, J. McKenna, W. Cooper and W. Rennie. A special committee was appointed to look in the matter of renting a new meeting hall.

G. VREUGDE.

NORTH SHORE HORTICULTURAL SOCIETY.

On December 6 this society had the pleasure of listening to a lecture on Landscape Architecture by J. Woodward Manning of Reading.

Mr. Manning covered the subject as fully as was possible in the time. Among the requirements necessary for success in this work the speaker laid great stress upon good taste in addition to broad education and knowledge of soil and plant requirements. He urged that natural existing conditions should be taken advantage of and improved upon, retaining everything of beauty, broadening or creating vistas and bringing the whole es-

COCOS WEDDELLIANA

Dreer's Large Palms

... FOR DECORATING ...

We can still supply the following large decorative Palms in prime condition and of excellent value:

Have you offered our 5-inch pot plants to your customers? If not, try a sample lot, they are good sellers; nice, shapely, well grown plants in 5-inch pots, about 18 to 24 inches high, \$1.00 each.

For a complete line of Palms and other seasonable Decorative Stock, see our current wholesale list.

HENRY A. DREER

714 Chestnut St., PHILADELPHIA, PA.

IN MEMORIAM.

P. J. Hauswirth.

The news of Philip Hauswirth's death came as quite a shock to his many friends in Philadelphia. The deceased had endeared himself beyond common to many of the leading men of the trade here, and the expressions of sorrow on receipt of the sad news from Chicago were universal and heartfelt. The Florists' Club sent by telegraph a handsome floral offering expressive of the combined sympathy of the trade, and there were a number of private expressions of the same kind in addition. We all feel that we have lost one of the finest of men, a warm-hearted, big souled brother, whose energy and enthusiasm for the general benefit was always unstinted and unselfish. We mourn him most sincerely and extend our sincerest sympathy to the family. The general impression here is that Mr. Hauswirth largely overtaxed his strength the past few years with the many burdens he so willingly undertook for the public benefit and literally worked himself to death in the intense effort to make good on all he obligated himself to. May the grass grow as green over his grave as his memory will ever remain dear to all who knew him.

G. C. WATSON.

Although none of his friends realized it, it is evident from facts which have come to light since the death of P. J. Hauswirth, that he has been for some time mentally more or less unbalanced. It would appear that he has been unable to bring himself to the routine work of making entries and reports and for some time has been piling everything up, waiting for the tomorrow of better mental condition which never came and this will no doubt explain to those members of the S. A. F. whose correspondence with

the Secretary's office has of late been unsatisfactory, the real cause of the apparent neglect. We learn from Chicago advices that those who are engaged in straightening out Mr. Hauswirth's unfinished affairs are making good progress and that there is nothing in the situation to indicate anything but scrupulous care in the handling of the property and funds of the Society.

PERSONAL.

John Mangan, of Frank Millang's establishment, and Miss Margaret Walsh were married on November 27 at Long Island City, N. Y.

Paul Swoboda of the firm of J. C. Schmidt, Germany, is in New York this week. Mr. Swoboda's brother is of the firm of Hess & Swoboda of Omaha, Neb.

Visitors in Detroit: Mr. Peterson, of Cincinnati, with fine samples of Lorraine begonias, Pandanus and Whitmanii. Dr. Gurons, of Grand Rapids, Mich.; James Scholes, florist same place.

JAMESTOWN EXPOSITION AWARDS.

The chrysanthemum exhibition in Machinery Hall, Jamestown Exposition, November 25-30, brought out a magnificent array of blossoms from many sections of the country. Two loving cups, donated by Mrs. Harry St. George Tucker, wife of the president of the Exposition, were the chief prizes contested for; the silver cup, for the largest and best collection of blooms was won by Mann & Brown of Richmond, Va.; the silver and copper cup for largest collection, by Wm. Nilsson of Woodlawn, N. Y. J. H. Small & Son, Washington, D. C.; J. D. Hooper, Richmond, Va.; Mrs. D. G. Heidt, Guyton, Ga., were among the prize winners.

The Children's School Farm, a New York institution organized for the purpose of creating an interest in gardening amongst school children, was awarded a gold medal at the Jamestown Exposition. All the seed used was supplied by J. M. Thorburn & Co.

SINGLE AND POMPON CHRYSANTHEMUMS AT AGRICULTURAL DEPARTMENT, WASHINGTON.

CHRYSANTHEMUMS.

Single Chrysanthemums.

In most of the public exhibitions in the London parks, single chrysanthemums this year form a conspicuous feature. They are chiefly used as free-flowering bush plants for edging the groups, or else as plants placed at intervals in the banks of the specimen blooms to relieve the monotony of the arrangement. Ladysmith is one of the best and is largely used, its bright pinkish mauve flower rendering it very effective. Miss Mary Anderson and its sport Miss Anne Holden are also often met with—they are both old favorites here. Edith Pagram and Bronze Pagram are a pair frequently exhibited together, both being flowers of good form and size. Pink Beauty well deserves its name. Acme is a large rose-colored variety with yellow centre. Ideal, pure white; Golden Fleece, a yellow self, Rose Pink and Miss Parkinson, a pure pale yellow, are also neat little varieties in this highly decorative section. Mrs. E. Roberts is a charming flower of soft pale blush and Mrs. Walton a deep rosy colored flower with yellow centre.

At some of the trade displays we have specially noted a few of the newest and also a few of the older known, which are this season to be seen in the highest state of development.

One of the most floriferous is W. B. Reeve, large flowers forming a perfect mass of white; Miss G. Partridge, a neatly built bloom in color not unlike Ladysmith; Blushing Beauty, a wonderful bloomer, very large flowers, color soft shade of rosy blush, centre yellow; Progress, terra cotta, passing to golden yellow at the base, a very distinct variety. White Duchess is good, very full, the florets stiff and flat, fair-sized blooms, color pure white. Kitty Bourne, medium florets, deep golden yellow. Cannell's Yellow, very large blooms, long florets, pure golden yellow. Florence Adams, very long florets, pure white passing to bluish towards the tips. Freedom, well named, a fine pure white, thin florets rolled over, yellow centre. Mrs. J. Ferguson is a Mary Anderson sport, pale pink, white at the base, very delightful little flower. Mary Richardson, rich golden terra cotta, a warm and effective shade of color. Alice

Crate, a neat little flower with flat florets, medium width, deep, pinkish rose, very fine and distinct. Kate Covell, rosy amaranth, flat florets of medium length. Mrs. H. J. Hampton, pale apricot yellow, narrow flat floret, centre yellow. Bessie Payne, a fine decorative flower of the most striking kind, very free bloomer, flat florets, color pretty shade of pinkish mauve.

Older varieties that are perhaps already known, or which may have been described in former articles, include among the best of their season's flowering Mrs. C. H. Curtis, Pride of Merstham, Mrs. Earle, Kate Westlake, Green Eye, The Navy, Repulse, Florence Gilham, Good Hope, Gold Point, Venerable, The Pilot, Eric, Evelyn Neale.

For growing in beds and in the open border, for cutting, for all kinds of decorative purposes, these light, artistic singles are absolutely invaluable, and abundant evidence of that fact is seen everywhere this season.

American Chrysanthemums in England.

In spite of all the competition there are some varieties that die hard. They may be banished from the showboard and the exhibitor may discard them for others of more modern introduction, but there are always some old-fashioned growers who keep their long-cherished favorites through good and evil report. Every season this fact is made abundantly evident, and I have seen this year several old varieties in very good form that, according to all the canons of present-day requirements, should have been thrown on the rubbish heap many years ago.

In my early days of chrysanthemum growing we had

many good sorts that had long been in cultivation by the exhibitors, but when the flood of novelties came pouring in from all quarters of the globe twenty years ago the vast majority of the good old standard show flowers passed into oblivion and their place was taken by practically another race. This is true of all sections—the Anemone, the Incurved, and the Japanese in particular.

In these sections we had a fair proportion of American seedlings. Of these there are few to be seen nowadays at our shows, and except in a small number of private collections they are as good as extinct. During my visits of the past few days I have met some of my old friends of American origin that have been preserved, and it is interesting just to place their names on record. In the Japanese section William Tricker, introduced in 1891, is still retained. Simplicity, a white sent out the following year, is also grown. Mrs. E. G. Hill, a big early bloomer, dates from 1894. Modesto was one of the 1896 introductions and is frequent in some decorative collections. Good Gracious, although raised in Japan, came to us via America in 1893 and well deserves to be retained. Mutual Friend is an 1894 variety, and Col. W. B. Smith, whose color even now wants beating, goes back to the year 1892.

CHRYSANTHEMUMS AT PEACOCK CONSERVATORIES, PITTSBURG.

**LAGER & HURRELL, ORCHID GROWERS
AND IMPORTERS SUMMIT, N. J.**

I have not met with any of the American incurved varieties this season, but the anemones are still in evidence. Mrs. Judge Benedict and Delaware being grown in numerous examples.

Some Popular Decorative Chrysanthemums.

Apart from the single-flowered varieties which are now largely used as front-row plants in some of the large decorative groups exhibited in this country, there are many others used with considerable effect. When freely flowered, some of the medium-sized Japanese are of great service to lighten and vary those groups or banks of bloom in which the big Japanese blooms form the chief material.

L'île des Plaisirs is of a bronzy crimson; it throws a multitude of pretty little flowers when freely grown and is one of the best. Old Margot is another grand variety for the purpose, and is immensely popular. Soeur Melanie is a free bloomer and good for every purpose of decoration. Mlle Elise Dordoms, a pretty pink pompon—a perfect gem in form—is one used by everybody and in spite of its age has no equal. Mlle. Lacroix, a nice white Japanese, freely grown, is also an old favorite, and to a lesser extent its pale yellow sport, Mr. C. E. Shea. Source d'Or and Elsie, a cream colored reflexed, are also much in evidence and worthy of inclusion in any group where lightness of effect is required.

Among the pompons there are many varieties that are used with effect but to which we must refer on another occasion. C. HARMAN PAYNE.

LAGER & HURRELL, Summit, N. J.

THE BROAD OUTLOOK OF THE AGRICULTURAL EXPERIMENT STATIONS.

A Paper by Dr. A. C. True, Director, U. S. Office of Experiment Stations.

(Continued from Page 770)

Original Researches.

The broad organization of our experiment stations has enabled them to perform a considerable variety of functions. In a general way the work of the stations in the United States may be grouped under the following heads: (1) Original research, (2) verification and demonstration experiments, (3) studies of natural agricultural conditions and resources, (4) inspection and control work, and (5) dissemination of information.

The original researches of our stations have been along almost all lines of the science of agriculture. They have included studies with reference to the improvement of methods of research, devising new apparatus and appliances, the relation of scientific principles to the science and practice of agriculture, the working out of new practical applications on the basis of well-known facts and principles, or the solution of special problems. Recently the opportunities of our stations to do original research have been greatly broadened by the passage of the Act of Congress of March 16, 1906, known as the Adams Act. This Act gives to each station in the several States \$5000 for the fiscal year 1906, and \$2000 additional for the 5 succeeding years, after which each station is to receive annually the sum of \$15,000, or \$720,000 for the 48 States and Territories, included in the continental United States. The money must be spent exclusively for original research in agriculture.

In reporting on the first year's operations of this Act the Office of Experiment Stations states that "it marks a distinct era in the life of the stations and agricultural investigation. It has served to draw attention sharply to a consideration of what constitutes scientific research in agriculture as distinguished from the mere acquisition of superficial knowledge. The result has been a general uplift in the conception of the duties and responsibilities of the stations and a stimulation of activity in all the more advanced lines of investigation. It is evident that a new regime has been entered upon in the conduct of the stations, which will make them contribute in a large way to the unfolding of the principles upon which agricultural development and practice rest."

Verification and Demonstration Experiments.

The verification and demonstration experiments have been partly carried on at the stations, more especially on the farms under their control, and partly by experiments in different localities, largely with the co-operation of farmers. Of this character have been very many of the experiments with fertilizers, thousands of which have been carried on in the States east of the Mississippi river. A very large number of practical tests of different field crops and horticultural plants have also been made on a commercial scale after the stations had

determined in a small way the adaptability of these varieties to the regions in which they are located. Many experiments in the feeding of animals and in dairying are of this character. Many means for the repression of insect pests and the diseases of plants and animals have been tried over and over again at the stations and among the farmers until they have become a part of regular farm practice. So popular have the demonstration features of station work become that many State legislatures have in recent years made relatively large appropriations for such work.

Studies of Conditions and Resources.

The station studies of natural agricultural conditions and resources have included such things as systematic meteorological observations, soil and crop surveys, studies of water supply, botanical surveys, determinations of the regions suitable to special crops, e. g., sugar beets, and investigations of marl and phosphate deposits. The stations in nearly 40 States and Territories are performing inspection service relating to fertilizers, feeding stuffs, foods, diseases of plants and animals, insect pests, fungicides and insecticides, dairy apparatus, etc. Taken together this constitutes a large item of station work and its practical results have been very important. All this work is provided for by State funds.

Dissemination of Information.

As agencies for the dissemination of information the American stations published in 1906, 418 circulars and bulletins and 45 annual reports, aggregating 17,501 pages, and amounting to 3,000,000 copies. In addition, a large number of more fugitive publications were issued and numerous articles prepared for the agricultural papers and other journals. The correspondence of the stations is enormous and covers the whole range of agricultural subjects. Their regular mailing lists contain over 758,000 addresses. Thousands of addresses are annually delivered by station officers at farmers' institutes and other agricultural meetings, numerous exhibits are made at county, State and National fairs and expositions, and special railroad trains have been used in a number of States to carry up-to-date information to farmers.

The most important and the broadest outlook of the experiment stations is along educational lines. Already the work of the stations has created an entirely new agricultural literature and the materials are constantly accumulated by which this can be extended and improved. The stations have also laid the foundations for a sound agricultural pedagogy and made possible the formulation of effective and satisfactory courses of instruction in agriculture for schools of all grades. They must ever supply the new materials by which these courses can be strengthened and improved.

Making Agriculture a Progressive Industry.

But their work has a far more fundamental and far reaching purpose—namely to make agriculture a progressive industry and the masses of agricultural workers progressive men. Great systems of education may be

elaborated and set in operation so as to bring within their control multitudes of men. But these systems may produce stagnation of thought and activity or crystallize the views of a certain epoch and make them the standards of national or even racial life for an indefinite period. Such has been the effect of the Chinese system of education and the Mohammedan study of the Koran, as seen in the great universities and schools of the Orient. And practically the same thing has been seen in that system of education of the farmer which has prevailed hitherto in every land and age. A system based on traditional lore handed down from father and son, and from age to age. Hence the outlook of agricultural industries and men has been universally almost wholly toward the past and, speaking broadly, the agricultural masses have been a constant drag on the progress of civilization.

But when there is put back of any system of education in the school or in practical life, the spirit of discovery, the quest for new truth, progress is not only possible, but it is sure to come. A hopeful spirit takes the place of discouragement or dull content. The outlook of the student or the worker is turned toward the future. Expansion of thought and of activity is bound to come with every new idea or principle revealed through experiment and research.

Modern science has introduced the ferment of truth-seeking in the natural world into many branches of human activity and in these latter days the agricultural experiment stations, as the agents of science for the special benefit of agriculture, have brought it in large measure into the rural communities. It has begun to work and in time it will leaven the whole lump.

An Example from Real Life.

Let me cite an example from real life. I know a successful New England farmer more than 80 years of age. He has passed through all the vicissitudes attending the development of agriculture in this country. He was reared in a small rural community where single families on farms of 40 or 50 acres did all the work with the aid of horses and oxen and simple hand tools. They not only raised the crops and animals necessary to give them food and clothing, but also spun some and wove the flax and wool and sewed the resulting fabrics into clothes, tanned the hides of their cattle into leather and made it into shoes, wrought as carpenters and blacksmiths to make tools and vehicles, and in a word were almost entirely self-supporting. He has witnessed the gradual introduction of factory-made articles which drove numerous industries off the farm and the development and use of farm machinery until hand tools are used in only a small part of the farm operations. He has seen these new conditions and the opening up of vast areas of fertile land further West break up the old rural communities of New England and greatly increase the area of land necessary for a family's support. He has heard all the foolish talk about abandoned farms, as if hard-headed practical men could ever again be expected to try

Forcing Ramblers AND Hybrid Roses

FOR IMMEDIATE SHIPMENT

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the fall or winter become better established and force better, and are far more satisfactory in every way, and you can retard and force at your leisure. We recommend American-grown Ramblers. Don't attempt to force imported Ramblers; the general experience is that they are a failure.

We offer exceptionally strong two-year-old dormant, low-budded stock (on Manetti), in the following varieties, true to name:

Anne de Diesbach. Bright carmine.

Ball of Snow. Pure white.

Baron de Bonstetten. Dark crimson, shaded.

Baroness Rothschild. Satiny pink; extra.

Captain Christy. Delicate flesh-color.

Duke of Edinburgh. Bright vermillion; fine.

Fisher Holmes. Dark rich scarlet.

Frau Karl Druschki. The finest white in existence.

General Jacqueminot. Rich velvety crimson.

General Washington. Beautiful red, shaded carmine.

John Hopper. Beautiful rose pink.

Margaret Dickson. White, pale flesh center.

Magna Charta. Clear rosy pink.

Mme. Gabriel Luizet. Light satiny pink.

Mme Plantier. White.

Mrs. John Laing. Soft pink; most desirable variety.

Paul Neyron. Beautiful dark pink.

Prince Camille de Rohan. Velvety crimson.

Ulrich Brunner. Cherry red.

Prices on Hardy Hybrid Perpetual Roses, 75c for bundle 5. \$12.00 per 100; \$110.00 per 1000. 25 at 100 rate, 250 at 1000 rate.

AMERICAN GROWN CRIMSON RAMBLERS

THE ONLY STOCK FOR FORCING

Large plants, 2 to 3 feet, \$1.25 for 10; \$12.00 per 100

Large, heavy plants, two years old, 3 to 5 feet, \$1.75 for 10;

\$15.00 per 100.

Extra heavy plants, 4 to 6 feet, \$2.00 for 10; \$18.00 per 100.

ENGLISH GROWN MANETTI STOCK

Selected stock — de-eyed for grafting indoor roses, \$1.50 per 100, \$12.00 per 1000. For Immediate Delivery.

THE NEW BABY RAMBLER ROSE

Catherine Zeimet. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. An important fact is that it has the true rose perfume in a high degree. One of the best polyantha types to date. Fine forcer. 50c each; \$5 per dozen; \$40 per 100. Extra heavy, 75c each; \$7.50 per dozen; \$60.00 per 100.

DEUTZIA

Gracilis. Pot-grown for forcing, \$2. per dozen; \$15 per 100.

Lemoinei. Pot-grown for forcing, \$2.50 per dozen; \$18 per 100.

ARTHUR T. BODDINGTON, (SEEDSMAN) 342 W. 14TH ST., NEW YORK CITY

A Large Surplus of Japan Bulbs

We have just received a large quantity of LATE DUG, well-ripened bulbs of superior quality, from Japan, in first class condition. They are being put into Cold Storage for delivery during 1908 as ordered. We have

LILIUM GIGANTEUM

LILIUM AURATUM

LILIUM MULTIFLORUM

LILIUM ALBUM

LILIUM LONGIFLORUM

LILIUM MAGNIFICUM

and a few Rubrum, Hansoni, etc. Among the Speciosums we especially recommend the Magnificum, which is one of the finest lilies today.

YOU SHOULD GROW LILIES ALL THE YEAR AROUND

The Longiflorum varieties flower in from 13 to 18 weeks after they are potted, and the Auratums and Speciosums in 18 to 24 weeks. 55° to 60° is sufficient for the Speciosums, while the Longiflorum varieties will do better by a 5° lower temperature, especially, from November until February. Careful watering is necessary to avoid getting the soil too wet. Under these conditions Speciosums potted end of July and Longiflorums end of August will bring you fine flowers for Christmas. All large forcers know these to be far superior to Harrisii.

We can also deliver from Chicago Cold Storage Warehouse, Longiflorum 9/10", Multiflorum 9/10" and Giganteum 7/9 and 9/10" at reasonable prices

Write us for prices.

RALPH M. WARD & COMPANY, 12 West Broadway, NEW YORK CITY

ORDER NOW

GET WISE TO MY SIZE

There is no more attractive and salable plant when grown, trained in pots for **Easter** than the **CRIMSON RAMBLER ROSE**, and considering the simple treatment they require, **few plants make better returns.**

Most important of all, is to get **strong field grown plants**, that have been dug carefully, and the roots kept **moist.** We have **several thousand such plants**, grown in our Nurseries that have been put up in bundles of 25 each and graded as follows:

Plants with 5 to 8 and more canes, 6 feet long suitable for an 8 inch pot \$25 per 100. The 2 should sell in flower from \$3 to \$5 each.
Plants with 3 to 5 canes, 4 to 6 feet long, suitable for a 7 inch pot \$15 per 100. These should sell in flower from \$2.50 to \$3 each.

Plants with 2 to 3 canes, 3 to 5 feet long, suitable for 6 inch pots \$12 per 100. These should sell in flower from \$1.50 to \$2 each.
We also have some smaller plants that would make nice \$1 plants in 5½ to 6 inch pots, 2 to 4 canes 2 to 3 feet long at \$8.50 per 100.

The latter size is useful for outdoor planting having very strong roots.

Each plant has been tied up separately in the field making them very convenient for potting.

PALISADES NURSERIES,

Sparkill, N. Y.

HARDY PERENNIALS OUR SPECIALTY. (Formerly conducted by Clucas & Boddington Co.)

to make a living from 40 acres of poor land in New England, or to grow crops on areas which nature intended for forests or recreation places for tired city people. He was long past middle life when he had an opportunity to welcome the experiment station as a friend and helper. He has learned to sell milk by the Babcock test, to feed silage to his cows, to spray potatoes and fruit, to buy high-grade phosphate at higher cost because it is so much more available to his crops. He has even undertaken to be an experimenter himself. Having heard that one of his neighbors had accidentally poured brine on land intended for potatoes and claimed that the succeeding crop was free from scab, he tried this year the effect of putting salt in the hills when he planted his potatoes. And what is the most important thing about his attitude is shown by his remark that he realized that this single year's experience would not prove anything, but that he should have to repeat the experiment several years and study the matter closely to determine what was the real effect of the salt on the scab. He has made a good success at farming and claims that his arable land is twice as productive as it was forty years ago, but he greatly regrets that in all probability he will not have much more time in life to continue and develop the experimental side of his farming which he believes promises much. If such can be the attitude and the hopeful outlook of an aged man who has come under the influence of the experiment station what may we expect if we can put the station back of every farm and school in New England, and other parts of this country and rear succeeding generations of rural people with a love for discovery of new truths pertaining to agriculture and a belief that science can advance agricultural practice and make agriculture a perpetually progressive industry.

Awakening the Rural People.

This is obviously a matter of tremendous importance. For if once the masses of rural people have the spirit of progress and discovery in matters relating to their industries they will doubtless carry it into all their social, moral and religious life. As things are now a large part of the progressive energy which has wrought the fabric of our commercial manufactures, social customs, laws, govern-

ment and religious life has come from the country.

If all this has come out of communities largely dormant or retroactive what may be expected when the country districts are permeated with the vital spirit of modern science—the love of truth and the desire for its enlargement.

Many plans for rural improvement have been made by philanthropists and statesmen but they have largely been failures because they were imposed on the unwilling minds and hearts of unprogressive people. But if the rural people themselves awake and make their plans of improvement we may surely expect wonderful things. As an arouser of desire for improvement and a stimulator to intelligent effort to make the country a better place to live in and work in the agricultural experiment stations have their chief importance and their high-virtue that they especially commend est mission. And it is for this themselves to all the friends of rural progress for if these fountains of new knowledge are kept strong and pure their waters will spring up forever to replenish the life of countless generations of rural people.

A NEW EXPERIMENT STATION.

Your readers will undoubtedly be interested in the fact that, through the combined efforts of the truck growers in the vicinity of Norfolk, Virginia and the State Board of Agriculture, there has been established, just outside the city of Norfolk, in Princess Anne County, an experiment station devoted exclusively to the interests of truck growing. This station has been placed under the immediate charge of Prof. T. C. Johnson formerly of Cornell and of the West Virginia University. The station is located upon characteristic trucking soil of the region and embraces some 58 acres which will be improved and devoted to the cultivation of various truck crops, and the solution of the many problems involved in the fertilization, harvesting, marketing and improve-

ment of such crops. Seven thousand five hundred dollars (\$7,500) have been set aside by the Southern Produce Company for the purpose of equipping this tract with suitable buildings for conducting the work. The State Board of Agriculture devote \$5,000 of its funds to the maintenance of the work, and the Department of Agriculture at Washington, and the State Experiment Station at Blacksburg, Virginia, both co-operate with the above named organizations in carrying on the work. While no experimental work has yet been inaugurated, the ground is being improved and prepared for the work of actual experimentation. It is hoped that as the spring opens areas will be available for extensive fertilizer and variety tests, as well as the beginning of some systematic breeding work with standard vegetables. This is a notable undertaking in this respect that it is the first experiment station to be organized in the United States exclusively devoted to the interests of truck growing of any locality. The organization is to be congratulated on having secured the services of a careful, conservative and well trained man in the person of Professor Johnson, and all possible success is hoped for the undertaking. It is a new field of work and will of course present innumerable problems, a few only of which can be taken up and solved at once. It will be necessary to devote years of careful study and research to this industry which has sprung up and grown to such gigantic proportions in comparatively few years; that is, the many problems peculiar to itself which have never been touched upon by the regular experiment station workers of the country, and it is fortunate that this station has been established in a region so pre-eminently devoted to trucking as is the territory in the neighborhood of Norfolk and Portsmouth, Virginia.

Very truly yours,

D. C. CORBETT,
Horticulturist.

A MODEL CARNATION ESTABLISHMENT.

The F. R. Pierson Company's carnation houses at Scarborough, N. Y., are undoubtedly the finest structures in the world devoted to carnation culture. Each of their four lofty greenhouses covers fully half an acre of ground, and altogether they shelter nearly 80,000 plants, of which 40,000 are the popular Winsor. It was a bold undertaking to chance half of the entire capacity of so large an establishment on a single variety, but Mr. Pierson has the figures from last year's returns to give him courage and so far as known no rival for this well-liked soft and pure pink flower is yet in sight.

Next in the appreciation of Mr. Pierson comes the white Enchantress. Like Winsor it gives evidence of superb vigor and productiveness. The blooms average three and a half inches in diameter and have all other qualifications to match. White Perfection is there also, but a good many split flowers are in evidence which is not the case with the two varieties previously named.

Scarlets have been narrowed down to three varieties—Beacon, Victory and Red Chief, the two first-named being preferred. Beacon is a little brighter than either of the other two, but Victory is keeping well up on productiveness and especially on that most desirable of all qualities, long endurance after cutting. Between Variegated Lawson and Mrs. Patten which are the only white-striped varieties grown, the latter gives the best satisfaction. Helen Gould and Rose

Pink Enchantress are inclined to irregularity of color and much care must be exercised in the matter of cutting the flowers on account of the quickness with which the color changes if picking is not done at the proper moment. The light pink Lawson or Melody suffers somewhat from its short stem early in the season but it is a most excellent keeper and shipper.

The greater part of Mr. Pierson's carnations are grown on benches, but in one house there are several solid beds of Winsor which make an equally good appearance. It is doubtful if 80,000 carnations are to be found anywhere so perfect in health and so uniformly excellent as Mr. Pierson has to show, and it would certainly pay any carnation grower well to make the trip to see these splendid modern houses and their contents. No manure or stimulant in any form is given the plants, neither are they syringed. Fumigation once a week, whether a green fly is to be found or not, is about the only operation outside of the usual care of watering, disbudding and picking. At the present time the cut is about 2500 a day.

Carnation growers have no more discouraging and pestilent trouble to contend with than splitting of the calyx. The season is now approaching when this bad habit is liable to break out and consequently it behooves all those who want to be fore-handed to read about the M. & D. artificial calyx in the advertising columns of this paper.

Seed Trade

The season is now at hand when the growers of peas and beans will begin booking orders for future delivery for the season of 1908-9, and the prices at which the various varieties can be profitably produced is causing the careful responsible grower much thought and anxiety. He has no idea what his competitors' prices are going to be, yet he knows he cannot continue doing business at old prices. For one reason his products are going to cost him more, and though he knows that certain camp followers are going to solicit business at old-time prices, trusting to their lower rates to atone for the notoriously low quality of their goods, yet he is compelled to raise his prices or allow his standard of quality to drop to the level of the jackals of the trade. This by instinct and long practice he cannot do, and must therefore trust that a sufficient number of his customers, knowing they will get the best goods attainable, will appreciate his circumstances, and that his advance in prices is justifiable to enable him to continue in business.

It has been pointed out at various times in these columns that the standard by which prices have in the past been regulated no longer represents actual conditions. The five-fold yield which was many years ago adopted as the standard for most varieties of garden peas, does not meet present-day circumstances. The hardy varieties in use at the time this standard was generally adopted, have either become obsolete or have deteriorated to such an extent in vigor and productiveness that now the five-fold yield is the rare exception, instead of the rule. A five-fold yield of the general line of garden peas has been realized but once in eight years, the average for the other seven being from three and one-half to four fold. Now in view of the continued deterioration in both seed and soil, no material improvement in conditions can be looked for, and while five-fold yields will occur at infrequent intervals, when Mother Nature is in a particularly beneficent mood, slowly diminishing yields are much more likely to be the rule.

As vigor and character decline in a variety the tendency to "sport" becomes more marked, and the care and expense of keeping it true to type increases.

Eternal vigilance is not only the price of liberty, but of quality, and it is but stating a splendid truth to say that quality is maintained only by intelligent, painstaking care and additional expense. Now, the quality of seeds and their products vary almost as widely as any given line in manufactures, and pure woollens cannot be bought at the price of shoddy nor can high-grade seeds be produced or bought at the prices of degenerate products.

Twenty-five or thirty years ago when yields of peas and beans averaged materially higher than now, prices were from twenty-five to fifty cents per bushel higher, and yet the prices paid the farmers were lower and the general cost of doing business much less than at present. While improved methods of cultivation and harvesting have greatly cheapened the cost of pro-

ducing most farm crops, peas and beans are produced by practically the same methods as followed by our fathers fifty years ago. Cost of production has not been lessened in any essential respect, while the general cost of doing business has greatly increased, and there are no prospects of any lowering of cost in the immediate future. There has never been any justification for the lowering of growing prices of peas and beans, but the seed trade has always been afflicted with certain wild-cat speculators and plungers who in their eagerness to get business have cut prices from time to time always seeking to be below their reputable competitors. Of course, this cutting of prices was followed at once by a lowering of quality, as few dealers and fewer canners were willing to recognize any difference in quality of seed and virtually compelled the reputable grower to meet prices of all comers. Even his stocks suffered, as he found it impossible to put the time and expense on them necessary to keep up the standard of quality. From this demoralized condition the growers are now recovering, and once again rounding their seed stocks into proper condition. Give them the needed encouragement and, in a few years more, stocks will again fairly represent their names and types.

Catalogue prices have finally been settled, and the first catalogues will soon be out, and the prediction is made that onion seed prices will be disappointingly low in many of them and it is not improbable that the makers will be among the most disappointed in final results.

While high tide in the price of peas has no doubt been reached, it is not so with corn, and not before February will this be the case, unless those who are depending on this year's crops learn the actual facts sooner, and abandon vain hopes that it may finally round into shape for seed. When this fact is finally appreciated there will be some interesting "doin's."

The damage to Lima beans caused by the rains in October proves very serious. Beans caught in the rain have suffered so severely that the shrinkage will be from forty to fifty per cent. and the cost of hand-picking from 60 to 75c. per bushel, thus making every bushel of beans cost from \$6.00 to \$6.50. This will leave the growers with a balance on the wrong side of the ledger.

There have been rumors for some time of discriminations in favor of canners against the seedsmen by certain growers of peas and beans, which seem to be well founded. Of course there can be but one opinion of such action, that it is essentially dishonest, and is done to curry favor with the canners because they are usually buyers of much larger quantities of a few varieties than the average seedsmen. If seedsmen are satisfied, and do not complain of such treatment no one else need concern himself with the matter. But are the seedsmen aware of this discrimination? It scarcely seems reasonable to suppose they would not enter a protest if they knew it.

In a season like this, when Alaskas, Admirals, Horsford's Market Garden, Advancers and Surprise are eagerly bought by canners at \$5.00 to \$6.00 per bushel to raise the canner's percentage on these varieties from 10 to 25 per cent. above the seedsmen's, looks to disinterested eyes like a very unjust proceeding and is certainly depriving the seedsmen of a very handsome profit on whatever quantities he loses by this action of the growers.

The severe cold of last week, when the mercury touched zero over the greater portion of the Atlantic, Middle and Central Western States, must have ended whatever hopes were entertained of saving soft and immature sugar corn, which really constitutes 75 per cent. of this year's crop of the late varieties, though even now this fact is not generally appreciated, and it will doubtless be some weeks yet before it percolates through the craniums of many who are depending on this year's crops.

Information comes to hand that the principal growers of peas and beans intend to advance their contracting prices for the 1908 crop of peas, and particularly the canner's varieties. This is a wise move and in view of the known scarcity of seed stocks, particularly of the wrinkled sorts, there should be no serious difficulty in getting their prices. Compared with the farmers who grow peas for the canning factory, those who grow seed realize but little over half as much per acre and it requires some little more labor and expense to produce a crop of seed; owing to the establishing of canning factories in the seed growing belts of Michigan and Wisconsin this fact is being learned by the farmers, and as a consequence it is becoming increasingly difficult for the seed grower to secure his acreage.

GLADIOLI

ARTHUR COWEE

Gladiolus Specialist

Meadowvale Farm, BERLIN, N. Y.

and unless a more equitable adjustment of prices is reached, the seed grower may have to rent his land and plant his own crops. This of course is really impracticable, and the only alternative is to pay the farmer more, which in time will compel the grower to ask more for his products. Higher prices seem to be inevitable.

Cincinnati has been selected as the place for the next Cannery convention, and Hotel Sinton will be the headquarters. The machinery exhibit will be in Music Hall. Further information will be given from time to time. The convention will be at the usual date, February 3-8.

CATALOGUES RECEIVED.

A. T. Boddington, New York. Seeds and Bulbs for 1908. This catalogue is well filled with the standard offers in flower and vegetable seeds, hardy and tender plants, etc., profusely illustrated, which we now look for in the catalogue of any representative house. The cover is, however, so far out of the usual in merit that we want to call attention to it specifically. It is one more of the productions of H. A. Bunyard to which we have had occasion to refer heretofore. It is in pink, white, green and gold, the central feature being a bloom of Cosmos Lady Lenox conventionally treated. Mr. Boddington is sending out, with the catalogue, a 16-page order sheet, comprising a complete list of the flower and vegetable seeds. We do not remember ever having seen anything in this line so comprehensive.

CHRISTMAS PLANT NOTES.

For several years it has been observed that at Christmas there was a decided increase in the numbers of those preferring plants rather than flowers both when the ultimate object was the making of a gift and the brightening of their own dwellings by the persons themselves.

This increase in preference for plants, though without doubt of great value to the plant trade, has not made any apparent difference in the sale of flowers. The sale and use of the latter has increased as much in proportion as that of plants.

Specimen foliage plants and single flowering plants are still in greater demand than made-up combinations of one or both, and there is without any question cause for thankfulness that such is still the case both for the sake of grower and buyer. Made-up combinations when tastefully done and not overdone are pretty and effective, but in very rare cases do buyers have the same real enjoyment out of them as they would have had from one or more well-grown plants of specimen form. And again it is doubtful if there is as much profit in made-up affairs as there is in plants that sell on their own individual merits.

Palms, ferns, *Ficus elastica* and *Ficus pandurata*, *dracaenas*, *pandanuses*, *crotons* all in variety will be in demand this year. Palms, especially nice thrifty medium-sized *kentias*, are never dead stock on hand so that there is no risk of loss with them no matter how taste runs. *Phoenix Roebelinii* is also a most likely subject for attracting the attention of buyers. Rubber plants can always be depended on to give an account of themselves. *Ficus pandurata* will find an opportunity to test its popularity. There is no doubt of its being serviceable, but its ability to increase its popularity for Christmas decoration has yet to be decided.

Araucarias are charmingly effective Christmas plants and as a rule there is less trouble disposing of them at satisfactory prices than there is with most other foliage plants. *Pandanus Veitchii* is a beautiful plant when well grown. This plant is a whole decoration for a table in itself when well finished with finely colored foliage and when taste runs in the direction of made-up arrangements there is perhaps no other plant that can hurriedly be made to do so much effective service in the work of filling. *Pandanus Veitchii* made up along with small colored *dracaenas* and *crotons* with perhaps a few dwarfier foliage plants for finishing produce excellent effects. Ferns of the many *nephrolepis* varieties are of great value for Christmas decoration. The old Boston will never disappear from view on these or other like occasions for plant selection; its unsurpassed graceful habit ensures for its popularity for all time. The newer varieties, such as *elegantissima* and *Whitmanii*, are without doubt in distinctly deco-

rative characteristics ahead of the old one, but in length and grace of frond they lack much of what the other possessors. Both are steadily on the increase in demand when plants are wanted for decorative effect. Most likely medium-sized plants will be called for in larger numbers than large plants. *Nephrolepis Scottii* has a place of no secondary importance among ferns. For fern dishes and pans *pteris* in variety and *Adiantum cuneatum* and *regina* should be on hand ready for use. It should never be lost sight of that color is an absolute necessity with the great majority of Christmas buyers of plants and that anything red has a decided advantage. That perhaps more than anything else places *dracaenas* near the front row of Christmas foliage plants. *Dracaena terminalis* is still the leader, not at all because of its superiority to many others, but because as yet it is the only one grown commercially in large numbers by reason of its supposed merits of endurance and easy culture. *Dracaenas Masangeana* and *amabilis*, though each distinct in habit and foliage from the other, are suitable for Christmas decoration, the former being particularly commendable because of its luxuriant foliage and comparative standing qualities. *Aucubas* and *aspidistras* should not be forgotten, because there are still many Christmas buyers shrewd enough to purchase these in preference to less serviceable material.

In flowering plants nothing old or new, common or uncommon in point of beauty and charming brilliancy excels or perhaps equals *Lorraine begonia*. *Cyclamens* are too well known as staple articles to need any helping remark. *Azaleas* are likewise well able to attend to their own soliciting. *Lilies*, all that will be in evidence as fit for use, will surely go without any trouble. Berried plants, such as *Jerusalem cherries* and *ardisias* are always favorites at this festival. *Poinsettias*, either in pans all to themselves or when tastefully combined with other plants in the formation of enticing arrangements, sell readily. These plants are also extremely effective for a window decoration. Every plant intended for sale should be clean and in shape days before it is likely to be sold. All baskets, hamper and the like should be filled before. Everything and everywhere should have the appearance of cheerfulness and prosperity. Good nature, good service and cheerful giving will all help to make a Merry Christmas.

GERANIUMS

NEW VARIETIES.—In New Varieties we make a special offer of one each of 100 varieties 1905 and 1906 introductions for \$10.00. This is acknowledged to be the finest collection ever offered in this country, coming as it does from such noted introducers as Bruant, Lemoine, Bouchlat and Cannell, is indorsement enough that in it will be found represented the highest state of development in Geraniums at the present time. Some of wondrous beauty in solid colors, others of exquisite combination of colors which baffles successful description, and would make grand acquisitions to any collection, possessing as they do special merit of such sterling qualities that we are satisfied they are destined to become the standards in their several different classes.

STANDARD VARIETIES.—In standard varieties we offer an immense stock in prime condition, for immediate shipment, at from \$2.00 to \$4.00 per 100. For \$18.50 we will send one thousand, 50 each of 20 varieties, our selection, single and double, all "A No. 1" kinds.

PELAGONIUMS.—In a good assortment, containing such kinds as *GALATEA*, *COUNTESS OF CREW*, *PURITY*, *COUNTESS OF WARWICK*, *GLORIOSA*, *TOMMY DODD*, &c. \$1.50 per doz. \$6.00 per 100.

Hudson Av., Haverstraw, N.Y.

Obituary

Mrs. Pauline Engelman.

Pauline, wife of Richard Engelman, florist, of Pittsfield, Mass., died on November 23, at the age of 46.

George D. Kelley.

George D. Kelley, employed at Lange's conservatories, Worcester, Mass., committed suicide on December 5. He was 30 years of age.

Abram L. Richards.

Abram L. Richards who, since 1894, has been a member of the Metropolitan Park Commission of Boston, died at his home in Watertown, Mass., on December 6, aged 78.

Rev. Joseph Jenks.

Rev. Joseph Jenks of Middleboro, Mass., who after retiring from labors in the missionary field in the west, entered upon the business of growing plants and flowers for the market, died on November 25, at the age of 62. A widow and daughter survive him.

Luke M. Deeds.

Luke M. Deeds of Shillington, Pa., aged 33, superintendent of the Deeds Floral Co., was asphyxiated with coal gas in his greenhouses where he went late in the evening of December 7 to attend to the fires. A widow and two daughters survive him.

Mrs. J. F. Huss.

We learn with deepest sympathy of the death of the wife of J. F. Huss, of Hartford, Conn., on December 2, after a long illness. She was a kind, true-hearted woman, assiduously devoted to her home, her husband and her three little children. To them the loss is, indeed, irreparable.

John Ringier.

John Ringier, traveling representative for Stumpp & Walter Co., New York, died at Zurich, Switzerland, on November 15, aged 36 years, after a long, painful illness with consumption of the throat. Mr. Ringier, who was a brother of Arnold Ringier of Chicago, was a faithful, loyal employe, popular with the trade and held in highest esteem by his employers.

Edward Keller.

At Norristown, Penn., December 2nd, aged 54. A member of the firm of Keller Bros., potters. He superintended the inside work and therefore did not come so much in contact with the horticultural trade as his brother Charles. He was a member of the Philadelphia Florists' Club, Beaver Tribe, No. 62, I. O. R. M., and Norris Lodge, No. 11, S. of H. Interment took place on the 7th inst. at Riverside Cemetery.

HENRY M. ROBINSON & CO., FLORISTS' SUPPLIES 15 Province St., and 9 Chapman Pl., BOSTON

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The club by invitation will hold a Field Day at Framingham on Saturday, December 14. A special Boston and Worcester car, kindly furnished by Mr. S. J. Goddard, will leave Park Square at 12 o'clock (noon) sharp; members and all other interested friends are invited to take it. Cars run every 15 minutes via South Framingham. The establishment of J. T. Butterworth will be first visited, later those of S. J. Goddard and William Nicholson.

The next regular monthly meeting of the club will be held at Horticultural Hall, Boston, on Tuesday evening, December 17, at 8 o'clock. This being the closing meeting of 1907, a very interesting program has been prepared, and it is hoped that the attendance may prove the largest of the year.

NEWS NOTES.

W. H. Duncanson, St. John, N. B.,
is about to embark in the florist busi-
ness.

The American Rose Co. has closed
its stand in the Centre Market, Wash-
ington, D. C.

John A. Burnham, Wenham, Mass.,
is laying out a rose garden on an ex-
tensive scale, on his estate.

Bertha, the twelve years old daugh-
ter of William Walker, florist, of Lou-
isville, Ky., was run down by a street
car and seriously injured on Novem-
ber 27.

The Portsmouth, N. H., Times con-
tains interesting sketches of the
growth of the business conducted by
R. E. Hannaford and Robert Capstick,
the enterprising florists of that city.

John Marshall has leased "By the
Sea" greenhouses, Newport, R. I.,
from Mr. Perry Belmont. He will run
the greenhouses on a commercial basis
and will grow roses and carnations
principally, with a general line of
plants and cut flowers.

ASPARAGUS PLUMOSUS A SPECIALTY

ALFRED M. CAMPBELL, Wholesale Commission Florist
1510 Sansom St., PHILADELPHIA

CHRISTMAS TRADE IN PHILADELPHIA.

And Some News Items of That Busy City.

The Christmas trade here is now in full swing, many of the producers working far into the night, and even on Sundays, to get orders off on time. As Robert Craig says, it is a serious problem how to do a year's business in ten days; but it has to be done somehow.

One of the most satisfactory holiday plants this year is the new Christmas azalea Mme. Petrick. Azalea forcing, for the Christmas trade, has made big strides in the past ten years. Among other popular subjects every year are the cyclamen and the poinsettia. A ten-inch pan of poinsettia with Asparagus plumosus trimming, is "an irresistible" to the average buyer—if well finished as to flower and foliage.

E. T. Alburger succeeds the firm of Alburger & Cascaden, Manayunk; Mr. Cascaden retiring on account of impaired health. The greenhouses at West Laurel Hill and the store at Manayunk will be continued as heretofore by Mr. Alburger.

That cheerful optimist, Godfrey Aschmann, is quite confident that Christmas trade this year will be just as good as last year. In fact, from the way stock is moving off now, many things will be scarce before the rush is over. Mr. Aschmann is a bright and persistent advertiser, and delights to be classed among those who have "made Philadelphia famous" in the plant trade.

West Philadelphia has been coming to the front the past few years in increase of population which has of course been the incentive for many new flower stores. Among the most recent is that of Bayne & Co. at 52nd and Spruce. The firm is composed of Frank Bayne and George Phile.

If an automobile be the sign manual of prosperity the flower growers of this nook of the country must have been greatly favored by "the Goddess" of late. Some of them, as A. B. Cartledge says, can afford to have one for every member of the family. The retailers have not been so fortunate but now that a bear market is on they hope to have their innings. With this laudable ambition we are in entire sympathy. The dear public never appreciates our products until we have

the nerve to charge full value for them.

Thomas J. Burns, whose sweet pea product is always first-class, has found the season unusually favorable for his crops this season. Pink Christmas and White Christmas are his mainstays and while he tries all the new ones he still hangs fast to that which he finds good.

We hear that the crop of cut poinsettias is not as large as usual this year which will make them the more appreciated. They were rather overdone last season.

The mushroom growing business has not been as profitable this year. Mr. Crawford who has a large plant at Secane informs us the prices are only about half what was expected to date.

Mr. Grakelow of the Depot Floral Exchange seems to have survived his strenuous night at the Florists' Club unscathed. We trust he will by and by modify his views on the fakir. The older generations have gone through the anti-fakir fever and now recognize that institution as a pretty good piece of hardware for all concerned.

Imported holly trees are particularly well berried this season. The Robert Craig Co. and others have a specially fine stock of them and find the demand beyond their expectations.

W. E. McKissick is now well warmed to his commodious new quarters at 1619-21 Ranstead St., in the heart of the market for the wholesale trade of Philadelphia. The change has infused new vim and vigor into the organization which is saying much, considering the vigorous and healthful life led at the old stand.

BETWEEN YOU AND ME, What do you think of the Buyer's Directory and Ready Reference Guide of HORTICULTURE? I always look it over before I do any buying.

Is Your Name In The Above List? If Not, Why Not?

FLOWER MARKET REPORTS

The local market has had a pretty dull time of it for the past few days. Receipts have been heavy on most lines and the outlet very restricted. Those engaged in shipping flowers to outside points have had rather the best of it, as the rural demand has been much better than the local. This has resulted in the unloading of much of the medium grade flowers and left the fancy qualities to seek an outlet through the very sluggish local trade and prices on choice material have been inclined to sag, much to the mental disturbance of those who think it is time to begin to brace up preparatory to the traditional holiday values. By next week we shall be able to speak more certainly with regard to Christmas prospects.

Christmas being only a short time away, florists' windows are adorned with holly, mistletoe and decorative greens, and all are beginning to realize that they must get in trim for a good hustle. In the flower line there is much to be said; the question is whether prices be as high as previously. There has been very little, if any, advance on any line, as the supply has exceeded the demand; at times, certain lines being sold out, something else is substituted. White carnations are in demand the past week and a trifle scarce. Colored varieties, short-stemmed were in oversupply and the moving prices ran quite low. As for fancies, there was little trouble in disposing of them. American Beauties were in fine quality, but remained in the cold places most of the time, hoping for something to turn up. Lilies, longiflorum, speciosum and auratum—were on the fence, while lily of the valley is still on the quiet list, although of excellent quality. Shipping trade is beginning to awaken; inquiries and orders are slowly coming in for decorative stock. The warm weather which was here the latter part of the week made the wholesalers feel somewhat uncomfortable. It is hoped that things will brighten up daily, as the trade is ready to meet a good holiday rush.

There is neither special brightness nor special gloom attached to the business in this locality. Supply is rather short. While fears are entertained as to what Christmas will be it is conceded rather early to speculate on that. We are all praying here that this uneasiness may cause the grower to abstain from pickling his product. It may be like preaching to the vultures, but we still live in the hope that the wholesaler may see the light some day and nail up his pickling vat.

Quite an improvement manifested itself in trade the past week, cut flowers in particular moving much better. Notable social events were quite numerous which required good stock in liberal quantities. There seems to be plenty of good roses, carnations, staevia, lily of the valley, Paper Whites, Roman hyacinths, and other seasonable stock.

The chrysanthemum season practically closed with last week. The plantmen will now have their inning. The majority of the growers hereabouts are showing a good stock of plants and flowers for the Christmas trade. Azaleas, lilies, begonias, poinsettias and other plants are making an unusually good showing. The men who handle greens for Christmas are very much in evidence and it is remarkable where all the green stuff goes as there are any number of new dealers in the evergreen business each year.

The standard of quality of all varieties of flowers in this market is unusually high this season. On some things it is unprecedentedly good. This does not, however, seem to help on the price and sales are made, as a rule, only after a long argument between buyer and seller as to what the figure shall be. In a general way prices are gauged a little stronger than last week, but on most staples the supply is so greatly in excess of the demand that little can be accomplished in that direction. Orchids are very scarce, the call for cattleyas being far beyond the present supply. Lily of the valley is at the other end of the proposition and much of it is sold at a figure below the cost of the pips. Violets are superb but minimum prices rule everywhere.

Conditions early part of last week were merely a repetition of the one preceding, but picked up towards the end. At this writing, shipments are not quite so heavy and prices are stiffening a little on some items. This is especially true of Beauty roses, fancy teas, carnations and orchids. Beauties were never better in quality, but prices are away below normal. Carnations are not so plentiful and the difference in prices here is not so marked. There are still quite a few good chrysanthemums coming in. The violet market is in pretty fair shape. Lily of the valley is of first-class quality, but demand is sluggish. Orchids are scarce with demand healthy. Paper whites are in heavy supply; Roman hyacinths enough for healthy conditions. Gardenias are in good supply and go fairly well. Sweet peas very good for the season; demand not brisk. Mignonette on the scarce side, with demand good. Plenty of bouvardia, and moving nicely. Market for greens normal. Bookings for Christmas plants, holly and other stock not quite so heavy as last year at this date—yet good judges look for a scarcity on this class of goods pretty soon. Quality is extra fine all along the line.

The past was a fairly good week. Wholesalers report business good; retailers are not overworked, all the same most of them are kept busy. Carnations are still short. Poinsettias are not very plentiful either but another week will see enough of them on the market.

There is an activity in all the stores, which is always incident to an approaching holiday. All the stores are in holi-

HELP WANTED

MUNICIPAL CIVIL SERVICE COMMISSION,
299 Broadway.

AMENDED NOTICE.

New York, November 29, 1907.
PUBLIC NOTICE IS HEREBY GIVEN that the time for receiving applications for the position of GARDENER has been extended until 4 P. M., MONDAY, DECEMBER 30, 1907. The examination will be held on WEDNESDAY, JANUARY 22, 1908, at 10 A. M. The subjects and weights are Special, 6; Experience, 4. The provisions of clause 12 of Rule VII, to the effect that "no person who has entered any examination for appointment to a competitive position and failed therein or who has withdrawn therefrom, shall be admitted within nine months from the date of such examination to a new examination for the same position," is waived so far as it applies to this examination.

For further information apply to the Secretary.

F. A. SPENCER, Secretary.

WANTED—Two first-class commercial greenhouse assistants experienced in growing a general line of high class plants. Wages \$15 per week and room. Apply with references. Address Plants, care Horticulture.

WANTED—At once, a good, sober, practical florist, who can do design work, grow roses and carnations; state wages expected with board and lodging; also references. H. B. Brubeck, Box 196, Rockville, Ind.

SITUATIONS WANTED

SITUATION WANTED by a reliable gardener, good grower of flowers, fruit and vegetables under glass and outside, fully experienced in all branches of work on a well kept private place; single, age 29. Address R., care HORTICULTURE.

FOR SALE

Suburban Florist Store FOR SALE CHEAP

Fine location for local trade; two years established. Fitted with ice chest, counters, etc., for immediate occupancy. A good chance for industrious party.

Address C. Care Horticulture, Boston.

FOR SALE—A well equipped new greenhouse, 80 feet long, 21 feet wide; new boiler house, new boiler and pipes and four other greenhouses, 60 feet long, attached. A large house, 12 rooms; also stable. A most desirable place in city of 15,000, and the oldest greenhouse plant in this section, and doing the largest business; or to rent to a man of energy and push. Chas. Z. Taylor, Middletown, N. Y.

TO LET

TO LEASE

For a term of years. Four Greenhouses containing about 40,000 ft. of glass. Low rent and a good market. For particulars address

N. F. MCCARTHY & CO.
84 Hawley Street Boston, Mass.

day attire and make a most attractive appearance. Everything is selling readily and at good prices.

PETROLEUM EMULSION FOR THE SAN JOSE SCALE.

Bulletin No. 49 of the Storrs Experiment Station by C. D. Jarvis, treats of a new remedy for the San Jose scale. The lime-sulphur wash, which for a number of years has been considered the standard remedy, has many undesirable qualities. It is corrosive to man, to horses and to spraying apparatus; its preparation requires care, time and an elaborate outfit; it must be applied while warm, and if applied in the fall frequently causes injury to the trees.

The various proprietary remedies or so-called "soluble oils" on the market have been thoroughly tested and favorably reported upon by several experiment station and prominent fruit growers. The cost of these preparations, however, makes their use almost prohibitive for commercial orchardists. These soluble oils are concentrated petroleum emulsions, made by a process known only to the manufacturers, and are the outcome of the strong demand for an efficient scale remedy that may be more conveniently prepared and less offensive to handle.

The Storrs Experiment Station, in the bulletin referred to, describes a method of preparing a "soluble oil," which after one year's observation, shows signs of becoming a very efficient and convenient remedy. Messrs. J. H. Hale, of South Glastonbury, and Barnes Brothers, of Yalesville, who tested it in an experimental way last year, report favorable results. The formula, which consists of two parts, follows:

1.—The Emulsifier.

Carbolic acid (crude liquid 100 per cent.)..... 2 quarts
Fish oil (pure Menhaden or whale oil)..... 2½ quarts
Caustic potash (granulated)..... 1 pound
Heat to 300 deg. F., remove from the fire and immediately add
Kerosene..... 3½ quarts
Water..... 5½ quarts

Very serious difficulty has been experienced in getting materials of the proper grade. This is especially true with regard to the local dealers who are not familiar with the requirements and who are likely to substitute "something just as good."

The emulsifier may be made up in any quantity and kept indefinitely. The cooking is best done in an iron kettle equipped with a cover and so arranged that it can be readily removed from the fire. The mixture being inflammable, it is unsafe to do the cooking near a building.

2.—The Complete Soluble Oil.

Emulsifier..... 8 parts
Crude petroleum..... 18 parts
Rosin oil..... 4 parts
Water..... 1 part

This part of the formula may be made up at any time without heat. The materials should be added separately and in the order named.

By securing the materials in large quantities the complete "soluble oil" may be made up for 16 to 18 cents per gallon. If diluted with 15 parts water, as is recommended, the spray mixture costs slightly over one cent per gallon. The lime-sulphur wash costs, including labor and fuel, at least one and one-half cents per gallon and the

commercial soluble oils cost, depending upon the amount of dilution, from two and one-half to three and one-half cents per gallon.

Directions for Use.

After a thorough stirring, take one part of the "soluble oil" to fifteen parts of water. Before mixing up large quantities, pour a few drops in a glass of water to see if it mixes. If it has been properly made the mixture will form a milky emulsion without any free oil on the surface. When satisfied that it will readily mix or "emulsify" a convenient way is to pour three gallons of the soluble oil into a fifty-gallon spray barrel and fill the barrel with water.

Thoroughness of application is of utmost importance. Badly infested orchards should receive two applications, one in the fall and the other in the early spring. As a regular practice, however, one application, just after the leaves drop in the fall, should keep the insect in check.

Where the leaf curl is prevalent in peach orchards the oil spray in the fall may be supplemented by a spring application of lime and sulphur. A finer nozzle should be used for the oil than for the lime-sulphur wash. In this way more thorough and more economical work may be done. Because of its greater spreading action and of its adaptability to a finer nozzle, one gallon of oil emulsion will go as far as one and one-half gallons of the lime-sulphur wash.

Complete information is given in the bulletin regarding the source and cost of materials, the preparation of the "soluble oil," the necessary precautions and the time and method of application.

The bulletin will be sent free upon request by addressing the Storrs Experiment Station, Storrs, Connecticut.

VERMONT AGRICULTURAL EXPERIMENT STATION.

The present status of San Jose scale infestation in Vermont is somewhat better than that of a year ago, as reported at the Society meeting. The writer visited the orchard of Mr. Emerson of Thompson's Point, early last summer and made a somewhat careful inspection of the infested trees. At that time there were less young scales than during the preceding season and it was thought that a large number of them had been killed during the past winter. In conversation with Mr. Emerson the writer was informed that he had already made arrangements with a professional sprayer from Boston to spray all the infested trees thoroughly, in the fall, after the leaves had fallen.

A few weeks ago, not having heard in the mean time that anything had been done by Mr. Emerson, except very indirectly, the orchard was again visited and it was found that all of the old trees had been cut down and burned up. There were, however, some thirty or forty young trees, some of which had been planted last spring, still remaining in the orchard. An examination of all remaining trees revealed the fact that only three or four out of the whole lot were actually free from scale, showing that, even though clean trees were planted in the spring, practically all of them were more or less infested during the first season. This furnished additional evidence of the rapid spread of scale throughout an orchard, when a few trees in the orchard are infested.

At the present time these trees, according to information given by the superintendent, have been thoroughly sprayed with one of the standard, soluble oils and it is the intention to give them another spraying next spring, before the buds begin to swell. If this work is thoroughly done and a spring application is made it is believed that practically all old scale will be eradicated from the young trees. There are some half dozen trees, however, on which it is quite likely a few scales will escape being hit by the spraying materials and it would seem advisable that a careful watch be kept on these suspected trees during the coming season. If young scale make their appearance, the writer would advise that all infested trees be at once destroyed.

Careful examination of adjacent orchards and scattering roadside trees have not revealed the presence of scale in a single instance.

WM. STUART, Sec'y.

A meeting in the interests of the Los Angeles Flower Show (Cal.) was held on Dec. 30 at Chas. Winsel's store. Secretary Hand was instructed to send out notices to exhibitors of Pasadena, Hollywood and Santa Barbara and the millionaire residents of Southern California with a view to making this the most extensive show of the kind ever given. A date, from April 5 to 11, was tentatively agreed upon.

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
Yours very truly,
GEO. A. SKENE.

Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
Florham Farms, Madison, N. J., December 8, 1906.
Yours truly,
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

AN IRON FRAME STATEMENT

The erection of all-cypress houses demands endless cutting and fitting on the grounds, which means both a great loss in materials and time. Our Iron Frame House is accurately cut, all holes drilled and every part prepared for instant erection, at the factory before a thing is shipped. It means to you simply the work of assembling the parts, bolting them up and putting in the screws. When you compare costs of the wooden house with our Iron Frame House, bear in mind that the Iron Frame costs less to erect, less to keep in repair, and gives you greater returns in quantity and quality of flowers than the best cypress house made. It is a construction that pays for itself many times over. Write us.

THIS IS NOT THAT HOUSE.

Here is something for you to think over. Last fall we put our bid in, with several other greenhouse builders, for a rather extensive range, involving thousands of dollars. The superintendent wanted U-Bar houses, but his employer was skeptical. We told him frankly, not to base his decision in their favor, on any arguments we may have brought forth, but to write to several U-Bar owners and get their points of view. He took a list of twenty-five names and wrote to every identical man of them. All but three answered. Every one wrote enthusiastically. The whole trend of those twenty-two answers was, that the U-Bar is *the* construction. We got the contract. A few days ago he wrote for a figure on an addition. Send for catalog or send for us. **Pierson U-Bar Company**, Designers and Builders *U-Bar Greenhouses*, Metropolitan Building, 4th Avenue and 23rd Street, New York.

Agricultural College Greenhouses at Durham, N. H.

The Sectional Iron Frame with Boarded sides and Foot Piece Foundation. Note the straight roofed palm house in the center

Greenhouse Construction

AMONG THE

Experiment Stations and Agricultural Colleges

Now that the purely theoretical phase is a thing of the past, and the public is appreciating the tremendous importance of the work being done by the various colleges and stations, the pressure for more greenhouses to meet the demand for carrying on and expanding of this work, is everywhere being felt.

Years ago, we furnished materials for a number of the Amherst houses, and the students did the erecting. But of recent years, the majority of our houses among the various colleges all over the country, have been the Sectional Iron Frame Construction, which because of its lightness and freedom from repairs is every way practical.

The same construction can be used with either masonry walls, capped by iron sills, or with the Cast Iron Foot Piece foundation having board or shingled sides. The foot piece foundation as we make it, is just as warm as the masonry wall, and enough cheaper to allow the erection of more houses for the same money.

Our Sectional Iron Frame Greenhouse is the ideal construction. It is so scientifically worked out, that the labor of preparing materials and erecting is reduced to a minimum. It is not a house that needs to be cut and fitted by hand, on the job, but the entire frame is passed through a line of machines in our factory, where it is cut, shaped, punched, fitted and primed, ready for immediate erection.

When the materials are delivered to you, the erection of the frame is merely a matter of bolting up the iron parts and fastening the screws.

The expense of erecting is thus greatly reduced, practically equalizing the advance in cost of the Iron Frame House over the wooden structure. Send for our literature. **Lord & Burnham Co.,** New York Offices, 1133 Broadway, corner 26th St. Boston Branch, 819 Tremont Bldg. Philadelphia Branch, 1215 Filbert Street.

We make every part of a greenhouse but the glass.

We sell any part.

Plan of the Connecticut Agricultural Station Greenhouses at Storrs. These sectional iron frame houses we are erecting on masonry foundations

Section showing the method of using our foot piece foundation and ice clearing eave plate

A single section of our iron frame construction placed on masonry walls. The light iron frame only shows on this side, while on the opposite, all the wood used is in place. The houses are a series of these sections united.

GERANIUMS

NEW VARIETIES.—In New Varieties we make a special offer of one each of 100 varieties in 1905 and 1906 introductions for \$10.00. This is acknowledged to be the finest collection ever offered in this country, coming as it does from such noted introducers as Bruant, Lemoine, Bouchlat and Cannell, is indorsement enough that in it will be found represented the highest state of development in Geraniums at the present time. Some of wondrous beauty in solid colors, others of exquisite combination of colors which baffles successful description, and would make grand acquisitions to any collection, possessing as they do special merit of such sterling qualities that we are satisfied they are destined to become the standards in their several different classes.

STANDARD VARIETIES.—In standard varieties we offer an immense stock in prime condition, for immediate shipment, at from \$2.00 to \$4.00 per 100. For \$18.50 we will send one thousand, 50 each of 20 varieties, our selection, single and double, all "A No. 1" kinds.

GERANIUMS.—In a good assortment, containing such kinds as **GALATEA**, **COUNTRESS OF CREW**, **PURITY**, **COUNTRESS OF WARWICK**, **GLORIOSA**, **TOPPY DODD**, &c. \$1.50 per doz. \$6.00 per 100.

JOHN J. COONAN

Hudson Av., Haverstraw, N.Y.

CHRISTMAS 1907

The financial flurry is over, and trade will be good for those who properly prepare for it. We offer the following, all in first class condition:

NEPHROLEPIS AMERPOHLII, The Philadelphia Lace Fern.

This, we believe will be the best selling plant we have for Christmas; everybody is fascinated by its exquisite grace.

4 inch pots at \$.50 each.

6 inch pans at \$12 per doz.; this size is very desirable.

8 inch pans at \$2 each.

10 inch pans at \$3 to \$4 each.

Large oval pans, very fine, at \$5 and \$6 each.

2 inch pots (for growing on), \$25 per 100; \$200 per 1000.

A purchase of these young plants will be a good investment for next year; it multiplies rapidly.

NEPHROLEPIS TODEAOIDES, The London Fern.

2 inch pots at \$25 per 100; \$200 per 1000.

6 inch pots at \$9 per doz.

NEPHROLEPIS SCOTTII, exceptionally well grown.

8 inch pots at \$1.50 each.

6 inch pots at \$6 and \$9 per doz.

5 inch pots at \$4 and \$5 per doz.

ADIANTUM HYBRIDUM, 2 inch pots at \$5 per 100.

ASPARAGUS PLUMOSA

2 inch pots at \$4 per 100; \$35 per 1000.

3 inch pots at \$7 per 100; \$65 per 1000.

ORANGES, with from 4 to 10 fruit at \$.25 per fruit. The small ones in 4 inch and 5 inch pots are particularly attractive.

FICUS PANDURATA, The famous decorative plant; nothing more satisfactory for the house.

Good plants in 6 inch pots, single stems at \$3 each.

7 inch pots, single stems, 4 feet high at \$4 each.

5 feet high at \$5 each.

Larger plants, both single and branched stems, at \$6, \$7.50 and \$10 each.

The plants from \$4 up are extra fine; good value for the price.

PANDANUS VEITCHII, well colored.

4 inch pots at \$.40 each; fine for basket work.

5 inch pots at \$.50 each.

6 inch pots at \$.75 and \$1 each.

BEGONIA GLOIRE DE LORRAINE, without doubt the finest we have ever grown.

3 inch and 3½ inch pots at \$20 and \$25 per 100.

5 inch pots at \$9 per doz.

6 inch pots at \$12 and \$15 per doz.

8 inch pots at \$2, \$2.50 and \$3 each.

BEGONIA TURNFORD HALL, 6 inch pots at \$1 each.

HOLLIES, well berried, at \$4, \$5 and \$6 each.

Kindly let us have your order early so that we can reserve fine stock for you

ROBERT CRAIG COMPANY, Market @ 49th Sts., PHILADELPHIA, PA.

POINSETTIAS

3 inch pots, short for pans, \$12 per 100.

7 and 8 inch pots, 3 plants with fern at \$.75, \$1, \$1.25

and \$1.50 each.

8 inch pans, short with fern, at \$1.25 each.

10 inch pans, short with fern, at \$1.50 each.

6 inch pots, with fern, at \$.75 and \$1 each.

CYCLAMEN

5 inch pots at \$.35 and \$.50 each.

6 inch pots at \$9 and \$12 per doz.

AZALEAS. We have the finest lot of Azaleas we have ever grown for Christmas, including Mardner, Vervaeana, Thiers, Petrick and Pauline Mardner, at \$1, \$1.25, \$1.50,

\$2 and \$2.50 each.

Larger plants of Vervaeana and Mardner from \$2 to \$7.50 each.

Pyramid Vervaeana at \$3.50 and \$4 each.

Pyramid Petrick at \$1.25 each.

CROTONS, well colored plants.

4 inch pots at \$25 per 100; \$3 per doz.

4 inch pots, new highly colored varieties, at \$.50 and \$.75 each.

5 inch pots, general collection bright colors, at \$.50 each.

Larger plants at from \$1 to \$5 each.

DRACAENA TERMINALIS, the highest colored and best grown we have ever had.

3½ inch pots at \$3 per doz.; \$25 per 100.

5 inch pots at \$6 and \$9 per doz.

6 inch pots at \$12 per doz.

2½ inch pots, well colored, at \$15 per 100.

The latter are fine for baskets, hampers, etc.

DRACAENA AMARILIS, an excellent keeper, well colored.

5 inch pots at \$9 per doz.

6 inch and 7 inch pots at \$1 and \$1.25 each.

DRACAENA MASSANGIANA, fine, perfect plants of this excellent variety.

6 inch pots at \$1.25 and \$1.50 each.

5 inch pots at \$1 each.

DRACAENA FRAGRANS, perfect plants. 6 inch pots at \$6 per doz.

DRACAENA SANDERIANA, 2½ inch pots at \$12 per 100.

SOLANUM CAP., well berried, 6 inch pots at \$4 per doz.

BOXWOOD, exceptionally fine value at \$1.50, \$2, \$3, \$5 and \$9 per doz.

AUCUBAS, heavily berried, in 6 to 8 inch pots at \$9, \$12 and \$15 per doz.

JAPANESE
THE YOKOHAMA NURSERY CO.
LILIES
PLANTS
BAMBOO STAKES
31 BARCLAY STR. NEW YORK.

A Large Surplus of Japan Bulbs

We have just received a large quantity of LATE DUG, well-ripened bulbs of superior quality, from Japan, in first class condition. They are being put into Cold Storage for delivery during 1908 as ordered. We have

LILIUM GIGANTEUM
LILIUM MULTIFLORUM
LILIUM LONGIFLORUM

LILIUM AURATUM
LILIUM ALBUM
LILIUM MAGNIFICUM

and a few Rubrum, Hansoni, etc. Among the Speciosums we especially recommend the Magnificum, which is one of the finest lilies today.

YOU SHOULD GROW LILIES ALL THE YEAR AROUND

The Longiflorum varieties flower in from 13 to 18 weeks after they are potted, and the Auratums and Speciosums in 18 to 24 weeks. 55° to 60° is sufficient for the Speciosums, while the Longiflorum varieties will do better by a 5° lower temperature, especially from November until February. Careful watering is necessary to avoid getting the soil too wet. Under these conditions Speciosums potted end of July and Longiflorums end of August will bring you fine flowers for Christmas. All large forcers know these to be far superior to Harrisii.

We can also deliver from Chicago Cold Storage Warehouse, Longiflorum 9/10", Multiflorum 9/10" and Giganteum 7/9 and 9/10" at reasonable prices

Write us for prices.

RALPH M. WARD & COMPANY, 12 West Broadway,
NEW YORK CITY
ORDER NOW

We desire to call attention to our large and fine stock of

NEPHROLEPIS

PIERSONI ELEGANTISSIMA, WHITMANII, etc. These are splendid selling plants for the Holidays. We offer exceptionally good value in the 6 in. and 8 in. sizes. Plants are in perfect condition and are exceedingly good value at the prices quoted. You will find no better selling plants than these beautiful ferns, and we offer them at lower prices than ever before.

2 1/4 in. pots, \$6.00 per 100; 3 1/2 in. pots, fine perfect little plants, \$15.00 per 100; 6 in. pans, 50c and 75c each; 8 in. \$1.00 and \$1.50 each; 10 in. \$2.00 each; larger specimens, \$3.00 to \$5.00 each, according to size.

SCOTTII. Fine plants, 6 in. pots, 50c. each.

BOSTONIENSIS (The Boston Fern). 6 in. pots, 50c each; 8 in., \$1.50 each.

SMALL FERNS FOR FERN PANS

There is nothing that sells better during the entire winter than small ferns for fern pans. We have a splendid stock of extra strong plants in 2 1/4 in. pots in the hardiest and most useful varieties for this purpose. Our stock will be found very strong and very nice.

\$4.00 per 100, \$30.00 per 1,000.

F. R. PIERSON CO., TARRYTOWN-ON-HUDSON,
NEW YORK.

CHRYSANTHEMUMS IN THE LONDON PARKS

For many years past there has been provided in those London parks under the authority of the County Council a gratuitous display of chrysanthemums. The Royal Parks do not have anything of the kind, and the only chrysanthemums seen there are such as are growing in the open in the beds and borders; but in the other parks greenhouses are specially set apart for the autumn exhibitions, and as they open to the public about the middle of October and do not close till the middle of the month following, the responsible authorities have always to keep in reserve plants which can take the place of those that have finished to bloom, and hence the display is kept up as brightly as possible for the time.

This year I started my round of visits to the parks by commencing with Waterloo Park, the most northern one in the metropolis. This lies at the top of Highgate Hill, past the famous Whittington stone, and is one of the most charming little parks in London, while all the others are on the flat. Waterloo affords natural features so varied in form, slopes, hollows, and well-wooded hilly background, as to offer to the head gardener in charge a capital opportunity of turning them to the best account. I, however, cannot deal with the general features of the parks, but must strictly limit my notes to the chrysanthemum displays. At Waterloo, the collection is staged in a composite house, the visitor entering first a span roofed portion which leads to a lean-to combination partitioned into three divisions. The plants, as at all the parks, are grown in pots, arranged in two banks, with a middle path for the visitors, who enter at one end and leave at the other. This display consists chiefly of big blooms, grown in exhibition style, with a certain regard being paid to decorative effect in the edging and intermingling of purely decorative varieties, the Japanese varieties predominating. We leave Waterloo to work our way south, and on the road call in at Twisbury Park, a fine open space of large extent. There are always two shows here, the arrangement not differing from that of the past few years—a sloping, undulating bank with a serpentine front edged with Singles and freely flowered Decoratives. At the back of the group, tall growing plants of decorative sorts are freely flowering and trained up under the roof to form a floral background, and the only cause of complaint we have is that, notwithstanding the immense number of new introductions and the great resemblance there is between many of the flowers the labels are very few and far between, and that visitors who are not experts have therefore little means of knowing the names of the varieties before them.

At the conservatory there is always a most delightful and artistic display. Huge palms, ferns and foliage plants of every varying form and size are here arranged in the greatest taste, and at intervals we see nicely flowered plants of the various sections of chrysanthemums that are of peculiar deco-

orative value. This year we see several most attractive groups set up in illustrative examples of the different sections. For instance, immediately on entering to the right we notice a fine bank of Singles flowering in great profusion. Then a little further there is an object lesson in Anemones of great educational value to the visitor, either expert or tyro. A few steps further and we observe the old florists' type of Incurved. Among the Japanese we recognize many old friends. As we leave, another bank of Decorative Singles is on our right and on our left. Victoria Park is next reached. Long before we come to the span-roofed greenhouse in which the collection is staged, we pass long borders filled with early flowering Pompons and other varieties that are now approaching their end. Not far from the entrance to the house are some large beds filled with single-stemmed well-grown plants of *Soleil d'Octobre*, each carrying from seven to ten huge blooms on a plant. This is a very effective display, and the variety is well named.

General decorative effect is here studied to a large extent, the ends and sides of this large greenhouse being covered with freely flowered bushes spread out to their fullest extent and forming a dense covering of foliage and blooms of medium size. The main collection, divided into two sloping banks with a path in the middle, is edged in the front with a continuous succession of bush plants of *Lady-smith*; and here, if we may offer a criticism, the effect is a little overdone. The edging a foot to a foot and a half in width of the peculiar mauvish pink that is distinctive of *Lady-smith*, practically kills the color of the whole collection when viewed from either end. It would, we think, have been better if the front row edging had been alternated with breaks in the color. This collection is always diverse and representative, *Incurves*, *Anemones* and the Japanese being included in good numbers. Among the Japanese some noble blooms stand out here and there like floral monuments to the skill of the cultivator, a veteran in the art, of many years' experience.

Brockwell Park lies far away, and is postponed for another day. The collection here is staged in a rather small house—in fact, the smallest in all the parks. The visitor passes through the old English garden, a quaint old-world garden that has been already described in these columns. As we pass on our way we notice besides *Lobelia cardinalis*, *gladioli*, dahlias, and many other occupants which are still flowering in spite of the weather, a charming bed of *Salvia splendens* in front of a background of white *Pompon dahlia* *Geo. Brinkman*. The old fountain with its collection of aquatics, iris, megasea, etc., is playing, and from the central path around it eight gravel paths radiate in all directions. These are linked together by a series of arches, covered with *Cobea scandens*, gourds and various climbers, and lead to odd corners in the garden, where there are arbors and rustic seats for the visitor to rest on.

The outdoor chrysanthemums in this secluded spot, which is surrounded by

an ancient red brick wall, a veritable *rus in urbe*, are still bravely keeping up their beauty, and are flowering freely in spite of the weather. The little span-roofed house contains a neat collection arranged in much the same manner as that at Victoria.

It is always a source of satisfaction to visit Battersea Park. The collection is staged in a large span-roofed house in the frame ground near the Albert Bridge. Artistic effect is the great feature of this display, and it deservedly ranks as the best thing of its kind. If as a visitor we had only time to visit one show in London, then we should unhesitatingly select Battersea. To describe the arrangement is not easy in a few words, but in the attempt we may say that there are two sloping and undulating banks of blooms, the right hand one rather wider than the left, with a serpentine winding path between. Floral decorative effect is practised with great skill and judgment; the ends, sides and part of the roof are simply clothed with chrysanthemums of freely flowered kinds. The collection is an extensive one, all sections receiving due recognition according to their value. Our notes are so ample that it is impossible to elaborate them here and describe one-tenth of the grand varieties we saw. All the members of the big brigade are grown and the varieties chiefly noted for brilliance of color are interspersed with a judicious hand. Is there anything to equal *Gloire du Rocher* or *Lord Alverstone* for color? For size, *Florence Molyneux*, the monster white, heads the list.

Time presses, and we must away. From the southwest corner of the metropolis to the southeast is a journey of some importance, the means of transport being less rapid. Southwark Park, situated near the river at a busy part near docks, warehouses, timber yards and the like, contains a large and densely packed population. The collection of chrysanthemums is therefore highly appreciated by residents in this locality, who belong chiefly to the working classes. This year our visit was earlier than usual, and considering the disadvantageous circumstances under which the collection is grown we were agreeably surprised to find what a large number of finely developed, well-colored blooms there were on view. Several poor women of the humble class with their children were enjoying this gratuitous floral feast, and we noted with pleasure their expressions of surprise and delight. In one corner there is a group of entirely yellow varieties together, and the effect is rather striking. On the other side is a large group of various pink sorts. The rest of the plants are arranged around the sides of the house, which is T shaped and in a central bed, so that visitors pass in at the door, go all around the house and leave by the same way. The middle bed contains the cream of the collection for quality and size, there being some grand blooms of the leading varieties. Here again, besides large numbers of Japanese, many excellent varieties of *Incurves* and *Anemones* are included. C. HARMAN PAYNE.

continually going on. One wily Maine lumberman is quoted as saying that the Christmas tree business is "doing more to devastate our forests than all the pulp mills combined," and wants the legislature to take action! People need not be disturbed by these appeals. Forest trees are valueless for Christmas tree purposes. The symmetrical, stocky little specimens which are required for this use are found not in the thick growth, but scattered individually over the pasture lands on the hillsides. Trees of this character are not used for lumber and they would not be allowed to grow on pasture land were it not for the equivalent they return for the space occupied, in their sale for the holiday trade. Chief Forester Pinchot is out with a public reply to the deluge of appeals which he has received urging that something be done to prevent the "needless destruction of the nation's forests," in which he assures the people that all the Christmas trees used in one year could be grown on a 1400-acre farm, an amount utterly insignificant when compared to the destruction caused by forest fires and wasteful lumbering. Anyone who has ever visited the lumbering regions needs no assurance on this point

Mr. Hill and his critics

Our New York contemporary takes itself very seriously in its strenuous struggle to impugn the former secretary of the S. A. F. for accepting from a well-informed and reputable firm registration of the name *Hydrangea arborescens alba grandiflora* for a new introduction. The editor of our esteemed contemporary rants about "plights" and other things which exist only in his distorted imagination and demands that this plant name as registered should be withdrawn by Mr. Hill. In our humble opinion Mr Hill will be in no hurry to act upon this advice so freely given, but will wait, at least, until some better evidence is produced to show that he is in error. The truth is that nothing has appeared thus far in the discussion to show that Mr. Hill's variety of *Hydrangea arborescens* has been compared with the specimens named by Torrey and Gray in 1840. This could be done next summer when the plants are in bloom and the question of identity, at least, settled properly. It may transpire that the Hill variety is a much better plant. Dr. Gray who, besides being a botanist, was also an ardent lover of floral beauty, could not have thought much of the variety or he would have carried it down in his later works. In half a century the variety might improve in nature or, by selection, better flowered forms might be obtained. The history of *Nephrolepis exaltata* in the past twenty years is a case in point.

Before the time for our next "Good Anticipation Morning" to our readers, Christmas with all its apprehensions, arduous responsibilities and distractions, will have passed into history. Varying views are expressed as to the influence upon the holiday trade of the recent monetary disturbance, many cautious people, like Bre'r Rabbit, being disposed

Alarmists are again to the front with the annual hue and cry about the awful destruction of spruce trees in Maine for Christmas purposes and the lumbermen and pulp mills are glad to join in the chorus and thus try to blind the people to the facts in regard to the real forest spoilation which is

to "lay low" and take no chances while others profess to expect a volume of business that shall be an eye-opener and sharp rebuke to all pessimists. We surely hope that the views of the latter will be overwhelmingly vindicated and that when it becomes our duty to report the results of the great holiday trade it shall be our privilege to record that the courage of the enterprising man who unhesitatingly advertised his holiday offers and the confidence of him who freely purchased the same will prove not to have been wasted. The report of the Secretary of Agriculture showing that our agricultural products for 1907 have reached the stupendous value of seven and a half billion dollars—six hundred and fifty million dollars in excess of last year's amount—should inspire us with the right kind of confidence. We commend to the doubters the following extract from James D. Law's poetic Thanksgiving epistle to Hon. James Wilson, Secretary of Agriculture:

"Eight thousand million dollars—whew!
From one year's toil accruing—
Our hats we must take off to you,
Here's surely something doing!
Compared to that our Soulless Trusts
As grasping as they're able
Get only but the crumbs and crusts
From Uncle Samuel's table

"No lasting harm may ever come
To our expanding nation
While rural Industry can hum
With such signification.
No danger of financial health
Our favor'd land forsaking
With such illimitable wealth
Before us for the taking.

"Our farmers now can live like kings
Without their fears and follies,
Enjoying all our finest things.
From telephones to trolleys,
With liberty unknown to most
Their lives are fat and sappy,
And when they get the Parcels Post
They'll be completely happy."

Vanda Varieties

Vandas were the pride of the pioneers of Orchidology, for they epitomized all that was typical in a fascinating class of plants. Today they are somewhat overshadowed; the public are more familiar with the graceful odontoglossums or gorgeous cattleyas but the man who grows orchids loves his vandas still. The ornamental character of their foliage is very striking; to see a house full of specimen plants mounted with fresh moss, noting the thick white aerial roots branching in all directions and drinking in the fragrance of the many-colored flowers, is surely to taste the cup of exotic intoxication. True epiphytes, they are chiefly natives of the East Indies and Malayan islands and with one or two exceptions require stove treatment. They also need more light than most orchids; indeed many successful growers do not use shading at all, but this point will need to be settled by one's location. *V. teres*, if it is to be well-flowered, must never be shaded and should have an end position to get the maximum of light.

There are now about fifty species with their varieties in cultivation and though all are beautiful, many are not of such a free-growing and flowering character as to make them popular outside a Botanic garden. The following are the best varieties. *Insignis* is exceedingly handsome and produces flowers in May or June on racemes of 5 to 7 flowers, sepals and petals light brown spotted with chocolate brown internally. *Suavis* is one of the finest for exhibition purposes, the flowers large and freely produced and deliciously fragrant, sepals and petals white outside, spotted and barred with blood purple within; it blooms at various seasons of the year and lasts a long time in perfection. *Tricolor* also makes a superb specimen for exhibition purposes; flowers white outside, sepals and petals pale yellow spotted with brownish red within. *Tricolor* has many varieties but *planilabris* is the finest; flowers are larger and brighter colored than the type and open at various seasons. *Sanderiana* was introduced from the Philippines in 1881 but is still somewhat rare; the flowers are the largest in the group, dorsal sepals and petals pink, slightly stained with buff yellow, lateral sepals pale nankeen outside, within greenish yellow, reticulated with dull crimson and opens in September or October. *Cerulea* is a somewhat "sticky" looking plant but this is compensated for by the large spikes of flowers of pale blue with lip deeper in color. It opens in the fall. It should be hung up close to the glass where it may have a current of pure air in the intermediate house. *Kimballiana* is a curious terete form which does well in the cool end of the cattleya house and is adapted for basket culture, giving a long rest in winter. The flowers are white with deep purple lip and open in October or November.

Vandas delight in a moist temperature and when grown in pots should be stood on pots inverted into large pans. The stove varieties should have a temperature of not less than 70 deg. by day and 60 at night in winter. A leggy specimen may be cut down and sunk deep into pots with nothing but crocks and charcoal round it, and a deep surface of good sphagnum; keep shaded and syringed until new roots appear.

Edgar Elvire

A New Rose

(See Frontispiece.)

Our frontispiece this week is a portrait of another new rose, a seedling raised by John Cook of Baltimore. It is a hybrid tea, the result of recrossing three generations of Mr. Cook's seedlings. The color is a soft salmon pink which lightens up beautifully as the bud opens. The flowers are large and very strongly perfumed and the growth is sturdy and Mr. Cook states that plants set in June have produced from fifteen to twenty blooms each, to date. It has not yet been named but is known as No. 294.

NEWS OF THE CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting on Tuesday evening, December 17, was well attended, there being about one hundred members present. After routine business had been attended to attention was directed to the various floral exhibits, of which there was a fine array, including two sterling novelties. The first of these was a plant in bloom of a hybrid lily, *L. Philippinense* X. *L. longiflorum*, raised and exhibited by R. & J. Farquhar & Co. This plant, which bore one flower, was from seed sown February 17, 1907, and is the first to bloom of a set of one hundred and fifty, showed characteristics intermediate between the two parents. The stem was stouter than that of *Philippinense* but less clumsy than *longiflorum* and the foliage was considerably wider than the narrow leaves of the former, widest at the middle and narrow at the base. The flower is of excellent form and substance. An award of merit was bestowed. The other novelty was a vase of bloms of a new rose—No. 294—from John Cook of Baltimore. As a portrait of this beautiful rose adorns our cover page and is described elsewhere in this issue we only need to add that it attracted much attention and was given an award of merit. Other conspicuous exhibits were a vase of very fine eucharis blooms from W. N. Craig and of Princess of Wales violets from I. F. Wood, both of which received awards of merit for superior cultivation, four vases of carnations from S. J. Goddard, one of which named *Ceres* was honored with an award of merit, roses from Fber Holmes, sweet peas from Wm. Sim, *Begonia Vesuve* from T. H. Westwood, *mignonette* from E. A. Wood, and carnations from another exhibitor, all of which received votes of thanks.

The topic assigned for the evening was "Innocents Abroad," a number of members to whom this designation might properly apply having been invited to entertain the club with brief accounts of recent visits to other sections of the country. W. J. Stewart was the first speaker, and his theme was the trip to Norfolk, Va., and the Jamestown Exposition, which Mr. J. K. M. L. Farquhar and he had taken last October. Mr. Stewart recited some of the incidents of the trip in a humorous vein, and spoke enthusiastically of the crepe myrtles, magnolias, umbrella tree and figs which are among Norfolk's horticultural attractions. A rising vote of thanks and unstinted applause was the speaker's reward.

Robert Cameron and W. N. Craig having visited New York and vicinity together during the chrysanthemum show, they were next called upon. Mr. Cameron told of his enjoyment of the orchid houses under the care of A. Herrington at Madison, N. J., and the successful transplanting of a large number of pin oaks to which his attention had been called. The natural scenery of Bronx Park had charmed him, and the chrysanthemum show was remarkable for the number of excep-

tional flowers displayed. He and Mr. Craig had traversed the Great White Way on election night, and "they could a tale unfold."

Mr. Craig followed and told entertainingly of what he had observed in the gardens and greenhouses of Madison, the orchids at Lager & Hurrell's in Summit and the greenhouses at Bronx Park. He spoke unfavorably in the main of the conditions as he found them in the latter. The conservatories were grand but defective in their heating. He said that the vase of chrysanthemum Miss Montigny exhibited at New York, by Thomas Proctor of Lenox, Mass., was the best vase of chrysanthemums he had ever seen.

The amendment to the by-laws providing for free nominations of officers from the floor, one month before the annual election, was adopted unanimously. A resolution of congratulation to Mr. and Mrs. J. T. Butterworth on their 25th wedding anniversary was adopted. A vote of sympathy with the family of W. W. Edgar was passed. D. Lumisden, who has removed to New Hampshire, was granted a demit from membership with thanks for his good services to the club. It was voted that the meeting in January be Ladies' Night.

Field Day at Framingham.

The members of the Gardeners' and Florists' Club of Boston, to the number of about one hundred, on Saturday, December 14th, enjoyed an excursion to Framingham, as guests of S. J. Goddard, J. T. Butterworth and Wm. Nicholson & Son. A big special trolley car was provided by Mr. Goddard, and although a heavy snow storm raged all the afternoon, all were comfortable and supremely happy. Mr. Butterworth's was the first place visited and the many houses of orchids grown commercially for Boston trade were a surprise to many of the visitors. A somewhat unusual crop was a house of young feverfews as a crop to follow chrysanthemums, the flowers to be used for Decoration Day work. Mr. Butterfield and Mr. Nicholson, who also grows a quantity, both stated that they found the feverfew a paying crop.

Mr. Goddard's establishment is devoted mainly to carnation growing. His pet variety, *Helen Goddard*, is not unknown to the frequenters of the carnation shows, where he is always well represented by flowers of high grade. At present *Ceres*, a beautiful rosy pink, is a centre of admiration. *White Fair Maid*, another novelty, is seen here, *White Perfection*, *Beacon* and a number of other popular varieties look very happy in Framingham soil. At Mr. Nicholson's *Afterglow* holds the entire of the stage, and it is superb as seen here, the stems being of extraordinary length. *Lady Bountiful*, *Snow-Drift*, *Harry Fenn* and *Victory* are among the money makers here. An appetizing collation was served at Mr. Nicholson's, after which appreciative remarks were made by President Westwood, Wm. J. Stewart, F. E. Palmer, Thomas J. Grey and the hosts of the occasion, Messrs. Nicholson, Goddard and Butterfield, responded amid much applause to the compliments showered upon them.

MORRIS CO. GARDENERS' AND FLORISTS' SOCIETY.

The annual election of officers for the ensuing year took place at the regular December meeting, with the following results: President, Percy Herbert; vice-president, Harold B. Vyse; treasurer, Wm. Duckham; secretary, Edw. Reagan, Morristown. Executive committee stands as follows: A. Harrington, Wm. F. Lyon, C. H. Totty, Alex. Brown, Joseph A. Manda, Wm. G. Badgley, David Falconer, A. R. Kennedy, Robt. M. Schultz, Thos. Stokes, Otto Koch, Ernest E. Wild.

The monthly exhibit while not large, was good in quality. Half a dozen very fine pans of *Begonia Lorraine* were shown by A. Herrington; *Stirling Castle* tomatoes in tempting dishes were here from Wm. F. Lyons, who also had Christmas Pink and Florence Denzer sweet peas. The judges for the evening gave each exhibit a cultural certificate.

The feature of the January meeting will be the installation of officers and the twelfth annual smoker, which we hope to make equal to any we ever had. The committee intrusted to prepare the viands and secure talent for the occasion consists of R. M. Schultz, A. Herrington, Wm. Duckham and C. H. Totty. They will be held strictly accountable for any short-coming.

E. R.

FLORISTS' CLUB OF WASHINGTON

Resolutions duly introduced and unanimously passed at the meeting of the Florists' club of Washington, held on the evening of December 6th, 1907.

Whereas, News has been received of the sudden death in Chicago, on December the third, of P. J. Hauswirth, secretary of the Society of American Florists and Ornamental Horticulturists;

And Whereas, Mr. Hauswirth was known throughout the length and breadth of the country as an enthusiastic fellow-florist and admirer of things beautiful; devoted to the best interests of the Society of which he was Secretary; willing and anxious at all times to be of any possible service to his own or kindred organizations; a man beloved by all who knew him;

And Whereas, We, the Florists' Club of Washington, D. C., recall with pleasure the various occasions upon which our deceased friend was with us, and the keen interest manifested in all matters pertaining to our welfare;

Be It Resolved, That these resolutions be spread upon the minutes of this meeting as an expression of the great shock with which the announcement of his death comes to us; as an evidence of the deep and heart-felt sympathy of the officers and members of this Club for the family in the great bereavement which has come to their home; and be it

Further Resolved, That the Secretary of this Club be directed to transmit a copy of these resolutions to Mrs. Hauswirth and the members of the family, and at the same time convey to them the sincere hope of the officers and members of this Club, that The Divine Ruler of The Universe may be their comfort and support in this time of their sorrow; and be it

Further Resolved, That copies be sent The Chicago Florists' Club, of which he was so long an active and efficient worker, and also The Society of American Florists and Ornamental Horticulturists, of which he was Secretary at the time of his death.

(Signed), Z. D. Blackistone, vice-president; Chas. McCauley, secretary; Wm. F. Gude, Jas. J. Harty, Jas. L. Carberry, committee.

NEWPORT HORTICULTURAL SOCIETY.

The election of officers of the Newport Horticultural Society took place Tuesday evening, December 10. President Butterton occupied the chair. Usually members turn out in large numbers to the annual meeting but the storm of that afternoon and evening prevented the attendance of many who otherwise would have been there.

The secretaries and treasurer presented their annual reports which showed that the Society is in every way in a healthy condition. The increase in membership was considerable.

On the table were several lots of carnations from the greenhouses of H. A. Jahn, New Bedford. A. S. Meikle, Bruce Butterton and James J. Sullivan were appointed a committee of examination and upon their recommendation a silver medal was awarded carnation Lloyd and a certificate of merit an unnamed white seedling. Carnation Lloyd will be distributed by Mr. Jahn in the spring. A refreshment committee previously appointed attended to their work after the regular business, which included the election of officers. But one change was made in the regular board, and that was in the financial secretary, but there are many changes in the executive committee. Following is the list:

President, John T. Allen; vice-presidents, Samuel Speers, James Robertson; Rec. secretary, David McIntosh; Fin. secretary, Daniel J. Coughlin; treasurer, A. K. McMahon; sergeant-at-arms, Wm. F. Smith. Auditors: W. S. Sisson, Bruce Butterton, B. M. Anthony. Executive committee: Andrew S. Meikle, Bruce Butterton, J. J. Sullivan, W. G. Matson, Alex. Fraser, Robert Patterson, B. M. Anthony, C. Oscar Schultz, W. F. Smith.

D. McINTOSH, Sec'y.

MINNESOTA HORTICULTURAL SOCIETY.

In our issue of last week we gave a very interesting account of the meeting of this useful society, from the pens of two correspondents. From Mr. LeRoy Cady we have received additional notes from which we extract the following:

Tuesday afternoon, the session was in charge of the Minnesota Rose Society, of which Mrs. H. B. Tillotson is president. Papers were presented dealing with Ornamental Horticulture. Rev. C. S. Harrison of York, Nebraska, told of the propagation and culture of some common perennials. Mrs. D. W. C. Ruff discussed the culture of foxgloves, hollyhocks, larkspurs, iris and some other biennials and perennials. Charles Nordine discussed rose culture very ably. Supt. Wirth of the Minneapolis Parks told about border planting. He advocated more thought and planning in planting of all kinds. A \$10,000 home should have some care taken in the planting about it so as not to mar the natural aspects and also to have all harmonious. Borders should form a pleasant background and be attractive to the neighbor as well as owners. Plants are cheap, and make a better screen than cement or brick. A number of other papers of interest to ornamental horticulturists were given, among them one by John

Monson, a florist, giving some of his experience in crossing roses. He has succeeded in bringing out some very promising large single roses.

The announcement was made that the National Paeony Society would probably meet in Minnesota in 1909. A list of perennials recommended for planting, to go with the list of ornamental shrubs already in use, was presented. Buckthorn and alpine currant were recommended as the best hedges to grow where pruning was practised.

LENOX HORTICULTURAL SOCIETY.

The annual meeting of this society was held Saturday, Dec. 7. President Heeremans occupied the chair and there was a large attendance. The following officers were elected for the ensuing year: W. Jack, president; R. Speirs, vice-president; Thomas Page, treasurer; G. Instone, secretary; E. Marsh, assistant secretary. The reports of the officers showed the society to be in a flourish-

W. JACK

President-elect Lenox Horticultural Society.

ing condition with a membership of nearly two hundred. President Heeremans, before leaving the chair, in a few well chosen words thanked the members for their support during his term of office. At the next meeting, on Dec. 21, there will be an entertainment.

G. INSTONE, Secretary.

AMERICAN CARNATION SOCIETY. Carnations Registered.

White Helen Gould by Simon J. Hider, Hillsboro, Ohio. Sport of Helen Gould, white, center petals slightly pencilled with pink gradually turning to white as matured; calyx stronger than Helen Gould; size 3 1-2 to 4 inches across; stem strong, 20 to 25 inches long; habit of growth same as Helen Gould. Registration made subject to the approval of the Carnation Society at its meeting in Washington, D. C., Jan. 28th. to 30th, inclusive.

ALBERT M. HERR.

Lancaster, Pa.

IOWA HORTICULTURE FLOURISHING.

One of the most successful meetings of the Iowa Horticultural Society was recently held in Des Moines. In spite of the light apple crop the quality and condition of the fruit were far superior to that of last season. The large attendance and the unusual enthusiasm shown by the members were notable features of the occasion.

The most interesting portion of the show was the collection of seedling apples exhibited by C. G. Patten of Charles City, Iowa. This collection of over one hundred varieties of new fruits won the Wilder medal at the Jamestown Exposition. Some of these apples have been found very profitable to grow in the colder sections of the state. The majority of the collection were of good color and quality, but have not been cultivated extensively, enough to determine their value commercially. Mr. Patten is a pioneer breeder of hardy fruits. Among the first of his production is the Patten's Greening apple, which has proven a great boon to the grower of the upper Mississippi valley.

The reports from the central station located at Ames under the direction of Prof. S. A. Beach were also encouraging. At this station there are over 17,000 seedling apple trees that have not yet come into fruiting. These are the products obtained from the cross pollination work that has been carried on with the leading standard varieties. Hardiness, productiveness and good keeping qualities are the features that the breeders are seeking for.

The unusually large damages from the insect pests has placed a greater importance than ever on the necessity for spraying. Large orchardists report that sprayed fruit sold at \$1.00 per bu. when it was difficult to dispose of the untreated product at 40c. per bu. The damages in sprayed orchards by the codling moth amounted to less than ten per cent., while the crop in many unsprayed orchards was entirely ruined.

The discussions of park and forestry questions were also interesting. "Ornamental Shrubs for Home Grounds," "The Destruction of Our Forests," and "Civic Improvements" are representative of the various subjects discussed. As the State grows older the artistic side of horticulture is bound to receive greater attention. W. G. BAXTER.

TWIN CITIES FLORISTS' AND GARDENERS' CLUB, MINN.

The Twin Cities Florists' and Gardeners' Club was organized December 12. According to the by-laws, the club will meet the third Tuesday of each month, alternately, at the Minneapolis Park Greenhouses, 38th street and Bryant avenue S, and at Holm & Olsen's, 20 W. 5th street, St. Paul. About forty professional horticulturists are members so far. Officers are as follows: President, T. Wirth; vice-president, O. J. Olsen; secretary, S. D. Dysinger; treasurer, R. A. Latham; executive committee, T. H. Hall, E. Nagel, G. P. Holm, A. S. Swanson.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held its regular monthly meeting on last Thursday in the Burlington Building. The attendance was by far the largest of the year, every seat in the room being taken, which goes to show that the new officers are doing good work in entertaining the members and the stay-at-homes missed another grand treat. President Young was much enthused when he took the chair to open the meeting, on facing the large attendance. There was quite a sprinkling of visitors, among them several young students from Shaw's Garden. Fred. Ammann presented resolutions on the death of P. J. Hauswirth, secretary of the S. A. F., which were adopted and spread on the minutes and a copy was ordered sent to the family and to each of the trade papers. The trustees were ordered to prepare an entertainment for the members and their families and to report at the next meeting, the entertainment to take place early in February.

Mr. S. L. Bray was introduced for a talk on flower pots. In the course of his talk he said he would like co-operation of the members in starting a large pottery in this city and form a stock company. A committee was appointed to look into the matter and report at the next meeting. The committee consists of C. C. Sanders, W. E. Guy, A. J. Bentzen, Emil Schray and J. F. Ammann.

The next on the program was a lecture on the Royal Gardens of Kew with stereopticon views, by G. H. Poing who has charge of the orchid houses at Shaw's Garden. This proved one of the most interesting features ever enjoyed by the club and Mr. Poing was congratulated at the close. Walter Mott, representing A. T. Bodding, New York, was in attendance. The first meeting in the new year will take place January 9th.

GARDENERS' SOCIETY OF GREENWICH.

The Gardeners' Society of Greenwich, Conn., whose membership includes about twenty-five gardeners, is formed to promote interest in horticulture and to invite more direct attention to the important and ennobling work involved. Silas Frost is president and Thomas Young of Belle Haven is secretary. Not alone is the influence of the society expected to improve the results from the work of its members, but methods are to be adopted that will, it is hoped, create an enlarged interest among residents generally, and a special program is already outlined for school children. Grades are to be formed and each of the children is to be given a plant to take home and cultivate, taking entire care of it until next September, when there will be a careful examination and inquiry into the work of each child and the condition of the plant in its charge. In each of the grades there will be three prizes.

The society's aim will be to cause the gardener and nurseryman to work more in unison and enlarge upon the community-of-interest idea along most worthy lines. It is reasonable to anticipate that the organization will be-

come a fixture which all will endeavor to maintain, and it goes without saying that Greenwich will reap advantages from what it accomplishes.

T. YOUNG, Sec'y.

KENTUCKY SOCIETY OF FLORISTS.

At the recent meeting of the K. S. of F. officers were elected as follows: President, H. Kleinstark; vice-president, H. Fuchs; secretary, F. L. Schulz; treasurer, J. Wettle. F. L. Schulz, J. Wettle, P. A. Reynolds, Jacob Schulz, and J. E. Marret were appointed a committee to arrange for a big chrysanthemum show next year.

J. K. ALLEN

Treasurer-elect, New York Florists' Club.

J. K. Allen was born in Wippany, Morris Co., N. J., received his educational training in Morristown schools, and subsequently was engaged with Jos. Towell at Paterson, N. J. for several years. In 1882 he embarked

J. K. ALLEN

in the florist business at Garfield, Passaic, N. J. During the past twenty years he has been engaged in the wholesale commission flower business in New York, where he has built up a large trade by his energy and ability and integrity.

Mr. Allen has also taken an active interest in public affairs in the town of Kearny, where he resides. He has served on the board of Education and is at the present time a member of the Free Carnegie Library commission. For seven years he served in the Kearny fire department holding responsible positions at various times in that organization. He has always been highly esteemed by all who know him and it is well to say the finances of the New York Florist Club will be well cared for.

Milwaukee Florist Club on December 5 elected officers as follows: F. H. Holton, president; Chas. Menger, vice-president; M. P. Vallier, secretary; J. E. Pollworth, treasurer.

CLUB AND SOCIETY NOTES.

At the recent meeting of the Virginia Horticultural Society the Emerson cup for the best fruit exhibit was won by Dr. S. S. Guerrant of Franklin.

The Montgomery County Horticultural Society held its annual meeting in Dayton, O., on December 4. The officers were re-elected for the coming year, F. W. Ritter, president; D. Berger, secretary.

Officers for the Menlo Park Horticultural Society, California, for the coming year are: President, Sidney Clack; vice-president, M. W. Carter; secretary, F. G. Hutchinson; treasurer, George Munn.

The Southwestern Iowa Horticultural Society opened their annual meeting on December 2, at Council Bluffs. Reports presented show that the fruit industry ranks near the head of agricultural interests in this section and is increasing each year.

The Horticultural Society of Northern Illinois met at Polo on December 3 and 4. An unusually fine display of fruits and vegetables was made. Among the valuable papers presented was one by O. C. Simonds of Chicago, on landscape gardening.

The Michigan Horticultural Society held its annual meeting in Battle Creek during the week of December 1. The fruit exhibit was magnificent. A fine display was made by the State Agricultural School and the experiment station at South Haven.

The new officers of the Nassau County Horticultural Society, Glen Cove, N. Y., are: A. Jaenecke, president; S. J. Trepeas, vice-president; W. S. Rennie, secretary; H. Matz, treasurer; V. Kurz, corresponding secretary. During the winter months meetings will be held in the afternoon.

The third annual conference under the auspices of the committee on children's gardens of the Massachusetts Horticultural Society was held on December 14 at Horticultural Hall, Boston. Henry Saxton Adams, the chairman, stated in his address that thirty-two localities have taken up school and home gardening and the interest is increasing. Principal Boyden of the State Normal School at Bridgewater stated that in four normal schools in the middle west there are natural science gardens. Mr. Adams awarded eight prizes and four specials for school gardens, one for school grounds, and six for home gardens.

BUSINESS CHANGES.

The nurseries of the Realty Syndicate Co., Oakland, Calif., have been leased by J. A. Furtado.

Joseph Menny of Fresno, California, has purchased the Macomber estate at Chicopee, Mass., and will engage in market gardening.

William White has purchased the business of Robert Miller at E. Brookfield, Mass. It is reported that Mr. Miller will locate near Salt Lake City, Utah, and take up the business of rose growing on a large scale.

Obituary

William W. Edgar.

The news of the death of W. W. Edgar on Dec. 18, although not unexpected, will carry a pang of great sadness and a sense of irreparable loss to a host of friends far and near, who have come to regard him as one of the best and noblest friends, a shining light in horticulture, a mainstay in every fraternal movement within the circle of his activities. He possessed a warm and affectionate heart and was never happier than when he had gathered around him, as he frequently did, at his greenhouses and in his cozy home in Waverley, a merry party of his florist and gardener friends. Whenever an entertainment or gathering of the fraternity was planned, a hearty supporter and faithful helper was always found in Mr. Edgar. He will be missed and mourned. His example should serve as an inspiration to those

WILLIAM W. EDGAR.

that follow him. His industry, sagacity and untiring energy are worthy of emulation by every young man in the profession who aims to make his career a success and to merit the respect and love of his fellows. "He was a man, take him for all in all."

William W. Edgar was born in Neston, Cheshire, England, April 28, 1843. He commenced early in the gardening line and worked on several large estates in England and coming to this country in 1867 he was employed on the Pratt estate, now Oakley Country Club of Watertown, Mass., also as head gardener for seven years to Gov. Claflin at Newtonville, Mass. Afterwards he was employed by S. J. Powers at South Framingham, and then came to Waverley and started business in 1885. He was the first commercial grower to import the Lorraine Begonia in 1898 and has won wide repute for the high quality of this and other decorative material, especially Easter stock, as grown by him. Mr. Edgar was a life member of the S. A. F., member of the American Rose

Society, Gardeners' and Florists' Club of Boston and a number of fraternal organizations. He is survived by a wife and children, his daughter Grace being the wife of J. McHutchison of New York.

William H. S. Wood.

William H. S. Wood of New York city, died at his home, 14 East 56th street, on December 11, aged 67 years. Mr. Wood was a life member of the New York Horticultural Society and the American Pomological Society and an incorporator and member of the New York Botanical Society. He was the founder of the publishing house of Wm. Wood & Co., and has been president of the Bowery Savings Bank since 1903.

Samuel H. Walker.

Samuel H. Walker of Taunton, Mass., died suddenly on December 3. Mr. Walker was for many years a successful florist in Taunton, having built the Weir street greenhouses which are now occupied by Willard & Williams. He was 69 years of age and leaves a daughter.

Mrs. C. W. Pike.

Mrs. C. W. Pike, for the past fifteen years in the retail florist business in Racine, Wis., died at her home on December 7. Mrs. Pike was at one time a member of the Society of American Florists and was highly esteemed by all who knew her.

Robert Faulk.

Robert Faulk, for many years a member of the firm of R. Faulk & Son, Pittsburg, Pa., died on December 15 at the age of 59. A widow, three sons and two daughters survive him.

Alexander Hukill.

Alexander Hukill, a retired nurseryman of Wilkinsburg, Pa., died on December 5 at the age of 69.

CROPS OF UNPRECEDENTED VALUE.

The Eleventh Annual Report of the Secretary of Agriculture opens with the statement that the farm production for 1907 is well up to the average in quantity, while its value is much above that of any preceding year. The farmer will this year have more money to spend and more to invest than he ever had before out of his year's work.

The report calls attention to the wonderful wealth-producing power of alfalfa. It not only yields several cuttings of most nutritious hay during a season, but actually enriches the ground on which it grows by taking nitrogen from the air. The Department and the State experiment stations have done much to promote the extension of alfalfa growing. While production is yet confined mainly to the Great West, this forage plant is yearly gaining a more substantial foothold in the Central and Southern States. The total crop of alfalfa hay in 1907 is estimated to be worth \$100,000,000.

The seven cereal crops produced 4,135,000,000 bushels, showing a loss of 214,000,000 bushels, or 5 per cent. below the five-year average, the loss being chiefly due to oats. The total value is \$2,378,000,000; this exceeds 1906 by \$296,000,000 and is 23 per cent. above the average.

WINTER PROTECTION OF BOX.

December 6, 1907.

Editor of HORTICULTURE.

Dear Sir:—I should like to beg the use of a little space in your valuable paper for an inquiry about the care of Box. Here at "The Orchard" we have 5298 feet of Box Hedge, and 116 clumps and standards, many of which are very handsome specimens. The prevailing idea here seems to be that it is necessary to shovel the snow off the hedge after every snow storm. The snow is apt to freeze and form ice, and they claim this destroys the Box. We are very careful to tie up all Box to prevent the snow from breaking it. In my estimation, this is all that is necessary.

This is a very serious question for us, and where better to go to have it answered than to HORTICULTURE?

Yours very truly,

H. W. CLARK.

Southampton, L. I., N. Y.

On the question of shovelling snow off the box hedges at every snow storm, I should think it unnecessary if the hedges are well tied up so that the snow cannot break them down. If ice forms so as to break down the hedge it had better be removed. In very heavy snow storms it is always well to go over and shake the trees so that the heavy snow will not break the branches. We have no large hedges of box in this part of Massachusetts, therefore have no need of these precautions, but in choice collections of evergreen, which might amount to the same idea, we do not shovel off the snow except where there is a possibility of the snow breaking them down. We look at a heavy fall of snow more as a protection than otherwise. If the hedge were thought of any great account I should protect it by a slight covering of pine bush stuck firmly in the ground and tied at the tops. The ice forms more on Long Island than it does here. I should leave the plants as they are and not shake the snow off except, as I say, in extreme cases, as there is no better protection than the snow. Of course, in ice storms, such as we sometimes have, it would be well to go over them and shake off the ice. JACKSON DAWSON.

MARKET GARDENING COURSE.

In the Winter courses in agriculture at Pennsylvania State College, horticulture has a prominent place, but the importance of instruction in market gardening and greenhouse management has led the college to make special provision for it, as the demand for vegetables and small fruits is increasing.

Ralph L. Watts, a graduate of State College and one of the most successful market gardeners of Pennsylvania, has been secured to assist Prof. Butz in the Winter course. He is a scientist who has made a big commercial success and is a popular instructor at the institutes of New Jersey, Maryland and Pennsylvania. He will present his methods to the students who take the horticultural course at State College. These Winter courses begin December 3, continuing twelve weeks and the enrollment of students promises to be large.—Philadelphia Press.

REMARKS ON ROSES

Before the Chicago Florists' Club,
by E. G. Hill.

Your secretary did not state what particular phase of the rose question I was expected to discuss, whether the raising of new varieties, the general culture of roses, or to discuss somewhat the coming exhibition of the National Rose Society which will shortly occur in your city. Hence my apology for the present somewhat discursive effort.

"Anything new in roses?" is a question propounded much more frequently now than a few years ago, especially by the rose growers of our country, and the same question is asked with even more interest in Europe.

The rose growers charge the retail store men with being more largely responsible than themselves for the seeming indifference towards new varieties, and in this there is undoubtedly a considerable degree of truth, and it must be confessed a large number of florists—growers—hold the same view. In the light shed on the matter of novelty by the milliner, the silk manufacturer, the dry goods man, and in fact by all the vendors of apparel, ornament and furniture, it is a wonder that we of the florist profession should have been the reactionaries in the matter of novelty in roses, but we still have to admit that such has been our past record. It was a leading society lady in an Eastern city who gave utterance to the protest against being compelled to use Bride, Maid or Beauty for her frequent functions; this was only too true and the lady in question simply voiced the general complaint concerning the world's pre-eminent flower, the rose. A change has taken place and new varieties are given a very different reception from that accorded a few years ago. It is well for the rose that such is the case, else the carnation would have continued its triumphal march to the point of disputing leadership with the rose.

Believing that a radical change has taken place and that novelty in roses is being sought, the question arises—will we be able to meet reasonable expectations and can we provide new varieties so as to meet this greater interest; the answer is in the affirmative and it is a pleasure to record that a considerable number of workers are endeavoring by hybridization and cross fertilization to give to the rose loving public new forms and types.

So many qualities have to be present in a variety that lays claim to favor as a forcing variety that the progress made will seem slow, but nevertheless it is within the range of possibility to gain entirely new and unique colors and forms.

I believe with Robert Simpson, the present President of the Rose Society, that the forcing roses of the future will come largely from an admixture of Rose Indica with the present Hybrid Perpetual; in fact, do not the Hybrid Teas bear witness to this prophecy? Still, the strong old Bourbon varieties, like Gloire des Rosomanes, should be made to furnish their rich scarlet tones to the newer sorts. Our task is to breed into the Tea varieties the strength, vigor, length of stem, and the finer dark shades found among the

HOUSE OF CROTONS.—Robert Craig Company.

Hybrid Perpetuals, using the Tea section in order to secure freedom in flowering; the varieties of the future will not be the result of a single cross between the two sections named, but will be the result of patient interbreeding extending through a series of years. I would not say that here and there a desirable new variety may not make its appearance as a result of a haphazard cross, but to get at definite results careful note must be made of the qualities present in the progeny and then seek to breed those missing qualities into future seedlings.

We must not forget that Rosa Indica is the one class that is to furnish the foundation for all our forcing varieties and this is on account of its continuity of bloom. No matter how fine a rose or what the length or tint of petal, unless it has the inherent power to produce buds and flowers freely it will prove practically valueless. We have every reason to hope that we may yet possess the ideal from the careful crossing of the H. P. and the Tea. We have Richmond, Chatenay, Liberty, Killarney, all undoubtedly from this source, hence it is within reason to hope for others in this particular line.

The new varieties appearing will perhaps require more careful or at least different cultural treatment from that given our present forcing varieties. The new sorts will require study; perhaps some will thrive best grafted on certain stocks, or will do best in certain soils; a case in point is the variety Killarney. It was Ben Dorrance who discovered the peculiarities of this variety and who brought it into its present prominence, so it would be well to give the new varieties a careful trial before putting them aside. My conviction is that we have much to learn in regard to right cultural conditions. I am inclined to think that perhaps other valuable varieties have been lost sight of by their not having had proper cultural treatment. We know that to grow American Beauty successfully requires the application of

good cultural skill and very often this variety fails to give best results in the hands of the most skilful growers. Great progress has been made in improved methods of culture and you have some notable examples in this line in your own vicinity. I mention the cultural side of the question in order to show how important it is in order that new introductions may not be condemned too hastily.

Some fairly successful rose men inveigh against Killarney and Richmond because they cannot do them successfully, and it is only the fine showing made by a majority of our best growers that has given them the position they deserve; each new rose must be studied and results carefully noted, before its cultural requirements can be known; it is infinitely easier to master the peculiarities of two or three sorts, drop down into a rut with them and run along comfortably, than to experiment, and fail, and try again; experimental work is seldom comfortable work, but buyers demand novelty and variety, and there is nothing for it but for us to take off our coats and get down to hard work.

INCORPORATED.

Lakeview Rose Gardens, Jamestown, Va.; A. N. Broadhead, N. A. Broadhead, W. A. Bradshaw; capital, \$50,000.

VISITORS IN NEW YORK.

Phil. Breitmeyer and son Harry of Detroit, Mich.

We have just received from Arthur I. Vescelius, floral artist, Paterson, N. J., a most beautiful calendar for 1908, consisting of reproductions in color of four flower paintings by the celebrated flower artist, Paul de Longpre, viz., lilacs and violets, American Beauty roses, daisies and golden rod, and poinsettias. These pictures will be given a place in any home, even the most exclusive, and will no doubt prove a potent advertisement for Mr. Vescelius.

S. S. PENNOCK-MEEHAN COMPANY "THE" Wholesale Florists of
1608-1620 Ludlow Street - - - - - PHILADELPHIA

PUBLICATIONS RECEIVED.

Bulletin of the New York Botanical Gardens, Vol. 4, No. 14. An enumeration of the plants collected in Bolivia by Miguel Bang, with descriptions of new genera and species.

Thirty-second Annual Report of the Board of Commissioners of the Boston Park Department. A 36-page pamphlet containing the Superintendent's report, exhibit of appropriations, expenditures and various statistics for the year 1906, with several full-page illustrations.

Successful Corn Culture. By Prof. P. G. Holden, of Iowa State College. Published in pamphlet form, 84 pages, by Successful Farming Publishing Company, Des Moines, Ia. This valuable addition to the practical literature provided for the farmer is compiled from contributions which have appeared from time to time in Successful Farming. Every question concerning our greatest product and its culture and harvesting is covered in this useful little book.

The first issue of The Pacific Garden, the new horticultural magazine of Pasadena, Cal., has come to hand. It is "devoted to the interests of professional and amateur gardeners and horticulturists and outdoor life," and will be published monthly. We extend the right hand of fellowship to our youngest contemporary. Its home field is peculiarly rich in horticultural promise and our best wishes are that it may cover the field well and that it may have a long and prosperous career.

The Garden and Farm Almanac. 1908. By Doubleday, Page & Co., New York.—The introduction states that the aim of the publishers has been to make an almanac really worth something. They have succeeded admirably. The Garden and Farm Almanac is certainly a book to which its owner will instinctively turn for information and for reference. Its list of contents reads like a synopsis of a

horticultural cyclopaedia. It answers a host of questions for the farmer. The price is 25 cents and it is well worth the money.

DECISION OF U. S. GENERAL APPRAISERS.

No. 17574.—Broccoli Seed—Cauliflower Seed.—Protest 255784 of Portland Seed Company against the assessment of duty by the collector of customs at the port of Portland, Oreg. Before Board 3, December 3, 1907.

The importers objected to the classification of broccoli seed under paragraph 254, tariff act of 1897, as seeds not specially provided for, contending that it was free of duty under paragraph 656, as cauliflower seed.

Waite, General Appraiser: * * * The case is submitted upon a sample of the seed inclosed in a small illustrated envelope similar to the usual package in which garden seeds are commonly sent out by dealers. The following printed description appears on the back of the envelope.

Broccoli.—* * * Taller and more hardy than cauliflower, but otherwise very similar to that delicious vegetable. Culture and use are identical with that of cauliflower.

It is very evident from the above description that these are not cauliflower seed. As broccoli are not specially provided for in the tariff act, we hold the collector's assessment to be correct, and overrule the protest.

"All in a Garden Fair," "In a Land of Flowers," "Nature's Jewels," and "Garden Glories," are the titles of four beautiful colored plates forming the calendar for 1908, which George E. Dickinson of 1 Broadway, New York, American agent for E. T. Dickinson, Nurseryman of Chatenay, France, is sending out to his customers. Reginald West is the artist and Raphael Tuck & Sons, Lt., are the publishers of this rich souvenir.

PLANT IMPORTS.

There were entered at the port of New York during the two weeks from December 4 to 17, inclusive, the following plants, etc.:

Via Antwerp: H. F. Darrow, 10 cs. bulbs; J. Dunn, 1 cs. plants; Peter Henderson & Co., 2 cs. bulbs; McHutchison & Co., 7 cs. plants; Maltus & Ware, 1 cs. bulbs; J. M. Thorburn & Co., 3 cs. do.; sundry forwarders, 19 cs. plants, 37 cs. shrubs, 4 cs. laurel trees.

Via Rotterdam: H. F. Darrow, 28 cs. plants; W. Elliott & Sons, 1 cs. do.; Peter Henderson & Co., 3 cs. do., 279 bales garden seed; McHutchison & Co., 29 cs. plants; P. Ouwerkerk, 25 cs. trees; August Rolker & Sons, 33 cs. plants; J. M. Thorburn & Co., 4 cs. plants, 14 bales seed; Vaughan's Seed Store, 19 cs. plants; Maltus & Ware, 204 cs. plants, 18 cs. trees, 22 cs. roots and bulbs, 22 bales garden seed; sundry forwarders, 22 cs. plants, 5 bales plants, 57 cs. shrubs and trees, 8 cs. bulbs.

From Germany: H. F. Darrow, 70 cs. lily of the valley pips, 13 bags seed; McHutchison & Co., 110 cs. lily of the valley pips; Chas. F. Meyer, 439 cs. do.; F. R. Pierson Co., 40 cs. do.; J. Roehrs Co., 38 cs. do.; J. M. Thorburn & Co., 4 cs. seed; Yokohama Nursery Co., 88 cs. lily of the valley pips; to order, 120 cs. do.; Maltus & Ware, 95 cs. do., 10 cs. lilacs; sundry forwarders, 831 cs. lily of the valley pips, 3 cs. plants.

Via Southampton: H. F. Darrow, 2 cs. plants, 81 bags seed; Elizabeth Nursery Co., 3 cs. plants; Hall & Carroll, 150 crates mistletoe; McHutchison & Co., 30 cs. plants; sundry forwarders, 56 cs. plants, 3 cs. trees, 138 crates mistletoe.

Via Liverpool: H. F. Darrow, 10 cs. plants; McHutchison & Co., 10 cs. plants; forwarders, 50 crates mistletoe, 1 cs. plants, 26 cs. trees.

Via London: J. M. Thorburn & Co., 49 pgs. garden seed; forwarders, 225 pgs. garden seed.

Seed Trade

For the benefit of those who expect to attend the canners' convention at Cincinnati, February next, it may be stated that no samples or exhibits of any kind will be permitted at the Hotel Sinton; the precedent that was established at Buffalo last year will be followed at the forthcoming convention. Ample space will be afforded all members of the Machinery and Supplies Association at Machinery Hall, where they can erect booths or do anything else that seems good to them.

Several times attention has been called to the reproach put upon the seedsmen by certain persons in the trade who are always present at these conventions but who persistently refuse to join the association and pay the price of membership. The only discoverable cause is penuriousness, and one would think a man's self respect and the good opinion of his competitors and prospective customers would be worth more than the cost of membership. However, some persons' self-respect seems to be a pretty cheap commodity, judging by the value they put upon it, and they would rather be camp followers than join the ranks. If the canners, who are the chief complainants, would refuse to deal at the convention with any one not a member of the association, the problem of how to get rid of such persons would be solved. Either they would be compelled to join the association or remain away.

The following is a list of the principal Cincinnati hotels and their prices: The Grand, European, \$1.50 per day and up; American plan, \$3.00 per day and up; St. Nicholas, Euro., \$2.00 per day and up; Burnett, Am. plan, \$3.00 per day and up; Hotel Sinton, Euro., \$2.00 per day and up; Gibson, Euro., \$1.50 per day and up; Palace, Am. plan, \$2.00 and \$2.50 per day; Haviland, Euro., \$1.50 per day and up; Hotel Emery, Euro., \$1.50 per day and up; Am. plan, \$3.00 per day and up; The Munro, Turkish baths and connection, Euro., \$1.00, \$1.50 and \$2.00 per day.

An interesting development of the past week was a quotation by a Western seed house, of Stowell's Evergreen and Country Gentleman seed corn at \$10.00 per bushel. While this price seems a little high just at present this quotation is a large-sized straw showing plainly the trend of prices, and the predictions made in these columns that corn would sell at \$10.00 a bushel seems within reasonable distance of realization. The writer knows where choice eastern grown seed has sold at \$7.00 within the past ten days.

Reports received during the past week indicate that the leading growers of peas and beans fully realize the scarcity of seed stocks of peas, particularly of canning varieties, and orders for future peas have been written at advances of from 50 to 75c. per bushel above last year's figures. Considering the value of seed stocks, low-yields which are the rule, and advances over last year's figures which must be paid the farmers, \$2.75 and

\$3.00 do not seem at all unreasonable on the standard canning sorts. Of course there will be some grumbling, and considering the fact that most of the canners charge the farmers not above \$2.50 per bushel for the seed, they can scarcely be blamed for not wishing to pocket a loss at the very outset. Many growers have been tempted by the unusually high prices to sell more or less of their seed stocks, and most of them admit these are short and very liable to be over-sold. With this handicap to start with, if the crop proves as short as last season, deliveries are likely to be even shorter of the 1908 crop. At any rate, it does not look "from the fence" as if there is much chance of any large surplus, however generous the crop may be. The seeds of the more fancy varieties of peas such as are grown by market gardeners and private trade are more abundant, and prices on these are not likely to show the same advance, excepting on Telephones, Duke of Albany, Alderman, Sutton's Excelsior, Dwarf Telephone, and Improved Stratagems, which are very much on the short side and generally are.

At the request of the Secretary of Agriculture the Treasury has directed that until July 1, 1908, two-ounce samples of all importations of one hundred pounds or more of grass, clover and forage plant seeds be prepared at the earliest practicable date after entry and forwarded to the Seed Laboratory, Department of Agriculture, labeled with names and addresses of consignors and consignees, name of seed and quantity of the consignment.

The following Japan news is just received, dated at Yokohama, November 28th:

"Longiflorum and multiflorum lily bulbs were left in some surplus this year. For the past few years there were always surpluses so far as the Japan market was concerned, and the prices were higher toward the end. Some of the largest growers consequently held back their bulbs expecting extraordinary prices later but this year they have not been sold and it has taught them a lesson. They have to carry over their bulbs now, which makes everyone afraid and others will not invest in seed bulbs, so that the crop next year will be short in these varieties should the demand be the same as heretofore. Furthermore a

great quantity of seed bulbs were damaged this year by floods and the weather and this will also tend to the expected shortage. Giganteums are not so weak but, owing to the fact that all growers wish to grow these bulbs, the price of seed bulbs is so high that prices must be advanced accordingly.

"Large size auratum were short this year and will also advance in price next season. They have been too low in the past and growers have not been able to realize a profit on them. The demand is very strong in Europe and they are used there in very large quantities for cold storage. Lilium album will be very short. Seed bulbs are very high priced and hard to get. We have to buy quantities of rubrum to get the necessary number of albums to fill our orders."

PROPERTIES OF THE CHRYSANTHEMUM.

Under the above title George Glenny wrote concerning the chrysanthemum in the London Horticultural Magazine, sixty years ago, as quoted below. It will no doubt be interesting reading for many. It shows how even the wisest may be mistaken and how careful we all should be before committing our views to the printer. In the course of a long article Mr. Glenny writes as follows:

"We expect a sort of remonstrance against the properties which we shall set down as desirable in the chrysanthemum, because the forms of the present varieties are as numerous as were those of the dahlia when the published rules first set to rest the properties of that universal favorite. There were among them at that time anemone-flowered, China-aster-flowers, to say nothing of colors. In semi-double, flat, starry, and ragged flowers, to say nothing of colors, in the chrysanthemum, we are told in a very recent publication, that there are the ranunculus-flowered, the incurved, the China-aster-flowered, the marigold-flowered, the clustered and the tasselled, all of which, except the ranunculus-flowered, are untidy and flimsy. Great efforts have been made to bring these flowers into notice, and shows have been established at which the judges have not known by what rules to award the prizes, or which flower was the best. We affirm with great submission to those who pride themselves on this flower, that it is impossible to select one less fit to exhibit, cut from the plant, and that individually there is nothing to hope for in the bloom itself that should raise it to the dignity of a florist's flower; but as there is great merit in growing the plant well in pots only, and as the plant is showy when there is a scarcity of bloom in a house, they ought always to be shown in pots only, and the merits of the plant be taken into account quite as much as that of the bloom, and as such we shall notice both."

SEWICKLY (PA.) NOTES.

About twelve miles from Pittsburgh, down the Ohio river, is the borough of Sewickly, where, on the heights overlooking the little town, many of the wealthy Pittsburghers have their summer homes. The location is just beyond the smoke and fog region, and within easy reach of the city. Unlike many suburban settlements, the estates are all extensive. The natural beauty of the district makes this an ideal spot for a country home; the land is rolling and in some places very rugged, requiring only a little of the landscaper's art to make the scenery really picturesque. Many trees, particularly conifers, which will not grow in Pittsburgh, thrive here luxuriantly.

At Mr. Wm. Thaw's place, Supt. Hall has been busy planting, thinning and transplanting trees and shrubs of all kinds. On this place, the chief features are those immediately surrounding the house, where some fine shrubbery and Italian gardening may be seen. On the terrace are some fine catalpas. The approach, which is a long, continuous curve with a gentle grade, is bordered

almost the entire length by herbaceous borders, with a background of shrubs and deciduous trees, the border receding and approaching the driveway in an informal, pleasing manner. The herbaceous plants are very effectively arranged, and are chiefly indigenous plants. The house stands on the highest part of the estate, and is approached from many points by English stepping stones cunningly laid in the grass.

Situated right on the brow of a steep hill overlooking a thickly wooded ravine are the greenhouses of R. H. Boggs, under the care of N. Chris Madsen, whose ability as a grower of all kinds of greenhouse plants, as well as an estate manager, is evident. Mr. Madsen does not grow only the stereotyped stock for winter flowering. Many gardeners still retain the tendency to imitate inherited from their progenitors. In the flowering house are all kinds of plants in bloom, many half-hardy annuals which have been grown for the purpose and are certainly worth the trouble, Phlox Drummondii, salpiglossis and many other simple things are very effective when arranged amongst such things as Ruellia marcantha, celosias, Begonia Gloire de Lorraine, mignonette, browallia, etc. Although late in the season there were still a number of fine chrysanthemums. In the rose houses are some healthy-looking American Beauties, and the tea houses benches are bristling with buds. Enchantress, Robert Craig and Lawson are the standard carnations. Several whites are grown, but next year only White Enchantress will be retained. A few orchids are grown. Lelia Perrinii and Cattleya Dowiana are now in flower. J. H.

AN APPRECIATION OF HORTICULTURE.

Mr. W. J. Stewart :

Dear Sir,—Having reached another milestone, we deem it a great privilege to tender our congratulations. HORTICULTURE is certainly doing a good work in our midst. The spirit shown in your paper is worthy the emulation of more pretentious papers. It can be seen at a glance what you are striving to give your readers—the highest and best to be found in Floriculture, as well as in Horticulture and kindred interests. Thanking you for the great help you have been to our club, and wishing you a prosperous and successful year,

We remain, sincerely yours,

THOS. H. WESTWOOD.

President Gardeners' and Florists' Club of Boston.

GET WISE TO MY SIZE

There is no more attractive and salable plant when grown, trained in pots for **Easter** than the **CRIMSON RAMBLER ROSE**, and considering the simple treatment they require, **few plants make better returns.**

Most important of all, is to get **strong field grown plants**, that have been dug carefully, and the **roots kept moist.** We have **several thousand such plants**, grown in our Nurseries that have been put up in bundles of 25 each and graded as follows:

Plants with 4 to 8 and more canes, 7 feet long suitable for an 8 inch pot \$2.50 per 100. These should sell in flower from \$3 to \$5 each.

Plants with 3 to 4 canes, 4 to 7 feet long, suitable for a 7 inch pot \$1.50 per 100. These should sell in flower from \$2.50 to \$3 each.

Plants with 2 to 3 canes, 3 to 5 feet long, suitable for 6 inch pots \$1.25 per 100. These should sell in flower from \$1.50 to \$2 each.

We also have some smaller plants that would make nice plants in 5 1/2 to 6 inch pots, 2 to 4 canes 2 to 3 feet long at \$.50 per 100.

The latter size is useful for outdoor planting having very strong roots.

Each plant has been tied up separately in the field making them very convenient for potting.

THE RETAILER'S POSITION TOWARDS THE WHOLESALER.

A paper read before the Florists' Club of Philadelphia, by Chas. H. Grakelow.

The retailer of today is a much harassed man, as, with endeavoring to realize the constantly increasing opportunities of the business, trying to adjust the prospective customer to the ever-varying prices of grower and commission house, and a desire to hold and add to his most valuable asset, customer, his is an unenviable lot. Wholesaler of cut flowers, temper your prices with the knowledge of past sales and the possibilities of the future, and at the first sign of scarcity do not make advances so rapidly that the retailer stands mutely by, thinking it a Shakespearian drama and expecting to hear that world-famous quotation, "Lay on, Macduff, and damned be him that first cries, 'Hold, enough!'" A slight knowledge of the conditions of the market and the orders entered on the book which are paid for and waiting to be delivered educate the retailer to the advance, a duplication of last week's effect for the same amount or a slight increase, if any, is all the prospective customer can see. The Thursday before Easter Sunday last year a little girl asked your humble servant for \$.15 worth of cut flowers and "Mamma did not wish too many of one kind." Another instance: "Carnations are \$.35 per dozen; give me three and put them in a box; plenty of wax paper so they won't bruise, as I am taking them across the mountains." Will some wholesaler kindly advise the best method of handling the retail trade? Gentlemen, I know this is the extreme, and is simply quoted to give you a slight idea of the troubles a retailer encounters without advancing prices. Help us to educate them to a more generous use of flowers; do not discourage, as our business is in its infancy and abnormal profits today will not meet all the obligations of the future. Now, then, when the occasional short notice, non-important order (except for the knowledge of the value of the customer in the past and the prospects of future business) comes along, should not the wholesaler pleasantly share our misfortune as well as our prosperity? While no doubt unreasonable demands are made upon you, fixed rule in this case is not practical; the wise man measures his cloth to fit the customer. The amount saved by the wholesalers by a united stand for thirty days' credit only would more than meet the carfare charges and assist the legitimate florist by effectually removing the "take-the-order-at-any-price" retailer. The small occasional payments on a constantly increasing account enables him to take an order at almost any price and still figure on a 100 per cent. profit. That which he does not pay for can be sold at any price and with a handsome profit. Laxity in credit invites men of no stability to embark in any business, making unequalled competition for the paying man and a sad experience when the inevitable failure takes place for the wholesaler. Give the small fellow the same attention as the big fellow as our baby of today is our man of the future. Keep in close touch with your consignors, impress on them the necessity of shipping when requested, the stock desired, so that the poor re-

tailer does not have to substitute and thereby lose a good customer. When stock is scarce and out-of-town orders strong, before filling orders on file ask yourself, "Where were the shipping orders when the summer glut was on?" Then fill according to your judgment, realizing that the high dollar policy is not always the most profitable in the end. Whether the fakir is the god-send to the business which the wholesaler would have us believe is a question in my mind. That he instills in the heart of the public a desire for flowers is true, but would not more good be derived by the business in the future by allowing the storekeeper to purchase at the same price when the glut is on, thereby enabling him to run a special or use the extra quantity (which he would purchase at the reduced figure) to make a window display? The attention would attract credit to that store and incidentally create a heavier demand from the wholesaler by reason of the increased patronage which the retailer would receive. True, they move stock we couldn't; but is it right that we should pay a higher price than they for the good stock we so often see upon the street, when we in winter pay the price which they will not? The up-to-date retailer, if given a chance at low-priced stock, will consider a display of same a good form of advertising. You claim the fakirs move stock which would otherwise stand; when next overstocked, give us a chance to do a little moving and the result will, I think, be a pleasant, profitable surprise. The retailer is a grateful but independent man, and does not desire something for nothing, but only asks the same desire to serve him in January as is displayed in July and his sun will always shine bright. Discuss all subjects with your retailer that concern him, inject into every club meeting a social feature, and the distrust now existing throughout the trade will give way to a better feeling between wholesaler and retailer, and good fellowship will be the stepping stone to a better understanding of each other.

Under the title of "A Remarkable New Fern," The Garden, London, in its issue of November 30, 1907, congratulates F. R. Pierson upon raising and introducing so fine a novelty as *Nephrolepis superbissima*. A drawing of the fern accompanies the article.

FLOWER MARKET REPORTS

BOSTON Material is shortening up
in the wholesale markets.

We don't like to say that
it is being held back in cellars and odd
dark corners by the growers, but cer-
tain it is that it is not forthcoming.
This is in line with the experience of
past years and we may reasonably
predict that there will be no surplus
in the market until the day before
Christmas. We might add that, in line
with past experience, the grower who
does not withhold his material in hid-
ing but sends it in when ready stands
best chance to win out.

DETROIT Retail business through-
out the city is acquiring
the usual holiday aspect
though it appears that prices in
general are somewhat reduced. The
florist business has been very quiet
but not unusually so. At any rate
it would not be just to predict
a smaller amount of business this
year than last although it may be
wise to curtail the number of high-
priced baskets, etc., etc. Considering
the various bookings of elaborate
decorations directly after Christmas
we may escape the usual after-holiday
lull.

The majority of
INDIANAPOLIS florists report lit-
tle or nothing do-
ing. Beauties, teas, carnations, violets

and other seasonable stock continue to
come in good shape, and some good or-
chids are seen on the market. Poinset-
tias, azaleas, Lorraine begonias and
cyclamens predominate in the flowering
plant line. The outlook at present is
that there will be plenty of everything
for Christmas. With the disappear-
ance of chrysanthemums stock was a
little short of the demand the first of
the week, the prices having advanced
all along the line. If all reports are
true in our city, we can look for better
things from this time on. The holiday
spirit is now in the air, and the pros-
pects are good for a big trade.

The supply is ample
NEW YORK for all demands at
present, and the indi-
cations are that this will hold true on
most lines next week, even under the
pressure of the Christmas demand.
The weather has been favorable to
full crops and should it continue in
the same quarter the customary holi-
day prices are likely to get a jolt.
Wintry skies and blustering storms
may interpose but their effect is not
likely to be very serious, and the out-
look favors most decidedly the man who
has made up his mind to a reasonable
valuation on his product and proposes
to stand by it. The prospects are that
phenomenal values will not prevail.

The usual lull be-
PHILADELPHIA fore Christmas.
Prices advanced a
trifle last week but are still much be-

low the normal of recent years. Last
week's business was still further de-
pressed by stormy weather, especially
on Saturday the 14th, when the big
overturn expected did not materialize.
The rose market suffers about the
worst. American Beauties were never
better in quality but it seems impos-
sible to jack-up the prices to where
they belong. Teas go fairly well,
white being probably the best seller.
Richmonds are fine and at this season
seem to be preferred to Liberty. There
is rather more of an upward tendency
in the carnation market—that staple
being on a healthier basis than most
others. Violets are moving fairly well.
Home grown Campbell and Princess
preferred—these being rather sweeter
than the Hudsons. Cattleyas and
Cypripediums are more plentiful. Lily
of the valley is very good but trading
is not brisk. Roman hyacinths and
Paper Whites sluggish. Mignonette
fine quality and in good demand. Holly
is scarce. Mistletoe on the long side.
All told, the market for decorative
material is healthy and satisfactory.

Business in the Twin
TWIN CITIES Cities is getting a lit-
tle dull. Plenty of
stock on hand except carnations.
Prices are about the same as last week
with a tendency to go up higher for
the holidays.

FORESTRY LEGISLATION IN ALABAMA.

At the recent special session of the Legislature an important forestry bill was passed. The law provides for a Commission of Forestry consisting of the Governor, a member of the Tax Commission, Game and Fish Commissioner, Commissioner of Agriculture and Industries, a practical lumberman, a member of the U. S. Forest Service and the Professor of Forestry in the Alabama Polytechnic Institute. This Commission is to elect one of their own number secretary.

Duties: To publish an annual report on the forest conditions, with reference to preservation, destruction, etc., upon the welfare of the State. To accept gifts of land and to provide for proper management. To exempt from taxation denuded land which is properly cared for during a period of ten years. To look after fires and trespass.

To defray the incidental expenses the sum of five hundred dollars is appropriated. All fines and revenue from Reserves goes to a fund to be called the Forest Reserve Fund.

Section 18-1-2 provides for the acquisition of land by the United States Government for Forest Reserves and the jurisdiction thereof. Doubtless this is in reference to the establishment of the proposed Appalachian Reserve.

While this law does not provide for all conditions which its friends desire, yet, it is a very good start and in a few years will lead to a better appreciation of the forest resources of the State.

NEWS NOTES.

James Scott, representing Scott Bros., of Elmsford Nurseries, New York, was in Lenox, Mass., last week.

The Haskell Seed and Implement Co. will start in business in Boston at 20 South street about January 1.

F. E. Palmer, Brookline, Mass., is having a large boiler room and storage building erected on Dedham street.

Alfred Lemke, florist, 31 E. 6th street, St. Paul, Minn., has filed a petition in bankruptcy; liabilities, \$2,392.16, assets, \$425, of which \$125 is claimed as exempt.

R. Peterson is making extensive improvements in the Hudson greenhouses, Hudson, Mich., which he recently purchased, and is putting up additional houses of the latest type.

Fire which did about \$700 damage destroyed one of the greenhouses in St. John's cemetery, High street, Or-

WANTS, FOR SALE, ETC.

HELP WANTED

MUNICIPAL CIVIL SERVICE COMMISSION,
299 Broadway.

AMENDED NOTICE.

New York, November 29, 1907.
PUBLIC NOTICE IS HEREBY GIVEN that the time for receiving applications for the position of GARDENER has been extended until 4 P. M., MONDAY, DECEMBER 30, 1907. The examination will be held on WEDNESDAY, JANUARY 22, 1908, at 10 A. M. The subjects and weights are Special, 6; Experience, 4. The provisions of clause 12 of Rule VII, to the effect that "no person who has entered any examination for appointment to a competitive position and failed therein or who has withdrawn therefrom, shall be admitted within nine months from the date of such examination to a new examination for the same position," is waived so far as it applies to this examination.

For further information apply to the Secretary.

F. A. SPENCER, Secretary.

WANTED—Two first-class commercial greenhouse assistants experienced in growing a general line of high class plants. Wages \$15 per week and room. Apply with references. Address Plants, care Horticulture.

SITUATIONS WANTED

SITUATION WANTED as working foreman on first-class place by sober, ambitious, young man with long experience on good wholesale and retail places. Good grower of roses, carnations, mums and general all-round stock. Familiar with greenhouse building, pipe fitting, both steam and hot water, capable of handling a large place. Steady position and good treatment expected. Not afraid of work. Married. References. State wages in first letter. If satisfactory would rent or buy place later. Address X. Y. Z., General Delivery, Bridgeport, Conn.

SITUATION WANTED—Single, temperate man of 27, with several years' greenhouse experience and some experience in store. H. H. Cade, Ridgely, Md.

FOR SALE

Suburban Florist Store FOR SALE CHEAP

Fine location for local trade; two years established. Fitted with ice chest, counters, etc., for immediate occupancy. A good chance for industrious party.

Address C Care Horticulture, Boston.

ange, N. J., early on the morning of December 9. Overheated pipes are supposed to have been the cause.

Hermann Thiemann has bought a place in Monson, Mass., and will grow dahlias, peonies, phloxes, irises, etc., for the wholesale trade. He is in the market for offers of choice stock and would like to receive catalogues from parties interested.

We have had the pleasure of seeing a bloom of M. H. Walsh's new H. T. rose Princess. It is almost identical in color with carnation Fair Maid and has a strong tea fragrance. The foliage is large and handsome and the stems 2-1/2 to 3 ft. in length. Mr. Walsh informs us that it is a free and constant bloomer.

Is Your Name In The Above List? If Not, Why Not?

PARK WORK IN A LARGE CITY.

The Uses of Public Grounds.

Perhaps one of the most important departments of civic administration, especially as related to the larger municipalities, is the department of parks and recreation centres. Parks have been the natural adjunct to the estates of nobility and of the wealthy classes since the time of Nero, but it has only been within the last century that the great value of public grounds has been felt to such an extent as to cause legislative bodies to take action in voting monies in large amounts for the acquisition and improvement of land for public purposes. The aesthetic value of artificially designed and well kept grounds has long been realized. Landscape gardening has for years been considered an art, and the profession of landscape architecture has long been recognized.

Public grounds were at first laid out merely for the benefit of the onlooker—an out-of-door picture, as it were—depicted on a canvas of nature, with trees, grass, water and slopes covered with verdant shrubbery as color matter, and all blended and arranged by a master-hand to best suit the requirements of the pre-acknowledged rules of art.

In landscape designing, there have been masters as in poetry and music. Kemp, Andre, Downing, Olmsted and Scott held similar positions in their professions as did Goldsmith, Tennyson and Burns, or Bach, Mendelssohn and Chopin in theirs. Central Park in New York or Prospect Park in Brooklyn bear the same marks of study and thought and masterly portrayal of nature, as do the celebrated landscape paintings in the galleries of Paris or Berlin. Today, however, the park movement has advanced in its requirements beyond the stage of mere artistic depiction, while in the larger naturalistic parks the same rules of landscape architecture are held to, and while the various schools of landscape design have their champions, all have tended to develop a more utilitarian, a more vital object. The great meadows of the city parks are flooded in winter, and the ice swept clear of snow at great expense that children and grown people may disport themselves. Toboggan slides are erected, and provision is made for popular sports in all seasons in such a way that the natural beauty of the ground is not sacrificed. Speedways are kept open, football, baseball, hockey, skating, tennis, horseback riding, golf, canoeing, boat racing—all are given their respective facilities. The use of the lawns is becoming in most cities unrestricted. Swings, merry-go-rounds and ponies are furnished for children, band concerts are fostered, and the whole machinery of the department is put in motion to give the public the most possible helpful pleasure.

What Chicago Is Doing.

In Chicago during the past few years nearly \$7,000,000 have been spent in neighborhood playgrounds. These playgrounds are from two to seventy

acres in extent, and contain a full equipment of buildings suitable for neighborhood recreation, besides lakes and expanses of lawn or grove which may appeal to the more quietly disposed. Full equipped gymnasiums are provided for each sex, both for outdoor and indoor work, shower baths, locker rooms, indoor and outdoor plunges and swimming pools, all have their corps of attendants and necessary accessories. In each park connected with the gymnasium is a building containing a library, reading room, restaurant, assembly hall and club room, all free of charge with the exception of the restaurant. The assembly hall is decorated from the park greenhouses twice a week, and is equipped with a piano, stage and all the things necessary to provide hospitality for clubs and social organizations. The assembly hall and club rooms may be obtained on application. In the restaurant, only wholesome foods are sold, and as near the cost price as possible. Pasteurized milk is furnished to families at a nominal sum, and the good result from this item alone is almost without estimate.

Chicago has already completed at an average cost of \$250,000 each, fourteen parks of this type, while a number of others are now in process of construction. Fifteen playgrounds of the smaller type, equipped only with outdoor gymnasiums, together with several municipal bathing beaches are also completed. Altogether Chicago has 96 parks and playgrounds, comprising approximately 3500 acres and costing annually \$5,000,000 to maintain, while nearly as much more is being spent annually in acquiring and improving new sites; yet with all this, Chicago has a reputation of lagging behind other cities of the country and Europe in its park work.

Plans for Future Extension.

Statistics show that there is an average of one acre to 6017 persons, while park authorities state that the proportion should be not less than one acre to every one hundred inhabitants. To correct this, plans are being formulated to carry out a work of park extension which will some day cause Chicago to become one of the finest equipped cities in the world. Money has already been provided and work begun on the extension of the shore parks of both the North and South sides. Lincoln park is adding 235 acres to her domain by filling in along the shore of Lake Michigan. Grant Park with an area of 210 acres is nearing completion, and the work of reclaiming the shallows along the Hyde Park district from Jackson to Grant Park is being planned. With the completion of this work the city will command, through its park department, the greater portion of the Lake frontage of Chicago, giving to the inhabitants a vast area of protected water for the use of aquatic sports, while the hitherto unestimated scenic features of the Lake will be reclaimed.

Around the city to the north, west and south stretches a continuous area of picturesque country, taking in the valleys of the Chicago, Desplaines and Sag Rivers, and including the hills and valleys of Palos to the southwest. As was the case of the Blue Hill district in Boston, this beautiful region has

lain unthought of and unreclaimed while the money-mad city has been paying too little attention to civic beauty. In a report of the Municipal Park Commission presented to the City Council in 1894, recommendations were made to add 37,000 acres of this and other territory to the park system of the city. Although recent legislative action has for a time stopped the progress of the enterprise, yet it seems in a fair way to be carried out in the future. Although the project calls for the expenditure of millions of dollars, and years of time to complete the work, yet the benefits to be derived by the future inhabitants of the city will cause the effort and the expense to sink into insignificance.

M. H. WEST.

Chicago, November 6th, 1907.

APPRECIATING THE GARDENER.

One of the little things about the recent annual chrysanthemum show in the Berkeley Lyceum that doubtless escaped the notice of many was the pains that some of the rich exhibitors took to give all possible credit to their respective gardeners. Thus, after the name of Mr. Robert W. Paterson, whose exhibits were sent down from "Blantyre," his Lenox country place, you always saw on the card, "Thos. Proctor, gardener." Mr. Paterson, whose wife was Miss Louise Fahys, is one of the leading chrysanthemum fanciers among the wealthy. Although he foots the bills for this expensive pastime he knows full well that for whatever success he attains to as a prizewinner, and that success is considerable, his gardener ought to have a proper amount of credit.—Brooklyn Life.

"SCALECIDE"

SAVE YOUR TREES THIS FALL DON'T WAIT TILL SPRING

The chances are they'll be killed by San Jose Scale. Take time by the forelock—spray with **SCALECIDE**. It kills every insect it touches. Cheaper than Lime-Sulphur or any home-made mixture, and easier to apply. Non-corrosive, non-clogging. 92 percent oil—the largest amount with less water than is found in any spray yet discovered. We prove it. Order a 50-gallon barrel at \$25. Makes 800 or 1000 gallons costing 25c to 30c at any station in the U. S. east of Mississippi and north of Ohio River. There's nothing cheaper. Send now for free, special booklet.

BROOKLYN, NEW YORK

H AND C

This Year What Is Your Move?

Going to come to us for your materials? The point is this—to manufacture materials is one thing, to prove their defects by erecting them—is quite another. That's what we do. That's why we stand in a position to give you the best there is, with every possible construction advantage.

We sell you actual tried out facts—not theories. Erect your house, if you like, but first get the right materials to erect. Don't spend your money for wooden eave plates in this age; use H. & Co.'s Steel Eave Plate and Roof Bar Brackets—and don't wait until the robins come again before you get your order in. Write now.

WHAT IT REALLY IS

HERE the U-Bar is in its parts—the the wooden core—and the steel encasing. The core is first chemically treated against decay and then firmly

pressed into the steel U-Bar and fastened by strong screws every two feet on alternate sides of the casing, making a complete combination of the sash bar and rafter as one. U-Bar greenhouses are the best greenhouses built because they are the only houses combining the sash bar and rafter as one—the only house in which it is possible to successfully space the glass 24 inches—the only house with the curved eave line—the lightest, strongest, greatest growing house. **Pierson U-Bar Company, Designers and Builders U-Bar Greenhouses, Metropolitan Bldg., 4th Ave. and 23rd Street, New York.**

Galvanized steel U-Bar. Every two feet it is screwed to core.

Cypress core which is chemically treated against decay.

The roof bar rafter U-Bar complete. This is half size.

Surplus Bulb Stock

We offer what remaining bulbs we have at bargain prices. The only cheap thing about them is the price. The bulbs are of first-class quality and in perfect condition. Bulbs planted in December, and even as late as January, can be had in fine shape for Easter; and as Easter is late this spring, (April 19th), they can be planted later than usual. If you have not all the bulbs you want, this is the last opportunity to get them. We offer an exceptionally fine lot of hyacinths, tulips and the choice varieties of narcissus at bargain prices.

Send for our Surplus List.

Winsor Carnations

We have splendid stock of strong rooted cuttings ready for immediate delivery. In order to get the best results from Winsor, it should be planted early. Now is the time to get gilt-edged stock. We have a splendid lot of cuttings ready for immediate delivery, and can also furnish strong established plants from two and one-quarter inch pots, fall propagation.

Strong rooted cuttings, \$6 per 100, \$50 per 1,000.

"QUALITY IS REMEMBERED LONG
AFTER PRICE IS FORGOTTEN."

WHAT QUALITY MEANS.

Quality means the best and finest types procurable in their respective classes. We go to specialists for our flower seeds. Our customers, the Florist, the private gardener demand the highest grade. We have no cheap catalogue trade. "Quality" may mean a little higher in price. "Quality" in fact means "Quality" and we know that when you buy from us you get it—and our customers know it too. Catalogue now in press: 48 pages. Write for one its FREE. We sell bulbs too.

Horticulture

Shall You "Go West"?

The eastern farmer is, as a rule, very envious of the western rancher. He hears reports of the vast farms, fine fields, great herds, innumerable flocks and record crops of fruit and grain. But a man wants to think well before he pulls up stakes and starts West.

In the first place the eastern grower has a market. Numberless towns and cities furnish opportunities for the disposal of his crops, generally right at his door. He can raise a small quantity of some fruit or vegetable for which there is a demand with an outlay of little capital and then get it to market with hardly any expense for freight and so forth. The West has very poor markets as a rule. Only the large cities are to be depended upon. Being an agricultural country each house has its little garden plot and keeps its own hens so that only a limited market is created. If the farmer's products are shipped to the cities he has high freight or express charges, and must pay the various items of spoiling, icing, storing, commissions, etc., which make a big inroad on his profits. And when his market is finally reached he finds himself in a com-

A Typical California Agricultural Town.

wastes valuable effort on at home. If he gets into a fruit country it must be grapes, peaches, prunes, pears or the particular crops for which the land and section is suited. If in an agricultural region it must be horses, cattle, sheep, grass or grain and nothing else. Of course there are lots of examples of men who are earning a comfortable living from a few acres of raisins, olives, figs, oranges, almonds and the like, but the men are those familiar with the country, who have gained their comfortable places through persistent effort aided by a knowledge of the field.

The second thing the rancher has to contend with is the labor problem. If this is serious in the East it is ten times more so in the West. There is such a lack of good men that various organizations have been formed with the express purpose of exploiting the country and getting more men. Mexicans, Indians, Japs and Chinamen are fairly good cheap labor but there is a dearth of them. In this connection I may say that for the anxious worker, whether or not conversant with farm life, who is willing to start in under somebody and work up, there are plenty of good chances. Foremen and superintendents are scarce articles. It is well to have a place in view, however, before starting in on any very extended journey.

But after all is said and done the West is a great country. When one has obtained a foothold the soil and climate in the favored sections make life well worth the living.

I am aware of the discontent of the easterner. The vivid pictures of western life have made him restless and he longs to start for "the land of the setting sun."

Typical California Ranch Buildings.

petition with specialists who can turn out a fine product at a minimum cost. For instance, in California the city of San Francisco is the distributing point for the whole State (perhaps somewhat less so since the fire) and the bulk of the ranch products are shipped there to be redistributed over the whole country. It sometimes happens that a roll of butter or a dozen of eggs will leave a town, go to 'Frisco and be shipped right back again for local consumption, from some commission house. And in "the city" are A No. 1 things, grown by successful men on the best soil. These the small farmer must come in competition with.

This doesn't mean that there is a lack of opportunities. There is an unlimited field for the man with capital, but to be successful he must spell his money with capitals. In a land where there are ranches of sixty thousand acres, quite a number of twenty thousand and a host of two or three thousand each, all turning out vast crops, the little man is likely to get snowed under. The only plan for the easterner to follow out West is to grow one crop and grow it well. He cannot afford to spend time and money on the dozens of schemes he

A California Residence.

I don't blame him. It is a grand country; a noble, upright, open-hearted clean-cut people inhabit it, whose motto is: Everyone for himself and a chance for the other fellow. Still, all sides of the question must be considered by the man who has anyone dependent on him. Better come out for a year on a visit before making it permanent. There are too many examples now of men who have sold out everything, have come West, and then returned home again bitterly disappointed, with their brightest dreams shattered—a desolation incomparable.

R. Z. Adams.

Water Soluble Fertilizers

Three of the more commonly used and best known of the simple soluble fertilizers are Nitrate of Soda, Sulphate of Ammonia, and Sulphate of Potash. The first two are a source of that most expensive element Nitrogen and the last gives Potash. All three are generally cataloged by seed houses and are frequently analysed by the State Experiment Stations. Almost every reader of HORTICULTURE is somewhat familiar with them.

The following figures are based on Massachusetts reports of which we have tried to strike a fair average.

It is to be remarked here that the use of the term "Nitrogen" (abbreviated to "N.") is simpler in many ways and is to be preferred to the term "Ammonia." To be sure the valuation of a fertilizer carrying nitrogen looks larger when calculated as "Ammonia" but that is all. For example, had a fertilizer 17 per cent calculated as "Ammonia," it would have just 14 per cent calculated as "Nitrogen." It is like the case of the Frenchman with his five francs and the poor American with only four quarters. If five francs or four quarters were worth one dollar on the spot who was the richer? So we will calculate all nitrogenous bearing substances as N.

We will consider for this article that Nitrate of Soda has 15 per cent N., Sulphate of Ammonia as 20 per cent N., and the sulphate of Potash has 50 per cent Potash, calculated in the usual way. Now these must be the high grade commercial chemicals to carry these amounts, and, while no doubt some on the market today may have more, as we have said above we are trying to strike a fair average.

A strength of soluble fertilizer often mentioned and also a convenient, round and practical figure, as a barrel usually holds fifty gallons, is one pound to a hundred gallons of water. This also means, as one gallon of fresh water weighs 8.31 lbs., one part by weight to 831 parts.

Using Nitrate of Soda at the pound per 100-gallons rate we have N. present in the water in the proportion of one part to 5,500, N. in Ammonia Sulphate solution would be one in 4,200 and the Potash in the Sulphate of Potash one to 1,700. These are round but not distorted figures.

The writer wishes to impress the reader if he has not already thought of it with the small amounts of fertilizer the above amounts seem, and also with the fact that same amounts are really high if compared with the use of the old English formula as indicated in the table below. This is an orchid mixture of chemicals which has been very useful and does not have any of the above mentioned chemicals in it.

Chemical.	Except Cookson's, 1 pound to 100 gallons water.	
	Gives N.	Gives Potash.
Nitrate of soda (N. say 15 per cent.).	one part in	5,500
Sulphate of Ammonia (N. say 20 per cent.)	one part in	4,200
Sulphate of Potash (Potash say 50 per cent.)		one part in 1,700
Cookson's formula, (say 98 per cent. pure) as used by its author.....	one part in 80,000	one part in 40,000

Cookson's Formula has been mentioned here because it is one of the best known of the survivors of chemical mixtures of which there used to be many. In water culture there were also many mixtures and today, in similar lines of work, mixtures are made with just as little in them as the above formula.

The plant can take up the good from weak solutions just as well as it can from stronger ones and note that in Nature it has to put up with rather slim broths.

Rudley M. Pray.

Lilium [Philippinense x longiflorum

(See Frontispiece)

This new variety first exhibited before the Gardeners' and Florists' Club of Boston, December 17, 1907, was raised by R. & J. Farquhar & Co, of Boston. The plant exhibited in bloom was produced from seeds sown February 17, 1907. It has to a large degree the erect wiry stem of Lilium Philippinense, the foliage being intermediate between the two parents and a decided improvement in this respect upon Philippinense, while it has the herbaceous habit of that variety in throwing up shoots from the bulb after the first shoot shows bloom. The flower is of the same glistening white appearance, and has the long, slender Philippinense tube, widely flaring at the mouth.

British Horticulture

THE POPULARITY OF THE SWEET PEA

A proof of the continuous increase in the popularity of the sweet pea is afforded by the success attained by the National Society watching over its interests. At the recent annual meeting the committee reported that the Reading trials, the Floral Committee's work and the new affiliation scheme have all been eminently successful. There has been a steady increase in the membership whilst financially the Society is in a sound condition. A new "Year Book" is in course of preparation. Amongst the American supporters of the Society are Messrs. W. Atlee Burpee & Co. of Philadelphia, and Messrs. C. C. Morse & Co., Santa Clara, California. Mr. Cuthbertson is anxious to see a closer union between American and British growers, for he advocated an American membership with a dollar subscription. The work of the National Society is now to be supplemented by a new organization, the Midland Counties Sweet Pea Society. The promoters intend holding a show in one of the chief towns in the Midlands each year, the first to be held in Wolverhampton on July 29, 1908.

THE POTATO SLUMP

Although the sweet pea society is enlarging its sphere of work, another of the newer horticultural organizations has just wound up its affairs. After a career of about four years the National Potato Society has been dissolved with the view of further steps being taken, if possible, to found a society which will include all vegetables within the scope of its operations. The Society came into existence at the time of the "boom," when certain new varieties of potatoes were sold at fabulous prices. The market was then flooded with alleged new varieties—some of these were old friends under a new name. At this time there was no difficulty in getting a strong trade section at the Society's shows. At the two last shows there has been a decline in the trade interest, and with the limited balance available the committee did not feel justified in embarking on the uncertainties of another show. It is a great pity that the Society has collapsed for there is plenty of scope for its operations in safeguarding the interests of the trade growers, conducting trials, and testing and certifying new varieties. The difficulty apparently was to secure a harmonious working between the trade section and those more concerned in private gardens.

THE CARNATION SHOW

The third annual show of the National Winter Flowering Carnation Society held on December 11th, was a decided advance as regards number of entries and quality of exhibits compared with the Society's previous efforts. The Guernsey specialists were well represented, and loomed largely in the prize list. Mr. H. Burnett, of Guernsey, who has raised several popular varieties, secured a large gold medal of the Royal Botanic Society from an admirable group in which some

meritorious seedlings were included. Creditable groups were arranged by the leading trade growers.

W. H. Adsett.

The White Fly in California

The discovery of the dreaded White Fly in California last summer has caused the planning of a campaign somewhat similar to that in New England against the gipsy and browntail moths, only on a much smaller scale. First found in Marysville, a vigorous search has since been made over the State with the result that the most feared of all Florida's citrus fruit pests has been located in Marysville, Oroville, and Bakersville—three prominent points for further dissemination of the insect. At all these points are well established colonies. Besides these three there are doubtless other places where the flies occur, at least in small numbers. The danger of one insect spreading is very minute, but when abundant, spreading seems inevitable. During the past year much has been done to reduce the numbers. County horticultural commissions, the State and the Experiment Station all united to control as far as possible this serious menace to the citrus fruit industry of the Pacific coast.

The Oroville situation presents three interesting features. They are probably an off-shoot from the Marysville colony, they were doubtless carried by the electric cars and they are thriving in a humid climate, an environment where it was believed they could not exist. The pest is here to stay and a continual fight will have to be waged against it, for it is the worst citrus pest we have. In Florida it causes more damage than all the others put together.

The aim will be to eradicate the colony at Bakersville, as it is altogether too near the great citrus belt. To this will be added the subduing of dangerous colonies by fumigation and defoliation of the trees, not for the benefit of the community where they exist but for the whole State. For this reason the cost should, and probably will, be borne by the State, especially as the policy must be laid out with the greatest aid to the greatest number.

Economic control consists in fumigating. Two things must be considered. One is to give the tree a rest after fumigating and the other is to prevent smutting of the fruit. Just what the next campaign will be is not yet known. But the vigorous start will be continued although doubtless with some modifications as to the concentration of authority and the extent to which inspectors can go. The principal fact is that the White Fly must now be added to the list of dangerous pests in California and the citrus growers must prepare themselves for a long, hard, up-hill fight against this most destructive insect.

which appears in this issue. How pregnant it is with appreciation of the beautiful and sublime in nature and how felicitous the appeal to the plodding farmer to open his eyes to the enjoyment to be found in flowers, fruit and verdure, beyond the providing for the bare necessities of living. The more this spirit is disseminated, not alone among farmers, but among people in all walks of life the more will horticulture flourish. There should be a Harrison in every community.

The seedman's position

The recent jury decision after a trial lasting two weeks sustaining the validity of the disclaimer of responsibility printed on the seed packages of a Baltimore seed house will be hailed with much satisfaction by the seed trade generally and it will not be questioned that the \$5,000 which the suit is said to have cost was well expended in thus affirming the legality of the disclaimer in general use. At the same time the interests of the farmers and other seed consumers are not being neglected and the advocates of seed inspection are busy in many States. No reputable seed dealer will interpose objection to any just law framed to prevent dishonesty in the sale of seed but purity and vitality, like all other good things, cost money and the man who buys low-priced seed in preference to paying for the best, as well as the man who doesn't take proper care of his seed after he has got it, can hardly have any claim on the government to step in and protect him against the consequences of his own free acts.

Making progress

With this issue ends volume six of HORTICULTURE. At the close of the year one is inclined to be reminiscent. We do not propose, however, to impose upon our readers any chronological account of the events, agreeable or otherwise, which have transpired during the year which has passed. The index to HORTICULTURE's contents which is sent out with the number following the close of each volume will be found to contain about everything worthy of permanent record. Notwithstanding the somewhat discouraging financial aspects of the final months of the year we believe 1907 may fairly be recorded as a success floriculturally as it certainly can agriculturally. Progress has been made in the science and art of the horticulturist and, on the whole, the profession has attained wisdom and advanced position. To be sure there have been repeated evidences that perfection is still in the dim distance; the florist who imagines he is helping his business by dispensing yarns to the newspapers about flowers soaring high for the holidays is still at it, the man who has "made a study of mixing seeds" has cropped up again with a blue carnation for which he has refused "a large amount of money" and sad to relate, our esteemed contemporary so erudite on matters botanical, has a "plight" in erica nomenclature on its hands, but these little lapses are unavoidable in human affairs and as the "campaign of education" goes on let us hope that they will become fewer and fewer.

Nothing that passes under our editorial eye gives us greater pleasure in the reading or keener delight in the passing on to HORTICULTURE's readers than the elegant compositions of that grand old man of Nebraska horticulture, Rev C. S. Harrison, which from time to time come to our hands. We commend to our readers' especial attention the paper from Mr. Harrison's pen

NORTHAMPTON, MASS.

Rural Progress in Eighty Years.

By Christopher Clark, City Forester.

Northampton has in the period of eighty years changed from a beautiful country town, with a population of less than 4,000, almost entirely of American birth, to a busy, cosmopolitan and educational city of 20,000, with all the modern improvements, including many things that were not known or invented for many years after I was born. It is quite true that rural progress was quite fully developed in Northampton when I was a boy by its leading and distinguished citizens. Especially after the Revolutionary War and for nearly a century many of her citizens were distinguished for general intelligence and cultivation, and a large number were college graduates. The yards connected with the residences of the people of ample means were provided with fine, well-built, expensive fences, and had beautiful gardens with all the flowers and shrubs of that period, and the borders of the front yards and garden walks were most beautifully arranged and filled with rose, lilac, syringa and other flowering bushes, and the yards, gardens and orchards had plenty of peach, pear, plum, cherry and apricot trees that flourished without any of the many enemies that now seem to multiply so greatly that their cultivation is quite discouraging. All the residences were fenced in, because the cows were allowed to graze in the streets, and in the autumn after the crops were harvested the meadows were thrown open for cattle and cows to feed, the entrances to the meadows being guarded by gates, the principal meadow gate being at the foot of Pleasant Street, just above the present railroad bridge.

The village life of Northampton in those days was the perfection of rural New England life, its leading citizens comprising United States senators, governors, judges and literary men. Among them was Governor Caleb Strong, his son Lewis Strong, Major Joseph Hawley, United States senator; Isaac C. Bates, Senator Ashman, George Bancroft, the historian; Joseph Cogswell, for many years the librarian of the Astor Library in New York; Judge Howe, then at the head of a law school in this place; Judge C. A. Dewey, Judge Chas. E. Forbes, Judge Lyman and many other distinguished men of that period, who lived here and gave tone and character to the society of the town for a long period.

The early settlers of Northampton, like those of all the Connecticut River towns, had the love of trees that came from their ancestors of old England, and the beautiful elm trees in all the Connecticut Valley towns, with the broad Common, or Mall as it was then called in England, were established in the center of the villages, notably that in West Street, Old Hadley, which is probably the widest street in this country. The Common and the planting of elm trees was a distinguishing feature of all the Connecticut and Massachusetts towns where the English people settled, but in no place or section did

the American elm grow so rapidly and beautiful as in the Connecticut River Valley, from Wethersfield and Hartford, Conn., to Northfield, Mass., and Keene, N. H. And many of these trees are now nearly 100 feet in height.

Northampton people have always cultivated fruit trees, and soon after 1850 the citizens organized a Horticultural Society which did good service. It was followed by one of the first Village Improvement Societies that was organized in this State, and soon after the Laurel Hill Village Improvement Society of Stockbridge, Mass., which was the first one organized in this country. The Northampton Village Improvement Society did good work until the present city government was organized, when its special work was given to a City Improvement Committee which is practically a park commission and still exists.

The village of Florence in the sixth ward of the city of Northampton, has a very active and efficient Village Improvement Society which has made its influence felt throughout the western portion of the city, who have made it one of the most beautiful villages in the state.

The Home Culture Clubs of Northampton, originated by George W. Cable, have under the able management of the officers established a competition for flower garden development through liberal prizes, that has resulted in adding many hundred flower gardens throughout the city mainly connected with the houses of citizens of very moderate means, which has already accomplished a general and very beautiful improvement of the city. This flower garden competition is a novel idea, and should become a part of Village Improvement Society work throughout the country.

As City Forester, I have accomplished much during 23 years' service, in tree protection, by the filling with cement the decayed portions of large trees, and in this way have saved some of the most beautiful and historic trees in this section of the state that otherwise would have had to be cut down. I have already filled single trees with 20 barrels of cement which have since thrown out new branches, and will now live many years.

My experience and observation has taught me that there should be a far greater variety of trees planted on our city and town streets, and I close this review by asking all city foresters and tree wardens who may read this paper to aid in this way in making our cities and towns far more beautiful in the near future.

A GREAT VIOLET.

Wm. Sim has sent to our office a bunch of his new single violet "Boston." We have measured the flowers and find them to average from one and a half to one and three quarters of an inch across, the stems ten inches long, and leaves three to three and a half inches across. By this it will be seen that Boston is a pretty sturdy variety. The petals are very broad, giving the flower the form of a good pansy. Color is somewhat lighter than that of Princess of Wales, but the fragrance is superior, as are also the keeping qualities, and it is an exceptionally good shipper on this account.

M. GEORGE SCHNEIDER.

The popularity of this distinguished French horticulturist resident in England for nearly forty years may well be gauged by the festivities recently held in England and France to celebrate his recent decoration by the French Government. On November 2 at a meeting of the French Gardeners' Society of London a punch d'honneur was given in his honor. Mr. Schneider has been president of the Society ever since its foundation 19 years ago, and the members presented him with the cross of the order set in diamonds. On November 9th there was a brilliant gathering in Paris at the Restaurant Ledoyen. M. Albert Truffant occupied the chair surrounded by the elite of French horticulture. A magnificent present was then made to Mr. Schneider consisting of a Sevres biscuit clock, a pair of vases and candelabra, subscribed for by 184 friends whose names were all inscribed in an album which accompanied the present. Of those 25 were Belgians, 10 English, 1 Italian and the remainder were French.

A meeting of the English friends was held at the Cafe Royal London on the 16th November when Mr. Harman Payne presided. A silver hot water jug and a silver cake basket were then presented to Mr. Schneider who may well feel proud of the spontaneous and friendly testimony of his numerous admirers on both sides of the Channel. Among his other titles to recognition it should be mentioned that he is the author of a very handsome work entitled "The book of Choice Ferns," in several volumes. C. H. P.

ROSE VERSUS CARNATION.

Mr. E. G. Hill, in his remarks before the Chicago Florists' Club, which we printed last week, in speaking of the recent activity in the production of new varieties of roses, said that "it is well for the rose that such is the case, else the carnation would have continued its triumphal march to the point of disputing leadership with the rose." This is in line with what seems to be a widespread notion that it is only within the past few years that the carnation has been regarded as competing with the rose for pre-eminence in the popular favor. It would appear, however, that this conception lacks foundation, for in Goode's Family Flora, a book published at Elizabethtown, N. J., in 1847 the rose is referred to as a "rival" of the carnation. Mention is made that at that date over four hundred sorts of carnations were enumerated by florists.

TO THE TRADE.

It is well known that Horticulture has opened up interest on new lines and created a live circulation among the substantial growers and consumers in the horticultural profession, people who take an interest in and will answer advertisements. If you have anything to sell to such people these columns will carry your offer to them at a very small cost. Try it for the coming year and you'll get there.

NEWS OF THE CLUBS AND SOCIETIES.

TORONTO GARDENERS' AND FLORISTS' ASSOCIATION.

Regular meeting of the above association was held on Dec. 17, the newly-elected president W. A. Houle in the chair, a large number of members being present. It was voted to send a letter of condolence to the widow of the late Geo. Vair whose sudden death took place last week. The sorrow and sympathy of all the members was expressed by the mover, Thomas Manton, who said the association has lost a member and true friend whose sterling character and late practical ability will long remain in the memory of those who knew him.

The following officers were elected for the coming year: President, M. A. Houle; first vice, E. Graham; second vice, J. Mathew; treas., Geo. Mills; secretary, E. F. Collins; assistant secretary, Colin Nesbit; executive committee, T. Manton, Geo. Douglas, W. Jay, W. H. Fould, W. Wilshire, W. H. Wright, F. Adam. The treasurer's report was read and showed the association to be in a sound financial condition. The secretary's report showed a membership roll of 102 in good standing, 19 members having been elected during the past year, and urged the members to push forward some scheme whereby the association may gain more influence in matters relating to horticulture in the city. The secretary read a letter received from the mayor of the city of Toronto, expressing his pleasure at being able to lay before the council the resolution of confidence in Park Commissioner John Chambers which had been sent from the association.

A program for meetings during the closing year was discussed and one plan which was adopted will be for every member to bring to the meeting some production of his own growing, when points will be awarded, and totalled up at the end of the year, when a gold medal will be presented to the exhibitor gaining the highest number. Geo. Mills kindly consented to defray half of the cost of the medal.

Thos. Manton exhibited a fine plant of *Moschasma riparium*, whose fine appearance and excellent qualities were freely commented upon as making a most desirable decorative plant for all purposes. By a unanimous vote Mr. Manton was awarded a certificate of merit, it being the first specimen of this plant exhibited in this city.

E. F. COLLINS, Secretary.

NEW ORLEANS HORTICULTURAL SOCIETY.

Regular meeting of the above named society was held Thursday, Dec. 19th. The following members were appointed on the finance committee for the en-

suing year: Messrs. Paul Abele, Richard Eichling, and R. Lockerbie.

A general discussion on the advisability of giving a chrysanthemum show then took place and it was ordered that the secretary should communicate with the New Orleans Ladies' Floral Society to see what assistance they would render. Richard Eichling of the U. J. Virgin establishment exhibited narcissus and Roman hyacinths.

President Eble announced that his niece, Miss Carrie Eble was married on December 18. She had been in his employ for the past four years as his floral artist. Mr. Eble's store must be a lucky store for young ladies to work in, as this is the third of his employees that has been married since he has been in business. Miss Leon Marthe, a former employe, has taken the place of Miss C. Eble. Business, in spite of the depression of the money market, is up to the usual standard.

C. R. PANTER, Sec'y.

NORTH SHORE HORTICULTURAL SOCIETY.

The above society held its regular meeting, December 20th, Pres. McGregor in the chair. Mr. A. E. Parsons read a paper on carnations, covering the subject in a very able manner. Commencing with the propagating bench and the cutting Mr. Parsons took his audience through the successive stages of its growth, briefly referring to watering, ventilating, feeding and the various diseases and insect enemies which menace its existence and which the successful grower must overcome until he turned out the finished flower. Cutting and packing the blooms then followed. Mr. Parsons had on exhibition some superb blooms of Beacon, Enchantress and Lady Bountiful. James Salter followed the speaker with a few remarks on the same subject.

Mr. Parsons was awarded a certificate of merit for his carnations and a vote of thanks for his interesting and instructive paper.

Next meeting and election of officers January 3d, 1908.

CHICAGO FLORISTS' CLUB.

Resolved, by the Chicago Florists' Club:

In the death of Philip J. Hauswirth every florist in Chicago has lost a loyal friend and horticulture has lost one of the most devoted and ablest workers for its advancement.

With him the common good was always first; he was ever ready to sacrifice his own interests to work for the interests of all. If he had a fault, it was that in his generosity he sometimes sacrificed himself too much.

For time and ability given freely in aid of their common welfare, the florists of Chicago and of the whole country are indebted to him more than can ever be repaid.

As an acknowledgement of this debt, as a tribute to his character and as a token of the grief we feel at his sad death, these resolutions shall be engrossed and presented to his family.

J. C. VAUGHAN,
WILLIS N. RUDD,
FRANK F. BENTHEY,
Committee.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The inaugural meeting of the Massachusetts Horticultural Society for the year 1908 will be held at twelve o'clock, noon, on Saturday, January 4, at Horticultural Hall, Boston.

The business of the meeting will be the hearing of an inaugural address by the President, the report of the Board of Trustees, the reports of officers, and the reports of the chairmen of the various committees.

WILLIAM P. RICH, Secretary.

Boston Horticultural Lectures.

The Massachusetts Horticultural Society has issued its program of winter lectures on horticultural subjects which are to be given at Horticultural Hall, 300 Massachusetts Avenue, Boston, Saturday mornings at eleven o'clock, beginning January 4, 1908. The list is as follows:

January 11. The Concord Grape and Its Originator. By Wilfrid Wheeler, Concord.

January 18. Opportunities for Commercial Apple Growing in New England. By Prof. F. C. Sears, Amherst.

January 25. Annuals and Biennials. By Robert Cameron, Cambridge.

February 1. Treatment of Home Grounds. By Frederick Law Olmsted, Jr.

February 8. Vegetable Growing Under Glass. By William Turner, Oceanic, N. J.

February 15. Hardy Conifers for Private Grounds. By John Dunbar, Rochester, N. Y.

February 29. The Private Gardener. By Robert Craig, Philadelphia.

March 7. Agricultural Education in the Public Schools. By Pres. Kenyon L. Butterfield, Amherst.

March 14. Development of Disease Resistant Varieties of Plants. By Prof. H. S. Jackson, Newark, Del. (The John Lewis Russell Lecture.)

March 21. Spring Flower Show.

March 28. Conference on Grape Growing.

SOUTHAMPTON HORTICULTURAL SOCIETY.

The second bi-monthly meeting of this society was held Thursday, Dec. 19, President Clark in the chair. Among those present were some of the expert potato growers of this section. Walter L. Jagger, an expert on the subject of potato growing, read a very interesting paper. The next regular meeting will be held Thursday, Jan. 2, when officers will be elected for the ensuing year. U. G. AGER.

CLUB AND SOCIETY NOTES.

The twelfth annual smoker of the Morris County Gardeners' and Florists' Society will be held at Masonic Hall, Madison, N. J., on the evening of January 8.

At the annual meeting of the Illinois State Horticultural Society, held at Bloomington, December 13, officers were elected as follows: President R. O. Graham; vice-president, J. M. Tanner; secretary, W. B. Lloyd; treasurer, J. W. Stanton.

In connection with the Iowa Horticultural Society the Iowa Plant Breeders' Society has been organized and officers elected as follows: president, C. G. Patten, Charles City; vice-president, Professor Beach, Ames; secretary, Prof. Irwin, Ames. They will meet jointly every year with the parent society.

The Detroit Florist Club held a very well attended meeting last Wednesday discussing freely the proposition of an exhibition next February. Arguments led to other propositions, such as annual spring and fall exhibitions, and finally it was decided that Pres. Scribner should appoint a committee of one to make a recommendation to the club.

In an address delivered before the Springfield Florists' Club (Ohio), P. M. Cartmell offered \$100 to any block four hundred or more feet square now fenced in an established part of the city, which will entirely remove fences from its front lawns. It has been further suggested that if the owners of the block should appropriate the money for the planting of ornamental trees, the custom would become general throughout the city.

At the monthly meeting of the Rhode Island Horticultural Society on December 9, E. H. Burlingame gave an interesting account of a visit to the Maine Pomological Society, and said "There are many acres of land in this State, some of which are but a very short distance from this city, on which apple raising might be tried with success. There is money in raising apples if some of the farmers who devote their time to other things only knew it." An interesting discussion followed the address. The annual meeting will be held on January 15.

PERSONAL.

J. P. A. Guérineau, representing T. J. Grey of Boston, has returned from a very successful business trip to Newport, R. I.

George Wainwright of Trenton, N. J., a well known rose grower, has successfully undergone an operation which has restored his sight, of which he had been deprived for three years by cataracts. Mr. Wainwright is 82 years old, and the physicians were fearful of the effects of the operation.

TWO PRESIDENTS.

W. JACK
President-elect Lenox Horticultural Society.

In our issue of last week part of the edition went out with the portrait

PERCY HERBERT
President-elect Morris Co. Gardeners' and Florists' Society.

of one of the gentlemen whose pictures appear herewith wrongly named. We have got them right this time.

WINTER FLOWERING CARNATION SOCIETY.

The above-named society held its third annual show in the Royal Botanic Gardens, Regent's Park, London, on Dec. 11. There was a large number of competitive classes, with prizes varying from 50 cents to \$10.00, according to the requirements. In Class 1, Mr. W. H. Page was first for a table, 10 ft. by 4 ft. of carnations, arranged in vases. Among his flowers were fine clusters effectively set up of Mrs. T. W. Lawson, Beacon, My Maryland, Melody, Gov. Roosevelt, White Mrs. Lawson, Lady Bountiful, White Perfection, Helen Gould, etc.

The second prize winner in this important class was Mrs. Mortimer, who staged a fine collection, which included among others Victory, Fair Maid, Jessica, Adonis, Nelson Fisher, Rose Pink Enchantress and others. There were seven classes for 36 blooms of any variety according to color thus: White, blush, light pink or salmon, deep pink or rose, crimson, scarlet, any other color or fancy. Then similar classes for 18 blooms in the same colors. In most of these classes there was good competition and we need only refer briefly to the flowers chiefly shown which, besides these above mentioned, include President, Harlowarden, Britannia, Robt Craig, White Enchantress, My Maryland, Enchantress, Imperial, Mikado, Winsor, Fair Maid, Royalty, Floriana. Vases of carnations, bouquets, sprays and buttonholes were also provided and many interesting exhibits were staged. Class 26 was for the best collection on a table space 8 ft. by 4 ft. Sir R. Baker was the winner of the first prize with a fine lot set up in glass vases.

Classes for plants in bloom were also provided, but in these the competition was less severe. The remaining classes in the competitive section were for three blooms in the various colors as already indicated in the bigger classes and these were well filled.

Among the miscellaneous exhibits we must record that set up by Mr. H. Burnett, who, on a long table, arranged a fine and varied display of cut blooms in large clusters. Marmion, Sensation, Aurora, Jessica, Ajax, Lieut. Peary. The President and others, were in fine form. G. Lange had another fine lot, and was awarded a silver gilt medal. A gold medal was awarded to Bell & Sheldon, who had an artistically arranged display mingled with ferns, smilax, etc. To John Peed & Son a large silver medal was awarded for a nice collection. C. Englemann staged a group on the ground level more in the Continental style than any of the preceding. There was a great variety shown in this collection, and among them were several not shown by other exhibitors. Mabelle, Aristocrat, Pink Imperial, Red Lawson, Queen Louise, Victory and John E. Haines were some of them.

A large silver gilt medal fell to the lot exhibited by Hugh Low & Co. This exhibit was about 40 feet long and contained many choice varieties daintily set up in tall bamboo stands and vases. Britannia, Enchantress, Mrs. Burnett, Flamingo, White Perfection, Helen M. Gould, were grand. Other noteworthy flowers were Mauviand, Floriana, Oriflamme, Beacon and Rose Pink Enchantress for the last two of which first-class certificates were awarded. Mr. Dutton of Iver, Bucks, received two first-class certificates for Melody and Winsor.

ORNAMENTALS.

A paper prepared for the Nebraska Horticultural Society, by C. S. Harrison, York, Neb.

God loves the ornamental, for He has given the world and the whole universe so much of it. Infinite skill, art and taste have been lavished on our grand old earth. It swings through the heavens like a bride adorned with a wealth of grandeur and beauty. He paints on the gates of the morning those dissolving tints which vanish into light. At evening, moving mountains of earth's choicest gems in their mingled beauty escort the retiring day. How glorious the night when the great dome, frescoed with blue, is sprinkled with stars, making a scene so resplendent it touches the soul, giving a divine awaking and enlargement—showing that it is related to the infinite. What august sublimity crowns the mountain—the coronal of white upon the hoary brow, the play of shadow and light, the blue above where float the fleecy clouds, all give us inspiration. When you let God alone and do not mar His works, what a beautiful land he gives us.

Before the white man touched our shores, He spread out a panorama of resplendent loveliness. There were vast forests of majestic trees, great rivers fed by unfailing streams were flowing to the sea, sparkling brooks were dancing gaily in the sunlight, charming lakes fringed with verdure and flowers were flashing their beauty like diamonds on the bosom of the fair mother earth, stretching out to the distant horizons were vast prairies whose emerald green melted into the sapphire of the sky, and there were flowers, flowers everywhere. God loved them so He filled the world with them all the way from the sunny tropics to the vast tundras of the Arctic. He makes winter glorious. In the cold North, at evening time, there is the most gorgeous display of which we can have any conception, when the curtains of the Aurora Borealis, flashing as with the coloring of the most sparkling gems, burn and glow, vanish and come again, lighting up all the clear heavens with entrancing splendors as if great moving pictures from the very heavens were controlled by the unseen hands of angels.

When it comes to fruits, God might have given them the sombre color of the cobble-stones—but no. One of the finest pictures on earth, the orchard in autumn with its great luscious burdens strapped up in envelopes of red and gold. The cherry tree is made beautiful—a bouquet of white in early spring and later you see the mingling of the red with the green—one of nature's fairest pictures. The strawberry—God's climax—is more valuable because of its superlative beauty. Fruits are not ready for delivery until they have their wrappings done up in colorings no artist can reproduce.

How endless the varieties of the trees with their different forms and foliage. Sometimes there are those of golden and purple tints, contrasting so well with the green of others. Then in the autumn, forest and moun-

tain are vast foliage gardens—nature holding a carnival of color before entering the solemn lent of winter.

What a family of shrubs He has given us. One hundred and fifty kinds of lilacs, with the power to produce more till we may run them into the thousands. These stretch the time of blooming from early spring till the first of July. In the West, we have not the full assortment of shrubs for our trying climate which they have in the moister and milder climate of the East, and yet, we have the power and skill for producing more. Our own "Wizard of the North," Professor Hansen, has brought out of the unknown a cross of *Prunus Pissardi* and *Besseyi*, one of the most beautiful shrubs I ever saw, symmetrical in form, with foliage of deepest crimson purple. Back in the unknown land there are other forms of loveliness which we trust his skill will drag forth to light.

The charming family of the *Philadelphus* or *Syringas* is a numerous one, and new types are being constantly added; so with the *spireas* and there are the *viburnums* and other shrubs which are all the while being improved.

When we come to flowers, we are in a land filled with the very fascinations and astonishments of loveliness. The rose, the peony, the phlox, the canna, and the dahlia with hosts of perennials show the love of the beautiful on the part of the Creator. But this is not all; the native flowers are but the beginning of things. They are mostly single. He gives man the skill to make them double and to increase their beauty manifold. There is kindly Nature, daughter of God, her head white with the snows of the millenniums, and yet, on her tresses are the glintings of the sunlight of eternal youth with each recurrent spring time. She is ever old and ever young, and yet, into the inner temple of her Holy of Holies, she permits us to go where she opens before us new pages of mystery and permits us to work miracles with her. What stupendous changes have been made with the phlox, the peony, the dahlia, and carnation, so marked, so divergent from the parent source their own mother would not know them. Yes, back in that unknown are reserves of beauty human eye hath not yet seen, waiting to be revealed so that the things we have already seen are only prophetic of further revelation.

Such men as Burbank, Hansen, Patten, and many others are high priests of Nature, commissioned of God to carry out his plans as well as the Gospel minister, the statesman, and the patriot.

The world's unused capital of the useful and beautiful is something stupendous. Providence stands at the door and knocks. In His arms are not only spiritual gifts but also material blessings of amazing value. One hundred and fifty years ago, there were undiscovered continents of power—steam, oil, and electricity—all unused. The most potent sources of corporate wealth are from these recently acquired materials. God helps men and women to invade the undiscovered continents of beauty and uncover riches greater than those of Golconda.

When a carnation sells for \$30,000,

and that is but its beginning, when a *Festiva Maxima* grows to be worth \$100,000, when other floral gems reach such high value, then it pays to explore that unknown land. Why, just think of it! All around our horizons are vast armies waiting for you to open the gates and let them in, forests to clothe the waste places of the farm, to pump gold for you from the mud, evergreens for steep hillsides, trees of rare symmetry and loveliness for your lawns, shrubs with blooms of red, pink, and snow, flowers in great masses clothed in fairer robes than ever were worn in palaces of kings.

I need not tell you of the beauty and of the grandeur beyond where the furrows in the fields of azure are blazing with stars in the limitless flower gardens of God. The brightest gems of earth are only the alphabet with which we read the splendors of the garments of the suns.

We are living in the margin of all that splendor and this borderland which touches it should have some forecasting of the glory to be revealed, so take what is yours—the wealth of the forest, the tree, the shrub, and the flower and fruit.

Man's stinginess and narrowness are insults to the Divine bounty. Man builds a mansion, or simply a comfortable dwelling and fills it with costly furniture, but when he goes into "God's great out-of-doors" a wave of poverty strikes and almost paralyzes him. A ten-cent flower or a twenty-five cent tree is all he can afford. Think of putting a \$3,000 picture in a fifty-cent frame. The moment he moves into his house and occupies his furniture, both begin to depreciate and soon become second-hand goods, but let him fill that yard with the most delightful trees, shrubs and flowers which money can buy; let him plant in masses as God does and the moment they leave his hands, they begin to increase in value. We reiterate, "Beauty is wealth," so raise plenty of it and glorify the home.

Do some home missionary work for yourself in the evangel of beauty. You need it badly enough. Do something for your neighbors. You can not live down here long, at best, but leave a worthy trail behind you to let people know you passed this way.

A single farm, put to its best, would be a Mecca for pilgrims in search of the beautiful. A whole section of rich prairie would be like a section of paradise let down to earth. A whole township improved as it might be, would make earth so attractive that the best Christian would be willing to stay out of heaven awhile to enjoy it. Such surroundings would lengthen life and prolong a stay on earth. Home would be a delightful memory to children in after years. If a man wanted a vacation, he could go over to the next section and lose himself in the delights of an earthly elysium. Such improvements would lift a man out of the hog-and-hominy range into a higher life.

Cattle, horses, hogs, corn, and wheat are all right in themselves. They have given you competence so you can now fix up and you will find that there are other things fully as attractive and beautiful as the hog, and yet, what farmer gives that front yard as much attention as he does his pig-pen?

NATIONAL CHRYSANTHEMUM SOCIETY.

On the 4th and 5th December last the above society held its annual winter show in the Crystal Palace, Sydenham. The weather on the opening day was rather unfavorable, but in spite of that disadvantage there was a very effective and interesting display. A large gold medal was awarded to H. J. Jones for a fine group. A row of immense porcelain Japanese vases were arranged at intervals at the back, each filled with massive blooms of Japanese chrysanthemums, one color in each vase. Then there was a row of bamboo supports, containing a mingling of large show flowers of various kinds, the whole being mingled with choice little groups here and there of singles and decoratives. Bamboos, palms, foliage plants and a front edging of maiden hair ferns completed this artistic floral composition. Henry Cannell & Sons put up a fine exhibit, eighty feet in length, comprising a grand selection of their zonal pelargoniums and chrysanthemums, for which they received a gold medal. A grand display of begonias, Turnford Hall, Ensign, Myra and Nitida in great quantity occupied the middle of this important group. W. Wells & Co. staged a composite group of singles, decoratives and big show flowers.

The competition in the cut bloom classes was very well maintained, there being numerous entries in each class. The Incurved were remarkably fine and the Japanese were also in as good form as might be expected earlier in the season. The classes for chrysanthemums in vases, in baskets and in other floral designs were also of a high order of merit, and were numerous. Groups of chrysanthemums and other flowering plants arranged on the ground level were most daintily shown. Mr. W. Howe set up two first prize groups of this kind that were much admired for the great taste displayed in their arrangement, and in which he is an adept. John Laing & Son staged a group of palms, ferns and foliage plants, John Peed & Sons had a nice lot in the begonia class, consisting of some finely flowered pots of Gloire de Sceaux, and Mrs. L. de Rothschild. William Dane had an attractive lot of conifers, etc., comprising some choice specimens of abies, retinospora, cypresses, taxus, juniperus, euonymus, berberis, ligustrum etc., in variety. Fruit was shown by the Nova Scotia Government, principally apples. A gold medal was awarded for this exhibit. One lot consisted of apples packed in baskets, an-

A CHRYSANTHEMUM SHOW IN SCOTLAND.

We present herewith a view in what has been pronounced the record display of chrysanthemums at the Glasgow Corporation Camphill Gardens.

other lot were in boxes and a third lot and the most varied in extent was set up on plates.

A great feature of the show was the numerous exhibits of single-flowered chrysanthemums, miniature pompons, and thread-petalled varieties which are of great artistic value in floral work at this season of the year. Numberless instances of these were on view. A good competition in the class for 18 Japanese brought some grand blooms. The large incurved class was also remarkable for the large number of big, massive blooms, mostly dressed to perfection.

Market Chrysanthemum Show.

The annual show of market chrysanthemums under the auspices of the National Chrysanthemum Society, was held on December 11th in the Foreign Flower Market, Covent Garden, London. There was a good display, but the arrangement, as may be expected, was purely a commercial one, very little attempt at artistic display being made. Philip Ladds was first in Class 1 for a collection of market blooms in bunches to fill a table space 15 feet by 3 feet. His best blooms were Snowdrift, Yellow Victoria, Framfield Pink, W. H. Lincoln, Mme. Paolo Radaelli, Tuxedo, Golden Age, etc. Class 2 was for a similar collection to fill a table space 10 ft. by 3 ft. Butler Bros. were awarded first, with Mme. Rene Oberthur, W. H. Lincoln, Yellow Thompson, Nagoya, A. J. Balfour, Lord Brooke and many others. The second prize in

We are advised by the Parks Department that it is not only the finest display they have ever made but that it stands unequalled in Scotland. Forty-one varieties were represented.

the same class went to J. Tulley, who had Niveus, Red Canning, Mlle. T. Pankouckè, Mrs. Hermann Kloss, Papa Villiard, Mrs. Judson and others. Class 3 was for singles. We noted Single Victoria, Horton, King of Siam, Kitty, Robt. Morgan, Linton, Gen'l Bullough, Roupel Beauty. A fine display was made in Class 4. Twelve vases of market blooms, 12 blooms in each vase, disbudded. Philip Ladds was first, R. Weir second and J. & F. Chatfield third. The best blooms staged by these exhibitors were Buttercup, Snowdrift, Mme. P. Radaelli, Mme. Rene Oberthur, Framfield Pink, Guy Hamilton, Mrs. J. Thompson, Mlle. Lawrence Zede, F. Pilon, Golden Age. Class 5 was for a collection not disbudded. Good blooms were staged of Niveus, Nagoya, Winter Cheer, Heston White, etc. All the above classes were open to market growers and nurserymen.

In the second division, open to commission salesmen, not growers, there was also a class to fill a table space 15 ft. by 3 ft. The third division was open to all, and consisted of classes for three vases of yellow market varieties, three of bronze, three of white, three of pink, three of crimson, three of singles, three of plumed, three of spidery.

Provision was made for groups of pot grown market chrysanthemums. There were some good lots shown, but they were flat in their setting up and not at all attractive from an artistic point of view. There were six entries in the class for the best packed two boxes of market chrysanthemums, only one variety in a box. R. Weir was first, with Winter Cheer and Snowdrift.

With this show the chrysanthemum season for 1907 closes.

C. HARMAN PAYNE.

SOME PHASES OF POLLINATION.

Results with Sacked Blossoms.

The question of the potency of pollen as a factor in the fertilization of the blossoms of fruits is comparatively new. Some years ago the writer tested the pollen of various varieties of grapes that seemed to show that the viability of the pollen was the chief if not the only factor which determined whether a given variety was self-fertile or self-sterile. This naturally suggested the query as to whether the same conditions did not possibly exist among other of our cultivated fruits. In apples, in particular, as the most important of our fruits, an investigation was started with a view to determining the self-fertilizing capacity of the various varieties. This work has been continued now for about four years in a very desultory way, owing to interruptions caused by the intervention of other work, change of location, etc.

One of the first, and almost indispensable things in an investigation of this kind, is a complete and accurate list of the self-fertile and self-sterile sorts. Unfortunately, there are no such lists which are generally accepted. Many investigators question the accuracy of the results secured by sacking the blossoms of such fruits as apples and pears, basing their skepticism on the fact that many varieties which fail to set fruit in sacks do not fail to give satisfactory crops when planted under conditions where access of pollen from other varieties would be improbable, if not impossible. Several experimenters, to my knowledge, have sacked large numbers of blossoms for several years in succession with such contradictory results that they were never published. Generally the results of such experiments prove altogether too much. Varieties of apples which are recognized to be self-fertile will frequently set no fruit at all under sacks, and will almost invariably set much less than when exposed to the visiting insects; and this is true even when the trees are standing in solid blocks of one variety so that cross pollination of the outside blossoms is very improbable.

Confusing Results with Apples.

In some experiments carried on by Lowe and Parrott, and kindly loaned me by Mr. Parrott for this occasion, a small Ben Davis tree was completely covered with muslin. On this tree there were 315 blossoms but only five set fruit. Other trees of the same variety alongside set the usual crop. Yet Ben Davis is known to be a self-fertile variety. Such instances could be duplicated many times from the experience of every horticulturist who has investigated this subject to any extent. On the Geneva Station this year sacks were placed on the blossoms of 60 varieties, from ten to twenty sacks being placed on each tree. Tolman Sweet, which is sometimes classed as a self-sterile sort, set seven fruits in one sack. Oldenburg, which is known to be self-sterile, gave no fruits whatever, although the twigs surrounding the sacks were covered with the usual crop. The results of other varieties were equally confusing. Such experiments as this are not worth publishing; all that they indicate is

that sacking alone will not determine for the apple, as it does for the grape, whether the variety is self-fertile or self-sterile. The question naturally arises why is it that a variety normally self-sterile should fail to give fruit under sacks. It manifestly must be on account of some abnormal condition produced by the presence of the sack. A manila sack being close and impervious, will naturally shut out more or less of both light and air, but the same is not true of muslin sacks, yet they give the same contradictory results as the paper ones. In Lowe and Parrott's experiments, where they covered small trees or large branches with muslin, windows were made of wire screens for the admission of light and air. In no case did they find that there was any more fruit close to the windows than away from them, and there were no more fruits in the muslin sacks with windows than in those without. So it seems that it can hardly be a question of the lack of light and air. In putting a sack over a cluster or several clusters of blossoms it is very difficult not to have the sides of the sack so close to the blossoms that the natural movement of the sack in wind would cause it to press against certain of the stigmatic surfaces after the petals have expanded. It seemed a question as to whether this possible injury might prevent fertilization from taking place. Examination of a large number of sacked blossoms, however, fails to show that there was any greater probability of the fruit that set being in the center and more protected than in the outer portion of the sack. This year four fruits were found, each in different sacks, where the sack had been pulled down on the branch so far that the blossom was bent back upon itself so that the calyx end of the fruit pointed down upon the branch upon which it was borne. Yet fruit had set under these conditions. In numerous other cases fruit had set with the calyx pressing against the sides of the sack, showing that the contiguity of the sack apparently had no deterrent effect on the setting of fruit. There seems to be only one other abnormal condition produced by the sacks, and this is the prevention of insect visits. The use of the sacking method as a means of determining a fruit's capacity for self-fertilization is based on the supposition that it will prevent insects from bringing pollen of other varieties while the pollen of the blossoms enclosed will fall on their own stigmas. So far as I am aware, it has never been proved that this is actually the case. The stigma of the apple is receptive, even before the blossoms open. If blossoms are castrated the day before they normally open and pollinated at the same time, they will usually set fruit. How long the stigmas remain receptive I do not know, but I have never found as good results from the later pollinations as from the earlier ones; apparently showing that the receptive condition is not long continued. When the blossom opens the anthers usually have not burst, and no pollen is available from that blossom. They soon commence bursting from the outside in, that is, those at the periphery dehiscence first, and then those toward the center. Thus it

will be seen that the chance of the stigma being past the receptive condition before the closest stamens would have available pollen is very great, and that pollen from other and earlier blossoms would be necessary in order that fertilization should take place.

The Reason Possibly a Mechanical One.

A consideration of these facts makes it appear possible that the reason why apple blossoms seldom set fruit under sacks as readily as they do outside, is a mechanical one and due to the pollen not being on the legitimate surface at the proper time. I have been confirmed in this view by the finding in one orchard this year that in every case where fruit had set in the sacks, the apple aphid was present also. These sacks were wired to the twigs, and while it might be possible that an aphid could crawl through the opening, it does not seem possible that it could do so with pollen sticking to its body without the pollen being rubbed off. This coincidence was so marked that it was possible to tell whether there were apples in any particular sack by tearing off the bottom of the sack and looking for the cast skins of the aphid. If these were present, then the fruit could be confidently looked for. In one case there were seven fruits in one sack, the variety being Tolman Sweet, which as is mentioned above, is sometimes listed as being self-sterile. For these reasons, and others which the length of this paper will not permit me to elaborate, I am strongly of the opinion that we will never secure satisfactory results from sacking apples except where they be also hand pollinated with their own pollen. This manifestly is going to add very seriously to the labor of all such investigations.

Extending the Blooming Season.

One of the great difficulties in doing laboratory work with pollen is the comparatively limited time during which the varieties are in bloom and pollen is consequently available. This renders a proper verification of results impossible without extending the work over several years. Work which must be done in installments of two or three weeks at a time, with a year intervening between each period of work, is necessarily unsatisfactory. Even to the most enthusiastic there is such a thing as the flagging of interest in work so intermittent. For these reasons I have tried to determine the feasibility of extending the blooming season by forcing twigs of the fruits in question into bloom in the greenhouse during later winter and early spring. Trial showed that previous to January 1st twigs placed under greenhouse conditions were slow to start, and that some of the buds would not start at all. It is quite possible that by the use of ether this difficulty could have been overcome, but as it was considered that a period of from four to five months would be sufficient time for the purpose, no effort was made to extend the period beyond the date mentioned. Some fruits can be forced into bloom so that pollen can be

secured very easily, peaches and apricots being probably the easiest of the lot. With these two fruits nothing more is necessary than placing the twigs in water or wet sand in a house where the temperature will run from 60 to 80 degrees as a diurnal range. A room used for forcing roses is well adapted for this purpose. Plums and cherries are not quite as easily forced into bloom as peaches, but they would not be called difficult. I have found the best results from forcing these in flats of sand which should be kept damp but not too wet as an excess of moisture is apt to cause a rotting of the part in the sand and a consequent withering of the part above. Apples and pears are the most difficult of the fruits to force inside, and yet with a little practise these can readily be brought into bloom with only a small per cent of failures. Good healthy twigs should be selected with from two to five fruit spurs thereon. These twigs should not be longer than fourteen inches, as twigs of greater length are more apt to wither if the temperature runs high, owing to greater evaporating surface. As soon as they are put in the flat they should be wet and then put under the bench in a cool room, one that is kept at about fifty for a night temperature being well suited for this purpose. They should be moved into the sun gradually and after about ten days or two weeks they should be moved to a warm room. Ventilation should be given at once if the sun raises the temperature above eighty degrees. Frequently the part of the twig below the sand will start to decay. In such a case the twig should be pulled out, the decayed portion cut off and the twig reinserted in a flat of clean sand. By putting in fresh boxes of twigs every few days it is possible to have pollen each day for as long a period as is desired. Pollen from twigs forced in this manner gives approximately the same results under test in the laboratory as that secured from the field. It will vary considerably from either source so that an exact comparison is impossible.

Laboratory Methods.

I have used wholly for hanging drop cultures the glass cells, finding them more convenient to inspect than either the rubber or zylonite. For sticking the cell to the slide and cover slip, the common laboratory mixture of equal parts of beeswax and vaseline is very satisfactory and could hardly be improved upon. Great care must be taken that the sealing is tight, otherwise the drop will dry up and the culture be ruined. For fear of some such accident it is better to make the culture in duplicate. While it is desirable that the laboratory be kept at as even a temperature as possible, variations of five or ten degrees will not usually be apparent in the growth of the pollen, except that a low degree will retard the growth somewhat. In case the pollen is being taken from the orchard at the normal blooming season it will be found advisable to take twigs on which the blossoms have not yet bloomed and place them in water inside until anthers dehisce. This will give not only a more plentiful supply

of pollen, but also an assurance that no contaminations of the pollen have been caused by insects or wind, bringing pollen from other varieties.

Media.

I am not at all sure that the best media for any kind of pollen has been discovered. I have used only the standard media, mixtures of sugar, gelatine and water; determining the proper strength for each kind of pollen by trial. Substitution of dextrose for sugar gave no apparent benefit and was consequently abandoned. And the use of glycerine either as a substitute for gelatine or in addition to it gave similar negative results. Media of quite different strengths seem to be demanded by different fruits. Plum pollen generally gave best results with about fifteen per cent. sugar and one and one-half per cent. gelatine. Cherry with ten per cent. sugar and five per cent. gelatine. Pear and apple twenty per cent. sugar and five per cent. gelatine. Where the per cent. of sugar is too high, the grains of pollen do not germinate in such numbers, and the growths are short, although they seem strong and symmetrical. Where the sugar solution is too weak, and particularly where the gelatine is not sufficiently strong, the tubes are numerous and long but they are apt to be grainy and irregular in size at different points in their lengths. Bacteria and various ferments sometimes bother by getting into the media, unless great care is taken to keep everything as sterile as possible by corking the bottles in which the media is kept while it is still hot and by washing slides, cover slips and cells with alcohol or some other quick-drying antiseptic agent. Media should always be neutralized by the use of a few drops of some alkaline mixture as the pollen does not germinate readily in acid media. The media should also be thoroughly shaken in the bottle as soon as prepared, a thorough aeration seeming to add to its efficiency. It would simplify greatly the question of media preparation if it were possible to analyze chemically some of the stigmatic secretions. The few chemists to whom I have mentioned the matter held but little hope of its being possible. There are two difficulties in the way, first, the probable delicate chemical nature of the compound which might change in a few hours; second, the practical impossibility of securing enough of the fluid for a proper analysis. At one time when the stigmatic fluid was standing in drops on the pistils of grapes I tried to gather some of it in a watch glass for use in the laboratory, but it would evaporate practically as fast as it was gathered so that at the end of three hours all there was to show was a smeared and sticky watch glass. Even taking it for granted, however, that conditions might be devised under which pollen would make a better growth than under those which our imperfect knowledge of the subject enables us to give, this would not demonstrate the lack of value of such tests as at present conducted. If all of our standard varieties of any kind of fruit were tested under any kind of conditions that were uniform for all the varieties in question so that the

comparative strength of all the pollen would be determined, then field tests of any one of these varieties for self-fertilizing power would give a line on all the others. For instance, even if it were found that varieties in which less than twenty-five per cent. of the pollen germinated in the laboratory were uncertain bearers when planted by themselves outside, that would be tangible and definite data capable of being utilized in orchard practice, and this without reference to whether the percentage of germinations as given inside were the same as would be given under natural conditions on the stigmatic surfaces or not.

Pollen Tests.

In the case of apples, with which I have worked more than with any other fruit, there are a few varieties in which the pollen is nearly all good ranging from ninety to one hundred per cent. germinable. Others give germinable values from this downward, sometimes only one or two per cent. of good pollen. I have not found a single variety but that two or three tests would show some germinations. In this respect there is evidently quite a difference between apples and grapes. With the grapes there were a large number of varieties in which all the pollen was good, and an equally large number in which none of the pollen was good, and a smaller number in which the good and bad was mixed. With the apple there are very few with all pollen good, none so far found with all pollen bad, and the great mass showing different proportions of mixed forms. Pollen of the same variety from different trees, and even some time from the same tree, will give varying results. The whole procedure is one of approximations rather than precise determination. There are certain varieties which seem to have a constitutional weakness in the matter of pollen production. Under unfavorable conditions they furnish pollen with a low germinating capacity. Where the conditions are more favorable they give a better pollen; but whether favorable conditions for pollen are the same as favorable conditions for tree growth, I have not sufficient evidence to say. Three varieties in which the pollen appears to be notably weak are the Gravenstein, Tompkins King, and Esopus Spitzenburg. The Gravenstein being a comparatively late introduction from Europe is not so well known, but for the last two varieties I believe it is generally recognized that they are raised successfully only in certain neighborhoods—that is under favorable conditions for pollen production. Five varieties in which the pollen was particularly strong are Jonathan, Wagener, Ralls, Wealthy, and Missouri Pippin. All five of these are good and regular bearers. In the case of four of them they have the recognized weakness of overbearing on mature trees, and the fruit being consequently undersize. All are widely distributed, well-known varieties in the sections where they mature. The selection of favorable conditions for the setting of fruit is evidently not necessary where good pollen is borne in the abundance that it is in the case of these varieties.

Not enough varieties have been tested, nor in many cases have the

tests been thorough enough, so that a list of varieties can be given with the percentage of viability of the pollen indicated. Each year's work seems to make the problem more complex and the range of investigation wider. As pollen seems to vary in different sections, it appears desirable that it be tested in various places, and the results compared. It is with a hope of arousing interest in this phase of pollination that this paper is presented.

W. O. Booth

CATALOGUES RECEIVED.

J. Lambert & Son, Trier, Germany.—General catalogue of flower and vegetable seeds, plants, roots, etc.

Samuel Murray, Kansas City, Mo.—List of Christmas plants for 1907, including Murray's unrivalled Lorraine begonias and Chinese primroses, the latter grown from Farquhar's seed.

Charles H. Totty, Madison, N. J.—1908 catalogue of chrysanthemums, carnations, roses and other specialties. As might be expected the list of chrysanthemums in this catalogue, while limited to the cream of the different types is very complete from the standpoint of the grower either for exhibition purposes or for sale. Every chrysanthemum grower will want a copy.

Alex. Dickson & Sons, Ltd., Newtownards, Ireland.—Rose catalogue for 1907 and 1908. Colored plates of Avoca crimson, Harry Kirk yellow, Elizabeth Barnes salmon rose, Souvenir de Stella Gray orange, Dorothy Page Roberts coppery pink, all pedigree seedling roses for 1907, are inserted and add to the attractiveness of this very comprehensive list which describes in full some eight hundred varieties of roses in the various classes.

PUBLICATIONS RECEIVED.

Missouri Botanical Garden, Eighteenth Report, 1907.—The annual reports of Director Trelease and the officers of the board which make the first two chapters in this volume furnish ample evidence of the good practical work this great St. Louis institution is carrying on. The scientific papers which follow include The literature of Furcraea with a synopsis of the known species, by J. Drummond; Branch Cankers of Rhododendron, by Herman von Schrenk; On first injuries to sycamore buds, by the same author; The germination of Hydrastis canadensis, by Henri Hus; An abnormal Odontoglossum Cervantesii, by the same; Virescence of Oxalis stricta by the same; Effect of light upon the germination of spores and the gametophyte of ferns, by H. C. Life; Plantae Lindheimerianae, Part III, by J. W. Blankinship; Additions to the genus Yucca, by William Trelease; Agave macroacantha and allied Encaves, by the same. A portrait of F. Lindheimer forms the frontispiece of the volume and there is a large number of interesting and beautiful plates. A complete index to Plantae Lindheimeriana is given.

CHARLES G. PATTEN OF CHARLES CITY, IOWA.

President-elect of Iowa Plant Breeders' Society.

The history of the apple runs parallel with the history of man, but never in its long story has it had such an intelligent, persistent, devoted friend as the subject of this sketch.

Peter Gideon, the pioneer pomologist of the Northwest, who gave the best of his life to moving the apple belt three hundred miles to the north, went at the matter in a sort of a blind, dogged way like a hound on the track that would not give up till he died. What if his elbows were out of his coat and his toes out of his boots, he keeps at it till he blazes a path through every difficulty and gives the world the Wealthy which has been such a signal success.

Forty years ago, Mr. Patten began his work along scientific lines. He did not rush, but laid siege and by slow approach has won success never before accorded to man.

The Situation.

Eastern and southern fruits would not grow in the North. It is well-known however that the higher altitude in the mountains the apple can have, and the further north it can be grown, the better it is. Orchard after orchard went down before 40 below zero and so a new and hardy race must be created. Even the Wealthy was not entirely hardy, especially on a common stock. So the Iron Clad apple must be built up, hardy from the tiniest rootlet to the topmost bud. Again there must be a greater variety of fruit and longer keepers. The Rhode Island Greening was a good apple but it was not hardy. Top grafting on a crab cross increased its power of endurance. He crossed this with the Duchess and that gave Patten's Greening, giving the fine flavor of one and the hardness of the other. It has had a marvelous record. It has or will, add millions to the wealth of fruit growers. Hardy as an oak, with good quality and an enormous bearer, it is a great favorite.

Now the work fairly opens and broadens. The best two apples in the West are the Jonathan and Grimes Golden. The question is, how to transmit their lusciousness to a progeny hardy enough to endure the severe winters. We can not stop to tell of the long, tedious process but he showed us a cross of Grimes' Golden and Patten's Greening which seems to fill the bill. He also exhibited the Jonathan which had been born again into the Iron Clad family. At the Minnesota meeting of the Horticultural Society, this winter, he showed fifty-five varieties of his hardy hybrids, all of them worthy of propagation, in flavor varying from the sourness of the Duchess to the most luscious sweets. Color in apples is an important item and he has succeeded admirably in transmitting the richest tints to his new creations.

It was highly important to have a suitable stock for foundation. For, time and again, orchards of hardy varieties were wiped out because they had tender roots. He tried the Pyrus baccata, the little Siberian crab. This worked well for a year or two but was not thrifty enough to sustain the tree and some began to blow over. Then he found the best types of the crab crosses, like Whitney's No. 20 and the Transcendent, with seedlings of the Duchess and Hibernial and others of that character were just right.

Mr. Patten is now seventy-five years young and his health is better than it has been for the last ten years. He says, "I must live twenty-five years longer to see my work through, then," he says, "I have reached a point where I can't go on and I can't let go." Can we estimate the work of hands and brain of such a man, reaching through forty years of the most painstaking research, evolving from his own genius, results worth millions? He is not a pauper but he can not give mind, soul, and body forever, without help. In some way the State or Government or some big-souled or big-pursed man should help. The giving should not be all on one side.

He might have done like some others we know of, take some new thing, herald it with great flourish of trumpets, with bright pictures, and plenty of printer's ink and big prices attached. He is too conscientious. "It takes time," he says. "A tree must be tested in various locations. We must get acquainted with it before we send it out and know that it will fill the bill, not only at home but elsewhere."

See how the work widens. Here are those fifty-five new and partially tried varieties. Thousands of new sorts on the way and barrels of well-bred apples the seeds of which should be sown and the results noted. And thus the work grows on. The grand old man who for untiring zeal, intelligent, and persistent efforts on behalf of the King of Fruits, doubtless stands without a peer in all the earth and all the ages.

C. S. HARRISON.

York, Nebr.

The Long Island Agronomist is authority for the statement that the record shipment for one day from one community, via the "Cauliflower Express," was 7,000 barrels each containing from ten to twenty-five heads of the succulent vegetable, according to the method of cutting and sorting.

GEOMETRIC BEAUTIFICATION.

Generally speaking, the current popular movement for the beautification of cities cannot be commended too highly, but it is doubtful if the passion for a geometric arrangement of squares, avenues, walks, trees and flower beds will prevail very long. To many persons such efforts seem crude and in-artistic. The attempt to improve upon nature displayed in the setting out of many small trees in straight or crooked lines, and the general artificial appearance which characterizes much of the landscape work that we see seen in much the same spirit as that displayed by the South Sea island belle who tries to improve her beauty by tattooing her face with artistic designs, putting a ring in her nose, blackening her teeth and so forth. Of course it is nothing short of heresy to suggest this, when eminent landscape architects take an opposite view.

The national capital has been having a rather lively controversy upon this very point. The plan of a commission composed of three distinguished architects to wipe out the Mall, with its shade trees and lawn, and replace it with a square resembling closely the open spaces in Paris, and in which concrete roads and walks, long rows of dwarf trees and other features would unite to produce strong geometrical effects, is meeting with considerable criticism, despite the high standing of the experts who recommend it. When the scheme has been worked out, if it ever is, the critics may be silenced by its impressiveness, but at present it seems that there is some reason to feel that the coolness of the green lawns and overhanging trees is more inviting and pleasing, during much of the year at least, than hot cement pavements. It is a rather curious feature that the ideas which the architects are borrowing from Paris seem to have been copied originally from L'Enfant's elaborate plans for beautifying Washington, which never were carried out. That such ideas are best adapted for Washington today is open to some question, and it is still more doubtful if a similar style of beautification should be adopted in other cities of the country.

It is desirable, if the beautification of American cities is to be successful, that all will not be governed by the same set of ideas, which dictate certain circumscribed methods that will make every city resemble all the rest, and seem like an imitation of work done in the Old World. The century or more which has elapsed since these ideals had their rise has witnessed the birth of a new respect for nature such as must influence all branches of art profoundly, as it has already influenced religion, medicine and various other lines of activity. It is likely that future experts in the work of landscape beautification will insist less on the distortion of nature and will be more willing to let nature co-operate with them in carrying out their plans.—Springfield Union.

The stock and fixtures of the store at 42d street and Broadway, New York, formerly occupied by C. R. Scallen, were disposed of at sheriff's sale on December 16; \$247 was realized.

NEWS NOTES.

T. F. Matthews, florist, Boston, has filed a petition in bankruptcy; liabilities, \$1145; assets, \$26.

Fire in the greenhouse of E. A. McGehee, Roanoke, Va., was extinguished with but slight damage.

Under the name of the Buffalo Cut Flower Co., J. N. Bailey has started in business at 468 Washington St., Buffalo, N. Y.

Justus Geist of Melrose, Mass., was a sufferer by fire which started in the block in which his flower store is located, on December 20.

The Southern Seed Co., Louisville, Ky., lost \$8,000 through fire in their building by which their seed supply was injured by water. They are fully insured.

The Philadelphia Ledger states that Charles H. Nimson, an ironmaster of Allentown, Pa., who died on December 19, was the "discoverer" of the galax leaf a North Carolina product which netted that state more than its iron last year.

Obituary

Thomas Burns.

Thos. W. Burns, 33 years old, son of Samuel Burns, vice-president of the Weathered Co., died Sunday, December 15th, at his home, 156th street, New York City, of typhoid fever. He served his apprenticeship with the Weathered Company and acted as assistant to his father for a number of years. He then connected himself with the Lord & Burnham Co., acting in the capacity of assistant heating engineer, working with them for about four years. In December, 1905, he took a position with the Richardson & Boynton Co. as boiler salesman, where he remained until the time of his death. He was a man of sterling character, devoted to his family, thoroughly practical in his business and made many friends amongst the gardeners and florists throughout the country. He had always enjoyed good health until

THOMAS W. BURNS

stricken with his fatal sickness; therefore his death was a shock to his many friends. He leaves a widow and two children to mourn his loss.

William Harris.

William Harris, a florist, of Buffalo, N. Y., 50 years of age, unmarried, died suddenly on December 11.

John Bloompot.

John Bloompot, florist, of Pekin, Ill., born in Rysum, Germany, July 10, 1835, died at his home on December 12.

James Dell.

James Dell, who has been connected with the flower business in Pittsburg, Pa., for about 20 years, died recently in that city.

William N. Oakes.

William N. Oakes, for the past 30 years engaged in the florist business in Westfield, Mass., died on December 19, at the age of 78.

William M. Blackman.

William M. Blackman, a well-known florist of Trenton, N. J., was stricken with apoplexy and passed away on

HENRY M. ROBINSON & CO., FLORISTS' SUPPLIES 15 Province St., and 9 Chapman Pl., BOSTON

December 15. He was 62 years of age. A widow, four daughters and two sons survive him.

Eugene V. R. Thayer.

Eugene V. R. Thayer owner of "Fair Lawn," a beautiful estate at Lancaster, Mass., and an enthusiastic patron of horticulture, died at Boston on Dec. 21. E. O. Orpet, the well-known orchid expert is gardener at Fair Lawn.

George Vair.

George Vair, superintendent of the Normal School grounds at Toronto, Ont., died suddenly, of paralysis, on December 10, aged 75 years. Mr. Vair was a descendant of a long line of gardeners, the family having removed to Scotland from France in the service of the royal Stuarts. He was an eminent horticulturist, a man of liberal education, broad minded, devoted to his profession. As a young man he was an enthusiastic seeker after rare plants and his collection forty years ago was not surpassed in this country. At the Centennial Exposition in Philadelphia, his peaches were awarded first honors for size and flavor, measuring over eleven inches in circumference. He had served his town as selectman and was at one time president of the local Horticultural Society and was loved and revered by all.

We learn of the death, a few days since, of the mother of W. H. Ernest, treasurer of the Florists' Club of Washington and ex-captain of the club's bowling team.

The funeral of W. W. Edgar, whose death was recorded in our issue of last week was held at All Saints church in Belmont, Mass., on Saturday, December 21. The edifice was filled to the doors with sorrowing friends among whom was a very large representation of the Boston floricultural interests. The honorary pall bearers were F. R. Mathison, M. H. Norton, T. A. Cox, Wm. J. Stewart, P. Welch, Alex Montgomery, Thos. Roland and Joseph Fuller. The number and richness of the floral tributes exceeded anything seen here for years.

FLOWER MARKET REPORTS

BOSTON CHRISTMAS REPORT

Boston florists had a good Christmas, every-thing satisfactory and all the more pleasing because few dared to expect so much. The weather was very favorable on Tuesday and Wednesday for the flower and plant trade, and this circumstance helped not a little in the final results. As usual the wholesale markets were heaped up with flowers on Tuesday morning, at sight of which the local buyers were disposed to hold aloof and there was a slump, but prices rallied by noon time and the remaining stock was satisfactorily disposed of. The wholesale dealers who do a shipping trade had no surplus at any time, and the only difficulty they experienced was in the handling of the first clearings of the storage cellars, which were shipped in to them on Monday morning. There was nothing salable left unsold in the wind-up. The demand for Beauties was noticeably weak and they fell far short of last year's good record, but Richmond and Bridesmaid roses sold well. Violets were strong factors all through, the warm weather permitting their use for outdoor wear. Poinsettias had to be pushed and were unloaded with difficulty. Lily of the valley did as well as was expected. Too much of this flower is being grown for this market. Carnations were in good demand, especially the bright colors. There were some early yellow trumpet daffodils in, but they found little favor. January 1st is early enough for these flowers. There is little to be said about the plant trade except that it was larger than last year and prices were well maintained. Nothing in the way of novelty was noted. Azaleas, poinsettias, cyclamens, primroses and berried plants were the chief stock.

Trade the week preceding Christmas was rather quiet as far as demand for flowers was concerned, but not unexpected, as such conditions usually prevail at that time. Boxwood, holly and festooning are selling well, and houses that make a specialty in that line have their hands full. Stock in the plant line everywhere is now at its best and ought to be enticing to flower buyers. Fancy poinsettias, both cut and plants, are in evidence with all the leading growers and are meeting with good demand.

NEW YORK CHRISTMAS REPORT

No one expected that the Xmas. business would measure up to previous years. It did not, either in volume or price, but the demand was sufficient— even if it was fitful—to use up nearly everything except white material, of which latter the usual proportion was left over. Prices ruled 25 to 50 per cent lower than last year. The rose crop was light. Apparently there were more long stem Beauties than any other variety, though it is a question if as many were in the market as a year ago. The short grades were of poor quality. The supply of teas was small and quality not over good, excepting some Killarney and Richmonds. Carnations were plentiful, too much so to maintain anything like a fixed price, and of course the bright colors had the preference. It seemed that there was a larger proportion of white this year, and though some brought good figures, many were sold for less than could have been realized a couple of days before. The call for scarlet was not as keen as last Christmas and the supply was heavier. A good many were "over ripe," too. A sign of the times was the number of cattleyas to be seen in the windows of several wholesale houses, and the comparatively low prices averaged, and all were not sold either. The choicest grade of gardenias cleared out well. Plenty of short stem flowers could be had cheap, but it seems they were not all sold. Lily of the valley could be had in quantity until closing time Christmas Day. A large quantity was disposed of at figures little above last week. If it were not that some of the violet men saved a few the picking would have been light, as the crop is off. None of these were left unsold— perhaps the low price helped to sell them. Poinsettias, mignonette, paper whites, Roman hyacinths and asparagus were too plentiful and not wanted particularly. Lilies were moved easily.

PHILADELPHIA CHRISTMAS REPORT

There seems to have been a strong tendency among buyers to indulge in made-up baskets of flowering and foliage plants, jardinières, etc., in preference to cut flowers either loose or in bunches. Still the trade in cut flowers

was good but, in comparison with former years, the fancy basket forged ahead. A rooted plant even if it is neglected as to water will usually stand longer than the cut product, and the pleasure to the recipient is correspondingly augmented. This idea has been working its way slowly but surely for many years. A handsome plant in full flower is a great seller, a nice bunch of roses is lovely and goes good, but a basket with trimmings and containing the combined loveliness of both, and at a price which seems moderate to the buyer, carries the day with the majority. This, in brief, is the experience of 1907. We are not growers, neither are we retailers, consequently our mirror is bound to be unbiased either way. When we say it was a good Christmas we mean it; when we say there was enough good stock left over to start another Christmas, we pretty near mean that too. Early in the game a courageous attempt was made to jack up prices in the cut flower market—the dollar mark for roses and the twelve for carnations, but the situation was too unmanageable and a retreat had to be sounded. The shorts in American Beauties were in better demand proportionately than the fancies although the flowers were poor. All other roses were very satisfactory stock and while prices were not extra there was a good clean up. The carnation men were very bold at first but were the first to back-down. A few very fancy Beacon reached sixteen and Enchantress scored twelve and a half once or twice but six to eight for very good stock was about the size of the market. Reds were the favorites of course, with Enchantress a close second. Large single violets sold well but doubles and small singles were a drag. Lily of the valley

FLOWER MARKET REPORTS.

(Continued from page 861)

was another unfortunate. Mignonette for a minor subject was really up to a higher point in importance than we can remember. The gardenia and the cattleya set off with a bit of Farleyense were favorite subjects among the higher aristocracy and a great trade was done in these. Behind the scenes, however, we find the crops larger than the market could absorb, especially in cattelyas. But the cattleya is a good keeper and so there is no break as to prices. Cyripediums, cattelyas, and other orchids were never finer. Asparagus was far too abundant, the growers of these items being hard to hold back from the holiday excitement which is not for them particularly. A bright particular spot in the market was held by case holly and boxwood—also lycopodium and laurel wreathing. All that class of stock sold very well, barring possibly mistletoe. Poinsettia was a leader in the plant market, made up dwarf with ferns, but the market for cut poinsettias was mismanaged and at the wind-up swamped! Lorraine begonia and the cyclamens were great favorites. Ardisias and ericas came mostly from Julius Roehrs. The local growers seem to neglect these leading subjects. Those who wanted a cheap berried plant had to be satisfied with a solanum. Oranges were poorly fruited and not nicely colored this year and of course the trade in these was limited. Boston and Whittman ferns went well. Dracaena terminalis was a strong favorite. Tree holly, Box, dwarf firs, and such stock were conspicuous everywhere. The demand for these while only moderate was satisfactory. All told, while this year has not shown such a rip-roaring halcyon and vociferous balance sheet as the 1906 holiday, it was much better than the pessimists expected. We are pleased to report smiling faces in Philadelphia this Christmas morning and hope our brothers elsewhere have had the same good fortune.

"A guid New Year to one and a'
And money may you see."

G. C. W.

The Christmas season was ushered in with the usual bustle and business-like air. Every store is in holiday attire, being bright with poinsettias, holly and evergreen of every variety. Everything has been selling readily especially smaller plants, though the prices are by no means up to the standard of former years. Almost continued rainy weather for the past two weeks has thrown persons back in their buying and the consequence is, that every available clerk is rushed. An epidemic of colds and grip has lessened the force in nearly every store in the city. Everywhere the sidewalks are loaded with Christmas trees and small ornamental trees for decorating. It has been stated on authority that never before has there been such a demand for green of all kinds, from the small wreath to the largest tree. Full report on the cut flower trade will be made next week.

The holiday rush has begun. Prices are up pretty well. Wholesalers and retailers report busi-

HELP WANTED

MUNICIPAL CIVIL SERVICE COMMISSION,
299 Broadway.

AMENDED NOTICE.

New York, November 29, 1907.
PUBLIC NOTICE IS HEREBY GIVEN that the time for receiving applications for the position of GARDENER has been extended until 4 P. M., MONDAY, DECEMBER 30, 1907. The examination will be held on WEDNESDAY, JANUARY 22, 1908, at 10 A. M. The subjects and weights are Special, 6; Experience, 4. The provisions of clause 12 of Rule VII, to the effect that "no person who has entered any examination for appointment to a competitive position and failed therein or who has withdrawn therefrom, shall be admitted within nine months from the date of such examination to a new examination for the same position," is waived so far as it applies to this examination.

For further information apply to the Secretary.

F. A. SPENCER, Secretary.

WANTED—Two first-class commercial greenhouse assistants experienced in growing a general line of high class plants. Wages \$15 per week and room. Apply with references. Address Plants, care Horticulture.

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

SITUATIONS WANTED

SITUATION WANTED as working foreman on first-class place by sober, ambitious, young man with long experience on good wholesale and retail places. Good grower of roses, carnations, mums and general all-round stock. Familiar with greenhouse building, pipe fitting, both steam and hot water, capable of handling a large place. Steady position and good treatment expected. Not afraid of work. Married. References. State wages in first letter. If satisfactory would rent or buy place later. Address X. Y. Z., General Delivery, Bridgeport, Conn.

SITUATION WANTED by a reliable gardener, good grower of flowers, fruit and vegetables under glass and outside, fully experienced in all branches of work on a well kept private place; single, age 29. Address R., care HORTICULTURE.

FOR SALE

Suburban Florist Store FOR SALE CHEAP

Fine location for local trade; two years established. Fitted with ice chest, counters, etc., for immediate occupancy. A good chance for industrious party.

Address C. Care Horticulture, Boston.

FOR SALE—2000 feet second-hand 4-inch cast iron pipe with fittings. In perfect condition. Apply to T., care Horticulture Pub. Co.

ness prosperous. The market is well supplied with everything, but it seems as if there was going to be a shortage in home grown carnations before the holidays are over.

In ordering goods please add, "I saw it in HORTICULTURE."

Is Your Name In The Above
List? If Not, Why Not?

THE MASSACHUSETTS EXPERIMENT STATION.

Paper Read by Wm. P. Brooks, Director, at Massachusetts Conference of Rural Progress.

The agricultural experiment station as a regularly organized and recognized institution in Massachusetts dates from the year 1882. The present year, therefore, marks the completion of twenty-five years of work and it seems especially fitting that in connection with this convention which has the consideration of means of rural betterment for its prime object we should both review its past and consider its present and future.

Though the experiment station in this state as an organized entity took its origin but twenty-five years ago, any survey of the past which should fail to recognize the fact that in a very real sense the experiment station in Amherst is as old as the college would not only be glaringly incomplete, but would as well be a grave injustice to the able, devoted and noble men, living and dead, who under peculiar difficulties yet labored zealously for the advancement of the bounds of knowledge of the laws which underlie farm practice.

No one who knows him will be surprised to learn that in this work our dear old Dr. Goessmann took a most prominent part. To mention even all the subjects which engaged his attention and upon which he wrote and talked instructively would occupy a very large share of my allotted time.

Importance of Dr. Goessmann's Work.

In these days when the manufacture of sugar from the beet has become an established and rapidly growing industry in many parts of the United States, it is often forgotten to whose pioneer labors we have been so largely indebted. From his very earliest connection with the College we find Dr. Goessmann experimenting with the sugar beet and studying the question as to the possibility of a profitable beet sugar industry in this country. From 1870 to 1880 he was especially active in this direction and his published reports and papers were numerous. While the results of his investigations led Dr. Goessmann to strongly advocate the beet sugar industry in certain sections of the country and under the proper conditions, his discussions of the subject were always characterized by careful and temperate statements; and numerous early failures would have been avoided had the managers of the new undertakings more fully accepted Dr. Goessmann's conclusions.

Of more general importance to the country at large was Dr. Goessmann's work in relation to fertilizers. He determined the manurial value of a large number of refuse substances and by-products, and pointed out better methods of conserving and using not only these but home-made manures and recognized fertilizers as well. To him also belongs the honor of having suggested and taken the most important part in the passage of the first law providing for fertilizer control passed in the United States. It is not extravagant to say that this law brought order out of chaos and that with its subsequent amendments it has been worth untold sums to the farmers in

the protection against fraud which it has afforded, while so wisely was it shaped and administered that it has almost equally served the interests of the honest manufacturers and dealers. Upon the Massachusetts fertilizer laws have been modeled the laws in very many of the states, so that in this particular direction, Dr. Goessmann's influence has been felt all over the country.

Among other important investigations conducted by Dr. Goessmann prior to the organization of the experiment station, should be mentioned: his studies as to the effects of special fertilization upon the composition of fruits; his determination of the effects of girdling upon the quality of grapes; his recognition of the possible relation of fertilizers to certain plant diseases; his work in connection with the reclamation of the Green River Salt Marsh, in Marshfield; his determination of some of the chemical changes taking place in ensilage and his chemical examination of sorghum and its products. He was associated with Stockbridge in the investigations which led up to the theory of special fertilization which bears the name of the latter and in the study of the results of fertilizer application by means of the lysimeter.

Prof. Stockbridge's Experimental Work.

It is peculiarly appropriate at this time to recall to memory the fact that Prof. Stockbridge not only contributed lavishly of time, ability and physical energy for the uplift of agriculture, but that he gave substantial financial aid as well. In 1878, he gave to the College for experiments in agriculture the sum of \$1000. Next to Goessmann, Prof. Stockbridge undoubtedly took the most prominent part in the early experimental work at the College. His influence upon the agriculture of the state was great both because of unusual natural and acquired abilities and because he was from and of the closest and most sympathetic touch.

Prof. Stockbridge's experimental work which led up to the perfection of his system of special complete fertilizers for all our important crops is no doubt his best known accomplishment. The idea underlying this system was, I believe, taken from Ville, but the elaboration and perfection of the system were based upon Prof. Stockbridge's own experimental work. Prof. Stockbridge, too, as long ago as 1880, called attention to the usefulness of frequent shallow culture as a means of conserving soil moisture and was thus probably the very earliest to preach the "dust mulch" gospel. His experiments demonstrating the benefits of the "dust mulch," the sources of soil moisture, and the origin of dew were characterized by much originality and were carried out only by great sacrifices of personal ease.

President Clark's Influence.

William S. Clark, the first active president of the College, deserves also to be mentioned in the survey of the past. Although his work was less directly in touch with the farm than that of Goessmann and Stockbridge, it was nevertheless important and his influence upon others was perhaps of even

greater importance. President Clark was a man of tremendous enthusiasm and energy and withal he had the spirit of the investigator—the university spirit. To come in contact with him was an inspiration. No one can estimate the value of his influence in promoting throughout the institution among faculty as well as students the spirit of inquiry. President Clark's individual work during the early seventies showed marked originality and the presentation of the results of his investigations into some of the phenomena of plant life at a meeting of the State Board of Agriculture held in Barre elicited the warmest encomiums from Louis Agassiz, who was present, and the statement that had the Massachusetts Agricultural College done nothing throughout the period of its existence but produce that one paper that alone would be richly worth every dollar expended for the institution.

President Clark's experiments on the causes of the circulation of sap in plants, in which he was assisted in the device of the apparatus by Prof. Peabody and in which he enlisted the co-operation of a number of students, contributed important facts to the knowledge of that subject. He took a prominent part also in the sorghum experiments of the College which settled the question as to whether Massachusetts should look to that plant for its sugar.

Massachusetts Early in Recognizing the Needs of Agriculture.

The history of the experiment station as a regularly organized institution begins in 1882 when the Legislature framed an act establishing the Massachusetts Agricultural Experiment Station. Dr. Goessmann was made the first director. This office, by the way, he continued to fill throughout the entire period of the separate existence of this station. In thus establishing an agricultural experiment station in 1882, Massachusetts recognized the needs of agriculture some six years before Congress passed the Hatch Act providing for the establishing of such stations in each state and territory; but we had been preceded in such action by Connecticut, New Jersey, North Carolina and New York.

The Massachusetts Agricultural Experiment Station had no organic connection with the Massachusetts Agricultural College. The act establishing it provided for its independent management and support. The amounts appropriated were at first moderate, but its usefulness was soon demonstrated and the sums placed at its disposal were fairly adequate.

Very naturally the station was located in Amherst, where so much experimental work had already been done; and the needed land and buildings for a beginning were secured by a lease from the College for a nominal consideration. The independent existence of the Massachusetts or State Experiment Station as it came to be called to distinguish it from the station later established under act of Congress continued until 1895. The men most prominent in its work were Goessmann, Miles, Maynard, Humphrey and Lindsey.

(To be Continued.)

WILSON'S PLANT OIL

If you want to make money there is only one way. That is to have clean stock and the only way to get it is by using WILSON'S PLANT OIL.

New York Botanical Garden, Bronx Park, New York City, September 5, 1906.
Mr. Andrew Wilson—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
Yours very truly,
GEO. A. SKENE.

Florham Farms, Madison, N. J., December 8, 1906.
Mr. Andrew Wilson:—Dear Sir—Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
Yours truly,
A. HERRINGTON.

PRICES: 1-2 pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; five gallons, \$9.00. Cash with order.

APPLE CROP REPORT FROM N. Y. STATE.

It has been some years since the farmers of western New York have had their apple crop so well cleaned up at this time of the year as they have this fall. This is owing to two reasons: the splendid weather conditions that have prevailed, and the fact that paring and cider apples have brought such good prices that the farmers have picked them up and sold them as fast as they could. While the crop has been light, there has been more clear profit realized to the growers than in a number of years past. One grower said recently that there is more money in 300 barrels of apples at \$3 a barrel than in 1200 barrels at \$1 a barrel; and this because of the cost of barrels and for picking and drawing them away.

When it came to the actual picking, the crop did not turn out as well as had been expected, and consequently the buyers who purchased orchards "by the lump" paid about all they were worth. As a usual thing the crop turns out to be greater than estimated, but the reverse was true this year. The apples sorted away more than was anticipated, but a factor that helped to offset was the unprecedented high prices paid during most of the season for parers and ciders. Paring apples brought as high as 80c. per 100 lbs.; cider apples brought 50c. Such prices were never known here before. Ciders are now bringing only 25c. per 100 lbs., however, as the buyers were getting so many more than they expected.

Most buyers have their storehouses well filled; and they expect to make a satisfactory profit, as outside of New York state the apple crop is very short. The market has weakened somewhat in the last three or four weeks on account of the stringency in the money market; \$3.00 per bbl. is the usual price for the general run of apples; exceptionally fine qualities, \$4 per bbl. The best apples this fall were the Northern Spies. The Baldwins and Greengings were under size, but the former variety was well colored. The comparatively small size is attributed to the late spring and the long continued drouth.

H. R. PEACHEY.

Irondequoit, N. Y.

The above article has been in type for three weeks but has been crowded out until now.

INCORPORATED.

D. Smith & Co., New York, whole-

"SCALECIDE"

SAVE YOUR TREES THIS FALL **DON'T WAIT TILL SPRING**

The chances are they'll be killed by San Jose Scale. Take time by the forelock—spray with **SCALECIDE**. It kills every insect it touches. Cheaper than Lime-Sulphur or any home-made mixture, and easier to apply. Non-corrosive, non-clogging, 92 percent oil, the largest amount with less water than is found in any spray yet discovered. We prove it. Order a 50-gallon barrel at \$25. Makes 800 or 1000 gallons costing 25c to 30c at any station in the U. S. east of Mississippi and north of Ohio Rivers. There's nothing cheaper. Send now for free, special booklet.

Here is How One Man Lost Money

We put up his greenhouse for him, but he felt that our figure for the heating was too high. He has just been in our office, telling us how he has just lost over \$1,000 on the system that was installed, simply because of dead ends, and in several cases, absolute lack of circulation.

This heating business as we do it, is backed up by our years and years of greenhouse experience and when we do a heating job for you, you can depend upon its perfect working. If it doesn't work perfectly we see that it does.

This spring when you are getting figures on your heating, just bear this man's experience in mind — he is only one of many others who have been served exactly the same way. Get in touch with us about that new spring house of yours.

HITCHINGS AND CO.

GREENHOUSE DESIGNERS AND BUILDERS.
Manufacturers of Heating and Ventilating Apparatus.

FOR THE STUDENT OF PLANT LIFE

experimenting with the wonderful possibilities of plant development, whether from its esthetic side or as a practical advantage to mankind—our Sectional Iron Frame Greenhouses are particularly adapted.

They are constructed to meet the trying demand for perfecting plant growth. We equip these houses with every conceivable necessity for the successful carrying out of experiments — they are built so thoroughly that repair costs are reduced to a minimum, while the expense of heating has been greatly reduced. As a practical plant laboratory for the advance of science or for the gratifying of a mere hobby, we meet conditions equally well. We have just received from the printer our book, "Greenhouses as we Build Them." This book is too expensive to distribute generally, but if you are seriously interested in the greenhouse question, we will gladly send you a copy. Lord & Burnham Company, Greenhouse Designers and Manufacturers, New York Office, 1133 Broadway, Corner 26th Street. Branches: Boston, 819 Tremont Building. Philadelphia: 1215 Filbert Street.

We make every part of a greenhouse but the glass. We sell any part.

Here it is — end on — and that is the way to get the full beauty and value of that curved eave. No, we are wrong there, for the most convincing way is to go inside a gutter-eave house and then in a U-Bar House, with its clean sweep of glass from ridge to sill. The comparison is instructive. It's just the sunniest, best growing proposition in greenhouse construction, and we stand ready to show you we mean exactly what we say. Write, or let us send catalog. **Pierson U-Bar Company**, Designers and Builders *U-Bar Greenhouses*, Metropolitan Building, 4th Avenue and 23rd Street, New York.
